Father Hennessey is a man caught in the middle. He wrote to his sister that "The guerrillas are not the answer." Most recently he told her that he feels compassion for the men serving in the Guatemalan Army. Remember that it is quite easy to forget that soldiers are human too. On August 11, however, after a month-long spree, reminiscent of the horrors of Auschwitz, one of those soldiers showed his appall over events within his country by trying to commit suicide in San Mateo. He was not successful, so he was severely punished.

I believe it important for us to now turn our attentions to events within Guatemala, to tell President Montt that we cannot tolerate genocide, to ask that he provide us with a response to these damning allegates and to insure that Father Hennessey will not suffer reprisals for now speaking out. Finally, I would like to humbly urge the Foreign Affairs Committee to review Father Hennessey's allegations and other reports of increased violations of basic human rights in Guatemala so that we may better review the wisdom of our decision to forward $10 million in economic support moneys to the Montt regime. Perhaps we may not be able to put an end to the current madness and terror that grips this nation, but certainly we do not have to condone it.

PRIEST SERVING IN GUATEMALA CHARGES ATROCITIES BY ARMY: DUBUQUE NUN GETS A LETTER ABOUT KILLING

(By Kenneth Pins)

DUBUQUE, IOWA.—A Maryknoll priest and native Iowan serving in Guatemala recently released accounts of government slayings of Mayan Indians that appear to contradict the State Department version of human rights conditions in that country.

"Please use this and anything else I sent to try to get others to help stop this madness," wrote the Rev. Ron Hennessey.

The Aug. 16 letter was smuggled out of Guatemala and sent to Hennessey's sister, a Dubuque nun.

Hennessey, a native of Ryan, Ia., serves Mayans in underdeveloped Huehuetenango province in western Guatemala. He's been almost helplessly recording the destruction of his parishioners for the last few months. And he claims most of the killing has been at the hands of the Guatemalan army, which is under the control of President Efrain Rios Montt, a born-again Christian who is supported by the U.S. government.

Entire villages of innocent people have been destroyed by Rios Montt's army under the pretense of removing "subversives" who aid and abet anti-government guerrillas, Hennessey wrote.

"I see no end to this type of thing," he wrote in the letter received here Tuesday by Sister Dorothy Marie Hennessey.

Like El Salvador and Honduras, Guatemala has been enduring a persistent bloodletting between army forces and guerrillas opposing the regime. But since Rios Montt came to power in March, says U.S. Representative Tom Harkin all the Indians have been labeled subversives, and the government policy "borders on genocide."

"The guerrillas are not the answer," Hennessey wrote. They, too, have killed innocent people who refused to provide them with food, "but nothing like all the people of a village."

A team of State Department officials spent two days in Guatemala in August investigating human rights at the invitation of the Guatemalan government.

"Basically, my impression is that there has been a great change in the attitude," Undersecretary of State Melvin Levitsky said Friday. "Guatemala City is no longer a city of fear."

But in the countryside, where Levitsky said insurgents often ambush army patrols, "The picture is a mixed one and confused."

"It's a struggle for the loyalty of these [Indian] people," Levitsky said, "and many of them are caught in the middle."

Levitsky conceded that the State Department relies heavily on information from the Guatemalan government, and he said he and others involved in the August visit never got out to Huehuetenango province where much of the fighting is going on. But, Levitsky said, "the government claims it does not use indiscriminate violence."

He added: "We've been encouraged by what this new government has been doing." As a result, the United States has increased aid to Guatemala under the Caribbean Basin Initiative.

Hennessey, a missionary in Guatemala for 18 years, sees it differently.

In a letter sent out of Guatemala in late July he wrote: "On the spot I cannot tell if Rios Montt is truly a mystic elevated beyond the cruel reality . . . or if he is really a genocidist in the guise of a Christian prophet.

"Let me give you a few of the happenings of just this month in just this parish, and let you decide for yourselves." Hennessey listed 20 incidents in his parish alone during July that he knows of personally, or has been told about.

July 2—The military came to San Mateo, where Hennessey is pastor, and read a list of 40 names of people who they said would become part of the new civil defense. Ten of those people presented themselves, and were led out of the village where their hands were tied behind their backs and their throats were slashed. Their bodies were found tossed off a cliff.

July 9—Soldiers hanged Diego Mario Mateo head downward from a light pole in the town square, applied their boots to his face, shot him and let him hang there for 24 hours before throwing him into the river. Two other people, supposedly runners for the guerrillas, were taken away to entertain people of other towns in the same way.

July 12-13—In the village of Sebep, soldiers divided the people into three groups and forced one group to kill another, and they forced a third group to kill the second. Thirty-seven people were killed in all.

July 14—The local military commander sent word for all of the people of the village of Petenac to assemble at 11 a.m. All the men were then bound and escorted to a house, where they were shot and stabbed. Their bodies were piled on top of each other and the house was set on fire.

The women of the village, some with babies on their backs, were killed and burned the same way. The children, however, were tied one to another and led into a house where they were burned alive.

July 18—Soldiers told all of the people of the village of San Francisco to assemble in the church to pray, and then set all the village buildings on fire. Sixty families died in the flames.

"There's no way you can confirm any of this," Levitsky said. "One sees burned-out villages when one flies over the country, but who burned them?"

Levitsky argued that it's possible that guerrillas posing as army members committed some of the atrocities, but Sister Dorothy Marie doesn't believe that.

"Roe's right there, he ought to know," she said.

Despite Guatemalan government claims to the contrary, Hennessey said, the army arbitrarily kills villagers thought to have dealings with the guerrillas, Guerrillas often, at gunpoint, force villages to feed them, and Hennessey said the army has made giving food to guerrillas a capital offense. Missionaries who interfere to protect people caught in the middle are often themselves threatened or killed Hennessey, 52, has been threatened for his intervention, which has included offering medical aid and pleading for the release of prisoners.

His sister fears of his safety but said she followed through with his request to release the letters in hopes the killing will be abated.

According to Harkin, "every credible source" has claimed that the rural killing has increased under Rios Montt. "The government has a policy of liquidating Indians," he said, "and Rios Montt has given that his tacit approval."

Hennessey has turned down three opportunities to leave Guatemala, and he was theatened with expulsion for intervening to save three lives in July.●

SOVIET VIGIL

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 16, 1982

● Mr. MOAKLEY. Mr. Speaker, I rise today to join with my distinguished colleague from New York, Mr. LENT, in remembering the plight of those citizens in the Soviet Union seeking immigration to Israel. I would like to take this opportunity to thank Mr. LENT for organizing and leading this year's vigil and for his many efforts on behalf of those Soviet Jews who are not allowed to immigrate to Israel.

I would now like to address the issue of the fate of a Mrs. Galda Nuhimovna Levina, a woman who has continually applied for an exit visa for the last 12 years, only to be refused after each subsequent request. The pain and disappointment this woman has experienced must be indescribable. Unfortunately though, her situation is not at all unique. Over the decades, many people have applied for visas only to be repeatedly refused, becoming virtual prisoners in a country which will not grant them their humble request.

In the specific case of Mrs. Levina, she is a 67-year-old widow who is suffering from cancer, and her prognosis for the future is dim. She survives on a minimal pension provided for her by the government, who also prescribed for her a communal apartment which she shares with two women who are strangers to her. Mrs. Levina's only son was granted an exit visa in 1978, and although he did not wish to leave his mother, he did so at her insistence. Since that time, he has married and is now living in my district in Massachusetts.

At this point in her life, it would seem normal for Mrs. Levina to be enjoying the fruits of her many years of labor in a missile factory, but due to her alleged knowledge of state secrets learned during her employment, she has lived in a state of limbo, waiting for her freedom to be granted, away from her only child and suffering from a debilitating disease. It is my belief that this is a horrendous way for any elderly person to be spending the final years of his or her life.

We in these United States are extremely fortunate to have the religious and personal freedoms that our forefathers made such an integral and crucial part of our Constitution. We are one of the few nation's on this Earth whose citizens are guaranteed the right of self-determination, which I fear we all too often take for granted. Refuseniks of the Soviet Union, such as Galda Levina, do not know what this rare ability is like, but they do know that it is something for which they will fight with every ounce of strength they possess.

This dream of freedom which is held by all the Soviet Jewry is that which has led them this far in their quest for emigration rights to Israel. We are keeping this vigil in the United States in remembrance of their courage and fortitude against a government that holds them captive, though they have committed no grievous act. It is my fervent hope for the future that these people we are supporting and praising today will soon know that security we have as free citizens. And perhaps one day soon, all those who have so valiantly sought freedom and have finally attained it may be seen standing on the shores of a new land, with dreams of a new future before them.●

SENATE—*Friday, September 17, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

God of Abraham, Ishmael, Isaac, and Israel, as Jewish people through America and the world anticipate the High Holy Days which celebrate their new year, we pray for the peace of Jerusalem and the Middle East. Grant to the leadership of those peoples the will to peace. Give them transcendent wisdom in their decisions and actions. Help our President, Secretary of State and others involved in the situation to fulfill our Nation's role in establishing peace.

May the prophecy of Micah soon come to pass:

And they shall beat their swords into plowshares, and their spears into pruninghooks: nation shall not lift up a sword against nation, neither shall they learn war any more.—Micah 4: 3.

On this 195th birthday of the Constitution of the United States, we thank Thee for this remarkable political document on which our Nation is based. We thank Thee for the radical concept "We the people of the United States in order to form a more perfect union." We thank Thee for the strength and flexibility of the Constitution which still works 200 years after its framing.

Thank Thee, O God. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order and the special order for Senator CHILES, that there be a period for the transaction of routine morning business not to extend beyond 10:30 a.m. today in which Senators may make speeches for not to exceed 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, today the Senate will continue consideration of the amendments to House Joint Resolution 520, the debt ceiling bill.

Under a previous order, following the special order for the Senator from Florida (Mr. CHILES) and a period for routine morning business, the Senator from Montana (Mr. BAUCUS) will be recognized to continue debate on his amendment.

There has been no order preventing rollcall votes, so Senators are reminded that there is still a possibility of votes.

On yesterday, however, the majority leader did indicate to the Senate that we would recess today by approximately 2 p.m.

Mr. President, after the session today the Senate will have but 9 working days left until the beginning of the new fiscal year. Thus far, out of the 13 annual appropriation bills necessary to keep the Government operating, the Senate has received only two appropriation bills from the other body, the military construction bill which passed the House on August 19, and the HUD appropriation bill which passed the House last Wednesday.

We face the problem of having to function the majority of the Government, including defense, under a continuing resolution. In my opinion, the country cannot afford to operate under a formula that is sewn together in just a few days, the complications of which are difficult to understand in such a short time.

In my role as chairman of the Defense Appropriations Subcommittee I have been attempting this past week to mark up the Defense appropriation bill for fiscal year 1983.

Some people accuse our committee of trying to spend too much; other people accuse our committee of not spending enough. As a practical matter, the reason why I bring this to the attention of the Senate at this time, is to ask the Senate to do everything it can to avoid having the Defense appropriation bill become a part of a continuing resolution that lasts for just a few months. It will literally cost the taxpayers of this country hundreds of millions of dollars each month if we operate on a month-to-month basis in the largest procurement department of the Federal Government. It is not possible to properly plan and execute the procurement programs and the defense strategy of the United States on a month-to-month basis.

Last year almost on a daily basis my good friend from West Virginia, the distinguished minority leader, asked the Republican leadership when the Senate planned to act on the appropriation bills for fiscal year 1982. The difficulty now is, and my friend has nothing to ask really, because we have only two bills here in the Senate now from the other body for fiscal year 1983. The Appropriations Committee marked up three Senate bills yesterday and we will move as rapidly as possible on those bills.

I am not trying to belabor the point, Mr. President, except to say that there is great frustration brewing in the Senate, and I think it is over the appropriation and budget processes. Members of the Senate still have a chance to make this system work in the next 2 weeks, and one of the ways to make it work is to insist that the defense appropriation bill ought to be a full annual bill in order to save the taxpayers of this country the money that can be saved by acute congressional oversight of the very extensive program of the Department of Defense in this period of modernization.

Mr. President, much remains to be done in the next 2 weeks. I hope the Senate will assist those of us who are trying to do it right.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. STEVENS. I am happy to yield.

Mr. CHILES. I notice the distinguished minority leader is not here today, and he did trigger the remarks that he made last year.

I was a little confused with the Senator's statement. I certainly agree with the Senator that we should have an annual defense bill, and we ought to take that bill up. I am a little bit confused as to why we do not have that bill. On the one hand, we do not have a bill over from the House but, on the other hand, the distinguished Senator from Alaska has been saying we cannot mark up the bill we have now because he cannot get the administration to give us any figures as to where the cuts should go.

So what is the problem? Is the problem with the House or with the administration or is it with both places?

Mr. STEVENS. I say to my friend the problem of not having a bill rests with the other body, but the problem of not having an agreement as to the levels of defense to be achieved under the budget process rests with OMB and the Budget Committee.

That has been resolved and we will start marking up the defense appropriation bill on Tuesday.

There was a legitimate dispute. It arose, Mr. President, out of the fact that the Department of Defense was the only Department that was asked to absorb a portion of the pay increase that will come about because of the 4-percent cost-of-living adjustment before the request had been received from the President to increase pay in a supplemental appropriation request. Under the budget procedure, the Defense Department was asked to absorb $1.2 billion before the request had been received. We have now worked that out so they will absorb that cost, as all other departments will, when the supplemental is received next year. We will proceed to mark up the defense bill on that basis. That was a legitimate issue between the Office of Management and Budget and the Budget Committee. The Defense Subcommittee had the unfortunate situation of being in the middle, and so did the Department of Defense.

The Department of Defense was instructed by OMB and the Appropriations Subcommittee, the Defense Appropriations Subcommittee, was instructed by the Budget Committee in the Senate, and we had to get those two bodies that were issuing instructions together so that the rest of us could do our work.

I am happy to report to the Senator from Florida and to the Senate that that matter has been resolved. We are still going to have disputes, though, over the defense bill. I do not think anyone will misunderstand that, but we will not be involved in this basic dispute as to the $1.2 billion.

Mr. CHILES. I thank my friend.

Mr. STEVENS. I meant no disparaging remark with respect to my good friend, the Senator from West Virginia. I meant it is not possible for him to ask these questions this year concerning action on appropriation bills, because we do not have the bills on which to act. We do hope that in the course of considering the continuing resolution the Senate will insist that the defense portion of that bill be for a full year and have the details, in fact, of a full defense bill. That is my goal. I hope it is the goal of the Senate.

I thank the Senator from Florida and the Senate.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. ABDNOR). The acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, in the absence of Senator BYRD, I will take only a minute and then yield back the floor and reserve the remainder of his time for his later use if he wishes to use it.

MICHAEL GOLDBERG: A LIFE SCARRED BY GENOCIDE

Mr. PROXMIRE. Mr. President, today I bring to the attention of the Senate the spiritual wounds genocide inflicted upon a young child, Michael Goldberg. Goldberg's book, "Namesake," which recounts his lifelong odyssey toward peace of mind, was reviewed in the New York Times on September 5, 1982.

According to the review, Michael Goldberg was born in France in the late 1930's, the worst possible time to be a Jew in Europe. His father was deported during the war and died in a gas chamber at Auschwitz. His mother remarried, and to save her son from the Nazis, gave him his stepfather's non-Jewish surname. She did not tell Michael that he was of Jewish origin. Hence Michael Goldberg became Michael Cojot, a change that saved his life, but scarred his soul.

Why did Michael's name change damage his soul? His ignorance of his ethnic heritage allowed him to fall prey to the Nazi culture and propaganda of occupied France. He became anti-Semitic, and developed other Nazi traits, such as sadism, destructive ambition, and contempt for others.

The later discovery that he was Jewish aroused a strong sense of self-hatred in Goldberg, which he carried with him for years. His personality was a paradox that only genocide could produce: he was a Jewish Nazi.

When Goldberg was an adult, he lived and worked in a bank in La Paz, Bolivia. He discovered that the Nazi war criminal who caused his father's death at Auschwitz was also living in Bolivia. To avenge his father's death, Goldberg decided to murder the man.

Goldberg posed as a reporter to gain the man's confidence. After an interview, he had the man at bay and was on the verge of pulling the trigger when he had a sudden revelation:

Something tells me that to kill is not the right solution.

In fact, Goldberg did kill a Nazi, but it was not the one he meant to kill. By choosing not to murder another man, he killed the Nazi in himself. He finally triumphed over the evil that had grown within him, but the battle was never easy.

Mr. President, nobody should have to endure that kind of mental agony. Nobody. But Michael Goldberg is just one of millions of people in our time who has lived—or died—under the spectre of genocide.

What we must do to help prevent what happened to Michael Goldberg from happening to others, Mr. President, is make genocide a crime under international law. I therefore call upon the Senate to ratify the Genocide Convention.

CLINCH RIVER

Mr. PROXMIRE. Mr. President, Wednesday, Senator BUMPERS and Representative COUGHLIN sponsored a forum on the Clinch River breeder reactor. The speakers included some of the most knowledgeable scientists and economists to study this program.

Their evidence against the program was overwhelming—huge cost overruns, obsolete technology, ample substitute fuels at dramatically lower costs, and increased danger of nuclear proliferation.

But that is not the worst part. According to Dr. Theodore Taylor, former Deputy Director of the Defense Atomic Support Agency, if just one breeder reactor were bombed, emissions of strontium-90 and cesium-137 would equal the radiation produced by the explosion of all the nuclear bombs in the world. That is right, all the nuclear bombs.

Is this risk worth taking? No way. According to Congressman OTTINGER the true cost of the project is about $10 billion, and this expense is to demonstrate a technology which, according to the Department of Energy's own figures, will not be competitive until at least 2040.

There is not one good reason to fund this project now when we have had to severely cut back on so many worthwhile programs.

Even the Department of Energy's own Energy Research Advisory Board has a low opinion of the Clinch River plant. They rated Clinch among the worst of the Department of Energy's current energy supply programs.

I urge my colleagues to stop funding this project now.

EXCUSES, EXCUSES FOR LACK OF ARMS CONTROL

Mr. PROXMIRE. Mr. President, three critically important treaties—representing years of arms control negotiations and the best product of our military experts—lie languishing in the Senate. I refer to the Threshold Test Ban Treaty of 1974, the Peaceful Nuclear Explosions Treaty of 1976, and the 1979 SALT II Treaty.

At a time when the world is desperate for progress in the arms control arena, three major advances rest peacefully unattended in the Senate. For this state of affairs, there are a

number of excuses. The Carter administration, for one, did not push for the Peaceful Nuclear Explosions Treaty out of fear that it would upset preparations for a Comprehensive Test Ban Treaty. SALT II died initially due to aggressive Soviet actions and it has been ruled out by the present administration.

The Senate, as an institution, has a responsibility to take some action on these treaties instead of letting them remain here with no prospect of attention.

The alternatives facing the Senate have been cogently spelled out in an excellent article on this subject by Carl Marcy—the longtime chief of staff of the Senate Foreign Relations Committee who now is codirector of the American Committee on East-West Accord.

Mr. Marcy notes that the Senate could:

First. Consent to ratification of the treaties and send them to the President, who would then have the option of ratification.

Second. Consent to the treaties with suitable reservations and understandings.

Third. Return the treaties to the President after having failed in a two-thirds vote.

Fourth. Or allow them to remain in legislative limbo—an unacceptable alternative.

Mr. President, I think Mr. Marcy is exactly right in his assessment. The Senate should hold to its obligation under the Constitution and take action on these treaties—be they modified, accepted or rejected. That is our duty.

Mr. President, I ask unanimous consent that the Carl Marcy article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 15, 1982]

ADVICE? CONSENT? WHAT?

(By Carl Marcy)

WASHINGTON.—Whatever happened to the Senate? The Constitution endows it with the power to give its advice and consent to treaties. Yet it has given neither to three of the most important treaties ever negotiated and that are now physically and legally pending before it.

Senators have not accepted the opportunity to discharge their obligation to stand up and be counted on the Threshold Test Ban Treaty of 1974, the Peaceful Nuclear Explosions Treaty of 1976 and the 1979 treaty limiting strategic arms. Why?

As the November election approaches, how come the electorate does not know, by the evidence of recorded votes, how the senators stand on a treaty limiting underground nuclear tests to 150-kiloton explosions, on a treaty regulating the use of nuclear explosives for peaceful purposes, and, most important of all, on SALT II—the only treaty signed by the President of the United States and the Chairman of the Presidium of the Soviet Union that would limit the number of nuclear weapons on each side?

The reason the Senate has not acted on all three was well put recently by Fred Ikle, Under Secretary of Defense for Policy and formerly Director of the Arms Control and Disarmament Agency. Referring to the threshold and the peaceful nuclear explosion treaties, he said, in an interview in The Washington Post: "The Senate Foreign Relations Committee was about to vote out favorably the recommendation for ratification when the Carter Administration pulled the package back because they felt it would divert from the effort to get a Comprehensive Test Ban Treaty." As for SALT II, negotiated by Presidents Gerald R. Ford and Jimmy Carter. Mr. Ikle said: "The treaty was pulled back from ratification by the Carter Administration."

Use of the phrase "pulled back" does not mean the treaties were returned to the President: it means rather that Mr. Carter decided to leave the treaties pending before the Senate in the expectations that the Senate would do nothing if he so asked. He was right. The Senate did nothing. As for President Reagan he didn't need to ask the Senate to do anything. His statement that SALT II was "totally flawed" was enough to deter that body from any action.

There you have it. The Senate, at the request of the President, has utterly failed to exercise its constitutional prerogative to give or withhold, its advice or consent on three treaties dealing with the most devastating weapon ever devised.

Consider the alternatives.

1. The Senate, by a two-thirds vote, could have consented to ratification of the three pacts. Even if it did, the President would not have been required to exchange documents of ratification with the other party—the formality that would bring these treaties into effect. (There have been past instances when the Senate has approved treaties and Presidents have failed to ratify them.) But at least it would be the President who would have to accept the onus for failure to bring the treaties into effect.

2. The Senate, by a two-thirds vote, could have sent the treaties to the President with its consent to ratification contingent on such reservations and understanding as the Senate might have adopted by a majority vote. This procedure would have given the President the benefit of the Senate's advice on how the treaties might have been changed to obtain the necessary consent to ratification. The Senate would have done its duty: The President would have been advised.

3. The Senate, by less than a two-thirds vote, could have failed to consent to ratification, and the rejected treaties would have been returned to the President. The Senate would have spoken, and the public would now know how each senator voted. This is generally accepted as a significant exercise of the democratic process.

4. The last and most undesirable alternative is what the Senate has in fact done. By leaving these three treaties pending, in limbo, on its calendar, it has abandoned its role in the treaty process. The President can now decide, without Senate action, to honor these treaties—as he is doing with much ambiguous language—or can decide to reject them, as he has threatened.

There are, incidentally, some dozen other treaties upon which the Senate has not acted, including the Genocide Convention, pending for 33 years. In some instances, there may be justification for letting sleeping dogs lie. But treaties involving the control of nuclear weapons should not fall into that category.

Perhaps the time has come for the Senate to amend its rules to require that all treaties submitted by the President be voted on within a certain time. The American people would then know where the Senate stands.

RECOGNITION OF SENATOR CHILES

The PRESIDING OFFICER. Under the previous order, the Senator from Florida is recognized for not to exceed 15 minutes.

REFORM OUR CRIMINAL JUSTICE SYSTEM

Mr. CHILES. Mr. President, I rise again today to speak out on the the need for the Senate to act promptly to pass legislation to fight crime, and to reform our criminal justice system. I have been speaking out here on the Senate floor now for almost 4 months, along with Senator NUNN, on the urgent need for the Senate to take action to solve one of the most pressing problems this Nation faces. Senator NUNN and I introduced a package of crime fighting proposals, S. 2543, and were able to have the bill placed onto the Senate Calendar. Soon afterward, Senator THURMOND and Senator BIDEN, the chairman and the ranking member of the Senate Judiciary Committee, introduced another crime package, S. 2572, which Senator NUNN and I cosponsored. That bill was also placed on the Senate Calendar, and, like S. 2543, it could be called up for consideration by the Senate at any time. What is disturbing is that the Senate has not acted, despite 3 months of opportunity, and now has as few as 12 days in which to act. I believe that we still have enough time to pass anticrime proposals before this session comes to an end, but only if we act promptly.

One of the most important things we do by acting to pass anticrime legislation is to send a message to people all across the country that the Senate, and the Federal Government, is concerned about crime and is committed to the fight against crime. We set an example for State legislatures, and for local governments by passing laws which they in turn can pass on the State and local level. By our inaction, we send out the wrong kind of signals. Yet today, even with our failure to act, we can see State governments that are moving on their own to pass new laws aimed at fighting crime.

Earlier this week, Florida Gov. Bob Graham, Attorney General Jim Smith and other law enforcement officials kicked off a campaign to get the people of Florida to support two anticrime amendments to the Florida State constitution. The two amendments will come before the voters in November's election.

The first of the two amendments would modify the Florida constitution so as to limit the reach of the exclusionary rule. After the Supreme Court first made the exclusionary rule applicable to the States back in 1961, Florida amended its constitution to include the language of the exclusionary rule within the body of the Florida constitution. Over the last 10 years, the U.S. Supreme Court, in a series of decisions, has cut back on the reach of the exclusionary rule. In many instances, the State of Florida was unable to follow the lead of the Supreme Court because the provision in the Florida constitution prevented a more narrow reading of the exclusionary rule. The proposal now before the voters of Florida would specify that the exclusionary rule, as it applies to cases in Florida, shall be interpreted consistently with the more restrictive recent Supreme Court decisions. Mr. President, that would help assure that the operation of the exclusionary rule is brought more into line with its purpose, which is to deter willful police violations of the search and seizure rules. Today, the exclusionary rule is often applied in a mechanical way, so that technical violations of the search and seizure rules are used to exclude crucial evidence at trial. As a result, prosecutors do not bring cases because they know that the exclusionary rule will be used to prevent crucial evidence from being used at trial. Earlier this week, Ed Austin, Florida's State attorney for Jacksonville reported that Jacksonville prosecutors have had to drop 79 felony cases this year because of technical search and seizure violations. It is no wonder that the American public has such little confidence in the ability of the courts to convict and sentence criminals.

The second proposed amendment that will be presented to the people of Florida modifies the bail provisions of the State constitution to allow a person who has been arrested to be held without bail pending trial if the court determines that the person's release would pose a danger to the community. Floridians are all too familiar with today's revolving door bail system, in which a person who is arrested gets out on bail practically before the police are able to fill out his arrest forms. Under current laws, the judge is unable to consider how dangerous it would be to let the person who has been arrested out on bail. He simply applies a rather mechanical rule, which asks whether or not the person is likely to show up for later proceedings. If we allow the judge to consider whether or not release on bail poses a danger to the community, we will give the court system more flexibility to protect society against dangerous criminals who have been arrested.

Mr. President, there are counterparts here in the Senate to both of the ballot questions that will be before the voters of Florida this year. Earlier this week, the President submitted a bill to the Congress that would make changes in the exclusionary rule to prevent the rule from being used to exclude evidence, where the police violation of the search and seizure rules was technical and the police acted in good faith. The President's proposal, which is now pending on the Senate Calendar, is similar to a bill proposed by Senator DECONCINI and cosponsored by myself. Bail reform provisions similar to those before the voters of Florida are contained in both the anticrime packages, S. 2543 and S. 2572, now pending on the Senate Calendar. We in the Senate have the opportunity in the remaining days to pass the kinds of changes on the Federal level that the State of Florida is considering adopting. If we act before we adjourn, we will send a message to people from Florida, and to people from around the country, that the Senate is in tune with the concerns and desires of the public to do something to reform our courts and to stop the crime which is plaguing this country. Both S. 2543 and S. 2572 can be taken off the calendar and passed at any time. Both bills would reform our bail laws, and would make other important changes to help in the fight against crime. The people of Florida are doing their part to make their communities safe once again. It would be tragic if the Senate did not try to do its part on the Federal level to fight crime, especially since we have this unique opportunity to take positive action. I urge my colleagues not to let this opportunity slip away. The fight against crime is too important.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will be a period for the transaction of routine morning business.

The Senator from Alabama is recognized.

SESQUICENTENNIAL OF RANDOLPH COUNTY, ALA.

Mr. HEFLIN. Mr. President, as the senior Senator from the State of Alabama, I am quite pleased and proud to congratulate the citizens of Randolph County, Ala., on the approaching occasion of the 150th anniversary of their being a part of Alabama.

In the 1830's, people poured west across the border between Alabama and Georgia to settle the fertile, mineral-rich territory which would become Randolph County.

Randolph County was created by the State legislature on December 18, 1832, and was formed from the last Creek Indian cession. It bears the name of John Randolph of Virginia, a prominent Member of Congress around the beginning of the 19th century.

The first county seat was created at Hedgeman Triplett's Ferry, on the west bank of Big Tallapoosa River. Two years later, it was moved about 10 miles west, to Wedowee, located in the central part of the county. This was named for an Indian chief whose village stood near the present site of the town.

Through the years, Randolph County has had a full and rich history—from the days of the Indians through the settling by early pioneers and the battles of the Civil War and on into the present day.

Walking through local pine forests, one finds remnants of Creek Indian towns, including a stonehenge-like circular structure of stone, some 2 or 3 feet high, with entrances on the east and west. These remains were found just a few miles from Wedowee. Some years ago, a row of stone piles or pillars, extending over a distance of more than 1 mile, at intervals of 100 yards, were found at the same site. No one knows why they were placed there.

Randolph County is blessed with outstanding natural resources—rich mineral beds, fertile farmland, pure and plentiful water. In fact, the name of the county seat, Wedowee, means "rolling water," and the name is certainly justifiable. There is scarcely a square 40-acre tract of land in all of Randolph County that is not penetrated by a stream, creek, or river.

All of this contributes to its reputation of being a healthy environment. In fact, during the national census of 1880, the census official assigned to Randolph County turned his report in to his Washington headquarters, only to have it returned to him for correction. The officials at the headquarters had declared the death rate as too small to be true. The original report, however, was returned to Washington unchanged, as there had been no mistake in figures.

Mr. President, Randolph County does have a grand history, outstanding natural resources, and a pleasant climate. I believe, however, that the most important attribute the county has is its people. I must admit that I may be somewhat biased in saying that—for I do have some close ances-

tral ties to Randolph County. Two of my great grandfathers were early settlers of this county—Wyatt Heflin and Harrington Phillips. I have many relatives today residing there including those that bear the names of Phillips, Gay, Blake, Stell, Poole, McMurray, Daniels, and Heflin. Randolph County has a warm spot in my heart. I do sincerely believe that all the citizens of Randolph County, through the years, have shown themselves to be great Alabamians and Americans. Together, they have weathered many storms, always demonstrating a great sense of community pride and determination.

It is a true pleasure representing Randolph County in the Senate, and even more of a pleasure to congratulate the people of Randolph County on their approaching 150th birthday.

AN AMENDMENT TO THE SOCIAL SECURITY ACT

Mr. HEFLIN. Mr. President, I was shocked when I learned that almost $1 billion each year in social security benefits are going to illegal aliens and foreign nationals. This loophole in the social security system is inexcusable at a time when the system is straining to meet its commitments to the millions of elderly Americans who have worked hard to earn their benefits.

It is unbelievable that, at the present time, there are more than 300,000 persons living abroad in more than 60 countries who receive $962 million annually in social security benefits, 70 percent of these recipients are not American citizens. An example of the abuse to the social security system which has resulted from this loophole is the case of a foreigner who moved to the United States and worked here for a number of years and then returned to his homeland at the age of 70. Upon returning to his native country, he married a 17-year-old girl and subsequently had three children before he died at the age of 75. After his death, his newly acquired family, who had never been to the United States, began collecting thousands of dollars annually in social security benefits. It is unfair that this sort of abuse is allowed to exist during a time when American elderly citizens who have worked hard all of their lives to earn social security benefits have been threatened with potential cuts in those benefits.

If we do not act to close this loophole and stop this type of abuse to the social security system, those elderly Americans who have earned and truly deserve social security benefits will be the ones who suffer. To remove this unneeded burden on our social security system and for the benefit of elderly Americans who have retired in reliance upon our social security system I have cosponsored an amendment offered by my distinguished colleague from Indiana (Mr. LUGAR), and I urge all of my colleagues to join me in support of this measure to insure that social security benefits continue to go to those truly deserving American citizens.

THE PRESIDENT IS RIGHT

Mr. HARRY F. BYRD, JR. Mr. President, I think the President of the United States is exactly right in demanding a special session of Congress to handle the appropriations bills. Congress has not yet passed a single one of the 13 appropriations bills. This fiscal year ends in less than 2 weeks, yet Congress has done nothing in regard to passing the necessary appropriations bills.

The President said it is bad economics and bad management of the Government's finances. I agree with that. I support his demand for a special session. I hope that it means that he is determined also to force a reduction in the excessive spending that Congress has been engaged in for so long.

It is time for Congress to act on these appropriations bills, it is time for Congress to reduce runaway and excessive Government spending. I hope that is what the President had in mind when he issued his call for a special session in November.

Mr. HEFLIN. Mr. President, I wish to associate myself with the remarks of the distinguished Senator from Virginia.

ONE-LEGGED CLIMBER

Mr. JACKSON. Mr. President, hundreds and hundreds of people from all over the world attempt to climb Mount Rainier in my native State of Washington every year. It is a tremendous test of one's physical and mental condition and endurance. For those who reach the top of this 14,410-foot volcanic peak, it is an exhilarating accomplishment.

In fact, even young people in good condition train for weeks and even months before trying to climb Mount Rainier. It often is described by those who are successful, as well as those who are unsuccessful, as the most grueling physical test of their lives.

I mention this, and draw my colleagues' attention to it, because I recently had occasion to meet a man, Mr. Donald H. Bennett, Mercer Island, Wash., who become the first amputee in the world to climb to the top of Mount Rainier. He was aided only by one leg and his crutches.

Mr. Bennett—and the members of his climbing team, John Skirving, Vashon Island; Rick Hanika, Seattle; Bob Hartz, Federal Way; Cy Perkins, Enumclaw; and Al Shelley, Tacoma—made the climb to emphasize what people can do if they lose a limb. Their climb was sponsored by the Seattle Chapter of the National Handicapped Sports and Recreation Association.

Mr. Bennett uses an artificial leg in his daily life, but used specially rigged ski poles as crutches to help him with the climb. To prepare for the rugged climb, he hopped 5 miles a day for 2 months prior to the climb.

A documentary film entitled "Hop to the Top" is being made about the climb.

Mr. President, the commendable success of Mr. Bennett and his team members can serve as an inspiration to all handicapped persons—as well as all Americans. His motto is "can do" and it serves us well to reflect upon his philosophy and share it with others.

An article about the climb appeared in the Bellevue Journal American and I ask unanimous consent to have printed in the RECORD the text of the article.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ONE-LEGGED CLIMBER: NEVER A MAYBE

(By Barbara Winslow)

The 52-year-old one-legged man who hopped his way to the top of Mount Rainier last weekend never doubted that he could make it.

"I think it was one of the greatest experiences of my life," Don Bennett of Mercer Island told reporters Monday morning. But he said he has no plans to climb any other mountains.

Bennett, who is believed to be the first one-legged climber to reach Mount Rainier's summit without use of an artificial leg, said there was never a "maybe" as he and his five-member team trekked up the mountain that beat him a year ago. The tanned, lean mountain climber described the trip as "really good" and said the weather cooperated with the expedition.

Bennett arrived home about 2 a.m. Monday after a small celebration of fried chicken and pitchers of beer on Crystal Mountain Sunday night.

"I should be tired, but I'm really not," he said. "I'm still up on the mountain!"

It was just one year ago that the handicapped man tried to conquer the mountain, but gave up when bad weather struck. He had come within 400 feet of the top when a blinding snow storm, known as a whiteout, struck and he was told he had to turn around.

"I couldn't believe what I was hearing," Bennett recalled of that try. "You could just see the summit."

He vowed that he wouldn't try again, but two or three months later when the soreness of his limbs was just about to fade, he was planning another attempt.

Bennett uses an artificial leg in his daily life, but did not take it with him to Mount Rainier. He used specially rigged ski poles as crutches to help him up the mountainside.

The poles have a seal-skin circular base and hand grips half-way down the shaft.

The physical conditioning Bennett did prior to this trip made a difference in his strength, he said. For the past two or three months, he hopped five miles a day and swam.

"I felt physically much better," he said.

The expedition departed Thursday and hit the rim of the mountain crater about 5:30 p.m. Saturday, where they slept that night.

"It's a fantastic sight," Bennett said.

There was fog in the crater that evening, but the next morning the team members were exclaiming that the sun was shining. The whole team shared the thrill of making the summit, he said.

"You're up like you're on top of the world," Bennett said.

Fifteen or 20 minutes later they began their descent, eventually deciding to come all the way down in one day. The team, which climbed the north side of the mountain, arrived at White River campground at about 9 p.m.—12 hours after leaving the summit.

The purpose of the trip was to emphasize to people what they can do if they lose a limb, not what they can't do, Bennett said. He lost his leg in an accident 10 years ago.

He played tennis and jogged before he lost his leg. Now he swims and pilots a kayak.

"That's the 'can do,' " he said.

When he awoke after his accident he wasn't remorseful over the loss of his leg, he said.

"I was so damn glad to be alive," Bennett said. His trip was sponsored by the Seattle chapter of the National Handicap Sports and Recreation Association and some commercial sponsors.

Sunday's success was Bennett's second time at the top of the mountain. He made it to the summit two years before he lost his leg.

For now at least, Bennett says he isn't planning another trip up Mount Rainier or any other peak.

"I definitely do not have another mountain to climb," he said.

WATT'S SELLING; NOBODY'S BUYING

Mr. JACKSON. Mr. President, I share with my colleagues George F. Will's column which appeared in the August 19 Washington Post.

Mr. Will suggests that the administration's plan to help reduce the public debt by leasing oil tracts, selling coal leases, increasing timber cutting, and selling off the public lands is not only ill-conceived but ill-timed. He reports that recent polls increasingly confirm the country's concern for environmental protection and its unwillingness to sacrifice its natural resources for narrow economic gain.

I ask unanimous consent to have printed in the RECORD Mr. Will's remarks.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

WATT'S SELLING; NOBODY'S BUYING

(By George F. Will)

ASPEN, Colo.—Having worn a look of patient suffering through seven summers while wearing heavy leather hiking boots, I note bitterly that now there are boots of feather-light fabric and cushiony soles that are comfortable from the first step. Thus does American capitalism produce comforts that subvert the Calvinist spirit that produced American capitalism in the first place.

This does not mean that hiking trails will suddenty be congested. Many, perhaps most, Americans feel as the Rev. Tom Marshfield does. The protagonist of John Updike's splendid novel, "A Month of Sundays," says: "Athletic fields and golf courses excepted, the out-of-doors wears an evil aspect, dominated as it is by insects and the brainless proliferation of vegetable forms."

But America will not soon be paved over or otherwise manicured. The amount of standing forest is about what it was 50 years ago, and 75 percent of what it was in 1620. And in spite of rhetoric about getting government "off the back of" and "out of" this and that, poll after poll reveals a national consensus for governmental activism concerning environmental protection.

Indeed, if the Reagan years become locust years that will be because a few strategically placed persons recognize and regret that consensus. The administration's plan to offer for lease, quickly, one billion acres of offshore oil tracts looks like an attempt to seize a fleeting opportunity. It is economically improvident to dump tracts onto a depressed market; it is environmentally rash to do so at a pace likely to overwhelm the capacity for supervision.

At a first sale, held two weeks ago, bids were received on only 40 of the 554 available tracts. The 40 high bids totaled just $12.3 million, the lowest yield per acre in the 28 years of federal offshore leasing. Recent leasing on Alaska's North Slope brought $70 million. At least $500 million had been anticipated.

A recent sale of coal leases in the Powder River Basin of Montana and Wyoming brought such disappointing revenues that the sale may be challenged in court as a violation of the law requiring that the public get fair market value for coal. Of the 13 tracts for lease, eight attracted one bidder, three tracts attracted two bidders, and two tracts attracted one. The Interior Department plans to lease 5 billion tons of coal over the next two years. Critics say the market is already glutted: given the current rate of mining, two centuries worth of coal land had already been leased.

Congress' fiscal 1983 budget resolution anticipates $13.7 billion in revenues as a result of administration "management initiatives." these executive branch initiatives are the most important deficit-reducing measures. The biggest component of the package of initiatives is supposed to be bonus bids royalties and rents from offshore oil exploration. Yields from these sources are supposed to double in fiscal 1983. They will not.

James Watt, the interior secretary, plans to sell up to 35 million acres of public lands—a chunk of America about the size of Iowa. The administration is eager to increase timber cutting in national forests, in spite of the fact that today there are 30 billion board-feet of cut but unsold timber. The administration is nothing if not reverent about the law of supply and demand, but it seems careless about increasing supply in a period of slack demand. The explanation probably is that the administration thinks such sales are good for the nation's soul, regardless of economic results, because shrinking the public sector is inherently good.

Watt is the administration's most vigorous (some would say lurid) exponent of this doctrine. He is the only person conspicuous in the upper reaches of the administration who tends to confirm the cartoon of Ronald Reagan as an immoderate ideologue. He has the sharpest tongue and the bluntest policical instincts in Washington. In a city of subtleness and nuances, many of the most effective operators have public personalities as pale as candles. Watt is a blowtorch.

That is one reason why, after 19 months of doing battle with Watt, environmentalists are merry as crickets. they are holding their own, in Congress and courts, regarding the Clean Air Act, pesticide controls, leasing in wilderness areas, offshore leasing and other matters.

This is not because most American closets contain hiking boots (either the old, character-building kind or the new decadent sort). Rather, it is because even Americans who resemble the Rev. Marshfield—who think, with reason, that the story of civilization is the story of mankind's long hike from the heath to concrete—know that acid rain falls on golf courses, too.

ACID RAIN

Mr. FORD. Mr. President, yesterday I had printed in the RECORD the statement of Mrs. Kathleen Bennett, Assistant Administrator for Air, Noise, and Radiation of the U.S. Environmental Protection Agency, presented before a Senate Energy Committee hearing on acid rain and congressional attempts to control it. Today I offer for my colleagues' information the statement of Mr. Jan W. Mares, Acting Under Secretary of Energy, which was given at the same forum.

Mr. Mares' testimony is particularly incisive in its criticism of the acid rain control strategy that has been adopted by the Committee on Environment and Public Works. He hits on the head one of the most glaring flaws in the proposal when he points out that the legislation would single out sulfur dioxide emissions for massive reductions when "[T]here are a number of other pollutants that are believed to be potential precursors of acid rain or which may play important roles as catalysts in the atmosphere." The examples he offers are nitrogen oxides which "not only contribute to rainfall acidity but also may play a critical role in the atmospheric chemistry of sulfur oxide."

Mr. Mares also echoes Mrs. Bennett's concern about this particular control strategy:

> While our estimates of the cost of proposed controls for acid rain reduction are admittedly uncertain, these cost uncertainties are small compared to the uncertainties in our understanding of the benefits, if any, that will be obtained. We have no estimate of the reduction in acidic deposition that would result from a reduction in emissions . . . further research is required before the modeling work can be considered as relevant for decisionmaking.

I hope my colleagues are beginning to realize how precipitous and limited in scope the Environment Committee proposal is, and I ask unanimous consent that Mr. Mares' statement be printed in full in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF JAN W. MARES, ACTING UNDER SECRETARY

Mr. Chairman and Members of the Committee, thank you for inviting the Department of Energy to testify on the issue of acid rain. This subject is of great importance to us; the Department has committed a significant amount of its resources to this problem and is working closely with a number of other Federal departments and agencies. Specifically, the Department is an active participant in the Interagency Task Force on Acid Precipitation established pursuant to Title VII of the Energy Security Act of 1980. In addition, the Department is continuing to support the State Department in the on-going negotiations with Canada concerning Transboundary Air Pollution.

We recognize, and are concerned about, the claims of environmental damage attributed to acid rain and other forms of acidic deposition. We are equally concerned, however, with the manner in which this issue is being addressed. We are concerned that rhetoric is too often outweighing balanced deliberation; that there are efforts underway to seek an immediate legislative solution; and that massive costs are involved in proposals currently receiving Congressional consideration. This is especially disconcerting in light of the fact that major scientific uncertainties abound in the area of acid rain and that we have little understanding of the benefits, if any, that would result from the current legislative proposals. For these reasons, Mr. Chairman, the Department of Energy welcomes the interest being shown by this Committee.

The United States has an unparalleled record of accomplishment in reducing air pollution. Our Clean Air Act is among the toughest in the world. We have accomplished more and expended more dollars in total as well as more dollars per capita in this area than virtually any other Nation on earth. For example, the Environmental Protection Agency has estimated that the United States spent some $150 billion dollars over the last 11 years on air pollution controls. This does not include the billions of dollars exported to oil-producing countries as a result of the conversion of many of our powerplants from coal to oil, primarily for environmental reasons, during the last 20 years.

Over the past few years, the American public has been barraged with stories of how acid rain is destroying the lakes, forests, and agriculture of major portions of North America. Those responsible for these predictions point an accusing finger at the Nation's older coal-fired power plants—those prior to the air quality regulations that now govern new electric and industrial powerplants. They propose a massive pollution control program beyond that provided for in the Clean Air Act. This approach to the acid rain issue is embodied in the proposed acid rain legislation approved by the Senate Committee on Environment and Public Works.

One of the primary targets of this proposed legislation, older coal-fired plants, will not be with us forever. Retirements are going to cause almost every one of them to be taken out of service and replaced by new powerplants incorporating Best Available Control Technology between the years 1995 and 2020. As a result, we anticipate that during that period, sulfur oxide emissions will decrease by roughly the same amount or even more than what is called for in the current legislative proposal. The proposed legislation will not add to this decrease, but simply accelerate it by a few to at most 30 years.

I would also point out that the proposed legislation singles out sulfur oxide emissions for massive reductions. There are a number of other pollutants that are believed to be potential precursors of acid rain or which may play important roles as catalysts in the atmosphere. For example, nitrogen oxides not only contribute to rainfall acidity but also may play a critical role in the atmospheric chemistry of sulfur oxide.

I make these points because too often we hear the issue of controlling emissions from older powerplants portrayed as an "all or nothing" affair. That is not the case. The structure of the current Clean Air Act will eventually accomplish the same results as the proposed acid rain legislation. Therefore, the issue is quite straightforward: Are the costs of accelerating the reduction of sulfur emissions balanced by the benefits?

COST OF EMISSION CONTROLS

The Department of Energy has undertaken a number of studies of the costs that would be incurred if such a massive control program were legislated with the intent of reducing rainfall acidity. The most recent of these studies is a staff analysis entitled "Costs to Reduce Sulfur Dioxide Emissions," which I have provided to the Committee. This analysis also summarizes the results of earlier Department of Energy studies.

As you are aware, the proposal now pending before the Senate would mandate a reduction in annual sulfur dioxide emissions in 31 eastern states by 8 million tons below 1980 levels. However, by the time the control program is fully in force, additional industrial and electric utility growth will have taken place so that the total level of reduction required by the proposed legislation is probably closer to 10 million tons annually. According to the Department's best estimate, a reduction of annual sulfur dioxide emissions by 10 million tons will require a minimum, average annual expenditure of $3.5 to $4.6 billion.

These cost projections are average annualized costs and have been calculated assuming that the extra controls would be used for 30 years. Therefore, over the lifetime of the proposed legislation, some $100 to $140 billion, in 1982 dollars, would be expended, again at the very minimum.

In conducting its cost analyses, the Department of Energy reviewed the various technical means currently available to achieve sulfur dioxide reductions. The choices are limited: switching from a higher to a lower sulfur coal, flue gas desulfurization, and coal cleaning. No single method was found to be the least expensive in all cases; costs will vary, depending upon the location of the powerplant and site specific constraints. Coal switching, however, appears on the average to be the method of economic choice. Moreover, due to the inherent sulfur removal limitations of currently available coal cleaning technology, most of the reductions would have to come from either switching coals or installing flue gas desulfurization equipment.

It is important to recognize that the $3.5 to $4.6 billion range of annual costs represents the minimum costs anticipated from the proposed legislation. Actual costs will probably be significantly higher. One reason is that calculations performed in Washington often underestimate the complexities frequently encountered in the real world that tend to raise costs. Second, these costs were calculated assuming that the legislation would be implemented through a set of near perfect, economically efficient regulations. Past history has shown that this will almost surely not be the case. Third, the calculations assume that the entire market place will be at equilibrium; that is, the selling price of low-sulfur coal will be strictly proportional to mining costs. In contrast, the market for coal is likely to be seriously disrupted, as I will discuss in a moment. These three assumptions are not unique to the Department of Energy analyses, but are inherent in all the analyses we have seen which attempt to estimate the costs of reducing sulfur oxide emissions. Taking these points into consideration, it would not be unreasonable to estimate that the actual costs of the proposed legislation are in the range of $5 to $7 billion annually.

These dollar costs translate directly into increased utility bills for consumers. Subject to the same caveats associated with cost estimating, the Department has calculated a 3 to 10 mills per kwh increase in electricity generation costs. This, in turn, will cause electricity rates to rise by between 4 and 25 percent depending upon the specifics of the utility serving a particular customer. Moreover, since utilities don't average their costs over a 30 year period, significantly higher cost increases are probable during the initial implementation period.

There are also indirect costs associated with the proposed legislation. By far, the greatest will be incurred by our Nation's coal supply sector; i.e., coal firms, the miners employed by those firms, their families, and the regions in which they work and live.

To achieve the proposed level of sulfur dioxide reduction more than 200 million tons of coal per year will have to be either switched or subjected to flue gas desulfurization. Two hundred million tons is approximately one fourth of our entire Nation's present annual coal use. If we assume that two thirds of the reduction will be achieved by switching and one third by flue gas desulfurization, we are talking about idling more than 160 million tons of the annual production of eastern higher sulfur coals and putting an equivalent amount of stress on low sulfur coal supplies. While overall net coal mine employment is likely to remain stable, some 40,000 miners will be looking for new jobs.

Unfortunately, the mines that will be required to supply lower sulfur coals will generally not be in the same geographical area as the mines that are shut down. Many miners will face not only unemployment but also the likelihood of moving their families to new areas. The average miner's family consists of about 2.6 persons, in addition to the miner, so the impact would adversely affect the lives of about 150,000 citizens. On top of this, local businesses and the communities in which these miners live will undoubtedly experience substantial economic and social disruption.

The imbalance in our Nation's coal supply infrastructure will cause the demand for premium low sulfur eastern coals to significantly increase, with the result that the market equilibrium, which I referred to earlier, will be lost. Higher prices for lower sulfur coals will adversely affect more than the large number of utility and industrial powerplants that would be forced to switch from higher sulfur coals. Current users of low sulfur coal will also see higher coal prices. In addition the economics of coal conversion, especially by industrial boiler users, will be adversely impacted.

Ultimately the cost increases will be passed to consumers and industrial users of electricity and coal. Initially, however, electric utility industry will bear a major financial and regulatory burden. The Nation's utility industry is already experiencing severe difficulties in raising capital necessary to meet growth projections. Additional financial requirements, such as the capital costs for flue gas scrubbing equipment and/or plant modifications necessary for receiving low sulfur coals, will significantly add to the financial stress of our Nation's utilities.

BENEFITS OF INCREASED SULFUR DIOXIDE REDUCTIONS

While our estimates of the costs of proposed controls for acid rain reduction are admittedly uncertain, these cost uncertainties are small compared to the uncertainties in our understanding of the benefits, if any, that will be obtained. We have no estimate of the reduction in acidic deposition that would result from a reduction in emissions. Attempts have been made to model how sulfur compounds are transported in the atmosphere and transformed into acidic species. Unfortunately, our current knowledge of the chemistry of sulfur oxides and other chemicals contributing to acid transformation in the atmosphere and in clouds is insufficient. As a result, further research is required before the modelling work can be considered as relevant for decisionmaking. I would like to emphasize here that I am not talking about reducing scientific uncertainties by a few percentage points; the scientific uncertainties I am discussing cover a broad range of possible outcomes. We cannot even rule out the possibility that the proposed massive emission reductions would have an insignificant impact on acidic deposition in Eastern North America.

The transport and chemistry of acidic pollutants in the atmosphere is only one area that is dominated by major scientific uncertainties. We also have an extremely poor scientific understanding of how changes in rainfall acidity would lessen the damages currently being attributed to acidic deposition. In fact, we have a highly incomplete understanding of what damages are taking place today because of present levels of rainfall activity.

Acid deposition has been blamed for the accelerated decay of manmade materials and structures, and damage to agricultural crops, forests and fresh water ecosystems. At present, the largest percentage of economic damage caused by acid deposition is being related to the decay of manmade materials and structures. There is no doubt that manmade pollution contributes to this decay; however, most of the damages are occurring primarily in urban areas. Studies in both this country and in Europe generally agree that this is a short range pollution problem and that the vast majority of the pollutants responsible are of local origin, coming from the combustion of fossil fuels within the same urban areas receiving the damage. These pollutants are exactly those covered under the Clean Air Act. States currently have the authority to modify their State Implementation Plans to deal with this problem. No new legislation is necessary. In fact, the proposed acid rain legislation is unlikely to significantly affect decay of manmade materials and structures.

Present environmental damage to agricultural crops is known to largely result from ozone, a pollutant that also can travel great distances from both industrial and urban sources. Ozone formation has been related to nitrogen oxides and hydrocarbons, not sulfur oxides. There have been some laboratory tests in which crops have been exposed to various levels of rainfall acidity. These experiments are difficult to perform and, at present, results are mixed: some crop yields diminish while other improve.

For forests, the Europeans have reported evidence of damage; however, their results have not been corroborated by similar observations in North American forests.

For aquatic ecosystems, there is evidence of adverse effects due to excessive water acidity, primarily in certain high-altitude lakes. The extent to which this problem is correlated to acidic deposition is still uncertain. The economic damage to aquatic ecosystems is expected to be small, however.

To understand the benefits of the legislative proposal, we require more than a knowledge of what damage is actually being incurred. We need to know what portion of these damages would be alleviated by reducing the level of emissions. We have no knowledge, at present, of the benefits that would accrue due to the implementation of any proposal to substantially reduce sulfur dioxide emissions in a geographically board area, such as the region covered by the 31 eastern states.

RESEARCH INITIATIVES

This Administration, in recognition that sufficient technical information is not available now, has proposed an accelerated research program. This, of course, responds to the Congressional initiatives in the Energy Security Act of 1980.

Even in these times of tight Federal budgets, Federal agencies nearly doubled the acid rain research budget from fiscal year 1981 levels to $22 million in fiscal year 1983. Much of this work follows initial directions set by DOE and ERDA in the mid 1970s. DOE also actively participates on the Interagency Task Force on Acid Rain and we conduct approximately $2 million in acid rain research, about 10 percent of the Federal budget for such research. Further, our National laboratories continue to play a major role in advancing our state of knowledge through a comprehensive program of research and technical assessments.

CONCLUSION

We share the concerns of those who value our environment and our Nation's natural resources. The Department of Energy will continue to fully support and participate in the Administration's program of accelerating research into the causes, effects and alternative means of controlling acidic precipitation. The scientific insights which will be forthcoming over the next few years should place both the Administration and the Congress in a position to intelligently address alternative courses of action. We will be in a position to know better if accelerated action is required or whether we can wait for the natural retirements of older coal-fired powerplants. If action is deemed necessary, we will understand which pollutants should be controlled. Control of sulfur oxides may be less effective than focusing controls on other atmospheric pollutants, especially those capable of converting sulfur dioxide to acidic compounds. We will also have a much better understanding of which control strategies are most effective. The geographically broad, massive emissions reduction strategy currently being proposed is but one approach. Effective results might be obtained with a less expensive program, for example, focused on local sources that may be contribution to acidic deposition.

In summary, Mr. Chairman, the Department of Energy finds that acid rain control measures currently being proposed represent a premature move towards legislation mandating a massive control program. In essence, we are being asked to set aside billions of our Nation's wealth to obtain benefits that have yet to be quantified. These proposals are all the more disturbing considering the current state of the Nation's economy and the importance of coal in meeting our Nation's energy security objectives.

STATES, LABOR, ENVIRONMENTALISTS, AND HEALTH GROUPS OPPOSE CHANGES IN FIFRA

Mr. CRANSTON. Mr. President, as I announced to my colleagues on September 15, I oppose the changes approved by the Senate Agriculture Committee to section 24(a) of the Federal Insecticide, Fungicide and Rodenticide Act. Section 24(a) authorizes a State to regulate the sale or use of federally registered pesticides as long as the State does not permit use or sale prohibited by the Environmental Protection Agency. The FIFRA legislation, H.R. 5203, approved by the Senate Agriculture Committee earlier this week makes a number of changes which would significantly restrict a State's authority to regulate pesticide use. I strongly believe that section 24(a) should remain unchanged so that States can protect the health and safety of their citizenry.

Since the committee action, I have heard from numerous State government organizations, labor, environmental, and health groups who share my concerns. These groups have objections to the bill in its present form and all oppose any changes in section 24(a). I want to bring to my colleagues attention the names of these groups:

National Association of State Departments of Agriculture.
National Governors Association.
Council of State Governments.
Southern Legislative Conference.
Southern Governors Association.
State of California.
AFL-CIO.
Longshoremen's Union.
The National Grange.
National Farmers Union.
Migrant Legal Action.
The National Coalition Against the Misuse of Pesticides.
The National Audubon Society.
Friends of the Earth.
The Sierra Club.
March of Dimes.
American Public Health Association.

S. 2853, THE HATTERS' FUR TARIFF ACT OF 1982

Mr. BAKER. Mr. President, I rise today to join my distinguished colleague from Illinois, Senator PERCY, in supporting a modest change in the tariff laws. Presently, a 15 percent duty is imposed on hatters' fur that is imported from abroad. I should point out, Mr. President, that there are vir-

tually no domestic suppliers of hatters' fur and therefore the present tariff is not protecting an American industry. While that alone may be reason enough to suspend the tariff, a more egregious inequity exists. Finished, or partially finished imported products which contain hatters' fur are subject to a maximum tariff of 5.3 percent—and in many cases, none at all. Therefore, a domestic producer of hats pays an additional 15 percent on a major raw material while its foreign competitors pay little or no tax on the fur used for hats and related items.

S. 2853, Mr. President, would temporarily suspend this tariff—until 1985—and relieve domestic manufacturers of this burden. A companion bill (H.R. 5386) has been introduced in the House, where hearings were held. The Ways and Means Trade Subcommittee has favorably reported the bill to the full committee. The administration favors this temporary suspension of the tariff. It is my hope, Mr. President, that this measure may be incorporated in the miscellaneous tariff bill presently in markup in the Senate Finance Committee.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT ON THE DEVELOPMENT OF SYNTHETIC FUELS UNDER THE DEFENSE PRODUCTION ACT OF 1950—MESSAGE FROM THE PRESIDENT—PM 179

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was refered to the Committee on Energy and Natural Resources:

To the Congress of the United States:

In accordance with Section 106 of the Energy Security Act (P.L. 96-294), I transmit herewith the second annual report on activities undertaken by the United States Synthetic Fuels Corporation and the Department of Energy to implement the development of synthetic fuels under the Defense Production Act of 1950, as amended. The report covers the period from December 1, 1981, through June 30, 1982.

RONALD REAGAN.

THE WHITE HOUSE, *September 17, 1982.*

ANNUAL REPORT OF THE DEPARTMENT OF EDUCATION FOR FISCAL YEAR 1981—MESSAGE FROM THE PRESIDENT—PM 1980

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with Section 426 of the Department of Education Organization Act (P.L. 96-88), I transmit herewith the second annual report of the Department of Education which covers fiscal year 1981.

RONALD REAGAN.

THE WHITE HOUSE, *September 17, 1982.*

MESSAGE FROM THE HOUSE

At 9:41 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5658. An Act to authorize the use of education block grant funds to teach the principles of citizenship.

HOUSE BILL PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent and placed on the calendar:

H.R. 5658. An Act to authorize the use of education block grant funds to teach the principles of citizenship.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-1184. A joint resolution adopted by the Northern Marianas Commonwealth Legislature; to the Committee on Energy and Natural Resources:

SENATE JOINT RESOLUTION No. 3-11, H.D. 1

"Whereas, Section 601(a) of the Covenant to Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America provides that "the income tax laws in force in the United States will come into forece in the Northern Mariana Islands as a local territorial income tax on the first day of January following the effective date of this Section, in the same manner as those laws are in force in Guam"; and

"Whereas, by Presidential proclamation, these income tax laws were to have come into effect on January 1, 1979, in the Commonwealth; and

"Whereas, the Commonwealth of the Northern Mariana Islands established a local tax system in its Public Law 1-30, effective January 1, 1979, which rebated the local territorial income taxes due under Section 601 of the Covenant on all income from sources within the Commonwealth; and

"Whereas, the United States Government in its Public Laws 95-348, 96-205, and 96-597 delayed the effective date for implementation of Section 601 of the Covenant to January 1, 1983; and

"Whereas, the Commonwealth of the Northern Mariana Islands has established new tax legislation in Public Law 3-11 which repeals Public Law 1-30, but incorporates a similar local tax system and rebate provision, but with an addition in Section 821 that local business gross revenue and employee wage and salary taxes "shall terminate upon midnight, December 31, 1982; PROVIDED, that the Commonwealth has adopted a local income tax and sales tax system for individuals and businesses by the date"; and

"Whereas, Section 601 of the Covenant is based upon the mirror-image application of the United States Internal Revenue Code, a concept which has been thoroughly discredited by two studies prepared by the United States Department of the Treasury:

"(1) 'Territorial Income Tax System's prepared by the United States Department of the Treasury in October, 1979, discussing the tax systems in the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa;

"(2) 'United States Federal Tax Policy Towards the Territories' prepared by Karla Hoff, International Economist on the Department of Treasury staff, in August, 1981, analyzing and critiquing the income tax systems in Puerto Rico, the Virgin Islands, and Guam; and

"Whereas, the mirror-image application of the Internal Revenue Code would disasterously affect the economic development of the Commonwealth at a time when the Commonwealth is seeking to achieve economic development on a par with that enjoyed by the continental United States; and

"Whereas, pursuant to Section 601 of the Covenant and U.S. Public Law 96-597, the provisions of the Internal Revenue Code will apply in the Commonwealth as of January 1, 1983; and

"Whereas, by House Joint Resolution No. 6, the Legislature of the Commonwealth of the Northern Mariana Islands has indicated its desire that Section 601 of the Covenant be modified to allow the Commonwealth to develop an alternative income tax system for individuals and businesses residing in the Commonwealth; and

"Whereas, by the same House Joint Resolution No. 6, the Government of the United States was asked to enact legislation to modify Section 601 of the Covenant for this purpose; and

"Whereas, House Joint Resolution No. 6 also requested financial and technical assistance from the United States to develop an alternative income tax system for the Commonwealth; and

"Whereas, best estimates are now that it may require up to two years to develop a satisfactory alternative tax system and modify Section 601 of the Covenant as requested; now, therefore,

"Be it resolved, That the Commonwealth of the Northern Mariana Islands hereby expresses its desire that the United States Government act to amend U.S. Public Law to defer the implementation date of the United States Internal Revenue Code income tax system in the Commonwealth

from January 1, 1983 until January 1, 1985; and

"Be it further resolved, That the Governor and the Washington Representative to the United States for the Commonwealth of the Northern Mariana Island are hereby authorized to take all steps necessary to facilitate a deferral of the implementation date of the United States Internal Revenue Code for income taxes to January 1, 1985 within the Commonwealth; and

"Be it further resolved, That the President of the Senate and the Speaker of the House of Representatives shall certify and the Senate Legislative Secretary and House Clerk shall attest to the adoption of this resolution and the Senate Clerk shall thereafter transmit a certified copy to the Governor who shall endorse the resolution and forward copies of it to the President of the United States, the Secretary of the Department of the Treasury, the Commissioner of the Internal Revenue Service, the President of the United States Senate, and the Speaker of the United States House of Representatives."

POM-1185. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"SENATE JOINT RESOLUTION No. 27

"Whereas, The oceans of the world are vital to all life on the continents; and

"Whereas, The oceans waters off the shore of California are the basis for the state's commercial and recreational fisheries which are a source of food for the people of California and are important to coastal recreation and tourism economies; and

"Whereas, The marine environment is a fragile ecosystem that may be significantly altered or contaminated by shortsighted disposal of radioactive wastes; and

"Whereas, Radioactive wastes have been dumped in the coastal waters off the shore of California and some samples of ocean sediment have been found to be contaminated with radioactive materials, including plutonium; and

"Whereas, The consequences of nuclear wastes in the marine environment are poorly understood and pose a threat to the human food chain; and

"Whereas, Congress is considering HR 6113 by Representative Norman D'Amours of New Hampshire to extend and amend the Marine Protection Research and Sanctuaries Act; and

"Whereas, Representative Glenn Anderson of California has proposed an amendment to HR 6113 to require that any federal agency proposing to dump radioactive wastes in the ocean shall provide Congress and the public with site-specific information about the full health, environmental, and economic consequences of the proposed dumping; and

"Whereas, The Anderson amendment also would allow either house of Congress to veto any permit the Environmental Protection Agency might issue for ocean dumping of radioactive waste; and

"Whereas, The United States Environmental Protection Agency is preparing regulations to lift the current moratorium on ocean dumping of radioactive wastes in United States territorial waters, which has been in effect since 1970, and the United States Department of Energy is developing the option of seabed disposal of radioactive wastes; and

"Whereas, The United States Navy is considering plans to scuttle decommissioned nuclear submarines in the ocean, possibly off the shore of Cape Mendocino; and

"Whereas, Japan is considering plans to dump high-level radioactive wastes in the Pacific Ocean north of Micronesia, a United States trust territory; and

"Whereas, The Pacific Marine Fisheries Commission, formed by interstate compact of the Pacific states, is scheduled to meet in Monterey, California, on November 15, 16, and 17, 1982, and is scheduled to discuss radioactive waste dumping in the Pacific Ocean; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly That the Legislature of the State of California respectfully memorializes the President and Congress to ban the scuttling of nuclear submarines off the coast of California and all other radioactive waste disposal in Pacific Ocean waters under the control of the United States until and unless future valid and reliable scientific studies prove it is safe; and be it further

"Resolved, That the Legislature supports the Anderson amendment to the Marine Protection Research and Sanctuaries Act as a reasonable interim measure while further scientific research is conducted; and be it further

"Resolved, That the Legislature proposes an international treaty to ban the disposal of radioactive wastes anywhere in the Pacific Ocean until and unless future vaild and reliable scientific studies prove it safe, and requests that the Congress and the President work diplomatically to oppose any disposal of radioactive wastes anywhere in the Pacific until the treaty takes effect; and be it further

"Resolved, That the Legislature respectfully memorializes the Congress to conduct an investigation of the effects of all radioactive contamination of the oceans from all sources to determine the effects of the contamination and to prevent repetition of radioactive waste dumping done without public notice or in violation of laws; and be it further

"Resolved, That the Legislature finds and declares that regular monitoring of marine life in the vicinity of the existing radioactive waste dumpsites off the shore of California, including those near the Farallon Islands, is necessary to protect the public health of the people of California; and be it further

"Resolved, That the Legislature requests that the Congress, the President, the Environmental Protection Agency, the National Marine Fisheries Service, and the National Oceanic and Atmospheric Administration provide for this needed regular monitoring and provide full information from the monitoring to the California Legislature and to the California State Department of Health Services; and be it further

"Resolved, That the Legislature requests that the Congress and the President require the Environmental Protection Agency to provide Pacific coast state and local governments with advance notice prior to publication in the Federal Register of any changes in ocean dumping regulations, and require the Environmental Protection Agency to consult with Pacific coast state and local governments and to conduct public hearings on the Pacific coast before adoption of any changes in ocean dumping regulations; and be it further

"Resolved, That the Legislature respectfully requests the Pacific states and United States Pacific territories to join California in opposing all radioactive waste disposal in the Pacific until and unless future valid and reliable scientific studies prove it is safe, and invites the Pacific states and United States Pacific territories to a meeting in Monterey, California, on November 15, 16, and 17, 1982, in connection with the meeting of the Pacific Marine Fisheries Commission, to plan common strategy for this opposition; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Administrator of the Environmental Protection Agency, to the Director of the National Marine Fisheries Service, to the Administrator of the National Oceanic and Atmospheric Administration, and to the Governors and presiding officers of the Legislatures of Alaska, Hawaii, Idaho, Oregon, and Washington, and to the Governor of each of the United States Pacific territories."

POM-1186. A joint resolution adopted by the Legislature of the State of California; to the Committee on Environment and Public Works:

"SENATE JOINT RESOLUTION No. 41

"Whereas, At a time when Californians are vitally concerned about their ever-increasing utility bills, the New Melones Dam is completed, but remains unfilled, denying a less expensive source of a clean, renewable hydroelectric power; and

"Whereas, In July 1973, the Legislature of the State of California, by adoption of Assembly Joint Resolution No. 7, urged Congress to proceed with construction of New Melones Dam as quickly as possible; and

Whereas, In 1974, the people of California, by means of a statewide vote on an initiative measure, expressed their desire not to keep the Stanislaus River as a wild and scenic river; and

"Whereas, In May 1980, the Legislature, by adoption of Assembly Joint Resolution No. 58, reaffirmed its position by urging Congress to proceed to fill the New Melones Reservoir to its maximum operating level; and

"Whereas, Nearly 350 million dollars have been expended to construct this major project which is now fully operational and will provide the people of California extensive benefits, including fish and wildlife enhancement, water quality protection, hydroelectric power, irrigation water storage, and flood control prevention; and

"Whereas, New Melones Dam will significantly help to restore the Stanislaus River fisheries run to its historical levels; and

"Whereas, A fully operational reservoir would help to foster and maintain environmentally beneficial water quality standards for the southern portion of the Sacramento-San Joaquin Delta; and

"Whereas, New Melones Dam is vitally needed to prevent unnecessary flooding and seepage damage to prime farmlands along the Lower Stanislaus River and the Sacramento-San Joaquin Delta; and

"Whereas, The average annual generation by the New Melones Dam over a long period of years is 455 billion watt hours of electricity, which would conserve an average of 750,000 barrels of fuel oil, and the State Water Resources Control Board's decision restricting the dam's water level at 844 feet denies the public the benefit of 275 billion

watt hours, causing the consumption of an additional 455,000 barrels of fuel oil; and

"Whereas, The lost watts of renewable energy amounts to 24 million dollars that the public must absorb and replace with more expensive, less desirable, oil-generated power; and

"Whereas, New Melones Dam, with a capacity of 2.4 million acre-feet, has the potential to provide over 222,000 acre-feet of irrigation water, a supply sufficient to serve 80,000 acres, with revenues of over 40 million dollars annually from farmland productivity; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California supports the Secretary of the Interior in his efforts to operate the New Melones Reservoir at its maximum capacity to fully achieve all the benefits envisioned by Congress when the project was authorized; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Interior, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1187. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

ASSEMBLY JOINT RESOLUTION No. 86

"Whereas, Public utilities providing gas and electric energy to consumers in California have historically been governed by the "flow-through" method of accounting for current tax reductions in ratemaking; and

"Whereas, The "flow-through" method of accounting allows the utilities' current tax reductions to be immediately reflected in lower rates to utility customers; and

"Whereas, The federal Economic Recovery Tax Act of 1981, proposed and signed into law by President Reagan, provides that in order to be eligible for the investment tax credit and accelerated cost recovery tax reductions provided by that act, public utilities must use the "normalization" method of accounting in ratemaking; and

"Whereas, The "normalization" method of accounting does not allow the utilities' current tax reductions to be immediately reflected in lower rates to utility customers; and

"Whereas, This federal act therefore has the effect of granting windfall tax breaks to investor-owned utilities and prohibits them from passing the savings on to the ratepayers; and

"Whereas, Gas and electric utility rates have increased extraordinarily rapidly in California in recent years, causing severe financial burdens and economic dislocations for utility customers; and

"Whereas, In 1982, 687 million dollars in gas and electric utility rate increases for California consumers are directly attributable to the use of the "normalization" method of accounting as required by this federal act, and 844 million dollars in 1983 gas and electric utility rate increase will occur as a direct result of the provisions of that act; and

"Whereas, Failure to pass the tax relief on to consumers is, in effect, a utility rate increase of a magnitude such as was recently experienced in the 909 million dollar rate increase granted to Pacific Gas and Electric Company, approximately 20 percent of the increase being due to the effects of the Economic Recovery Tax Act of 1981; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to revise the federal Economic Recovery Tax Act of 1981 to provide that the tax benefits to investor-owned electric and gas utility companies resulting from changes in accelerated depreciation rules, investment tax credits and other tax deductions be passed through to the utilities' ratepayers; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Chairman of the House and Senate Committees on Taxation."

POM-1188. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

"SENATE JOINT RESOLUTION No. 46

"Whereas, The California State Lands Commission administers trust lands containing crude oil reserves and provides by contractual arrangements with private firms for development of these reserves; and

"Whereas, The development of these reserves produces revenues for the state which are dedicated to public purposes and which are intended to be exempt from the windfall profit tax on crude oil; and

"Whereas, The state is using net profits contracts for the development of the crude oil reserves on its trust lands; and

"Whereas, The United States Treasury Department and the Internal Revenue Service have interpreted the Crude Oil Windfall Profit Tax Act of 1980 as requiring allocation of crude oil production to net profits interests in a manner which imposes an unintended windfall profit tax burden on a property with an exempt state net profits interest that, if the tax is treated as a reimbursable expense, is borne by the state net profits interest, thereby diverting to the United States Treasury oil revenues that would have been used for public purposes in the State of California; and

"Whereas, Congress did not intend for any state interest, including a net profits interest, to bear the burden of the windfall profit tax; and

Whereas, Senators Cranston and Hayakawa have introduced S. 753, Congressman Glenn Anderson has introduced H.R. 3044, and Congressman Rostenkowski has introduced H.R. 6056, the Technical Corrections Act of 1982 which has been amended by Congressman Matsui and joined by Congressmen Stark and Rousselot, before the 97th Congress which are bills amending the Crude Oil Windfall Profit Tax Act of 1980 to provide for allocation of crude oil production to net profits interests in proportion to their respective percentage shares of net profits, thereby eliminating the unintended windfall profit tax burden placed on the state's net profits interest by the interpretation of the act's present language by the United States Treasury Department and the Internal Revenue Service; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States to enact and the President to approve S. 753 by Senators Cranston and Hayakawa, H.R. 3044 by Congressman Glenn Anderson, and H.R. 6056 by Congressman Rostenkowski amending the Crude Oil Windfall Profit Tax Act of 1980 to provide for allocation of crude oil production, for the purpose of assessing the windfall profit tax, among the holders of net profits interests in proportion to their respective shares of net profits, so that states employing or intending to employ net profits contracts for development of crude oil reserves in their trust lands may enjoy a complete exemption from the windfall profit tax; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California as well as other appropriate members in the Congress of the United States, to the Secretary of the Department of the Treasury, and to the Commissioner of the Internal Revenue Service."

POM-1189. A joint resolution adopted by the legislature of the State of California; to the Committee on Finance:

"SENATE JOINT RESOLUTION No. 70

"Whereas, There are more than 4 million Californians over the age of 60, and more than 2.5 million Californians over the age 65; and

"Whereas, More than 3.1 million Californians who are aged or disabled, or who are the survivors or dependents of persons eligible for Social Security benefits, depend for their economic security on the integrity of the Social Security System; and

"Whereas, Social Security System expenditures to and on behalf of citizens of California are currently approximately as much as 80 percent of the budget of the government of the State of California each year; and

"Whereas, In May of 1981 the President presented Congress with a set of proposals for reforming the benefit structure and financing of the Social Security System; and

"Whereas, Those proposals were found to be so onerous and unacceptable by the community of senior citizens of this country that the President withdrew them from consideration by Congress and instead appointed a National Commission on Social Security Reform, which is directed to report to the President and Congress on or before December 31, 1982; and

"Whereas, The 97th Congress has authorized interfund borrowing between the Old Age and Survivors Insurance Fund, the Disability Insurance Fund, and the Health Insurance Fund, which collectively constitute the financial bases of the Social Security System; and

"Whereas, The interfund borrowing authorization, which will be essential to permit continued payment of Social Security benefits beginning in the last calendar quarter of 1982, expires on December 31, 1982; and

"Whereas, There is great fear and concern among members of the senior citizens community and among other groups whose economic security is vitally linked to the integrity of the Social Security System that the pending expiration of the interfund borrowing authority will be used as an excuse to recall the 97th Congress in a "lame duck" session after the November 1982 elections and, in such a session to attempt to adopt the President's original drastic and strin-

gent revisions of the Social Security Act that would provoke extreme political opposition if attempted prior to the November 1982 elections; and

"Whereas, It would be highly inappropriate for any major action to change the Social Security System to be taken in a lame duck session of Congress, but would be entirely appropriate for such decisions, if any, to be left to the deliberations of the 98th Congress, which will convene in January of 1983 and will have two full years in which to grapple with the problems of Social Security; and

"Whereas, It is possible that significant numbers of Members of Congress meeting in a lame duck session would, in fact, themselves be "lame ducks" by virtue of retirement or defeat in the elections and therefore not appropriately accountable to the electorate for major policy decisions enacted under such circumstances; and

"Whereas, A lame duck session would not be necessary if the 97th Congress were to extend the interfund borrowing authority beyond December 31, 1982, before it adjourns for the November 1982 elections; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California memorializes the President and the Congress of the United States to extend the provisions of Public Law 97-123, which authorized interfund loans and transfers, to at least the first two calendar quarters of 1983; and be it further

"Resolved, That the President and the leadership of the Senate and the House of Representatives be urged to assure the senior citizens of this state and this country that no efforts will be made to enact major changes in the benefit or financing structure of the Social Security System during the balance of the 97th Congress; and be it further

"Resolved, That the Secertary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1190. A joint resolution adopted by the Legislature of the State of California; to the Committee on Finance:

SENATE JOINT RESOLUTION No. 68

"Whereas, The California raisin industry, one of the oldest industries in our state, is currently facing damaging and unfair competition in world trade as a result of the European Economic Community subsidization of Greek raisin sales; and

"Whereas, The lack of a strong international trade policy on the part of the United States government has already resulted in serious economic injury to California's canning fruit and vegetable industry; and

"Whereas, If the common market policy continues to be extended, trade with most of California's agricultural products will be similarly adversely affected; and

"Whereas, The common market unfair trade actions have caused, and are expected to continue to cause, substantial economic losses to our California farm families and the thousands of farm laborers, packinghouse employees, and other persons engaged in related industries, such as wine, transportation, banking, real estate, and numerous others; and

"Whereas, It has been determined that the California raisin industry alone does not have sufficient capital resources to survive the unfair common market attack on California raisin markets; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorialize the Congress and President of the United States to immediately take whatever action is necessary to promptly protect our California raisin industry's established markets and restore fair world trade in light of unfair practices being engaged in by the European economic community; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-1191. A resolution adopted by the International Typographical Union opposing the contemplated changes by the Reagan Administration on our social security system; to the Committee on Finance.

POM-1192. Joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

"SENATE JOINT RESOLUTION No. 62

"Whereas, People throughout California are concerned about the rise in social and cultural hostilities, the increasing incidence of violent conflicts among nations and peoples, and the ever-present threat of nuclear war; and

"Whereas, There is a need to promote nonviolent methods of resolving human conflict; and

"Whereas, Conflict resolution techniques have repeatedly been demonstrated to provide a constructive, cost-effective means of resolving potentially violent human conflicts; and

"Whereas, Legislation is now pending in Congress which would establish the United States Academy of Peace and Conflict Resolution, which would serve to advance international peace through the development and implementation of programs to promote the use of conflict resolution techniques in international conflicts; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California supports the passage of the "United States Academy of Peace and Conflict Resolution Act," H.R. 5088; and be it further

"Resolved, That the Legislature of the State of Califorina respectfully memorializes the California delegation to the Congress of the United States to work to secure that bill's passage; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

POM-1193. Joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

"ASSEMBLY JOINT RESOLUTION No. 103

"Whereas, 1982 marks the 10th year of Title IX becoming law; and

"Whereas, Women now comprise over 50 percent of the student population of the elementary, secondary, and postsecondary educational institutions in the State of California; and

"Whereas, The State of California has demonstrated a long standing history and commitment to equal opportunity in education; and

"Whereas, Equal opportunity in education is assured to women students in educational institutions in the State of California by Title IX of the Federal Education Amendments of 1972; and

"Whereas, The 1975 Title IX regulations and the 1979 Intercollegiate Athletics Policy Guidelines define the effect of Title IX and address concerns of collegiate athletics; and

"Whereas, Title IX is necessary to present and future generations of students to promote and ensure sex equity in education; and

"Whereas, The Administration of President Reagan as represented by the Secretary of the Department of Education, has expressed its intent to rewrite Title IX, weakening and limiting the equity protection afforded by the law and the regulations implementing it; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes each Senator and Representative from California in the Congress of the United States to preserve the scope and strength of Title IX and to work for the defeat of any legislation which would weaken or dismantle Title IX; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States; and be it further

"Resolved, That the Assembly and Senate of the State of California jointly proclaim June 23, 1982, Title IX Day."

POM-1194. Joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

SENATE JOINT RESOLUTION No. 67

"Whereas, The Constitution of the United States of America is an inspired document 'of the people, by the people, and for the people', and

"Whereas, The people's freedom of religion, of speech, of the press, to peaceably assemble, and to petition, of their own free will and accord, are inspired ideas set forth in the Constitution of the United States; and

"Whereas, The Constitution has sheltered the pursuit of free enterprise, resulting in the extraordinary availability of jobs, food, clothing, and shelter in every community in America; and

"Whereas, On September 17, 1787, one hundred and ninety-five years ago, George Washington, the chairman of the constitutional convention, Benjamin Franklin, and thirty-seven other great Americans approved this immortal instrument of government; now, therefore, be it

"Resolved by the Senate and the Assembly of the State of California, jointly, That the President of the United States of America, the Congress of the United States, the Governor of the State of California, the governors of the several states, and the legislatures thereof be respectfully urged to join with all Americans in proclaiming our fidelity to the principles contained in the Constitution of the United States; and be it further

"Resolved, That every citizen of the United States is urged to actively participate in the observance of this anniversary and advance in understanding of the Consti-

tution so that we shall 'secure the blessings of liberty to ourselves and our posterity', and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, to the Governor of California, and to the governors and legislatures of each of the 50 states."

POM-1195. A petition from a citizen of Kansas City, Mo. urging Congress to reject "the Gay Bill of Rights"; to the Committee on the Judiciary.

POM-1196. A concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Labor and Human Resources:

"SENATE CONCURRENT RESOLUTION No. 731

"Whereas, The Senior AIDES Program is an employment program for senior citizens which is funded under Title V of the Older Americans Act. This program, along with all others under Title V, is scheduled for elimination. This program has been particularly effective in enabling low-income seniors the opportunities they need to supplement their incomes and provide them with meaningful activities. Its elimination would be devastating to countless senior citizens throughout Michigan and the country as as a whole; and

"Whereas, Title V programs provide employment to approximately 54,000 of the nation's senior citizens. The AIDES of the Senior AIDES Program honors older workers for their alert, industrious, dedicated, and energetic service. The people who work under this program's auspices must be at least fifty-five years of age, willing and able to work, and at or below the U.S. Department of Labor's low-income guidelines. They work in nonprofit organizations approximately twenty to twenty-five hours per week and earn an average of $3.50 per hour. Such employment may include driving senior citizens, delivering food to homebound seniors, or helping in various other aspects of senior services; and

"Whereas, Seniors benefit not only financially, but find their work rewarding, stimulating, and interesting. Through their work they meet people and participate in the mainstream of American life rather than sitting by on the sidelines and being spectators in life. We cannot allow these critically needed employment opportunities to disappear; now, therefore, be it

"*Resolved by the Senate (the House of Representatives concurring),* That the Congress of the United States be memorialized to maintain funding for the Senior AIDES Program for 1983; and be it further

"*Resolved,* That a copy of this resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, each member of the Michigan delegation to the Congress of the United States, and the President of the United States."

MEASURE PLACED ON CALENDAR

The Committee on the Budget was discharged from the further consideration of the resolution (S. Res. 447) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1606; and the resolution was placed on the calendar.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND (for Mr. SIMPSON), from the Committee on Veterans' Affairs, without amendment:

S. 2913. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children of disabled veterans, and to modify and improve the education and vocational rehabilitation programs administered by the Veterans' Administration and veterans employment programs administered by the Department of Labor, and for other purposes (Rept. No. 97-550).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HEFLIN:

S. 2922. A bill relating to defense of insanity, and for other purposes; to the Committee on the Judiciary.

By Mr. ROBERT C. BYRD:

S. 2923. A bill for the relief of Joseph Benjamin Pearson, formerly of South Africa; to the Committee on the Judiciary.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2924. A bill to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. RANDOLPH:

S. 2925. A bill to amend the National Labor Relations Act to give employers and performers in the performing arts rights given by section 9(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MOYNIHAN (for himself, Mr. HART, Mr. RANDOLPH, Mr. KENNEDY, Mr. LUGAR, Mr. BRADLEY, and Mr. CRANSTON):

S. 2926. A bill to create a National Commission on the Rebuilding of America which will conduct an inventory of our Nation's water and sewer systems, bridges, highways, and roads; develop a 10-year investment plan to rebuild the public improvements essential to economic development; make recommendations concerning changes in Federal laws and regulations that influence the pattern of Federal expenditures for public improvements; and for other purposes; to the Committee on Environment and Public Works.

By Mr. NICKLES:

S. 2927. A bill provide for the disposition of certain undistributed judgment funds awarded the Creek Nation; to the Select Committee on Indian Affairs.

By Mr. HATFIELD:

S. 2928. A bill to provide for equal access to public secondary schools; to the Committee on Labor and Human Resources.

By Mr. NICKLES (for himself, Mrs. HAWKINS, Mr. HUMPHREY, Mr. LAXALT, Mr. EAST, Mr. GRASSLEY, Mr. MATTINGLY, and Mr. THURMOND):

S. 2929. A bill to amend the Davis-Bacon Act; to the Committee on Labor and Human Resources.

By Mr. HATCH (for himself, Mr. QUAYLE, Mrs. HAWKINS, and Mr. HELMS):

S. 2930. A bill to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GORTON (for himself and Mr. JACKSON):

S. 2931. A bill to provide for the disposition of funds appropriate to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission docket No. 218 and for other purposes; to the Select Committee on Indian Affairs.

By Mr. D'AMATO:

S.J. Res. 248. Joint resolution to proclaim Ukranian Insurgent Army Day; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS (for himself and Mr. SARBANES):

S. Res. 468. Resolution to pay tribute to Earl Weaver; considered and agreed to.

By Mr. PERCY (for himself, Mr. BURDICK, Mr. HELMS, Mr. LUGAR, Mr. NUNN, Mr. QUAYLE, Mr. GRASSLEY, Mr. PRESSLER, Mr. DIXON, Mr. SASSER, Mr. HUDDLESTON, Mr. BOSCHWITZ, and Mr. ABDNOR):

S. Con. Res. 122. Concurrent resolution relating to the processed product share of U.S. agricultural exports; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HEFLIN:

S. 2922. A bill relating to defense of insanity, and for other purposes; to the Committee on the Judiciary.

FEDERAL INSANITY DEFENSE BILL

Mr. HEFLIN. Mr. President, the Hinckley verdict has caused a tremendous amount of discussion on the issue of insanity and its relationship to the criminal justice system. A large number of American citizens followed the accounts of the trial of John Hinckley and were shocked when the jury returned the verdict of not guilty by reason of insanity. This has evoked indignation on the part of many citizens that the criminal justice system is not living up to its responsibilities.

The Judiciary Committee has had extensive hearings on the relationship of the defense of insanity in the criminal justice system. I would like to commend Senator THURMOND, Senator SPECTER and their able staffs for the capable and thorough review in the hearings. It is a complex issue and the

hearings have brought forth scholarly and enlightening views from many diverse corners.

Five of the jurors in the Hinckley case appeared voluntarily before the committee. These jurors stated in substance that they heard testimony from the defense psychiatrists that Hinckley was insane and therefore not responsible for his acts; then they heard testimony from the prosection psychiatrists that Hinckley was sane and therefore responsible for his acts. After hearing this conflicting testimony, the trial judge charged the jury that the burden of proof was on the prosecution to prove beyond a reasonable doubt that Hinckley was sane. The judge's charge was the deciding factor in their decision.

My home State of Alabama and other States have statutes that recite in substance that every person over 14 years of age charged with crime is presumed to be responsible for his acts and that the burden of proving a defense of insanity is upon the accused, not the prosecution. The U.S. Supreme Court has upheld a similar statute from the State of Oregon.

I am convinced from hearings that the most important thing that can be done to prevent Hickley verdicts in the future is to change the burden of proof to the accused. Today, I am introducing a bill to toughen our Federal law regarding the insanity defense. Most significantly, my bill will place the burden of proving insanity squarely on the defendant. I believe this is the most important structural change that this Congress can make relative to the issue of insanity as a defense. My bill will basically follow the Alabama statute and create a presumption that every person over 14 years of age is presumed to be mentally responsible for his acts and change the burden of proof from the prosecution to the defendant when the defendant raised the defense of insanity.

My bill als provides for an automatic Federal commitment for one who is acquitted by reason of insanity, followed by a court determination of whether the person presents a risk of bodily injury to himself and others. Had John Hinckley been acquitted in Alabama in a Federal district court, he could have walked out of the courtroom until such time as the State could file a commitment proceding. The situation would be the same in most States which do not have automatic commitment procedures themselves. My bill will insure the public safety through an immediate commitment. It will insure the rights of the acquitted by a timely court determination, not more than 45 days after the verdict is rendered.

My bill also provides for direct commitment to the custody of the Department of Health and Human Services, or if the person is a veteran, to the Veterans' Administration. I believe that Federal commitment is imperative for those acquitted by reason of insanity under Federal law. While proposals have been made to turn custody of these individuals over to the State in which the Federal proceeding occurred, I do not believe this is proper policy.

The States should not be expected to take the care, custody, and responsibility for those who have been charged under Federal law, and I am not certain that the Federal Government has the power to force the States to do so. Furthermore, as Federal courts, and not State courts, will retain jurisdiction to review whether the acquittee can be released, it is more appropriate for a Federal facility to retain control.

Also, without a definite commitment to a Federal facility, the acquitted individual, who is in need of psychiatric treatment, runs the risk of being juggled back and forth between Federal and State facilities, or even possibly released, while the Federal and State entities wrangle over custody. A Federal disposition will insure Federal control, Federal treatment, and Federal responsibility.

Finally, my bill will maintain the issue of insanity as a separate affirmative defense. I realize that some of my distinguished colleagues have advocated the elimination of a separate insanity defense and, instead, allowing evidence of mental disease to go only to the issue of state of mind. But I have previously raised my concerns to this body that this test will only expand the insanity defense and probably permit a thousand Hinckleys to go loose.

Now, having heard the testimony of Federal judges, defense lawyers, psychiatrists, and State legislators, I am more than ever convinced that a mens rea test will only liberalize the insanity defense and open the door to unlimited psychiatric evidence. It would be used to reduce charges and to plea bargain on lesser included offenses and punishment.

I, therefore, advocate that the separate insanity defense be maintained with the burden of proof on the accused for the issue of insanity.

In closing, I am hopeful that Congress can move forward with this legislation, or some measure to shift the burden of proof. The American people are shocked, indignant, and disturbed. I believe it is incumbent on this Congress to rectify our Federal law and restore the confidence of the public.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Chapter 1 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"Sec. 16. Insanity defense

"(a) It is an affirmative defense to a prosecution for an offense against the United States that, at the time of the conduct alleged to constitute the offense, the defendant, as a result of severe mental disease or defect, lacked the capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law.

"(b) As used in this section, the terms 'mental disease or defect' do not include an abnormality manifested primarily by repeated criminal or otherwise antisocial conduct.

"(c) "Every person over 14 years of age charged with crime is presumed to be mentally responsible for his acts, and the burden of proving that he is mentally irresponsible is cast upon the accused. The accused shall have the burden of proving the defense of insanity by clear and convincing evidence."

(b) The table of sections at the beginning of chapter 1 of title 18 of the United States Code is amended by adding at the end the following: "16. Insanity defense.".

SEC. 2. (a) The first sentence of paragraph (a) of Rule 12 of the Federal Rules of Criminal Procedure is amended by adding after "guilty" the following: ", not guilty by reason of insanity".

(b) Rule 12.2 of the Federal Rules of Criminal Procedure is amended by deleting "defense of insanity" in subdivision (a) and inserting in lieu thereof "affirmative defense of insanity".

(c) If the issue of insanity is raised as provided by law, the jury shall be instructed to find, or, in the event of a nonjury trial, the court shall find, the defendant—

"(1) guilty;

"(2) not guilty; or

"(3) not guilty only by reason of insanity."

SEC. 3. Add to chapter 313 of title 18 of the United States Code the following new section:

"SEC. 4249. COMMITMENT OF PERSONS FOUND NOT GUILTY BY REASON OF INSANITY

"(a) In any case in which a person is charged with a federal offense in the course of which he caused, threatened to cause or created a substantial risk of serious injury to the person of another, and is found "not guilty by reason of insanity", he shall be committed by the trial court to a suitable facility of the Department of Health and Human Services, or if the person is a veteran, of the Veteran's Administration, for examination and treatment.

"(b) Within 45 days of the date of confinement for examination and treatment, the superintendent of the facility shall forward to the committing court an evaluation of the mental condition of the committed person and the court shall promptly thereafter hold a hearing to determine whether the person presents a risk of bodily injury to himself or others and whether the person is in need of treatment.

"(c) If the court finds by clear and convincing evidence that the committed person will not in the reasonable future pose a risk of bodily injury to himself or others, and is no longer in need of treatment, the court shall order such person unconditionally re-

leased from further confinement. If the court does not so find, the court shall order such person shall remain committed to a suitable facility of the Department of Health and Human Services or if the person is a veteran, the Veterans' Administration for treatment.

"(d) Where any person has been committed to a suitable facility of the Department of Health and Human Services or the Veterans' Administration, pursuant to subsection (c) of this section, and thereafter the superintendent of such facility certifies that: (1) the person is no longer in need of treatment; (2) in the opinion of the superintendent, the person will not in the reasonable future pose a risk of bodily injury to himself or others; and (3) in the opinion of the superintendent, the person is entitled to his unconditional release from the hospital; and such certificate is filed with the clerk of the committing court and a copy thereof served on the Untied States Attorney who prosecuted the person; the court shall, after due notice, hold a hearing on the mental condition of the person. If the court finds by clear and convincing evidence that the person is no longer in need of treatment and will not in the reasonable future pose a risk of bodily injury to himself or others, the court shall order such person unconditionally released from further confinement. If the court does not so find, the court shall order such person returned for treatment.

"(e) Where, in the opinion of the superintendent of the facility a person confined under subsection (b) of this section does not pose a risk of bodily injury to himself or others and may be effectively treated if released under supervision, the superintendent shall so certify and file and serve such certificate as provided in subsection (d) of this section. The court shall, after due notice, hold a hearing on the mental condition of the person. If the court finds by clear and convincing evidence that the person will not in the reasonable future, pose a risk of bodily injury to himself of others, the court may order the release of such person under such conditions for supervision as the court sees fit.

"(f)(1) A person committed or conditionally released pursuant to the provisions of this section may file a motion before the committing court for release or other relief concerning his custody.

(2) A motion for relief may be made at any time after a hearing has been held pursuant to subsection (b) of this section.

(3) Unless the motion and the files and records of the case conclusively show that the person is entitled to no relief, the court shall cause notice thereof to be served upon the prosecuting authority, grant a prompt hearing thereon, determine the issues, and make findings of fact and state conclusions of law with respect thereto. On all issues raised by his motion, the person shall continue to have the burden of proof. If the court finds that the person is entitled to his release from confinement, either conditionally or unconditionally, a change in the conditions of his release or other relief, the court shall enter such order as may be appropriate.

(4) A court shall not be required to entertain a second or successive motion for relief under this section more often than once every 6 months.

(5) An appeal may be taken from an order entered under this section to the court having jurisdiction to review final judgments of the court entering the order.

By Mr. MOYNIHAN (for himself and Mr. D'AMATO):

S. 2924. A bill to modify Federal land acquisition and disposal policies carried out with respect to Fire Island National Seashore, and for other purposes; to the Committee on Energy and Natural Resources.

FIRE ISLAND NATIONAL SEASHORE AMENDMENTS ACT OF 1982

● Mr. MOYNIHAN. Mr. President, I rise today, along with my distinguished colleague from New York, Senator D'AMATO, to introduce legislation to amend the Fire Island National Seashore Act (Public Law 88-587). This bill is similar to a bill (H.R. 6771) introduced in the House of Representatives on July 15, 1982, by Congressman THOMAS DOWNEY.

The Fire Island National Seashore was established by Congress in 1964 for the purpose of "conserving and preserving for use of future generations certain relatively unspoiled and undeveloped beaches, dunes, and other natural features within Suffolk County, N.Y., which possess high values to the Nation as examples of unspoiled areas of great natural beauty in close proximity to large concentrations of urban population * * *." Fire Island, located just 50 miles east of New York City, is composed of sandy beaches, salt marshes, and sand dunes, which are among the highest in the Northeast. Within the boundaries of the seashore there are 18 small, heavily developed communities, primarily consisting of single-family homes and cottages and the businesses serving them and day visitors.

The 1964 act grants the Secretary of the Interior limited powers of condemnation in order to further the purposes of preserving the natural features of the seashore. In 1980, I joined Senator Jacob K. Javits, one of the prime sponsors of the legislation creating the seashore, in requesting that the General Accounting Office (GAO) review the Nation Park Service's land acquisition and management policies and practices for the Fire Island National Seashore. The GAO report (CED 81-78) issued on May 8, 1981, made several suggestions concerning ways to improve land acquisition and management policy at the seashore.

The legislation I introduce today is designed to perfect certain provisions of Public Law 88-587. The bill allows the Secretary of the Interior to sell certain acquired property, with covenants to insure future conforming uses, and to retain the proceeds from such sales for additional seashore acquisitions. Second, it permits the Secretary to apply for an injunction or temporary restraining order to prevent any use of, or construction upon, property after the commencement of a condemnation action taken pursuant to the Seashore Act. Finally, it clarifies the power of the Secretary to condemn property, in the seashore's developed communities, that becomes the subject of a variance or exception under any applicable zoning ordinance.

The bill specifically implements two of the recommendations contained in the May 1981 GAO report. First, the GAO suggested that the National Park Service should sell unneeded land. This bill adds a new subsection to the law that provides for a "turn around" provision that would direct that certain lands in the developed communities, acquired as nonconforming properties and not needed to further the purposes of the act, be sold. Properties thus sold would carry with them restrictions to insure that their use conforms to all applicable seashore regulations. The Park Service is currently in the process of identifying which of its present holdings may be eligible for such a turnaround. The revenues from the sale of these properties would be used to create a "revolving fund" to pay for future Park Service acquisitions within the seashore.

Second, the GAO pointed out a need to clarify land acquisition policy within the seashore's developed communities. This bill addresses that issue by amending section 3(e) of the current law. The new language provides that the Secretary's authority to condemn property in the developed communities with approved zoning ordinances would be reinstated only if a property becomes the subject of a zoning variance or exception and the Secretary finds that such an exception or variance results in the property being used in a manner that is inconsistent with the Secretary's guidelines issued pursuant to section 3. Currently, the Secretary does not make the latter finding. As the GAO observed, existing law "does not create a variance process that would permit the Park Service to certify if a nonconforming structure might harm the resource or not." The GAO went on to say, "The Secretary's authority to suspend condemnation is not discretionary." The new language in the bill will make it clear that a zoning variance is not, in and of itself, cause for condemnation. Instead, only a zoning variance that results in a use inconsistent with the purposes of the act would be cause for condemnation. This would put the Park Service back into the business of resource protection, where it belongs.

Mr. President, as I previously stated, the intent of this bill is to simply perfect the existing law (Public Law 88-587). This is necessary not only to make the operations of the seashore more efficient but also to help alleviate some very real concerns being expressed by Fire Island landowners about land acquisition policies within

the seashore. It is for these reasons that I am today introducing this bill.

Mr. President, I should add that this matter was brought to my attention by the Honorable Thomas J. Schwarz, mayor of the village of Ocean Beach. Mayor Schwarz has long been dedicated to preserving the beauty of the natural features and comfortable settings that abound on Fire Island. I am confident that his legislation will serve to further such purposes.●

By Mr. RANDOLPH:

S. 2925. A bill to amend the National Labor Relations Act to give employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and empoyees in the construction industry, and for other purposes; to the Committee on Labor and Human Resources.

PERFORMING ARTS LABOR RELATIONS AMENDMENTS

● Mr. RANDOLPH. Mr. President, today I am introducing the performing arts labor relations amendments, legislation which amends the National Labor Relations Act to provide necessary changes with regard to the performing and entertainment industry. My bill would extend to the entertainment industry the same provisions currently covering workers in the apparel and industry. The performing industry and professional musicians are similar to the apparel and construction trades in that workers experience hardships and instabilities associated with short-term employment, often with many different employers, minimal job security, and additionally must travel frequently in order to find employment. These circumstances do not fit neatly into the work experience generally addressed by the National Labor Relations Act (Taft-Hartley). Because of this, organized individuals in the performing industry have had a difficult time with purchasers of their services. Under interpretations by the National Labor Relations Board, the purchasers of music, for example, cannot be compelled to recognize the musicians' collective bargaining agent, and the musicians are compelled to bargain individually since the purchasers under the National Labor Relations Board's interpretation, are not considered the employers of the musicians, even though the purchasers exercise the rights of employers in setting working conditions. The definitions of "employer" and "employee" are key to the Taft-Hartley Act. By denying that the purchasers are employers under the meaning of the act, this denies the workers the rights of employees.

My bill will correct these inequities by clarifying the employer under the National Labor Relations Act, as purchaser of musical performance services. It will also allow a performers union to collect dues after 7 days of employment, just as the construction industry may do now, as a recognition of the brevity of employment experiences. Under current law, the period is 30 days. The legislation would also authorize prehire agreements and legitimate collective bargaining.

I believe these amendments to the National Labor Relations Act are long overdue. I am pleased that there is similar legislation pending in the House of Representatives. I believe the unique circumstances of the performing industry must be recognized under the labor laws of the Nation. Musicians and other performers must be afforded fair and equitable treatment under the laws, not be penalized simply because the work experience is not of a permanent nature.●

By Mr. MOYNIHAN (for himself, Mr. HART, Mr. RANDOLPH, Mr. KENNEDY, Mr. LUGAR, Mr. BRADLEY, and Mr. CRANSTON):

S. 2926. A bill to create a National Commission on the Rebuilding of America which will conduct an inventory of our Nation's water and sewer systems, bridges, highways, and roads; develop a 10-year investment plan to rebuild the public improvements essential to economic development; make recommendations concerning changes in Federal laws and regulations that influence the pattern of Federal expenditures for public improvements; and for other purposes; to the Committee on Environment and Public Works.

REBUILDING OF AMERICA ACT OF 1982

Mr. MOYNIHAN. Mr. President, today I introduce, on behalf of myself and my distinguished colleagues from Colorado (Mr. HART), West Virginia (Mr. RANDOLPH), Massachusetts (Mr. KENNEDY), and Indiana (Mr. LUGAR), the Rebuilding of America Act of 1982. The purpose of the bill is to begin one of the most important tasks facing us in the coming two decades—rebuilding the public works infrastracture of our Nation.

The bill we introduce today would lead to the development of a national investment plan, setting priorities to guide Federal expenditures for public improvements over the succeeding 10 years. The national investment plan would be predicated on the facts and findings contained in a national inventory of public improvements.

To conduct the inventory and develop the plan, a National Commission on the Rebuilding of America would be established. The Commission would have 2 years to complete its work. As part of its responsibilities, the Commission would draw up a list of proposed changes in Federal statutes and regulations which would be necessary to implement the investment plan.

For some years, as our economic ills have come more and more apparent, there has been discussion of the need to reindustrialize America, to modernize the equipment and facilities of private manufacturing. Only recently, however—really within the past year—has attention begun to focus on the need to rebuild and recapitalize America, to repair, replace, and modernize the public improvements such as roads, bridges, and water supply systems without which productive economic activity cannot take place. And, surely, this rebuilding must accompany any attempt at reindustrialization.

A sampling of the past year's articles on the state of our public works infrastructure will suffice to underscore the alarm with which those who look even cursorily at the problem come to view it:

Time magazine, April 27, 1981, "The Crumbling of America."

The New York Times, July 18, 1982, "Alarm Rises Over Decay in U.S. Public Works."

Business Week, October 26, 1981, "The Decay That Threatens Economic Growth."

Newsweek magazine, August 2, 1982, "The Decaying of America."

I ask unanimous consent that the texts of these and several other articles on this topic be printed in the RECORD after my remarks.

Perhaps the most persuasive case for rebuilding America was made in a 1981 publication of the Council of State Planning Agencies, "America in Ruins," by Pat Choate and Susan Walter. These authors state the problem succinctly:

America's public facilities are wearing out faster than they are being replaced. Under the exigencies of tight budgets and inflation, the maintenance of public facilities essential to national economic renewal has been deferred. Replacement of obsolescent public works has been postponed. New construction has been cancelled.

The deteriorated condition of basic facilities that underpin the economy will prove a critical bottleneck to national economic renewal during this decade unless we can find ways to finance public works.

The following facts suggesting the magnitude of the problem emerge from "America in Ruins":

The 42,500 mile Interstate Highway System is deteriorating at a rate requiring reconstruction of 2,000 miles of road per year. Because of inadequate funding in the 1970's, over 8,000 miles of the system and 13 percent of its bridges are now beyond their designed service life and must be rebuilt.

The costs of rehabilitation and new construction necessary to maintain existing levels of service on non-urban highways will exceed $700 billion during the 1980's.

One of every five bridges in the U.S. requires either major rehabilitation or reconstruction. ($33 billion)

The 756 urban areas with populations over 50,000 will require between $75 billion and $110 billion to maintain urban water systems over the next 20 years. Approximately one-fifth of these communities will face investment shortfalls.

Over $25 billion in government funds will be required during the next five years to meet existing water pollution control standards.

Despite unmistakable evidence of such deterioration, the nation's public works investments, measured in constant dollars, fell from $38.6 billion in 1965 to less than $31 billion in 1977—a 21 percent decline. On a per capita basis, public works investments in constant dollars dropped from $189 per person in 1965 to $140 in 1977—a 29 percent decline. When measured against the value of the nation's Gross National Product, public works investments declined from 4.1 percent in 1965 to 2.3 percent in 1977—a 44 percent decline.

At least one half—and possibly up to two-thirds—of the nation's communities are unable to support modernized development until major new investments are made in their basic facilities that undergird the economy.

There can be no doubt that this problem is public in nature, national in scope, and appropriately attended to by the Federal Government. Geography, economics, and history all argue for Federal leadership.

Our public works infrastructure, or public improvements, as Jefferson so much more elegantly termed them, constitute an economic investment that is peculiarly public. These facilities epitomize what the economists call a "public good"—a commodity that everyone values, but that private enterprise is loath to supply because it is difficult or impossible to sell the goods in discrete units and to deny the benefits of the good to those who do not pay for them.

Our national experience, both remote and recent, demonstrates that public improvements are matters for the Federal Government. In 1807, the Senate, at the prompting of President Jefferson, asked the Secretary of the Treasury to prepare a plan "for the application of such means as are constitutionally within the power of Congress, to the purpose of making roads, for removing obstructions in rivers, and making canals; together with a statement of the undertakings of that nature now existing within the United States which, as objects of public improvement, may require and deserve the aid of Government." The following year, Secretary Albert Gallatin produced the landmark "Report on Roads and Canals," a 10-year plan calling for a federally supported system of roads and canals.

In 1824, the Congress directed Secretary of War John C. Calhoun to prepare surveys and plans for roads and canals. This legislation initiated the meritorious service of the Army Corps of Engineers in extending the development of the Nation.

The Federal Government is now responsible for fully one-half of all public works investment in the United States through grants and direct investment. We are therefore well-beyond the 19th century arguments about whether the Federal Government should be involved with "internal improvements." Extensive Federal involvement is an indisputable fact. However, our failure to coordinate planning and expenditure of these sums—nearly $25 billion annually—is also an indisputable fact.

A 1980 Commerce Department study, "Public Works Investment in the United States," made several interesting observations with regard to the regional allocation of Federal funds for public works:

The western and southern regions of the U.S. received over three-fourths of all direct Federal public works investment in 1972 and 1977.

On a per capita basis, the Mountain region received $97 per capita in 1977 and the New England region received $3 per capita.

From the Federal perspective, public works projects fall into three basic categories: First, federally owned; second, federally assisted but owned by a State or local government; and third, totally non-Federal projects. Most public works projects in the north-eastern region of the United States fall into the third category. Cities and States in the Northwest traditionally have built their canals, highways, and water systems without assistance from the Federal Government.

Clearly, the Federal programs through which the $25 billion is spent each year are not meeting the needs of a significant portion of our population. Those areas are instead struggling to meet their own needs, and in most cases, they are failing to do so.

It is not the purpose of this legislation to preempt State and local prerogatives in the matter of roads and water systems, but rather to help focus and coordinate Federal assistance.

I shall ask that hearings on this legislation be scheduled at the earliest opportunity in the Committee on Environment and Public Works. I would hope that even at this late date in this Congress, we can begin receiving comments on the legislation.

I ask that a copy of a summary of the bill and the bill itself be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2926

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be cited as the "Rebuilding of America Act of 1982."

FINDINGS

SEC. 2. The Congress finds and declares that—

(a) highways, roads, bridges, and water supply and sewer systems are public improvements vital to national development and prosperity;

(b) public works investment in the United States has declined at an alarming rate over the last decade and has resulted in the poor condition of much of our public improvements;

(c) the national costs of deteriorated public improvements are significantly higher than the costs of repairing, rehabilitating, improving or replacing existing facilities;

(d) the Federal government is responsible for one half of all public works investment in the United States through grants in aid and direct investment;

(e) the Federal government has no institutional means of formulating a comprehensive national public improvements plan and ordering national priorities; and

(f) direct Federal public works investment has been spread unevenly throughout the regions of the Nation.

POLICY

SEC. 3. It is the policy of the Congress that—

(a) states and local governments shall retain their traditional primacy in decisions affecting the use of land and water within their jurisdictions;

(b) the Federal government shall adopt practices and procedures that will lead to regionally balanced economic development;

(c) prior Federal involvement in a national public improvement shall be a primary consideration but not sole determinant in establishing future national priorities; and

(d) disincentives for maintaining, repairing, rehabilitating and replacing deteriorating national public improvements that now exist in Federal laws and regulations shall be corrected to encourage the most economically efficient pattern of investment in public improvements by the Federal government.

NATIONAL INVENTORY OF PUBLIC IMPROVEMENTS

SEC. 4. The National Commission on the Rebuilding of America, established pursuant to Section 7 and hereinafter referred to as the "Commission", shall conduct an inventory of existing major public improvements by region, state, and major metropolitan area of the United States and by type of facility, surveying especially—

(i) age and condition of the facility;

(ii) trends in the condition of the facility over the last twenty years and the relation of those trends to usage and maintenance schedules;

(iii) means of financing the maintenance, repair, rehabilitation, replacement, and new construction of facilities;

(iv) comparison of condition of public improvements within a region, state, or major metropolitan area and the pattern of economic development over the last twenty years; and

(v) trends in public expenditures for maintenance, repair, rehabilitation, replacement, and new construction of public improvements by region, state, and major metropolitan area and by level of government.

DEVELOPMENT OF A NATIONAL PUBLIC IMPROVEMENTS PLAN

SEC. 5. (a) The Commission shall develop a National Public Improvements Plan, hereinafter referred to as the "Plan", listing in priority order, needed maintenance, repair, rehabilitation or replacement of public im-

provements in each region, for the next ten and twenty years, or such other time periods as the Commission may deem appropriate, to sustain regionally balanced national economic development. Priorities shall be listed by type of facility for the Nation as a whole and for each region, and shall further consider the relative priorities among the various types of facilities. The Plan shall include recommended means of financing the needed maintenance, repair, rehabilitation and replacement, taking into account the least-cost life-cycle costs of developing and maintaining national public improvements and the appropriate mix of Federal, state and local resources to implement the Plan. The Commission shall consider prior Federal involvement, level of prior maintenance, and regional equity in its recommendations on financing the Plan.

(b) As an integral part of the Plan, the Commission shall suggest specific revisions in Federal laws, regulations and policies and further suggest alterations in the current responsibilities of Federal, state and local governments that may be necessary to reverse the pattern of disinvestment in national public improvements and sustain econmic development. The Commission shall include analyses and recommendations in accordance with policies set forth in Section 3 concerning:

(i) the establishment of the Federal capital budget;

(ii) changes in the imposition or allocation of excise taxes, user fees, other sources of public revenue, and borrowing authorities;

(iii) statutory or regulatory revisions in grants-in-aid, direct construction, or subsidy programs that would eliminate corruption, waste, and delay; that would encourage consideration of least-cost life-cycle costs in developing and maintaining facilities; and that would correct regional imbalances and disincentives for maintenance of facilities in Federal programs; and

(iv) the desirability and feasibility of scheduling public improvements construction and major renovation work in a manner counter to national or regional economic cycles in order to reduce the cost of such work and to dampen economic fluctuations.

PROCEDURES

SEC. 6. (a) The Commission shall submit to Congress and the President, not later than one year from the date of enactment of this Act, the national inventory of public improvements required pursuant to Section 4.

(b) Not later than 18 months after the enactment of this Act, the Commission shall submit to Congress and the President a draft Plan required pursuant to Section 5. For purposes of soliciting and considering public comment, the Commission shall further distribute the draft Plan to Federal agencies, all Members of Congress, major public interest groups, the Governors of the states, local officials, and make the report generally available to the public. All affected Federal agencies must submit written comments to the Commission.

(c) Not later than 24 months after the enactment of this Act, the Commission shall submit to the Congress and the President the final version of the Plan pursuant to Section 5.

(d) Unless the Congress enacts a joint resolution of disapproval of that portion of the Plan required pursuant to subsection 5(a) within 120 calendar days of receipt of the final Plan, that portion of the Plan shall be deemed to be approved by the Congress and shall be the policy of the Federal government; provided, however, that no statute or regulation of the Federal government, of a state or political subdivision thereof shall be in any way altered by Congressional approval of that portion of the Plan pursuant to subsection 5(a).

(e) The Senate Environment and Public Works Committee and House Public Works and Transportation Committee shall hold hearings on the proposed changes in existing law pursuant to Section 5 and shall report legislative proposals to the Senate and House of Representatives regarding such changes within 180 days of receipt of the Plan to permit full Federal implementation of the Plan.

ESTABLISHMENT OF THE COMMISSION

SEC. 7. (a) There is hereby established a National Commission on the Rebuilding of America which shall assess the condition of the national public works infrastructure, analyze causes of disinvestment on the national public works infrastructure, and evaluate the need to repair, maintain, replace, and expand the national public works infrastructure to support balanced development of the national economy.

(b) The Commission shall be composed of—

(1) the Secretary of the Army, the Secretary of Transportation, and the Secretary of Commerce; in the event the Secretary is unable to attend a meeting of the Commission, he may designate a representative but in no case may the designee be of a rank lower than assistant secretary;

(2) representatives of each of the following organizations: the National Governors Association, the National Conference of State Legislatures, the National League of Cities, U.S. Conference of Mayors, and the National Association of Counties; and

(3) five individuals from the private sector selected by the President who among them have experience in and knowledge of public investment financing, civil engineering, state and local budgeting practices, and regional planning.

(c) The President shall designate one of the five individuals as Chairman of the Commission. The Chairman shall be an individual of national recognition with experience in both public affairs and private enterprise. The Chairman shall be confirmed by the Senate.

(d) The Secretary of Housing and Urban Development, the Secretary of Labor, the Secretary of Agriculture, the Secretary of the Interior, and the Administrator of the Environmental Protection Agency or their designees shall attend the meetings of the Commission as non-voting members.

(e) The Commission shall be convened within 30 days of enactment of this Act.

DEFINITIONS

SEC. 8. For the purposes of this Act—

(a) The term "national public improvement" means the nation's systems of highways, roads, bridges, main water supply and distribution systems, and sewer systems;

(b) the term "facility" means any physical structure such as a highway, road, or bridge, or structure related to a water supply storage, treatment, and distribution system or sewage treatment and collection system which is owned and operated by the Federal government, a state, municipality, or other public agency or authority organized pursuant to State or local law;

(c) the term "maintenance" means routine and regularly scheduled activities intended to keep the facility operating at its design specifications;

(d) the term "repair" means the correction of a structural flaw in the facility without adding significantly to the design life of such a facility;

(e) the term "rehabilitation" means the correction of structural flaws in a facility so as to extend the engineered design life of such a facility;

(f) the term "replacement" means the reconstruction of an existing facility;

(g) the term "life cycle cost" means the total cost of constructing, operating, and maintaining a facility, including the interest on any borrowed funds, over the design engineered life of the facility;

(h) the term "State" means any State of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Northern Marianas Trust Territories, or the Virgin Islands, and

(i) the term "region" means one of the nine geographical groups of states defined by the Bureau of the Census in the Statistical Abstract of the United States.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. (a) There shall be a staff for the Commission consisting of no more than 30 full-time employees of the Federal Government, who shall be detailed by the various agencies upon request of the Chairman of the Commission: *Provided*, That nothing in this section shall be construed to permit an increase in the level of total Federal employment.

(b) The Army Corps of Engineers shall assign a Civilian employee as staff director for the Commission, with the concurrence of the Chairman of the Commission, and shall also provide office space, supplies, equipment, and necessary contracting and other support services to the Commission and its staff.

(c) The heads of all Federal agencies are directed to cooperate with the Commission to the maximum extent possible, and to provide, on a timely basis, such information as the Commission may request.

(d) There is hereby authorized to be transferred or reprogrammed from appropriations otherwise available to the Army Corps of Engineers, the Department of Transportation, and the Department of Commerce, the total of five million dollars to carry out the duties of the Commission during its tenure, said sum to be exclusive of salaries for staff.

(e) The private members of the Commission shall be compensated for their time engaged on Commission business at the daily rate established for employees at grade 18 of the general schedule.

THE REBUILDING OF AMERICA ACT OF 1982—SUMMARY OF THE BILL

The "Rebuilding of America Act" would establish a National Commission on Rebuilding America to devise a program for reconstructing and rehabilitating the nation's public improvements—the system of roads, bridges, water supply and sewer systems without which industry and business cannot function.

The bill states the Congress's findings that national public improvements have been deteriorating at an alarming rate, that there is a serious regional imbalance in the capability of such facilities to support economic activity and growth, and that the Federal Government has failed to develop a response to the problem.

Accordingly, the bill would establish a National Commission on the Rebuilding of America that would be required to:

(1) conduct an inventory of national public improvements by region, state, and

metropolitan area and by type of facility, with attention to the condition of the facilities, their sufficiency to support economic growth, and recent patterns of investment and deterioration (Section 2 of the bill); and

(2) develop a national public improvements plan, setting priorities and detailing the means of financing needed public improvements over the next ten and twenty years and further recommending changes in Federal laws, regulations, and policies that would permanently insure adequate investment, and clarifying the relationship among Federal, state, and local responsibilities for development and maintenance of public improvements (Section 3).

The 13-member Commission would be composed of five distinguished individuals from the private sector who are conversant with infrastructure needs, one of whom would be Commission chairman; the Secretaries of the Army, Transportation and Commerce; and representatives of the five major organizations of state and local elected officials (section 5).

The Commission would have two years and a budget of five million dollars to complete its work (Section 6). The $5 million would be drawn from existing appropriations and no new spending would be required to fund the Commission. The Commission's recommendations regarding investment priorities would become binding unless disapproved by the Congress within 120 days of their submission (Section 4).

The Army Corps of Engineers, which spearheaded the development of the Nation's public improvements in the 19th and early 20th centuries, would provide principal administrative support to the Commission. The Commission would be restricted to no more than thirty full-time employees, drawn from and paid by various Federal agencies. No new Federal employees would be hired.

HOW TO KEEP AMERICA FROM CRUMBLING

(By Roger J. Vaughan)

America is falling apart. Our roads are crumbling, our bridges are impassable and our sewers are backing up. Politicians have always believed in the talismanic power of public works to generate jobs and to gather votes, and the sheer size of the "infrastructure problem" presents an unprecedented opportunity to do both.

One study, provocatively titled "America in Ruins," estimates that we must quadruple our annual public spending from the present total of $70 billion if we are to prevent further deterioration. This would mean a 40 percent increase in all state and local taxes—a prospect that would drive the beleaguered taxpayer to something less democratic than a tax limitation referendum. It would grossly inflate construction costs, expose local governments to massive fraud and abuse and lead to inhumane cuts in other public services.

Fortunately, there are some solutions to this crisis that do not require an impossible increase in public expenditure. First, local governments can stop using scarce tax-exempt bond revenues to subsidize private investments. Last year, less than half of the revenues from bond issues were used for public works projects. The rest were used to finance private projects, including hospitals ($5.4 billion), pollution control for private corporations ($4.5 billion), industrial development ($3.2 billion). Cut these subsidies out and we could double public construction spending for public purposes. Private investment was generously encouraged under the 1981 Tax Recovery Act. Further public aid is redundant.

Second, state and local governments can start charging for the services they provide. There is no reason why citizens at large should pay for expensive water supply systems unless they use the water. Yet, in most states, gereral obligation bonds are used to pay for irrigation systems for farmers, orewashing for mining companies and green lawns in new suburban subdivisions. A water user fee will encourage greater cconservation, reducing the need for new reservoirs and water treatment facilities. Those who would argue that "user fees" are hard on the poor should compare them with the alternative of cutting back on social service spending to continue the present subsidies for inefficient development.

Third, we can stop giving away the local tax base through tax abatements and exemptions to attract business. There is no evidence that the $1 billion given away annually by states and cities to lure business has had any real effect. The resources would be better used repairing streets, improving the local education system and modernizing our ports.

These are not easy steps to take. But local officials must face some painful facts. It should be clear by now that the federal government will not help. While Washington wrestles with its own enormous deficits, it is unlikely to bail out states and cities from the results of their profligate subsidies to local businesses. Second, the tax-exempt bond market will not be a source of low-cost money in the foreseeable future. Interest rates will remain high, and investors will carefully scrutinize new issues. Fiscal gimmicks—from zero-coupon bonds to the tax leasing of public facilities to private corporations—will prove little more than placebos. With no cheap sources of funds, local governments will have to make some painful decisions about which projects really require a public subsidy.

Public infrastructure investments are an important ingredient for successful economic recovery. The past level of underinvestment is endangering growth. But we should use this "crisis" as an opportunity to define new priorities. Public funds should not be used to build convention centers, industrial parks and buildings for large corporations. A sound fiscal strategy and a clear allocation of responsibility between the public and private sectors are much more powerful development incentives than speculative projects and tax subsidies. Construction activities may provide local politicians with photo opportunities. But, in the long run, the local voters will be more impressed with a leader who can fill their potholes, hold down the cost of local debt and lay the foundation for sustained economic growth. And that will require saying "no" to a lot of pork-barrel projects and making the users of public facilities pay for the privilege.

(The writer is a consultant to the Council of State Planning Agencies.)

HOW NEW YORK DEALS WITH PERILOUS PROBLEM OF CRUMBLING BRIDGES

(By Bill Paul)

NEW YORK.—George Zaimes, in the five years that he has been this city's chief engineer, has become a skilled practitioner of urban triage.

Put bluntly, his main task is to keep New York's hundreds of decaying bridges from collapsing. Like a medic at wartime, he moves among the wounded and dying, assessing which patients can be saved, which need attention first, and which must be left to die. Ordering a wooden buttress here, a batch of plastic there, he buys time and sets priorities. The critical—but salvageable—cases come first.

It is one of the world's most-impossible—and thankless—jobs.

If he were to make a serious mistake in judgment, hundreds or even thousands of people might die. Yet those people whose safety he fights for complain loudly when he inconveniences them. And the politicians who would be held accountable if an accident occurred keep cutting his funds, making catastrophe no longer unthinkable.

The balding, 54-year-old Mr. Zaimes is a soldier in what is perilously close to a losing battle: The fight to save the nation's crumbling highways and bridges. Old age, neglect and continual battering by today's larger trucks have taken a heavy toll on America's roads and bridges. Nearly half of all highway bridges are deficient or obsolete, according to the Transportation Department. About half of the 43,000-mile interstate highway system, if not soon repaired, will have to be rebuilt. Thousands of miles of less-traveled roads have already been allowed to revert to a natural state by counties and towns. In all, the Federal Highway Administration estimates it will cost more than $230 billion over the next 13 years to rehabilitate the nation's primary roads and bridges.

. . . than in the aging and financially pressed city of New York. After more than 50 years of abject neglect, city officials awoke to the imminent dangers in 1977: Bridges and highways, some more than 75 years old, were rapidly deteriorating, with only a handful of untrained ironworkers regularly inspecting them. Mr. Zaimes, a state employee, was summoned to head a new city-state task force on bridge rehabilitation. His mandate: Rebuild, repair and, above all, prevent disaster.

But even with the hard-charging Mr. Zaimes, a beefed-up staff of 200 and hundreds of outside consultants now inspecting and repairing New York's 2,000-plus bridges, the city is still uncomfortably close to a major accident. The roads and bridges are decaying faster than money and manpower can be found to make needed repairs.

SAVING THE DAY

"I'd say we've headed off eight catastrophies in the last five years," Mr. Zaimes says matter-of-factly, chomping on a cigar in his World Trade Center offices.

Perhaps the most chilling near-miss involved the Queensboro Bridge, which carries motor vehicles and subway trains over the East River between Manhattan and Queens. Shortly after stepping in as head of the task force, Mr. Zaimes conducted the first inventory ever of all New York bridges. During that survey, he discovered that the two outer lanes of the Queensboro were about to collapse. "There were heavy trucks riding in those lanes and any one of them could have caused the roadway to give," he recalls. He immediately ordered the lanes closed and repairs begun. "We were very lucky no one died," he says.

Since then, Mr. Zaimes has built extensive files on all of the city's bridges. Each file contains a detailed report on the condition of the bridge made within the last two years by one of the 450 or so engineers Mr. Zaimes employs as consultants, as well as

photographs of the structure from every considerable angle. If a bridge has a serious defect requiring immediate attention, the file is pulled and placed with over 300 other "red flag" files.

STOPGAP MEASURES

It is one thing to identify problems, however, and quite another to correct them. At last count, Mr. Zaimes had been forced to close 19 bridges. At least 100 others aren't receiving the immediate attention they need. Dozens more are getting at best only "Band-Aid" repairs, such as the application of plastic sealants to retard erosion or the installation of wooden supports to reinforce cracked concrete columns. Sometimes all that can be done is to bore a hole at the end of a developing crack in a bridge's steelwork; this keeps the crack from spreading but doesn't prevent new cracks from forming.

Such half-measures are costly, Mr. Zaimes says. Right now, for example, seven viaducts on seven different expressways could be preserved if $30 million were spent to chip away and replace the top layer of pavement. Acid from snow-melting salt is leaking through the worn pavement and corroding the underlying steelwork. Instead, Mr. Zaimes settled for a cheaper asphalt repaving, which gives a smoother ride but still allows acid to leak. Mr. Zaimes figures that if he can't fix the viaducts properly for another 10 years, it will cost $150 million to replace all the steel rotted by then. "This is agony," he says. "Agony."

Quite likely, Mr. Zaimes says, many other bridges will be closed over the next couple of years for lack of repair funds. He says he could do the needed work in a decade, given $250 million a year. (When he first came to town, he was give that much to work with. But today, thanks primarily to cuts in federal funding, his budget has been more than halved.)

The chief culprit is an "obligation ceiling," imposed for the past two years by the Reagan administration, that limits state spending on road and bridge repair to roughly half the level appropriated by Congress. In New York City's case, if has meant a loss of $100 million in federal funds in the current fiscal year.

"If we can't spend it, what the hell good is allocating it?" Mr. Zaimes fumes.

For a while this spring, Mr. Zaimes thought he could recover part of that lost federal money. Drew Lewis, the Transportation Secretary, had proposed a five-cent-a gallon gasoline tax increase, with four of those five cents earmarked for road and bridge repair. New York City's share would have amounted to about $35 million.

His hopes were dashed in April, when the president tabled the plan, deciding he couldn't ask Congress to raise taxes at a time he was urging it to trim the federal budget.

New York State's fiscal problems have forced it, too, to cut back funding for bridge and road repair. The combined effect has meant Mr. Zaimes has had to cannibalize, his own programs. This year, for example, he received only $6 million of the $24 million in federal money needed to fix viaducts on the Henry Hudson Parkway north of Manhattan. To make up the difference, he postponed repairs on half a dozen other bridges

"RACE AGAINST TIME"

Repairs on the Henry Hudson couldn't wait. The parkway is at the northern end of the West Side Highway, one of Manhattan's two north-south arteries, and it must be fixed before problems on Franklin D. Roosevelt Drive, the other artery, become critical. It will take at least two years to complete work on the Henry Hudson, by which time the FDR Drive viaduct between 79th and 96th Streets will be becoming unsafe. "I'm in a race against time," Mr. Zaimes says. "If I gut the FDR viaduct before I've got the Henry Hudson fixed, I'll strangle the city."

He shudders at the thought of beginning the FDR Drive work, which will entail closing some lanes and rerouting traffic onto city streets that crisscross some of the world's most expensive real estate, "I know that residents aren't going to like it and there"ll be a big stink at City Hall," Mr. Zaimes says.

The city is so strapped for funds that Mr. Zaimes is giving serious consideration to a scheme that would have done P.T. Barnum proud. Next year, the centennial of the Brooklyn Bridge, he proposes cutting up all the rotten wire that he plans to replace on the bridge and selling small mounted lengths of it as souvenirs. If he cut 500,000 pieces of wire and charged $50 each, he figures he could garner $25 million. So far, city officials have been cool to the plan, but he keeps pushing. "I'll do anything to raise money," he says, "I'm fighting a war here."

DIFFICULT CIRCUMSTANCES

Mr. Zaimes's 54th-floor office at the World Trade Center in some respects resembles a war room. A hard hat is always within reach. A blackboard stands next to his desk so that he can diagram logistical problems. The desk itself is weighted with paper—mostly communiques from Washington and Albany. A slogan on the wall attests to his frustration: "When all is said and done," it reads, "more is said than done."

Mr. Zaimes's colleagues in and out of government credit him with doing the best job possible under the circumstances. "George is an excellent man, but even Superman would have a difficult time if he were up against what George is," says Arthur Asserson, the city's construction coordinator for transportation. Janet Weinberg, executive director of a citizens' group, Transportation Alternatives, adds, "I wouldn't want his job for anything."

Mr. Zaimes' wouldn't argue with that assessment. "I'm burning out and so is my staff," he says. "I don't know how much more I can take."

At any moment in his typical 12-hour days, a crisis can erupt, and he is on 24-hour call for emergencies. A few weeks ago, for example, a dangerous crack appeared on the Manhattan Bridge which carries vehicles and subway trains between Manhattan and Brooklyn. The fissure was in a vertical steel beam, directly under the subway tracks. Mr. Zaimes faces a tough decision. Should he remove the subway trains, the vehicles—or both—from the bridge until the beam is fixed? Given the city's traffic problems on even a normal day, he knew that any rush-hour diversion would cause massive snarls.

After consulting with transit officials, he rerouted the subways but allowed the cars to continue traveling over the bridge. "I was very close to taking the cars off, too," he recalls.

The Manhattan Bridge is a textbook case of the physical decay Mr. Zaimes's task force must contend with. While the bridge is still safe to use, it is notably weaker than the day it opened over 73 years ago. Years of neglect have resulted in the hopeless clogging of the drains that once siphoned rain-water and melting snow off the bridge. As acid from the salt spread on the pavement collects, it eats into the steel structure.

Compounding the acid corrosion—a problem shared with all other city bridges—is weakening caused by the subway trains traveling in the Manhattan Bridge's outer lanes. Their weight causes excessive twisting of the steel work and eventually, cracking. To help lessen the strain, Mr. Zaimes's crews have begun padding the bridge with neapreme, a sort of super-sturdy "Silly Putty."

Between crises, Mr. Zaimes presses on with the drudgery of paper work and public relations. He personally answers complaints from citizens—such as bike riders protesting the closing of their lane during repairs on the Queensboro Bridge. He also plays host to local Congressmen, pitching for more federal funds.

When pressures get too great, Mr. Zaimes retreats to the Bronx delicatessen that his 87-year-old father still owns. "Sometimes I just go up there and whack hell out of the meat," he says. "It helps."

More often, he grabs his hard hat and tours trouble spots. On a recent outing he bobbed out on the East River in a rubber dinghy to view the underbelly of the decaying FDR Drive viaduct. There, steel rods that should span the roadway hung down into the murky water like rusty Spanish moss. Then, on to the Williamsburg Bridge to examine anchorage cables buried in cement at the base of the bridge's Manhattan side. When he was out of earshot, one of the workmen said of Mr. Zaimes: "The guy cares, you know what I mean? It's more than a job to him."

[From Newsweek, Aug. 2, 1982]

THE DECAYING OF AMERICA

(No one noticed the spidery crack inching its way along the concrete casing of New York City's 65-year-old water tunnel No. 1. But one weekday morning, 600 feet below the Bronx, the steady torrent of water loosened one chunk of concrete, then another, then another, until an underground landslide closed the tunnel off. Manhattan's water trickled to a stop. Within minutes pumps in high-rise buildings, trying to compensate for the loss of pressure, caused a widespread blackout. Elevators stopped at mid-floor. Subways rolled dead, their antiquated electrical backup systems unable to handle the sudden load. Sewers backed up. Fires raged. Before rescue workers could come to their aid, thousands of panic-stricken New Yorkers headed for the only means of escape—the city's dilapidated bridges. Overloaded with humanity and cars, the 73-year-old Queensboro bridge cracked, groaned and toppled into the East River.)

That vision of urban apocalypse isn't farfetched. America's infrastructure—the vast, vital network of roads, bridges, sewers, rails and mass-transit systems—is heading toward collapse. The decay is most acute in older industrial cities, but clogged highways and strained water systems also threaten to strangle booming Sun Belt towns, and even in dusty rural communities, potholes batter chassis and jangle motorists' nerves. Two weeks ago, in one 24-hour period, an 80-year-old earthen dam burst in Colorado, sending a wall of water through the town of Estes Park, and a major aqueduct broke in Jersey City, N.J., leaving nearly 300,000 residents without drinkable water for six days. Says Robert Harpster, executive director of the Iowa League of Municipalities, "Our sewers leak like sieves, our mass transit is in

bad shape and our roads look like the Ho Chi Minh trail."

Ever since the canal boom of the 1800's, public works have shaped the nation's character and accommodated its growth. But today one-quarter of the interstate-highway system is worn out and needs resurfacing. One-half of Conrail's rails and roadbeds are seriously decayed. Half of all American communities cannot expand because their water-treatment systems are at or near capacity. One-fifth of the nation's bridges are so dangerously deficient they are either restricted or closed. "We're living on our laurels of the 1950s and 1960s," says Transportation Secretary Drew Lewis. Agrees Pat Choate, co-author of "America in Ruins," a study of the crisis for the Council of State Planning Agencies: "We've been squandering a major part of our national wealth."

All told, the cost of needed repairs around the country could run as high as $3 trillion. But the bills are coming due at a time when there is little money to spare. The Reagan Administration favors cutting Federal aid for highways, bridges and pollution-control projects and plans to phase out mass-transit operating subsidies by 1985, leaving state and local governments to pick up the slack. For their own part, many states and cities are already in fiscal extremis and will be forced to spend more and more scarce funds for simple operating costs as Federal aid to other programs diminishes. Money is even tighter where strict local tax-cut measures are in effect. Under Proposition 2½, for example, Massachusetts is devoting only .5 percent of its budget this year to maintenance and repair—a policy one expert on the state's budget, Mark Ferber, calls "pennywise and pothole foolish."

At the same time, record interest rates have driven the cost of issuing municipal bonds—the traditional means of raising capital funds—prohibitively high. And other recent Federal policies have hardly helped. All Savers certificates, Individual Retirement Accounts, accelerated depreciation and "safe harbor" leasing laws have all reduced the incentives for individuals and corporations alike to invest in tax-exempt municipal bonds. "The U.S. Treasury is slowly choking the ability of states to raise money," charges Massachusetts bond counsel Francis X. Meany. Some economists warn that Reagan's plan to stimulate the growth of the private sector through tax cuts could backfire if the roads, bridges, rails and water systems that businesses depend on are allowed to collapse from too little government support.

Human toll: Already the nation's decaying physical plant is costing Americans dearly. In Houston, for example, city planners estimate that motorists pay a "traffic congestion tax" of $800 a year in time and gasoline wasted on the city's snarled expressways. U.S. Steel spends an extra $1 million a year detouring its trucks around a closed bridge in Pittsburgh. TRIP (The Road Information Program), a highway-in-industry group, estimates that the aggregate cost of the private sector of bad roads and bridges is $30 billion a year-for everything from broken axles to lost business. Even worse, the infrastructure crisis is exacting a heavy human toll. A recent Federal Highway Administration study found that spending an extra $4.3 billion to fix dilapidated bridges and roads could save 480,000 injuries and 17,200 lives over fifteen years.

There are nearly as many reasons for infrastructure decay as there are potholes. Some of it stems simply from old age. Built largely in the 1950's, the interstate-highway system, for example, was designed to last only 25 years. Many roads, bridges and water systems are also bearing far greater burdens than they were ever expected to accommodate. Boston's six-lane Southeast Expressway, built in 1959 for 75,000 cars a day, is now an axle-crunching obstacle course that carries 150,000 cars daily. And everywhere, age and abuse have been compounded by neglect. Investment in public works by all levels of government has dropped by more than 25 percent since 1972 (chart, page 18). As the fiscal crises of the 1970s hit, many local officials balanced budgets by canceling preventive maintenance and deferring needed repairs. "In the choice between laying off police or maintaining sewers," says Lincoln, Neb., Mayor Helen Boosalis, "the sewers always lose."

Although billions of dollars have been spent on public works in recent years, the vast bulk of expenditures has gone not to maintain old facilities but to build ambitious new pork-barrel projects, often determined more by politics than actual need (page 18). Says E. S. Savas, Assistant Secretary for Housing and Urban Development, "Have you ever seen a politician presiding over a ribbon-cutting for an old sewer line that was repaired?" All too often the cost of such projects is wildly inflated by corruption on the part of construction firms, labor unions, public officials and organized crime—all at the taxpayers' expense (page 17). Meanwhile, the longer the repairs are put off, the costlier they become. "Deferred maintenance becomes reconstruction," says Choate's co-author, Susan Walter.

One big obstacle to good infrastructure maintenance is the very system that controls it. Responsibility for maintaining public facilities rests with more than 100 Federal agencies, as well as the 50 states, more than 3,000 counties and thousands of local agencies. In Cleveland four separate municipal departments share authority over hundreds of dilapidated bridges. In Eaton Rapids, Mich., city manager Dennis Craun has compiled a 120-page booklet of all the Federal regulations that pertain to a 90-year-old one-lane bridge that is not strong enough to carry trucks or buses—but is nevertheless listed in the National Register of Historic Places, and therefore cannot be destroyed. "I'm about at the point where I'd consider driving an 80,000-pound tanker over it," he says. "That would do the trick."

Citizen opposition has also stood in the way of preventive maintenance, since road, bridge and water-main work can be inconvenient as well as costly. But as the decay worsens, some citizens are taking the lead—and some deteriorating facilities have become key political issues. Last March women in Grosse Pointe Farms, Mich., got so fed up with the potholes on Detroit's Lakeshore Road that they donned hard hats and hockey helments and fixed them. U.S. Representatives Barney Frank and Margaret Heckler are fighting a re-election battle over a 76-year-old bridge in redistricted Fall River, Mass. Frank recently brought the chairman of the House Public Works and Transportation Committee to visit the bridge; Heckler brought Drew Lewis. "If this is what it takes to get action, I'll take it," says bemused Fall River Mayor Carlton Viveiros.

"Bumpy Rug": Aware of the growing potency of pothole politics and the genuine dangers of serious breakdown, many city officials are belatedly fighting to save their public facilities—at no small cost to city coffers. Chicago's Mayor Jane Byrne has announced a two-phase, $187.5 million plan to rebuild 22 bridges and viaducts, 90 intersections and 46 railroad crossings. New York City has embarked on a ten-year, $34.7 billion program to renovate streets, bridges and mass transit and work has begun on a third water tunnel. In Pittsburgh Mayor Richard Caliguiri is devoting $60 million of his city's $225 million budget this year to maintenance projects—deferring work on recreation programs. "We can no longer sweep these problems under the rug," says Cleveland's director of public utilities, Edward R. Richard. "The rug is getting too bumpy."

A sampling of the nation's worst infrastructure problems:

Highways. Still 1,500 miles short of completion, the once proud 40,500-mile interstate-highway system will need $33 billion worth of repairs in the next decade. But the Federal Highway Trust Fund, which supported the system throughout the 1960s on ever-burgeoning revenues from the 4-cent-a-gallon Federal gasoline tax, has been sorely depleted with the advent of smaller, more fuel-efficient cars. Conditions are even worse on the larger network of primary and secondary roads. The U.S. Department of Transportation (DOT) estimates that the work needed to keep nonurban highways at current levels will cost more than $500 billion over the next ten years—more than Federal, state and local governments combined spent on all public works in the 1970s.

City streets. It takes 100 pounds of asphalt to fill the average pothole, and the record-cold winter of 1982 left a plague of them—1 million, by some counts, in Chicago alone. But city officials are finding that it can also be costly to leave them unrepaired. Two years ago, after paying $20 million in negligence claims, New York City enacted a pothole "prior notice" law, exempting it from responsibility for accidents caused by any street defect not reported at least fifteen days earlier. Not to be thwarted, a citizens group called Big Apple Pothole and Sidewalk Protection Corp. sent an army of workers out to document every crack and rut in Manhattan, Brooklyn and the Bronx.

Bridges. Nationwide, 248,500 bridges—45 percent of the total—are structurally deficient or functionally obsolete. But DOT estimates that needed repairs could cost as much as $47.6 billion. Meanwhile, two Federal programs are supposed to provide for periodic inspections and aid to the most dangerous bridges, but a 1981 General Accounting Office report found that many national safety standards were not being met. Heavy trucks continue to barrel over the Mountain Avenue Bridge in Malden, Mass., for example, even though it was "posted" at a maximum of 6 tons in 1977.

Mass transit. Believe it or not, conditions on subways and buses are actually improving in many cities. Since 1979, when two Philadelphia buses caught fire on the road and only 26 of 108 subway cars were operating on the Broad Street line one night, the Southeastern Pennsylvania Transportation Authority (SEPTA) has raised capital spending from $17 million to $110 million and even brought aged repairmen out of retirement to teach a new generation of mechanics how to fix its 1920s car motors. New York City's Metropolitan Transportation Authority (MTA) has embarked on a five-year, $5.8 billion renovation program, though frequent glitches with its new buses and subway cars have actually compounded maintenance problems in the vintage repair

shops. Meanwhile, critics remain leery of the rescue plan, since the financing includes $1.6 billion in bonds to be paid off by farebox revenues. MTA Chairman Richard Ravitch "may be known in the future for two things," says Gene Russianoff of the watchdog group Straphangers Campaign, "rebuilding the system and the $3 fare."

Railroads. Tempers have been rising along with fares on U.S. commuter rails. In 1980 half the ridership of the Long Island Rail Road joined in a one-day strike, refusing to show their tickets. "We pay ransom for the privilege of being hermetically sealed in dirty, smelly cars," says Lorraine Pirro, a citizen adviser to New York's commuter rails, which will spend $1.3 billion on capital improvements over the next five years. Many systems are saddled with ancient equipment never designed for stop-and-go commuter service. "Edison Cars," dating back to 1923 when Thomas A. Edison threw the first switch, still make up 10 percent of the New Jersey Transit Corp.'s fleet.

Commuter headaches will be compounded later this year when Conrail gets out of the commuter-rail business, leaving local transit agencies completely responsible for 210,000 riders daily. SEPTA officials warn that unless contracts and work rules are renegotiated (the average Conrail worker earns $40,000 a year), they may have to close down the area's thirteen commuter lines. The precedents set by public takeover of bankrupt freight lines are not encouraging. In Michigan, for instance, half of the 931 miles of freight track run by the state lies dormant in disputes over subsidies.

Water and sewage systems. Every day more than 1 million gallons of tap water disappear through leaks beneath the streets of Berwyn, Ill. In Milwaukee there were 170 water-main breaks in January alone. And in New York City, though the complete failure of one of the two giant water tunnels is unlikely, neither has ever been inspected. Experts say a breakdown of some kind is all but certain within the next twenty years. Sometimes made of brick, wood or cast iron and often more than 100 years old, America's sewer and water systems are subterranean time bombs. Choate estimates that 756 major urban areas will have to spend $75 billion to $110 billion to maintain their water systems over the next twenty years, and just meeting pollution-control standards will cost $25 billion over the next five years.

Dams. Like the earthen dam that burst in Colorado earlier this month, many U.S. dams are tiny, aged and privately owned—yet their collapse would jeopardize hundreds of lives and homes. State and Federal officials didn't even know where many of the dams were until the 1977 collapse of a dam in Toccoa, Ga., spurred Jimmy Carter to send the Army Corps of Engineers out to survey them. In a four-year study the Corps counted 68,000 non-Federal dams. The Corps inspected nearly 9,000 dams in highly populated areas and found roughly one-third to be unsafe, with 130 in danger of imminent collapse. But even where repairs were ordered, they have often not been carried out, because the dams' owners either couldn't afford them or couldn't be found.

Public buildings. "Hardly a week goes by that we don't have some kind of roof problem at one of our 29 fire stations," says St. Louis budget director Jack Webber, whose city-hall roof nearly fell in on him last year. In New York City nearly half of the 1,087 public schools are at least 50 years old and many suffer rotted windows and outdated plumbing and electrical systems. Worse still are the nation's 3,500 prisons, as many as 3,000 of which need substantial renovation or expansion. In Texas 3,800 inmates of the state penal system sleep in tents for lack of space. In some states prisoners are being paroled early to ease overcrowding.

Growing pains. Public works in Sun Belt cities have not kept up with population growth. In sprawling Phoenix a scant 36 miles of freeway now serve a population of 1.5 million, 97 percent of whom travel by car. Every day between 1970 and 1980, roughly 250 more cars joined Houston's expressways, and traffic there has become so chronically awful—with "rush periods" lasting twelve hours a day—that some executives now commute by helicopter (page 53). Texas planners figure it will take 300 miles of new freeway and 1,400 miles of streets, costing $16.2 billion, to bring traffic conditions back to what they were in 1975.

Water is also a serious problem in the West and Sun Belt, where overtapping of ground resources causes more and more giant fissures and sinkholes. Meanwhile, the nation's ports have not kept up with the increasing demand for coal exports. At one point, 15 percent of the world's bulk coal was sitting useless at the port in Hampton Roads, Va., due to congestion in unloading.

Solutions: How will the staggering infrastructure needs be met? Proposed solutions range from a gigantic New Deal-style public-works program to increased user fees, but none will be easy. One of the most sensible ways of raising highway revenues, for example, would be to boost the Federal gas tax, which has been 4 cents a gallon since 1959. Transportation Secretary Lewis has proposed doubling the gas tax and raising levies on heavy trucks, to generate $5 billion annually. But the powerful automobile and trucking lobbies oppose Lewis's plan to use $1 billion of that revenue for mass transit, and President Reagan has vetoed the idea for now.

On their own, 31 states have raised state gas taxes and other fees in recent years and several are considering more road tolls. By charging an average of 2.4 cents per mile, for example, the 40-year-old Pennsylvania Turnpike pays for resurfacing 30 to 50 miles a year. Many communities are also raising rates for water and sewer services—systems experts say should be self-supporting. Often that requires creating a separate local agency, such as Boston's acclaimed five-year-old Water and Sewer Commission. The danger, critics warn, is that the proliferation of local agencies will diffuse accountability and multiply administrative costs.

Private businesses are also assuming a greater share of the burden—voluntarily or not. At the Sycamore housing development in Danville, Calif., where Proposition 13 prohibits raising taxes to pay for basic services, a local approval board is asking the developer to provide two new water tanks, a freeway interchange, a new elementary school and a new fire engine. The cost, of course, ultimately gets passed on to consumers: the town's decree is raising the cost of each new home there by $15,000. Private donors are helping to renovate the crumbling Statue of Liberty and restore San Francisco's 107-year-old cable cars, which will shut down this September for twenty months of repairs. And in some cities business leaders are donating management expertise. "If Cleveland goes to hell, we all go to hell with it," says attorney Carlton Schnell, chairman of a coalition advising the city on its infrastructure needs.

Dabbling: In desperation, local officials are experimenting with a wide variety of other revenue-raising schemes, including selling off public buildings. The Port Authority of New York and New Jersey is considering leasing vacant office space to raise funds for a "bank for regional development" that would lend money to local governments for infrastructure needs. Others are dabbling in "leveraged leasing." New York's MTA sold 620 buses and ten commuter-rail cars to Metromedia, Inc., at $15.5 million over the cost. Metromedia will take the tax depreciation on the equipment and lease it back to the MTA, which will use the net gain for operating costs. Atlanta. Officials are considering an even more complicated plan. A local Lockheed plant would build a plane for a Japanese trading company, take payment in Japanese-made subway cars, then sell the cars to the transit agency for less than their usual cost.

On a larger scale, New York investment banker Felix Rohatyn has suggested a revival of the Reconstruction Finance Corp., which would issue $25 billion in federally backed loans to cities to help maintain their facilities. Aware that the infrastructure crisis coexists with record-high unemployment, the House Education and Labor Committee has proposed a massive five-year, $11 billion public-works program to provide jobs ranging from painting bridges to patching potholes. And a growing number of economists lawmakers are calling for creation of a "national capital budget" that would fund infrastructure projects outside the Federal budget, where they are currently vulnerable to spending cuts.

Whatever the mechanism—higher taxes, higher user fees or higher consumer prices—the cost of repairing the nation's physical plant will inevitably come out of citizens' pockets. Already, the problems of decay and growth have pitted East against West, rural residents against city dwellers, truckers against straphangers and almost everyone against the Federal government.

Canoes? Federal allocation formulas currently favor building urban, not rural, highways—even though the expense of clearing city land can push the cost per mile as high as $500 million. Allocation formulas also favor "multiple use" waterways, rather than city water and sewer systems. "If I could fugure out a way to put canoeists down there, maybe our problems would be solved," jokes New York Mayor Ed Koch. Reagan's plan to phase out mass-transit operating subsidies while continuing to fund transit capital needs has angered people on both sides of the issue. And because of opposition, the Administration is likely to table its New Federalism plan for roads that would have returned to the states their share of Federal gas taxes—along with the responsibility for maintaining highways. "Based on the amount of money it generates in gas taxes, Montana would barely pay for the signs on its highways, let alone the highways," says Lewis. "You can say fine, don't build any interstates in Montana, but what do you do when you get to the Montana border—get a horse and wagon?"

In general, the Reagan Administration believes that state and local governments rely far too heavily on the Federal government for their infrastructure needs. "The fact that there are potholes all over America doesn't mean that it's time for the Federal government to pay for filling them," says HUD's Savas. Historically, the pattern has been for the Federal government to build major public works, but leave them to states

and cities to repair—and some local officials are beginning to decide that they can't afford the Federal largesse. Cincinnati, for example, has adopted a policy of "planned shrinkage" of its physical plant where possible—even turning down Federal grants to concentrate its own funds on maintaining what it has.

Scaling back: As the national budget debate increasingly becomes one of guns vs. butter vs. asphalt, planned shrinkage may become the public-works policy of the future. Already, officials doubt that the interstate-highway system, as originally conceived, will ever be completed. The Federal government has indefinitely postponed building the once planned $3 billion rail and road system for the congested Houston area and the proposed $2.1 billion "people mover" in Los Angeles. Not a single road links Juneau to the rest of Alaska, but the cost of building one may be too high even for that oil-rich state.

What will such decisions mean for the boom towns of the future? And if older cities are allowed to decay and contract, can citizens who "vote with their feet," as Reagan has suggested, hope to find better conditions anywhere else? In past decades public works made America a nation of highways, of automobiles, of vital cities and water systems that are the envy of the world. Today's hard choices will determine the shape of America in the decades to come.

[From the New York Times, July 18, 1982]

ALARM RISES OVER DECAY IN U.S. PUBLIC WORKS

(By John Herbers)

In Pittsburgh, the United States Steel Corporation contends that it is paying at least $1 million a year to detour its trucks 26 miles around a major bridge that the state closed two years ago for lack of repair.

In Albuquerque, motorists are up in arms because sewer lines are crumbling under the streets, many of which have become impassable as the city struggles to make piece-by-piece replacements.

In Houston, the magazine Texas Monthly asserted that it had counted 1.5 million potholes in a city that is a center of great wealth.

In New York, broken water mains, subway failures and the deterioration of other facilities above ground and below have become so common that the seemingly mundane subject of "the infrastructure" has become a prominent issue for both the city and state governments.

News of a neglected and decaying infrastructure—public facilities such as water systems, sewers, streets, highways, bridges and rails, which undergird life and commerce in every community—has taken on a new prominence on the national scene at a time when the country is suffering from a recession, high unemployment, decline of much of its basic industry and the reduction of public services by governments at all levels.

The situation is similar to that of a family whose income has been cut, that is behind on the mortgage payments and unable to buy shoes for the children, and then learns that tree roots have plugged the drainage pipes, the furnace must be replaced and termites have weakened the foundation of the house.

In the urban policy report the Administration made public last week, President Reagan said he wanted to do something about the infrastructure problem but had not decided what.

Meanwhile, a bipartisan coalition is growing in Congress to force action by the national Government, partly on the ground that Mr. Reagan's goal of revitalizing American industry cannot be reached until something is done about inadequate public facilities. Many Democrats say that repairing public works would provide jobs for many of the unemployed.

One difficulty is that public works projects have been so fragmented between the various levels of governments that no one knows the extent of the decay, or how much money would be needed for repairs and new construction necessary to support the economy and quality of life at reasonable levels.

Only in the past year or so has the concern of policy makers about the neglect of basic public works grown urgent. Studies by George E. Peterson of the Urban Institute and by Pat Choate and Susan Walter of the Council of State Planning Agencies documented the inadequacy of public facilities, not only in older, fiscally troubled cities such as New York and Boston but in suburban and rural communities in every region of the nation.

Their findings have been confirmed and expanded by a number of Government agencies and by Congressional investigations. These are some of the more serious deficiencies cited:

Obsolete and decaying bridges. The Transportation Department recently classified 45 percent of the nation's 557,516 highway bridges as "deficient or obsolete." Replacement or repair could cost $47.6 billion, the department said.

Crumbling highways. The 42,000-mile interstate system, begun in the 1950's and not yet completed, is deteriorating at a rate that would require reconstruction of 2,000 miles a year, in addition to a backlog of 8,000 miles in need of rebuilding that accumulated because of cuts in financing in recent years. The condition has contributed to costly traffic jams on the expressways of most major urban areas.

Deteriorated rail facilities. The condition of roadbeds and rolling stock of Conrail and other rail systems is so poor that some officials say there are no reliable estimates available on the cost of replacement and repair. But frequent derailments and delays in shipments attest to the need, according to a range of officials.

Leaking water and sewer mains. The Urban Institute, in a survey of 28 cities, found that 10 of them, Cleveland, St. Louis, Pittsburgh, Tulsa, Philadelphia, Hartford, Kansas City, Mo., Cincinnatti, Buffalo and Baltimore, were losing 10 percent or more of their treated water because of deteriorated pipes. And the survey did not include New York and Boston, with two of the leading all-time water-leaking systems. Probably a larger problem, from the standpoint of waste, is leaky sewers in which ground water flows into the pipes, adds to the volume of sewage and greatly increases the cost of treatment.

Shortage of capacity of many facilities. A survey conducted by the Economic Development Administration in 1978 showed that half of the nation's communities had wastewater treatment systems operating at full capacity, meaning they could not support new economic or population growth without costly new construction.

The estimates of need tend to become astronomical. Nationally the figures run into the trillions. Last fall, the New York State Legislature estimated that $8 billion to $10 billion a year would be needed in New York State for repairs, replacement and construction of the infrastructure, which would double current expenditures.

A more precise expression of need was published by the Joint Economic Committee of Congress, which said that New York City alone over the next few years would have to service, repair or replace 1,000 bridges, two aqueducts, one large water tunnel, several reservoirs, 6,200 miles of streets, 6,000 miles of sewers, 6,000 miles of water lines, 6,700 subways cars, 4,500 buses, 25,000 acres of parks, 17 hospitals, 19 city university campuses, 950 schools, 200 libraries and several hundred fire houses and police stations.

The causes of neglect and decay are more easily documented than the extent of need. Mr. Choate, an economist and a former Federal official who is now the senior analyst for a giant corporation, said in a paper prepared for the House Wednesday Group, made up of moderate Republican representatives, that investments in capital projects had declined sharply.

The nation's public capital investments fell from $33.7 billion in 1965 to less than $24 billion in 1980, a 30 percent decline," he wrote. "Public works investments dropped from $174 per person in 1965 to less than $110 per person in 1980, a 36 percent decline, and shrank from 3.6 percent of the gross national product in 1965 to less than 1.7 per cent in 1980, a 54 percent decline."

In the 1960's and 70's public works projects frequently were delayed so that the Government could finance such endeavors as the Vietnam War, social programs, education and space exploration. Nevertheless, the Federal Government assumed a much larger share of public works costs, which previously had been borne by state and local governments. In 1957, the Federal Government paid 10 percent of the costs. By 1980 its share had risen to 40 percent.

RESPONSIBILITY FRAGMENTED

The responsibility for maintaining public facilities, Mr. Choate pointed out, was fragmented between 100 Federal agencies, 50 state governments, 3,042 counties, 35,000 general-purpose governments, 15,000 school districts, 26,000 special districts, 2,000 areawide units of government, 200 interstate compacts and nine multistate regional development organizations.

But the Federal Government, the dominant player, never achieved any rational method for allocating the funds. Mr. Choate said Federal laws favored new construction over repairing of existing facilities.

Public works money, which often has been handed out for purposes of politics rather than need, became increasingly subject to waste and fraud, according to Mr. Choate and others. In 1980 alone, 219 state and local public officials were convicted of criminal abuse of public funds, a figure three times greater than the 1970 level.

At the same time environmental requirements enacted in the 1970's increased the need for higher expenditures for public works.

Many authorities say they believe, however, that the greatest cause for inadequacy of public facilities lies in the spread of the population and industry out of the central city to suburbs and remote communities around the nation.

Retired people moved in large groups into new communities, many in rural recreational areas; factories settled along the freeways

and new urban development sprang up near them; state governments spread their colleges over once remote areas; people migrated from the old industrial cities to the South and West, where urban and rural sprawl was greatest; after the 1980 census the Federal Government designated 36 former small towns as metropolitan areas. All this new development required enormous amounts of capital investment for streets, curbs, water and sewer facilities, airports and other facilities.

DEMAND IN CITIES REMAINED

But the new growth did not lessen the demand in the thinned-out central cities. The infrastructures in old cities, which sufferd heavy population losses, serve many vacant lots, half-empty buildings and closed factories and warehouses. But the facilities must usually be maintained as though they were being used at capacity.

At a recent conference on land use sponsored by the Engineering Foundation in Rindge, N.H., Philip Finkelstein of the Center for Local Tax Research in New York pointed out that when the city government suggested that it could no longer afford to maintain basic facilities in the South Bronx, where many buildings had been abandoned, there was a storm of protest and the suggestion was dropped.

"I don't think there is any way to do that with any degree of acceptability," he said, in reference to a suggestion that there be a contraction of public facilities in the cities.

Americans in 1982 are separated as never before by great stretches of pavement, communication and electric lines and water and sewer pipes. Many authorities are questioning whether the nation can any longer afford to maintain what it already has built and continue to provide for new communities.

LAND USE AT THE HEART

Harry E. Pollard, president of the Henry George School of Social Science of Los Angeles, said the way it is now, "A bus driver in order to collect one acre of people has to drive five acres to find them. And he has to drive past five miles of sewer pipe instead of one. It is a land-use problem. If you have to finance five miles for every one you will forever be in financial trouble."

According to a number of authorities, no national administration has succeeded in bringing order to the chaos of public works spending. The Carter Administration, they said, was beginning to coordinate Federal spending so that priorities could be established.

The Reagan Administration, according to those officials, abandoned the coordination but to some extent has stopped the use of Federal funds for capital projects in new areas. For example, it refused to finance water treatment plants in new communities around Orlando, Fla. The rationale was that if people there wanted new communities they could finance them themselves.

FUTURE OF FEDERAL ROLE

Yet even high White House officials acknowledged that the Reagan Administration had no comprehensive policy on public works, except that it intends to drastically reduce the Federal role. Richard S. Williamson, assistant to the President for intergovernmental relations, said Mr. Reagan wanted to help the cities with their infrastructure problems, and he ordered that this concern be put in the Administration's urban policy report that went to Congress.

The report, however, sought to show that the picture was not so bleak as had been depicted. It pointed out that demand had lessened for schools and new highways and said many cities were moving on their own to step up capital projects. And it pointed to local innovations. New York, for example, had switched emphasis from new buildings to repairing streets, bridges, mass transit, water and sewage systems. Other cities, such as Boston, were putting the authority for public works in the hands of independent commissions for greater efficiency, while others, such as Cleveland, were enlisting private interests for help.

The Federal Government's role, the report said, was to gather information about more cost-effective methods of financing public works while "other aspects of Federal aid remain to be determined."

Meanwhile, members of Congress have stepped into the void. Some have been spurred by such reports as bridges being closed for long periods in Kansas City, Mo., while motorists drive blocks out of their way and school children in Altoona, Pa., having to leave their bus, walk across a bridge and wait for the empty bus to follow because the bridge can no longer support the weight of both children and bus.

PROPOSAL BY HOUSE MEMBERS

Two Pennsylvania Representatives, William S. Clinger Jr., a Republican, and Robert W. Edgar, a Democrat, have been pushing legislation for a capital budget that would require the Administration to take an inventory of capital needs and assign priorities for spending on public works, as a first step toward long-term recovery.

They were joined in their effort by such diverse leaders as Speaker Thomas P. O'Neill Jr. and Representative Jack Kemp, the conservative Republican from Buffalo, who were among a number of Congressmen signing a letter to Mr. Reagan asking him to consider the idea. A similar bill has been introduced in the Senate by Christopher J. Dodd, Democrat of Connecticut.

Meanwhile, a number of Democrats around the country have taken up the issue on ground that rebuilding the nation's capital plant would fight unemployment.

In New York, Assembly Speaker Stanley Fink has made repairing of the infrastructure one of his major concerns and Governor Carey, in the recent legislative session, proposed increases in taxes and fees to help pay the costs. The tax legislation, however, was defeated, in part because it was an election year. Officials on the national and state levels predict the issue will become more heated in the years ahead.

In response to questions about how the nation could let basic facilities decay to the extent that many authorities say they have, Maury Seldin, president of the Homer Hoyt Institute, a nonprofit foundation in land economics, and a professor at American University, said, "We as a nation are accustomed to living on uppers and downers."

He said that in recent years the nation had become accustomed to "taking a fix" for whatever bothers it without much thought to the long-range consequences, especially in response to various special interests that can command support for narrow goals, and policy is fragmented.

He called for a maturing of the political processes so that various interests could reach compromises for the overall good and "be willing to settle for a fair shake."

[From the New York Times, June 16, 1982]

STUDY SEES PERILS FOR ROAD SYSTEM

(By Ernest Holsendolph)

WASHINGTON, June 15.—The national highway program. Is plunging deeply into the red, requiring an urgent and complete overhaul in the next year, the Congressional Budget Office reported today in a 94-page study.

In a separate action not prompted by the report, a bipartisan group of House members introduced a bill to require the Federal Government, for the first time, to set priorities for rebuilding roads, bridges, sewers and other major capital projects in a coordinated public works program. The group was led by Representative William F. Clinger, Jr., a Republican, and Representative Robert W. Edgar, a Democrat, both of Pennsylvania.

The budget office study said the costs of completing the Interstate System and doing essential renovation work were huge: The remainder of the Interstate alone could cost $38 billion in 1979 dollars, and the cost of renovating existing roads is estimated at $16 billion from now to 1990.

Although only 1,579 miles remain to be completed in the Interstate System, construction projects and maintenance programs now scheduled will cost $8 billion additional a year, the study said. Clearly what is needed, it said, is a scaling back of present plans, retaining only the completion of the open-road portions of the Interstate plan and leaving the rest to local construction programs.

AID FOR LOCAL PROJECTS

The Government will help to finance these local projects only where they are of a high priority, the budget office said, adding that only about 50 percent of such projects are likely to get Federal help.

"All of these developments," said the report, "portend a major review of highway programs, and the Interstate program in particular, during the coming year."

Even if the highway programs were changed in order to reduce the Federal financing burden, the programs would require an additional annual outlay of $3.9 billion to $5.8 billion, according to the study, which was ordered by the Senate Committee on Environment and Public Works.

Whatever the choice, new revenues in some measure, such as gasoline taxes, will be needed soon to meet the highway program's minimal needs, the study said.

[From Business Week, Oct. 26, 1981]

STATE AND LOCAL GOVERNMENT IN TROUBLE

How well will the Reagan economic revolution work? Most attempts to answer that question so far have focused on the overall U.S. economy and on the financial markets. But the true test of Reaganomics will come at the state and local level. The President is shifting more of the burden of government away from Washington at a time when the local infrastructure is decaying, when the ability of states and cities to borrow is withering, and when state and local revenues are shrinking. The problems are so severe as to constitute a crisis for state and local government. In the pages that follow, the editors of Business Week document the extent of the crisis and examine its implications for economic growth and for the growing rivalry between regions, as well as its probable political and social impact.

THE DECAY THAT THREATENS ECONOMIC GROWTH

While high interest rates have led in recent weeks to doubts over the prospects for President Reagan's economic program, Americans at large still seem to be committed to its central premise—that a revolutionary curtailment of the government's role in the economy should release resources to the private sector and create a new era of noninflationary growth. Vast tax and spending cuts have been passed that are intended as enabling legislation for unleashing the private sector. But in its zeal to put the U.S. back on a fast-growth track, the Reagan Administration may unwittingly have created a barrier to the success of its program.

Falling revenues are now combining with an inability to borrow in a way that is making it extremely difficult for Washington's great partner in the federal system, state and local government, to fill its traditional role of producing the basic government infrastructure for growth—such elementary things as bridges, roads, sewage, water, and mass transit. So serious is the decay of the nation's infrastructure and so poor the prospects for its refurbishment that many sophisticated businessmen and economists believe the U.S. is entering a period of severe crisis for state and local government.

The nation's physical infrastructure is only part of the state and local authorities' problem. Compounding the crisis are cuts in federal funding in the no less important area of human capital—job training, vocational education, and health care. Letting such public services decline could have high costs not only in social and political terms but also in terms of the operating environment for business.

Acceptance of decay

To a nation that has already experienced the virtual bankruptcy of New York City in 1975, the forced reorganization of Cleveland's finances in 1978, and the recurring difficulties of many cities and states, including Michigan and Missouri, in meeting their payrolls, the idea that local governments are once again in dire straits may seem like nothing to get alarmed about. Indeed, as the passage of Proposition 13 in California and similar tax-spending-limitation moves in 18 other states has shown, the American public is sick and tired of paying high local taxes, even if tax relief means accepting a reduction in services and living with potholes in the streets, bridges that are on the verge of collapse, and an interstate highway system that is about 95% complete but already needs $26 billion in repairs.

But the current crisis is far more severe than in the past. For a series of forces is now at work that calls into question the ability of local governments throughout the nation—not only in the traditionally depressed Northeast and Midwest but even in the fast-growing Sunbelt—to provide the infrastructure needed for economic growth. These forces are:

Massive Cuts in Federal Aid to State and Local Government

After growing almost fourfold in the 1970s, federal grants-in-aid will be drastically reduced, falling from $88 billion in 1980 to $78.6 billion in 1983.

A Reduced State and Local Tax Base

With the cut in federal taxes—especially for business—some 30 states that tie their taxes to federal taxes will face declining revenues.

Record-Breaking Interest Rates

The rates that states and cities have had to pay for money have almost doubled since 1977. The average municipality now has to pay 85% of what the U.S. Treasury has to pay for long-term money; only two years ago it was 70%. So prohibitive have borrowing costs become that even such financially sound states as California have recently suspended new bond offerings.

A Reduction in the Attractivenss of State and Local Bonds

To spur private saving and investment, the Reagan Administration has lightened the tax load, particularly in the upper brackets, and has provided special tax-exempt investment vehicles as the All Savers certificates and has broadened the scope of Individual Retirement Accounts. This has reduced the attractiveness of tax-exempt municipals to the rich, who have been their traditional purchasers.

The effect of these four forces is to put municipal finance in an unprecedented vise at a time of growing need.

According to the Urban Institute, neglect in maintaining the country's existing infrastructure will push maintenance investment alone to over $660 billion in the next 15 years. This is as much as state and local government has spent on new investment in the past 20 years; it is equal to 20% of the entire U.S. gross national product in 1980.

If state and local government cannot find a way out of this bind, the effects will be devastating. It is perfectly true that the private sector has carried the responsibility for economic growth throughout the history of this nation. But at virtually every stage of the nation's history, growth was dependent on a balance between private and public investment.

The great canal boom of the early 19th century was financed mainly by private sources, but public subsidies provided a favorable investment climate. This was even more true of the railroad boom of the late 19th century. The growth of the nation's great manufacturing centers, with their dense concentrations of population, was dependent on public spending for streets, bridges, and mass transit. The great auto boom of the 20th century could never have occurred without huge public investment in roads and highways. Similarly, the great post-World War II airliner boom was dependent on complementary public investment. There is no reason to believe that this historical necessity for balanced investment has come to an end. So even if, initially, President Reagan's economic program does unleash a surge of private investment, it would be likely to abort if state and local government cannot find the wherewithal to build the public facilities needed for support.

In the past decade, the crisis of state and local government has occurred mainly in the Frostbelt. But it would be a serious mistake to infer that the states of the Sunbelt will therefore be immune to the infrastructure crisis of the 1980s. For just as New York City needs a $5 billion investment in mass transit to prevent a further erosion of jobs and population, Houston needs to invest heavily in new freeways or mass transit in order to prevent the traffic congestion that threatens to strangle its growth.

The crisis of the 1970s became highly visible because some cities and states were hanging by their financial fingernails and had to reduce expenditures sharply and restructure debt. Bankruptcies and near-bankruptcies may also occur during the 1980s. But these lurid financial episodes only serve to worsen the real growth problem. For in the past local politicians have responded to financial stress by postponing the maintenance of existing capital plant and deferring the building of new plants, much the same way an executive in the private sector acts when his company is in a financial bind. Says New York State Comptroller Edward V. Regan, "You can always delay public investment, but in the end it catches up with you."

A wave of anxiety

The Reagan Administration argues that, until now, a good part of the infrastructure crisis has been the result not of insufficient spending but of inefficient, wasteful spending. It maintains, for example, that subsidies to mass transit are not cost-effective and that the sewerage-treatment program, which cost $3.4 billion in 1980, is in need of overhaul. It believes that federal spending for roads should be confined to major highways essential for national defense. These arguments reflect the Administration's basic philosophy that more and more federal functions should be shifted to state and local government. And the Administration maintains that it has taken a large step in that direction by consolidating 57 separate federal programs into 9 new or modified categories of block grants.

Although many state and local officials may have welcomed the added flexibility in the way they can spend federal money, the Reagan-imposed austerity, particularly the proposed second round of budget cuts, is now stirring a wave of anxiety among local officeholders, including many key Republican governors and mayors. They fear that the states and cities have been set adirift, because there may simply not be enough money from any source. They say that Reagan's new federalism has assigned them a role that they plainly do not have the resources to fill. As a consequence, a desperate hunt is on for new ways for cities and states to raise revenues and to increase the borrowing power needed to attack the infrastructure crisis. But no one thinks funding solutions will be easy.

INFRASTRUCTURE: A NATIONWIDE NEED TO BUILD AND REPAIR

For years cities and states have neglected their basic life support systems. Voters demanded more policemen and teachers and a cap on transit fares. • • •

Recently, however, growing numbers of bursting water mains, flooding basements, creaking bridges, collapsing roads, and stalling buses have awakened the public and elected officials alike to the problem of the deteriorating infrastructure. Yet the Reagan Administration's $35 billion first-round budget cuts and proposed $13 billion second round, coming when the municipal capital markets are in chaos, could prevent this new awakening from being translated into effective action. If that occurs, the result would be supremely ironic. For the economic expansion Reagan is predicting requires a strong and healthy public infrastructure. Industry cannot expand without adequate water and sewage systems and well-maintained roads, bridges, and mass transit systems to get its employees to work and its goods to market.

Says Pat Choate, author of *America in Ruins* and currently an economist at TRW Inc.: "I don't want to sound like the Joe Granville of public works, but the fact is that much of America's infrastructure is on the verge of collapse." The problem is so

widespread, he says, that "three-quarters of America's communities can't participate in Reagan's economic growth program."

The decay is evident in all parts of the nation's stock of public capital:

Streets and Highways

More than 8,000 mi. of the interstate highway system's 42,500 mi. and 13 percent of its bridges are now beyond their designed service life and must be rebuilt. And just to maintain current service levels on the roads and highways outside urban areas that are not part of the interstate system will require more funds for rehabilitation and reconstruction during the 1980s—$700 billion—than all levels of government spent on all public works investments during the 1970s.

Bridges

It will cost $41.1 billion to replace or rehabilitate the more than 200,000 deficient bridges—two out of every five—in the nation.

Sewers

To meet existing water pollution control standards, federal and local governments will have to invest more than $31 billion in sewer systems and wastewater treatment plants over the next five years.

Water

The 756 urban areas with populations over 50,000 will have to spend up to $110 million over the next two decades just to maintain their water systems. Even more money will be required to develop more water sources for fast-growing areas in the Southwest and West.

Mass Transit

Spurred by the Administration's proposed elimination of operating subsidies and other pressures, up to one-quarter of the country's 300 metropolitan transit systems might have to cease operation by 1985. The New York City Transit Authority must raise $5 billion to rebuild its rusty, dilapidated rail and bus systems. Chicago's system raised its fare to 90 cents from 60 cents this year, and scheduling, maintenance, and financial problems still abound.

Deterioration of the infrastructure hurts growth because its costs must be borne by America's businesses. U.S. Steel Corp. is losing $1.2 million per year in employee time and wasted fuel rerouting trucks around the Thompson Run Bridge, in Duquesne, Pa., which is posted for weight restrictions because it is in such disrepair. Companies wanting to locate in certain parts of downtown Boston must bear the additional cost of a sewage holding tank to avoid overloading the sytem in peak hours. And companies in Manhattan lost $166 million a year for each additional five-minute delay on the subways and buses.

In real terms, Reagan's first-round budget cuts represent a 25 percent reduction in state and local aid, and a substantial part of that will come straight out of spending for roads, bridges, mass transit systems, and sewers. Morever, there is a danger that these first-round federal cuts will induce state and local governments to shift their own funds to services and out of infrastructure. And while Reagan's second round of cuts—12 percent across the board—is being resisted by Congress, there is little doubt that the final result will be to shrink even further the money available for upkeep of local public capital.

Not only older cities

The blow these cuts will deal to older cities will be especially severe, for that is where the problems are most advanced. Financially strapped New York City must spend $40 billion to repair and rebuild its 6,000 mi. of streets, 6,200 mi. of sewers, the 775 bridges it owns, and the 1.5 billion gal.-per-day water system. Cleveland needs $124 million to rehabilitate more than 40 of its 490 bridges. And Chicago is seeking $3.3 billion—half from the feds—over the next five years to rehabilitate everything—roads, bridges, sewers, and mass transit.

But even the cities in the Sunbelt, which have newer physical plants and rapidly expanding tax bases, face problems with their infrastructure. Fast-growing Dallas must raise some $700 million for water and sewage treatment facilities over the next decade and more than $109 million to repair deteriorating streets. And booming Denver has begun informally delaying its repair and maintenance schedules.

Obviously youth and growth do not guarantee sound and adequate infrastructures any more than age and stagnation necessarily condemn the physical plant to decay. Maintenance, management, and revenues explain why Cincinnati's infrastructure is stronger than Cleveland's and why the bridges run by the Port Authority of New York and New Jersey are better kept than those controlled by New York City. And sophisticated maintenance management is why Dallas' infrastructure, while not perfect, is in better shape than most.

The lack of maintenance has inflicted severe damage on the roads, bridges, and mass transit systems that form the life-line of the nation's business. Bad roads and bridges keep some 25% of America's communities out of the growth business, says Choate. Even the relatively new interstate highway system is spotted by dilapidation. The federal government, which did not provide funds for "the three Rs"—resurfacing, restoration, and rehabilitation—until 1976, blames the states for failing to keep the highways in good repair. The states complain of the federal government once again saddling them with the responsibility of maintaining whatever Washington builds. The Reagan approach is to take most of its overall cuts in funds for secondary and urban roads and to use them for the interstate program, which will require $53.8 billion through 1990 to complete and repair. This would leave the states and localities to bear the entire cost of local roads. The federal govenment now pays 75% of that.

This proposal retreat from aid for local roads means that the potholes that already dominate many local roads will only proliferate. In New York City, where street repair slowed to a near standstill in the late 1970s, streets, which engineers say have about a 25-year life, are being replaced at a 700-year rate; the replacement rate is 49 years in Cleveland, 50 years in Baltimore, and 100 years in Oakland.

The deterioration of the mass transit systems that move people to and from work has been even more profound. Nowhere is this more evident than in New York City. The Metropolitan Transportation Authority of the State of New York "literally stopped preventive maintenance in 1975," when the city's fiscal crisis hit, says City Council President and MTA board member Carol Bellamy. The results were stark: The number of serious breakdowns en route rose to 12,291 in 1977 and tripled to an estimated 36,000 this year; and the number of miles traveled by the average subway car before having to be laid up for major repairs dropped from 13,627 in 1977 to 6,500 in 1981.

The MTA's plans to borrow some $5 billion to rebuild its system have been set back by high interest rates and will suffer further from Reagan's proposed cuts, which could reduce captial aid by $30 million and operating assistance by $165 million over three years, forcing higher taxes or a 15¢ fare increase, to 90¢, says Steve Polan, special counsel at the MTA. And if the rebuilding is delayed, transit failures will choke the economic vitality of the region even further.

In Massachusetts, federal operating subsidies will decline $13 million in fiscal 1982 and $28 million more over the next two years. "The first third that goes we can cope with," says James F. Carlin, Massachusetts' Transportation Secretary. "But when the cuts go up to $20 million, we could have some problems. One of their problems will be caused by Conrail's consolidation, which will leave the communities in the southeast of the state without service. "The state is going to have to come in and acquire the railways and then get some carrier to come in and run those lines," explains Carlin.

Since fast-growing cities in the Sunbelt have avoided reliance on federal help for their still small transit systems, the cuts will not hurt them as much. The Metro bus system in Houston does not use federal money for operating expenses, so it will not be affected immediately by any budget cuts. Most of the federal money for two bus maintenance facilities has already been committed. And work on contraflow lanes and raised tracks for buses will continue with local money. Nevertheless, Houston's plans to develop a rail line to link southwest Houston with downtown will be slowed, even though the city will continue to fund engineering studies with some $10 million in local taxes.

The vital connections

Similarly, Dallas, which has been slow in reacting to the need for a sophisticated system, is now faced with bearing the full burden of financing its future mass transit needs unless the state helps. Although the voters just last year rejected the establishment of a regional transportation authority, mass transit like sewers, is vital for growth. If growth continues at its present rate, without the development of a mass transit system, cities like Dallas and Houston could eventually be paralyzed.

Inadequate and dilapidated sewer lines and wastewater treatment plants are also stalling economic activity both in stagnating cities that have to bring their systems up to congressionally mandated standards and in growing areas that need additional capacity. Wastewater treatment plants in 47% of the communities surveyed by the Commerce Dept. in 1978 were operating at 80% or more of capacity, while the generally accepted effective full capacity utilization rate is 70%. That means that new plants and homes could not be hooked up to those systems. The Florida Environmental Protection Dept., for example, recently prohibited Orlando, one of the fastest-growing areas in the U.S., from adding more homes to its overloaded sewer system. The moratorium was lifted only when Orlando signed court decrees promising to build more sewage treatment plants.

If the Administration's plans for distributing treatment plant funds go through—it wants to limit funds to the cities' needs as of 1980—Orlando and other growing cities and suburbs will have to build capacity for new population without federal money. Capital spending for wastewater treatment

facilities by all levels of government has tripled since the Clean Water Act was passed in 1972, making it the largest single public works program now underway. The Administration wants to cut the estimated remaining federal costs for treatment plants to $24 billion from $90 billion. And Reagan would slice annual federal expenditures from $3.5 billion to $2.4 billion.

Water and the West

If Reagan's changes become law, there will be less money to spend overall, but changes in the allocation formula will benefit some cities and cost others. It could end up penalizing growing areas and helping older cities. Baltimore, for example, needs to spend nearly $1.5 billion, or $1,880 per capita, to get its sewers and waste treatment system in shape, according to estimates by the U.S. Environmental Protection Agency. With current levels of federal aid, it has been spending around $35 per capita per year, according to the Washington-based Urban Institute, which has made a major study of infrastructure needs. Reagan's proposals are expected to give Baltimore more money. But in the Chicago area, where the sewer systems overflow raw sewage into homes and lakes and rivers alike with a disturbing regularity, the Metropolitan Sanitary District is less likely to get the funds it wants to build a $3.4 billion, 131-mi. "deep tunnel" to upgrade its system. It has already sunk $1.2 billion into pollution control and will probably have its flood control moneys slashed by Washington.

Reagan's approach could also reduce grants going south of the Mason-Dixon Line and west of the Mississippi. Right now there is little concern among local officials, partly because the spending requirements to meet standards on these newer systems are low: $3 per capital for Tulsa, Tucson, San Jose, and Dallas.

But over the long run the cuts could create problems. Houston is receiving 75% federal matching funds for a large sewage plant, which the city needs to meet federal clean water standards. Once that is spent, City Controller Kathryn J. Whitmire does not expect any more federal funds. "If we don't have federal assistance, we'll finance as much as is feasible through revenue bonds based on user fees," she says. "But for large additional projects, we'll have to turn to the developers; we've already seen developers ready to participate." But some experts point out that this will raise the cost of new construction, and that could slow growth.

Huge investments also will be required in water systems over the next two decades to maintain economic vitality. "The history of much of the West is the history of its water projects," says Choate. "And water will determine its future." The water systems in much of the West have not been well maintained, and they will require additional spending in the 1980s. Since the federal government does not support local water systems, Reagan's cuts will have no direct impact. But where water is controlled by cities instead of independent authorities, the cuts in other areas could force politicians to divert funds that would normally go to maintain the water system, and that could increase problems in the future.

In the East, too, money will have to be spent on water, but there the problem is storage, treatment, and distribution. "One half of the water lines are so decrepit that they need to be replaced," says Choate. New York City, for example, loses 100 million gal. of water per day because of leaks.

The squeeze on state and local governments is not coming only from Reagan's austerity push. Even while federal capital aid is being slashed, court-mandated improvements in jail conditions are requiring many cities and states to upgrade their prisons. "If the federal government doesn't give the local governments and states the money for jail and prison construction," says Susan Walters, an infrastructure expert at the Council of State Planning Agencies, "the trend of mandating jail replacement by the judiciary means that streets, water systems, and schools will go.

Cities and states are scrambling to find ways to buffer their infrastructures from these revenue shortfalls. One approach being considered by cities that still control their sewers and water supplies and other facilities is to turn these over to independent operating authorities that have pricing and bonding power. Experts have noted that, since they have their own revenue sources, the authorities' maintenance programs have been insulated from the fiscal squeeze that has led many municipalities to skimp on maintenance. They "generally maintain their capital plants better and have healthier financing," says Urban Institute economist George E. Peterson. "There's not a pothole in the George Washington Bridge," says Peter C. Goldmark, Jr., executive director of the Port Authority of New York & New Jersey, the largest multipurpose operating authority in the U.S. "We resurfaced it two years ago." The City of New York, by contrast, has so neglected maintenance on the Manhattan Bridge that it must sharply limit traffic there for several years while it rebuilds.

A long recovery

Yet independent authorities have their drawbacks: Every time one is set up, it limits the flexibility of the government to shift funds to meet its most pressing priorities. There is no way city officials can subsidize street repair out of water fees, for example, if the water system is operated by an independent authority. Says Peterson, head of UI's infrastructure study: "If you generalize that model so every service has its own financing and operating authority, it eliminates all trade-offs between services. How far can you go?"

The crisis in America's infrastructure has been building for decades, and its resolution will take decades. "This is not a crisis for the short-winded," says former New York City Budget Director David A. Grossman. "Most rebuilding will take a decade or decade and a half," adds TRW's Choate. Yet even with such a long horizon, there is no doubt that the cuts Reagan has made and the cuts he has proposed portend a major setback to the rebuilding of America's infrastructure.

[From the New York Times, Sept. 11, 1981]

PUBLIC FACILITIES HELD FACING CRISIS

(By B. Drummond Ayres, Jr.)

WASHINGTON, Sept. 10.—A national crisis is developing because the nation's transportation, sewage, water and other public works facilities are wearing out faster than they are being repaired or replaced, urban affairs and economic development specialists warned Congress today.

They placed much of the blame on the Federal Government and Congress, asserting that capital aid programs and monetary policy had often been misdirected.

"It is national policy that is the principal deterrent to action," Alan Beals, executive director of the National League of Cities, told the House Subcommittee on Economic Stabilization. The subcommittee is holding hearings on revitalizing the national economy, which Mr. Beals said "simply cannot succeed" without massive aid to rebuild the nation's public works systems.

Mr. Beals said the tight monetary policy of the Federal Reserve Board had made a "shambles" of the municipal credit market. He added that recent changes in Federal tax laws would make matters worse because many investors would be encouraged to put their money into the tax-free savings certificates to be offered beginning Oct. 1 instead of investing in municipal bonds.

CURRENT AID PLANS ASSAILED

As for current Federal aid programs, Mr. Beals said that too many supported new construction of public facilities rather than maintenance and repair of existing facilities.

Asked to assess the overall status of the nation's streets, highways, bridges and water and sewer systems, Mr. Beals replied, "In some communities, it may be characterized as a crisis."

The subcommittee chairman, Representative James J. Blanchard, Democrat of Michigan, agreed with Mr. Beals, saying, "Unchecked, the situation threatens the health, safety and quality of our citizens' lives."

Details about the extent of the deterioration of public facilities were provided to the committee by Pat Choate, author of "America in Ruins," a recent study of the state of the nation's public facilities. He said that tight budgets, inflation and bad public policy had caused a 28 percent drop in public works investment over the last 15 years, adding:

"Today, one of every five bridges requires major rehabilitation or total reconstruction. The nation's Interstate Highway System has deteriorated to the point that almost one of every four miles requires replacement. Conrail faces the prospect of abandoning half of its lines. One-quarter of the nation's 3,500 prisons are so antiquated, crowded and inadequate that riots are a constant hazard, or, as in Florida, judges are forcing the early release of some criminals to allow the jailing of new inmates."

WATER LOSSES IN NEW YORK

New York loses about 100 million gallons daily because of leaks in aging water lines, Mr. Choate continued. He said that in Albuquerque, New Mexico, a third of the city's sewer lines have decayed to the point that they are often crushed when trucks pass over them and added that half of the water mains in Washington needed to be replaced. In all, Mr. Choate said, the deterioration of vital public facilities "afflicts" three of every four American communities.

Mr. Choate estimated that half the nation's cities could not allow substantial industrial expansion because of inadequate water and sewage systems. Another quarter of the nation's communities, he said, could not improve their economies because their roads, streets and certain other public facilities were worn out, obsolete or already operating at full capacity.

"We have a major problem," he concluded, calling upon Congress and the Federal Government to establish a national public works budget to bring "coherence" to the rehabilitation task ahead.

Another witness at today's hearings, Eugene P. Foley, former Assistant Secretary of Commerce for economic development in

the Kennedy and Johnson Administrations, agreed that the Federal Government needed to give more direction to its public works expenditures and plans. Referring to the tendency of Congress to appropriate funds for new construction, he said, "It's ridiculous budgeting to put all this money into new facilities when we could rebuild and repair for so much less."

PROBLEMS IN BOND MARKETS

Melvin Mister, deputy director of the United States Conference of Mayors, told the subcommittee that the municipal bond market had become so hectic and confused that even the booming Sun Belt cities were finding it difficult to raise funds. "You can have a good bond rating but still not be able to carry out the needed functions," he said.

Attempting to sum up the situation his committee was studying, Representative Blanchard told of a recent visit he made to Detroit to make a speech on urban revitalization. While being driven to the speech site, he said, he attempted to drink a cup of coffee while studying an outline of his remarks.

"But there were so many potholes in the streets of Motor City," he continued, "that I couldn't get it down."

Mr. HART. Mr. President, America—it is reported—is crumbling all around us. Streets are cracking, dams are breaking, bridges are collapsing, sewers are overflowing, and water mains are leaking.

America's "infrastructure"—the stock of public facilities that underpin our national economy—has so deteriorated as to impede efforts to restore our economic health. And it continues to deteriorate faster than we can repair or replace it. It makes little sense for us to worry about the decline in investment in private capital, such as industrial plant and equipment, while we disregard chronic underinvestment in the vital public facilities—roads, bridges, ports, and dams—that support our Nation's commerce.

Because I consider rebuilding our national infrastructure essential for revitalizing our economy—and particularly our distressed communities—I join the distinguished Senator from New York (Mr. MOYNIHAN), in introducing the Rebuilding of America Act of 1982.

This bill would take a crucial first step toward establishing a comprehensive Federal policy for rebuilding the infrastructure in all regions of the country. It would establish a National Commission on Rebuilding America to: First, inventory the existing major public facilities by region, State, and major metropolitan area; and Second, develop within 2 years a National Facilities Investment Plan (NFIP) to develop priorities for the needed repairs, improvements or expansions of specific public facilities over the next 10 years. The NFIP would become the infrastructure policy of the Federal Government, unless disapproved by joint resolution of the Congress.

This bill assumes, as its major premise, that simply throwing money into any public works project that comes along will not necessarily improve the Nation's infrastructure. We cannot continue the failed "pork barrel" politics of the past. Rather, we must spend our limited resources on those projects that will provide the greatest benefit to the public.

Just as the strength of our military depends not on how much we spend but rather on how effectively we spend, so the strength of our infrastructure depends on how closely our spending follows an effective infrastructure strategy like the one the NFIP would include.

Mr. President, the Senator from New York has done an excellent job in explaining the details and logic of the bill. I will not repeat that effort. I would like to discuss, however, the three issues this bill addresses that I consider particularly important. First, the bill directs the National Commission on Rebuilding America, as part of the NFIP, to make recommendations on establishing a Federal capital budget. Virtually all major corporations, all State governments, and most local government use capital budgets as a basic policy and administrative tool. It is amazing that the Federal Government does not also have a capital budget to guide national policy for investing in public works. For that reason, I offered an amendment to the balanced-budget constitutional amendment resolution (S.J. Res. 58) that would have directed the President to prepare and submit to the Congress a capital budget as part of the annual budget process.

The administration opposes a capital budget because it would present "formidable accounting problems" and raise questions about whether to classify certain expenditures as capital or noncapital. These arguments are not persuasive. The Federal Government already includes 11 special analyses in its annual budget to highlight specified program areas and enable it to coordinate policy. Moreover, accounting always presents difficult choices in classification, yet accountants make those choices knowing that even some classification will improve the budget process. Some capital budgeting is certainly better than none at all.

A Federal capital budget would reverse years of uncoordinated investment and management practices by Federal public works agencies that now make policy decisions "flying blind." It would permit the administration and the Congress to conduct a comprehensive review of the Federal Government's capital expenditures and to consider public works activities in light of other national needs.

Second, this bill requires the National Commission to consider life cycle costs in evaluating public facilities and setting investment priorities. Too often, government agencies consider only the front-end construction costs in deciding whether to fund a project. As a result, to make a facility more politically acceptable, an agency may try to reduce front-end costs by "cutting corners" in construction and design that actually increase the costs of operation and maintenance. Life-cycle costing would minimize this problem by taking into account all the estimated costs of a facility—construction, operation, and maintenance—throughout its life.

Finally, the bill requires the National Commission to address the serious problem of waste and fraud in public works programs. Fraud costs the taxpayer inestimable amounts of money through increased project costs and deficient construction. Many States and communities have virtually institutionalized the process of awarding government contracts on the basis of political contributions. In 1980, the Justice Department obtained indictments against 34 companies and 41 persons in four States for conspiring to raise prices and allocate highway construction contracts. The establishment of an independent inspector general corps as part of a comprehensive Federal infrastructure policy would go a long way toward stopping fraud in projects receiving Federal funds. In addition, government agencies should set standards for construction of various types of public facilities and notify the public of all contracts they propose to let.

Waste also drains the funds available for rebuilding the national infrastructure. Waste occurs, in part, because so many government agencies have responsibility for funding public facilities. For example, 100 separate Federal agencies, 50 State governments, the District of Columbia, Puerto Rico, the protectorates, 3,042 counties, 35,000 general-purpose local governments, 15,000 school districts, almost 26,000 special districts, 2,000 areawide units of government, over 200 interstate compacts, and nine multistate regional development organizations have responsibility for public works. This fragmentation of the Nation's public works activities prevents the most efficient use of funds and leads to costly delay in project approvals; duplication of some facilities and services and omission of others; fragmented regulatory activities and conflicting program procedures; and uncertainty over which agencies have responsibilities for financing, constructing, rehabilitating, maintaining, and operating a facility.

Mr. President, the Rebuilding of America Act would establish for the first time a coherent national strategy for attacking the problem of a deteriorating national infrastructure. But, we should not underestimate the enormity of the challenge before us. Experts predict we will have to spend between

$2.5 and $3 trillion simply to maintain our infrastructure in its current condition. The additional improvements necessary for sustaining a growing economy will cost billions more. Yet, we cannot afford to wait:

One of every five bridges in the United States requires major rehabilitation or reconstruction.

The Interstate Highway System requires reconstruction at a rate of 2,000 miles each year.

A Commerce Department survey of 6,870 communities found that 3,000—or 46 percent—had wastewater treatment facilities operating at over 80 percent of capacity and thus could not accommodate any further industrial expansion.

The Nation's 756 urban areas with populations over 50,000 will need between $75 and $110 billion to maintain their water systems over the next 20 years.

A large number of the Nation's 43,500 dams require additional investment to reduce hazardous deficiencies.

The Corps of Engineers has inspected 9,000 of these dams and found many needing safety improvements.

We need a major program of expanding our ports if we hope to increase significantly our exports of coal and other products.

Mr. President, the rapid deterioration of the national infrastructure is a timebomb waiting to explode. If we do not act now to reverse this trend, we may soon find our public facilities can no longer support a modern industrial economy. I urge the Senate to consider and pass this bill as one weapon in the fight to revitalize our economy.

Mr. President, I ask unanimous that an article from the AFL-CIO American Federationist follow my statement in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the AFL-CIO American Federationist, August 1981]

PUBLIC FACILITIES: KEY TO ECONOMIC REVIVAL

(By Pat Choate and Susan Walter)

For nearly a decade, the critical public facilities that underpin many community services have been wearing out faster than they have been replaced. Today, one in every five bridges requires major rehabilitation or total reconstruction. The nation's interstate highway system has deteriorated to the point where almost one of every four miles requires replacement. In Albuquerque, New Mexico, a third of all sewer lines are so deteriorated that trucks traveling over them frequently cause the collapse of lines and covering streets. Half the water mains in the District of Columbia require replacement. In New York City, approximately 100 million gallons of water are lost daily through leaks in old water lines.

These are not isolated or extreme examples. America's public works are wearing out in every part of the country—North, South, East, West, suburb and core urban areas. Unless these trends are markedly reversed, and soon, the nation will end this decade with substantially fewer public facilities in usable condition—fire stations, prisons, parks, libraries, reservoirs, aqueducts, bridges, paved streets, street lights, highways and community buildings—than exist today.

More ominously, the deteriorated condition of essential public facilities that undergird the economy threatens the Administration's program for national economic renewal. Half the nation's communities cannot permit major expansions of existing firms or new plant locations because community wastewater and water treatment facilities are operating at or near full capacity. Another quarter of the nation's communities are unable to improve their economies because other public facilities such as roads, streets and industrial waste disposal sites are either worn out, obsolete or operating at full capacity. Overall, three-quarters of America's communities will be unable to participate in whatever economic renewal program the Reagan Administration gets through Congress until major improvements are made in their public facilities. Revitalization of these facilities is the keystone to renewal.

The primary source of America's public works decline is long-term massive underinvestment. Under the exigencies of tight budgets and inflation, maintenance of vital public facilities has been deferred. Replacement and rehabilitation of obsolescent public works have been postponed. New construction has been cancelled or "stretched out."

Despite unmistakable evidence of deterioration, the nation's public works investments, measured in non-inflated purchasing power, fell from $33.7 billion in 1965 to less than $25 billion in 1979—a 28 percent decline. On a per capita basis, public works investments in constant dollars dropped from $174 per person in 1965 to $111 in 1979—a 36 percent decline. Measured against the value of the nation's Gross National Product, public works investments declined from 3.6 percent of GNP in 1965 to 1.7 percent in 1979—a 53 percent decline.

Yet unbelievable as it may seem, the federal government does not have or use a capital budget for its public works expenditures. National public works decision making has been dominated by the Congress, whose attention to public works is fragmented among numerous committees. The disorder in federal policies and administrative procedures, in turn, creates major obstacles to effective state and local public works policymaking and management.

Well-conceived public works are not pork-barrel projects. Investment in public facilities is as essential for national and local economic renewal as investment in our industrial plant. Indeed, public works, along with education and research and development expenditures, are the only "supply-side" investments that government makes.

In addition to facilitating private sector investment, public works expenditures can be used to assist in (1) achieving a desired level of employment, output, income and prices; (2) stabilizing state and local budgets; and (3) eliminating problems of economic obsolescence for specific geographic areas, economic sectors and population groups. To date, however, little attention has been given these uses of public works expenditures.

FIRMS AND EMPLOYMENT IN CONSTRUCTION, 1977

[In thousands]

Industry	Establishments	Employees	
		Total	Construction workers
Contract construction	473	4,210	3,550
General building contractors	154	1,160	960
Heavy construction contractors	30	890	740
Special trade contractors	289	2,160	1,850
Plumbing, heating, air-conditioning	57	460	370
Painting, paperhanging, decorating	27	130	120
Electrical	37	370	310

Public works and jobs. The construction industry is a major sector in the U.S. economy. In 1977, nearly 478,000 firms employing more than 4.2 million, were directly engaged in construction activity. Some 3.5 million of these persons, earning more than $43 billion, were construction workers (see Table 1).

Public works investments account for a substantial share of construction activity. Of the $228 billion in new construction put in place in 1980, over $56 billion was for public works—almost 24 percent of the total investment. Furthermore, the public sector investd an additional $30 billion in the purchase of right-of-ways, existing buildings and equipment.

Nor is the impact of the construction industry and its public works component limited to the several millions directly employed in construction activities. It is closely linked with a wide range of industry and service institutions which are subject to expansions and contractions in construction industry activity. The Rand Corporation and the U.S. Department of Labor traced these industrial linkages for 22 types of public works projects and drew the following conclusions:

The most significant short-term impacts of public works projects are found not in on-site construction but in equipment, materials and other industries. For every on-site construction job created by public works projects, three additional jobs are created in the overall economy.

There are substantial variations in the number of on-site construction jobs generated by different types of public works projects. Public school construction requires almost 25 percent less on-site labor than does college housing construction. Highway construction uses less than half the on-site labor required for dam, levee and local flood control projects.

Substantial variations exist in the quantities and types of materials and equipment used in different types of public works projects.

Such variations are important because we can take advantage of them to tailor public works investments to meet a number of objectives, including stabilizing the economy, alleviating structural unemployment and helping distressed areas to adapt to new economic development possibilities.

Public works and communities. A large and growing number of communities are now hamstrung in their economic revitalization efforts because their basic public facilities—streets, roads, water systems and sewerage treatment plants—are too limited, obsolete or worn out to sustain a modernized industrial economy. A Department of Commerce survey of the wastewater treatment capacities of 6,870 communities found that over 3,000—46 percent—of these systems were operating at 80 percent or more of capicity. A system operating at this level of capacity generally cannot accommodate additional industrial load. The same survey indicated that water treatment and distribution systems were operating at effective full capacity in a third of these communities.

When the condition of other public facilities essential to private sector investment are also considered, it becomes clear that most of the nation's communities are unable to support modernized development until major new investments are made in the basic public facilities that undergird their economies.

A number of studies have attempted to measure the influence of public works on the location and investment decisions of individual firms. The most comprehensive was a Census Bureau survey conducted in the mid-1970s for the Economic Development Administration. Over 2,000 firms operating in 254 distinct product classes were examined. For virtually all 254 categories studied, the survey found that the availability of public works facilities was either of critical or significant importance to location decisions. Moreover, public facilities were almost always a more important locational consideration than were local tax incentives or industrial revenue bond financing.

VALUE OF NEW CONSTRUCTION TRENDS AND PROJECTIONS, 1978–81

[In millions of current dollars]

Type of construction	1978	1979	1980	1981	Percent change 1980–81
Total new construction	205,460	228,950	228,300	270,330	18
Private construction	159,560	179,950	171,600	206,700	20
Public construction	45,900	49,000	56,700	63,600	12
Buildings	15,240	15,860	18,100	20,100	11
Housing and redevelopment	1,050	1,210	1,600	2,000	28
Industrial	1,180	1,410	1,800	2,300	30
Education	6,260	6,900	7,700	8,500	10
Hospital	1,820	1,650	1,600	1,600	0
Other public	4,920	4,680	5,400	5,700	5
Highways and streets	10,710	11,920	15,500	17,800	15

Note: Figures for 1976 and 1978 have been rounded. Figures for 1980 and 1981 are estimates by the Bureau of Industrial Economics.

It has long been assumed that public works investments could be modulated to help stabilize the ups and downs of the economy. In practice, however, the United States has given little attention to such uses of public works expenditures.

The current recession is the sixth such decline in the economy since the end of World War II. As with previous recessions, the 1980–81 economic decline has created substantial unemployment and underutilization of production capacities in the construction, materials and equipment industries. In 1980, the unemployment rate in the construction industry averaged 17 percent nationwide and as high as 40 percent in some regions. The steel industry, closely linked to construction, operated at about 50 percent of capacity throughout 1980, idling some 80,000 steelworkers.

Economic policy might reduce the harsh impacts of a severe recession by using the nation's $80 billion of annual public works investments as a countercyclical tool to provide employment in the construction, materials and equipment industries. But precisely the opposite has occurred. Public works investments in the United States have long been made in a perverse pattern, increasing during expansions in the economic cycle and decreasing during contractions. Such "procyclical" management of public works investments creates adverse consequences:

Increasing public works investments during periods of economic expansion makes the costs of materials, equipment and labor artificially high and contributes to inflation: and

Decreasing public works investments during economic downturns exacerbates underutilization of labor and industrial facilities in the construction, materials and equipment industries, and worsens the recession.

WASTEWATER TREATMENT CAPACITIES

Since 1960, Congress has enacted three countercyclical public works programs—the $1.9 billion Accelerated Public Works Program (APW) in 1961–62: the $130 million Public Works Impact Program (PWIP) in 1972–83; and the $6 billion Local Public Works Impact Program (LPW) in 1976–77. Studies of the latter two programs concluded that they fell far short of meeting stated objectives, that is, stimulating employment for the structurally unemployed in distressed areas during an economic downturn. Evidence suggests that these shortcomings lay in the timing and administration of these expenditures and in the narrowness of program goals.

The temporary countercyclical LPW program of 1976–77 did nothing to relieve the 1974–77 recession until late in 1976. Over 80 percent of the employment generated directly by LPW projects did not occur until the recovery phase of the cycle had begun. This time lag reflects less on the efficiency of public works as a countercyclical device than on the sclerosis of the executive and legislative process. Lags occurred because of delays in securing passage of legislation. Presidential approval, appropriation of funds, selection of projects and construction. For two years after the onset of the 1974 recession, until the summer of 1976, the use of countercyclical public works for economic stabilization continued to be rejected in favor of traditional fiscal and monetary measures.

Occasional recessions are inevitable. And federal public works expenditures can exert major economic stabilizing influences. Thus, it is both timely and prudent to devise policies and administrative techniques for managing public works investments in anticipation of the economic cycle.

Using public works funds as a countercyclical tool has many potential advantages. The first, perhaps most important, is to reduce the adverse consequences of the current pro-cyclical pattern of these investments. In many ways, these pro-cyclical investment patterns are akin to loose cargo in a ship in turbulent waters. As the ship sways from side to side, the cargo shifts and accentuates the sways. A permanent countercyclical public works policy would directly address this issue, something temporary programs cannot, by their very nature, accomplish.

If delays are eliminated, a large portion of the benefits of countercyclical public works projects can be generated during contractions in the economic cycle. Also, recovery can be accelerated at the beginning of the economic expansion. After all, there is little merit in having massive unemployment and unused production capacity during a slow recovery period.

A number of reforms are worth discussion, including (1) standby authorities for public works construction; (2) identification of a backlog of projects which would serve both countercyclical purposes and long-term national and local development; and (3) creation of purchasing techniques that would permit stockpiling of materials and equipment for use in future projects.

By careful planning, government can target benefits to help both people and specific industries. Currently, for example, the steel, aluminum, fabricated metals, concrete, equipment and related industries are all operating well below full capacity. To counter this economic sluggishness, the current $100 billion backlog of appropriated, but unspent, public works funds could be used to purchase needed materials and equipment in advance of actual construction.

This would produce many benefits. For example, purchasing steel when the industry is operating at only half its capacity would avoid ensuing price rises: permit the industry to operate closer to normal levels of production: improve conditions of certainty in that sector: create jobs for laid-off workers, many of whom reside in distressed areas; and eliminate almost $10 million per week in unemployment payments. A range of industries could be similarly assisted.

Targeting specific sectors can be an effective means for addressing major regional variations in the economic cycle. Pre-purchasing would also stimulate basic industries operating at low capacity in distressed areas.

At this time, it is difficult to even estimate the range of potential investments that will be required for public facilities. This reflects

(a) the absence of national capital budgeting;

(b) the absence of common standards for public works facilities and the services they provide;

(c) inadequate information on the inventory and condition of existing facilities and costs of repair; and

(d) lack of potential consensus on what types of projects should be given priority.

Even though the magnitude of the problem cannot now be specified public works investment requirements for the 1908s clearly will be enormous. For example, the costs of rehabilitation and new construction necessary to maintain existing levels of service on non-urban highways will exceed $700 billion during the 1980s. Even excluding the estimated $75 billion required to complete the final 1,500 miles of the interstate system, the balance required for rehabilitation and construction is still greater than all public works investments made by all units of government during the 1970s.

Clearly not all needed projects can be funded. Because so many other compelling public and private uses of capital exist, difficult strategic choices must be made. The first is to determine how much of the Gross National Product is to be allocated to consumption and how much encouraged into savings for new capital investment. The second is to determine how much of that capital investment will be used by the public sector and how much by the private sector. The third set of choices involves the allocation of what will inevitable be limited public works funds among places and classes of projects.

Financing the nation's public works in the foreseeable future will require better use of existing financing techniques as well as the creation of new financing approaches. The most basic financing challenge is how to cope with federal fiscal retrenchment at a time when almost half of all public works funds come from federal programs. Rapid withdrawal of federal support would devastate the capital programs of most communities. Such a withdrawal must be preceded by a careful reassessment of the allocation of authorities and responsibilities within our federal system.

Applying user charges. In addition to redefining their federalist roles, state and local governments will increasingly be forced to apply user charges to public works related services. By reducing pressures on general revenue sources, fee-for-service charges will improve a community's access to capital markets if a dedicated, guaranteed flow of revenues can be shown. User charges also have the virtue of more directly relating prices to consumption and real costs. Although user charges have been rejected in some places because of their adverse impact on low-income citizens, special income adjustments for the poor could make such financing equitable.

The General Accounting Office, in a series of analyses on federal aid for urban water distribution systems, found that management and financing were better where fee-for-service financing existed. In these communities, actions had been taken to improve conservation, reduce leakage and control other nonrevenue-producing water uses, such as meter underregistration. Applicable user charges can be tailored and applied to virtually every type of public facility.

Shifting from public to private. Still another financing alternative is private operation of some facilities that in recent decades have been the responsibility of the public sector. Competition in garbage collection, fire protection, street cleaning and parcel delivery are examples. Although this approach is not an option in all circumstances, it can be applied to the construction and operation of many kinds of public facilities.

Reducing costs of delay and fraud. Another important way to increase purchasing power for public facilities is to reduce the enormous costs of delay, waste projects. The nation can get much more from its public works dollars than it has been getting.

The time required to build major projects, for example, is continually being expanded by government regulations and administrative procedures. Many of these delays are unnecessary and are reducing real capital investment as funds are diverted to the nonproductive task of financing increased interest charges generated when projects take longer to put into operation. Additional funds are also required to keep pace with inflation-devalued public works purchasing power as delays put off construction. About 20 percent of the nation's annual public works appropriations are now used to finance delay—a major waste of shrinking public capital.

The magnitude of funds lost through fraudulent practices or poor construction is impossbile to estimate. The number of indictments and convictions for public works related fraud suggests that it is widespread. Actions to reduce fraud, such as requiring public announcements on bidding, warranties on construction and more rigorous oversight, are possible and needed to increase usable funds for public works projects.

The federal, state and local governments have long used budgets as a device for bringing policy and administrative coherence to their operations. Virtually all major corporations, all state governments and most local governments use capital budgets as basic policy and administrative tools. Some states such as Pennsylvania and some cities such as Cincinnati, Ohio now include lifecycle costing in their capital budgets.

A major flaw in federal public works policymaking and program administration is the absence of national public works investment policies and a supporting capital budget. This omission is no accident and in fact is the consequence of explicit decisions not to have a capital budget.

The annual federal budget submitted to Congress contains three fundamental components: (1) the basic budget in overview; (2) a detailed budget appendix; and (3) the special analyses. The special analyses of the Office of Management and Budget are designed to highlight specified program areas or provide other significant presentations of budget data. These analyses help bring together policy and administrative overviews of areas of major federal concern.

The special budget analysis of federal credit programs, for example, demonstrates how useful a comprehensive annual accounting of fragmented federal activities can be. An assessment of the federal government's numerous credit activities was not possible until the special analysis was created. Now that the magnitude of these credit activities is clear, OMB is better able to manage them.

The creation of a national capital budget analysis would permit a similar overview of the federal government's capital expenditures and commitments. It would also permit consideration of public works activities in light of other national needs, as well as explicit consideration of construction, rehabilitation, maintenance and operation requisites.

The OMB's technical success in creating other complex special budget analyses demonstrates that it can surmount the accounting and classification problems that might arise in creating a national public works capital analysis and a national public capital budget.

A national capital budget would consist of three essential components: (1) current and projected capital needs and expenditures; (2) current and projected operation and maintenance needs and expenditures; and (3) sources of financing. Such a budget would bring new coherence to public works policymaking and program management by providing a framework for legislative and administrative decisions. It would also provide a framework for systematic analysis of a number of issues:

One: The aggregate potential for domestic nondefense public works investments relative to other potential claims such as national defense and social programs.

Two: The impacts of government regulatory actions on public works investments and operations. For example, mandated investments to assist the handicapped on public transportation threaten to bankrupt some public transportation systems such as those in New York City.

Three: The consequences of allocations of limited public works funds as between new construction, rehabilitation of existing facilities and operation/maintenance.

Four: The social and equity issues associated with the distribution of public works funds among and between various regions.

Five: The sources, consequences and alternative financing sources of public works projects and their operation.

Capital budgeting is ultimately a political process through which resources are allocated. Advocates of federal public works investments would negotiate potential expenditures against other uses of federal funds; funds would be allocated among programs such as transportation, water treament, navigation, and so forth; and funds would be allocated among construction, operation, maintenance and rehabilitation activities.

A capital budget would serve as a device by which the President and the Congress could bring necessary control to the present "free form" investment and management practices of the various federal public works agencies. It would also permit effective congressional management, especially of congressional committee actions which have contributed substantially to duplication and inconsistency.

Public works investments reflect a history of choices, decisions, bargains, compromises and allocations which provide a foundation for present and future actions. A capital budget could chronicle this information. It could also articulate a statement of the future, specifying goals and resources needed to attain those goals. States and communities, now dependent on federal public works funding, operate on a year-to-year basis with the ever present possibility that federal "commitments" will be altered or regulations changed. State and local governments need more certaintly than is provided in a one-year federal budget. The private sector would likewise profit from more certainty.

The deteriorated condition of the basic facilities that underpin the economy will prove a critical bottleneck to national economic renewal during this decade unless we can find ways to finance critical public facilities. Our success in this effort hinges on the willingness of the Executive Branch to share responsibility for creating and managing public works policy more coherently than in the past. Specifically:

Congress should require the preparation of an annual special analysis outlining the nation's public works needs as they affect national economic performance.

Congress should direct the Executive Branch to undertake an inventory of national public works needs as they affect the economy.

With the inventory as a starting point, Congress should require presentation of a capital budget that proposes phased capital investments matched with both short-term cyclical and long-term national economic needs. The budget would display preconstruction, construction, maintenance and operating costs.

Congress should direct the Executive Branch to report steps for reducing delays in public facilities construction through reforms in federal, state and local administrative procedures. Similiar efforts in reducing other regulatory delays are already underway at the direction of the President.

Congress and the Executive Branch should consider undertaking a series of reforms designed to minimize the corruption and waste connected with public works expenditures.

The Executive Branch should undertake an administrative evaluation of the scattered public works activities of the federal government and be prepared to consummate consolidated reforms simultaneous with the proposed public works report to Congress.

Congress or the Executive Branch should direct the Advisory Commission on Intergovernmental Relations or a new body constituted for the purpose to review the public works responsibilities of each level of government and propose appropriate guidelines for allocating functions and responsibilities.

It would be tempting to avoid disentangling the knotted threads of intergovernmental complexity and to assume that federal public works expenditures must be drastically curtailed in the face of current economic conditions. But such a course would thwart the very purpose of economic policy now being formulated.

Economic renewal must be the major focus of domestic policy in this decade. Our public infrastructure is strategically bound up in that renewal. We have no recourse but to face the complex task at hand of rebuilding our public facilities as an essential prerequisite to economic renewal.

Mr. RANDOLPH. Mr. President, I am pleased to join with my colleagues in introducing the Rebuilding of America Act of 1982.

For most of our 206 years as a nation the United States has placed great emphasis on building. From a wilderness we have constructed a strong and prosperous nation which provides to its citizens the highest standard of living in the world. Our economy and our way of life were created and are supported by a public infrastructure representing investments of billions of dollars. We are becoming increasingly aware, however, that the public facilities on which we depend so greatly are wearing out faster then they are being replaced. In recent years our investments in public works have declined dramatically. It is necessary only to drive on some of our roads, ride our trains, examine our water systems, or calculate the need for sewage treatment to know that we cannot continue to ignore these underpinnings of America.

We have failed to keep pace with growing needs for transportation, sewer and water facilities, waste disposal, and the other elements of infrastructure that contribute to sound economies and healthy communities.

A reliable report indicates that total investments in public works by Federal, State and local governments declined by two-thirds in constant dollars over a recent 10-year period. The study also reported that between one-half and two-thirds of our Nation's communities are unable to support modernized development until major new investments are made in their basic facilities.

Public works are too often mistakenly considered unnecessary "pork barrel" projects. When opportunities are sought to slash budgets, funds for these basic necessities are often the first targets.

In this era when we look for ways to revitalize our economy, we must look to new investments in public facilities if we are to be successful.

Mr. President, I believe that the situation we face is a result of several factors. In recent years we have recognized the need for Government involvement in many new programs. With limited resources at our disposal we have reduced public works expenditures in order to support these new needs. Inflation has limited the return we receive from these reduced investments and the situation has been exacerbated by efforts in the past 2 years to reduce Federal spending in general.

Mr. President, the measure we introduce today is the first step in reordering priorities to assure that the development and maintenance of vital public facilities receive adequate attention. This bill establishes the procedure for an inventory of our public infrastructure and its needs. It provides for considering Federal public facilities spending on a unified overall basis.

Mr. President, we do not anticipate that the Congress will act on this legislation during the short time remaining in the 97th Congress. Rather, we introduce it as another means of bringing attention to the critical situation which exists. I would hope that hearings can be scheduled this fall or early in 1983 to allow us to examine in detail our needs for public facilities and the ways in which we meet these needs.

By Mr. HATFIELD:

S. 2928. A bill to provide for equal access to public secondary schools; to the Committee on Labor and Human Resources.

(The remarks of Mr. HATFIELD on this legislation appear earlier in today's RECORD.)

By Mr. NICKLES (for himself, Mr. EAST, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HUMPHREY, Mr. LAXALT, Mr. MATTINGLY, and Mr. THURMOND):

S. 2929. A bill to amend the Davis-Bacon Act; to the Committee on Labor and Human Resources.

DAVIS-BACON ACT AMENDMENTS

Mr. NICKLES. Mr. President, today, I am introducing legislation—along with Senators EAST, GRASSLEY, HAWKINS, HUMPHREY, LAXALT, MATTINGLY, and THURMOND, to reform the Davis-Bacon Act. Speaking for myself, I believe that the act has long outlived its usefulness and currently is so outmoded that it cannot be administered fairly absent statutory changes. Frequently, the result reached by the Labor Department's predetermined prevailing wage calculations are inequitable to the very persons the act is designed to protect—local construction craftsmen and their employers.

To its credit, the Reagan administration has tried to bring the 50-year-old act into the late 20th century, but has been stymied by a court-imposed restraining order obtained by the real beneficiaries of artificially determined prevailing wages—the building trade unions. I suspect that if the Congress delays action on Davis-Bacon until this legal dispute is finally resolved by the courts, then additional years will pass and several billion dollars more will be wasted on inaccurate wage determinations.

I believe the Congress has a responsibility to clean up the act quickly so that the taxpayers may benefit forthwith.

The legislation I am submitting today mirrors the administration's key proposed changes in all but one provision—the threshold level. The four changes I am proposing are:

First, for the first time a definition of "prevailing wages" would be written into the act. Currently, in the absence of a statutory definition, the Labor Department uses the notorious 30 percent rule. This legislation requires the DOL to use a majority rule or, if a majority wage rate cannot be identified, a weighted average.

Second, an outright ban on importing urban wage rates into rural civil subdivisions and vice versa.

Third, the addition of a helper classification would be formally written into the act. This practice is not new. For years the Department of Labor has recognized helper classifications in several States and has issued wage determinations accordingly. But this recognition needs to be expanded. The use of helpers is common in the construction industry and the Labor Department's failure to take helpers into account leads to numerous situations where indigenous contractors and their employees lose work to outside, higher priced competition.

Fourth, the current $2,000 threshold is upped to $100,000. This modest increase is long overdue and will give greater latitude to the contracting officers of the various Federal agencies in awarding small contracts more quickly and efficiently.

If enacted today, the Congressional Budget Office calculates that these four changes will save the taxpayer some $3.5 billion over the next 5 fiscal years—with savings of over $1 billion per year thereafter. Copies of the CBO estimate are available from the Senate Labor Subcommittee upon request.

This legislation is designed to retain the rationale behind the Davis-Bacon Act—that prevailing wage scales and practices should not be undercut by the Federal Government's construction program. However, these four changes will bring the act back into balance by permitting and encouraging indigenous contractors to bid on Federal work—a practice frequently denied to them because the Davis-Bacon Act forces up the true prevailing wage scale in an area and/or precludes the efficient use of their work force as utilized on private sector projects. Davis-Bacon changes are long overdue and I believe that the Congress will eventually accept these statutory changes.

Mrs. HAWKINS. Mr. President, I am pleased to support Senator NICKLES' bill amending the Davis-Bacon Act. It seems to me that times have changed, our economy has changed, most labor and management laws have changed, but the Davis-Bacon Act has remained the same. To put it simply, the Davis-Bacon Act is out of date—and it is costing our constituents a lot of money.

The Davis-Bacon Act was first adopted in 1931 to promote fairness and consistency in the construction industry. I am all for fair wages and consistent treatment of laborers, but I believe the Davis-Bacon Act is now counterproductive. The act now provides the prevailing excuse for unfairness and inconsistency in the construction industry as well as an empty pocketbook for taxpayers.

The Davis-Bacon Act was designed to insure that laborers on Federal and federally assisted construction projects were paid the prevailing wage. The formula that the Department of Labor now uses to determine prevailing wage is rightfully under suspicion, however. Briefly, the prevailing wage is now defined as the rate paid to 30 percent or more of construction workers, mostly union workers, in a given classification. In theory the act appears fair. But let us get back to the realities of space and time here. Fifty years ago a determination of a prevailing wage was a necessary tool to protect workers. But, today, workers are protected from exploitation by the Taft-Hartley Act, the Fair Labor Standards Act, the Walsh-Healy Act, and scores of State and local laws. Fifty years later, the act inflates the cost of Federal and private construction. In an effort to curb excessive construction costs, our bill defines prevailing wage as the rate paid to 50 percent or more of the construction workers in a given classification. By doing so, the "prevailing wage" formula will more closely measure the actual earnings of average workers.

Clearly, the Davis-Bacon Act also makes no allowances for changes in time—or in space. Currently, for example, the Department of Labor makes prevailing wage determinations in urban areas but also uses them in rural areas—where the cost of living is considerably lower. Our bill requires more localized wage-rate surveys to prevent this.

It may seem impossible to save the taxpayers over $1 billion a year in unnecessary construction costs without eliminating a single construction job or canceling a single construction project. But Senator NICKLES has done just that in his amendments to the Davis-Bacon Act. And I urge my colleagues to support them.

By Mr. HATCH (for himself, Mr. QUAYLE, Mrs. HAWKINS, and Mr. HELMS):

S. 2930. A bill to provide for the protection of migrant and seasonal agricultural workers and for the registration of contractors of migrant and seasonal agricultural labor and for other purposes; to the Committee on Labor and Human Resources.

MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION ACT

● Mr. HATCH. Mr. President, I am today introducing, with the cosponsorship of my distinguished colleagues, Senator QUAYLE, Senator HAWKINS, and Senator HELMS, a bill to supercede the Farm Labor Contractor Registration Act (FLCRA). This bill, which will be cited as the "Migrant and Seasonal Agricultural Worker Protection Act," (MSPA) was recently submitted to the Congress by the administration. For the past 18 months the Department of Labor has engaged in extensive negotiations with the various interest groups to develop new legislation that would strengthen enforcement over labor contractors as well as enhance labor standard protections for migrant and seasonal agricultural workers. Among the representative groups consulted were the American Farm Bureau Federation, the AFL-CIO and its affiliate, the United Farm Workers of America, the migrant legal action program, the National Cotton Council, the National Council of Agricultural Employers, the National Food Processors Association, the United Fresh Fruit and Vegetable Association, and the Western Growers Association. As Secretary Donovan indicated in the letter transmitting the measure, "the bill represents a consensus among the parties who are most directly affected."

Congress enacted the current law FLCRA in 1963 to curb the exploitation of migrant agricultural workers and their employers by irresponsible farm labor contractors. Known commonly as crew leaders, these contractors typically traveled the country, following the planting and harvesting season. They recruited, transported, supervised, handled pay arrangements, and otherwise acted as intermediary between migrant workers and agricultural employers. Congressional hearings, however, revealed sordid abuses in many instances. Migrant workers were commonly promised higher wages and more work than they eventually received; they were transported long distances in unsafe vehicles and under degrading conditions; they were housed in hovels; they were subjected to physical abuse and kept in virtual slavery. The hearings also showed that itinerant crew leaders at times victimized agricultural employers. Lured by a more lucrative arrangement in the interim, a crew leader might break a previously made contract to supply labor to a farmer, who would then face financial ruin if he could not get help to harvest his crop in time.

The 1963 act regulated these crew leaders through a system of Federal registration and the imposition of affirmative obligations with respect to vehicle liability insurance, recordkeeping, and disclosure of prospective terms and conditions of employment. However, the act proved ineffective. After a decade of experience and several congressional studies, the Congress in 1974 adopted sweeping amend-

ments. The amendments provided an express private right of action to migrant workers; it extended coverage to intrastate contracting activities; It extended registration requirements; it imposed affirmative duties on the Secretary of Labor to monitor and investigate the activities of contractors; and, It imposed substantive duties on a contractor with respect to transportation and housing. The amendments also imposed on farmers and other employers the requirement of confirming that a contractor in properly registered and the requirement to maintain payroll redcords on migrant workers furnished by the contractor.

Unfortunately, the experience under the 1974 amendments has been anything but satisfactory. Newspapers and the news magazines still periodically report on continuing exploitation of migrant workers, on squalid housing, and on unscrupulous crew bosses. At the same time, strong criticism has been directed against the Department of Labor, particularly against its expansive interpretation of the act and its enforcement policies. Congressional hearings have confirmed that the Department in the past concentrated its scarce resources on securing the registration of every employer who might conceivably be construed a farm labor contractor. In an inordinate number of cases, farmers and other agricultural employers—basically fixed situs employers, who were easy targets for Government enforcement—were cited for technical violations dealing with registration requirements. The impact of this enforcement policy has not been the improvement of the migrant workers' lot in the workplace.

The overriding result has been the harassment of agricultural employers. They have expended valuable time and energy in attempting to comply with burdensome registration requirements which in fact are of little utility when it comes to stationary employers. They have wasted resources fighting legal battles over technical violations. If anything, the whole enforcement philosophy of the past has undermined cooperation between the Government and the agricultural employer community in curbing the exploitation of migrant workers.

The bill introduced today seeks to rectify these fundamental problems with current law. It eliminates redtape, paperwork, and administrative burdens. Yet the bill preserves the rights of migrant and seasonal farm workers against abusive employment practices. As outlined in the Secretary's transmittal letter, this consensus measure follows certain basic principles.

First, unlike FLCRA, the bill distinguishes between the traditional, itinerant crewleaders and fixed situs agricultural employers by totally eliminating the obligation of fixed situs employers to register as crewleaders. Second, it maintains the basic farmworker protections under the present FLCRA and has made clear that these protections are to be provided by the appropriate agricultural employer or association, irrespective of whether that employer is a crewleader or a fixed situs employer; those protections pertain to vehicle safety, adequate housing, disclosure of wages, and working conditions, and maintenance of certain records. Third, the bill distinguishes between migrant agricultural workers and seasonal agricultural workers; under the bill migrant agricultural workers are those who are working away from their home overnight, while seasonal agricultural workers are those who live at home and commute to agricultural employment. Fourth, exemptions are provided for labor unions, family businesses and small businesses. Fifth, ambiguous words and phrases which have caused extensive litigation under FLCRA have been eliminated.

I am hopeful that the Congress can give this legislation prompt attention. It is my understanding that the House Education and Labor Committee held hearings on an identical measure, H.R. 7102, 3 days ago. Moreover, because the measure has been reviewed by many eyes—the Department of Labor, representatives of the various agricultural employer groups, and employee representatives—we have a measure of confidence that it has been well crafted. What remains is the need to review it carefully, so as to assure both that it is free of technical flaws and ambiguities and that the policy decisions inherent in the bill are fully understood by all.

I include here a section-by-section analysis of the bill and I ask unanimous consent that the text of the bill be printed in the RECORD; I also want to include in the RECORD the statement of the Department of Labor which was presented to the House Labor Standards Subcommittee on September 14, 1982. The statement sets forth an analysis of the bill, which will be useful for purposes of legislative history. I ask unanimous consent that that document be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

Section 1.—This section provides the table of contents for this Act and that the Act may be cited as the "Migrant and Seasonal Agricultural Worker Protection Act".

Section 2.—This section states that the purpose of this Act is to remove the restraints on commerce caused by activities deterimental to migrant and seasonal agricultural workers; to require farm labor contractors to register under this Act; and to assure necessary protections for migrant and seasonal agricultural workers, agricultural associations, and agricultural employers.

Section 3.—This section provides for the definitions of terms to be used for the purpose of this Act.

(1) The term "agricultural association" is defined as "any nonprofit or cooperative association of farmers, growers, or ranchers, incorporated or qualified under applicable State law, which recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal agricultural worker."

(2) The term "agricultural employer" is defined as "any person who owns or operates a farm, ranch, processing establishment, cannery, gin, packing shed or nursery, or who produces or conditions seed, and who either recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal agricultural worker."

(3) The term "agricultural employment" is defined as "employment in any service or activity included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)), or section 3121(g) of the Internal Revenue Code of 1954 (26 U.S.C. 3121(g)) and the handling, planting, drying, packing, packaging, processing, freezing, or grading prior to delivery for storage of any agricultural or horticultural commodity in its unmanufactured state."

(4) The term "day-haul operation" is defined as "the assembly of workers at a pick-up point waiting to be hired and employed, transportation of such workers to agricultural employment, and the return of such workers to a drop-off point on the same day."

(5) The term "employ" is defined as "having the meaning given such term under section 3(g) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(g)) for the purposes of implementing the requirements of that Act."

(6) The term "farm labor contracting activity" is defined as "recruiting, soliciting, hiring, employing, furnishing, or transporting any migrant or seasonal agricultural worker."

(7) The term "farm labor contractor" is defined as "any person, other than an agricultural employer, an agricultural association, or an employee of an agricultural employer or agricultural association, who, for any money or other valuable consideration paid or promised to be paid, performs any farm labor contracting activity."

(8) The term "migrant agricultural worker" is defined as "an individual who is employed in agricultural employment of a seasonal or other temporary nature, and who is required to be absent overnight from his permanent place of residence." Specifically excluded from the definition of a migrant agricultural worker are any immediate family member of an agricultural employer or a farm labor contractor and any temporary nonimmigrant agricultural H-2 alien worker.

(9) The term "person" is defined as "any individual, partnership, association, joint stock company, trust, cooperative, or corporation."

(10) The term "seasonal agricultural worker" is defined as "an individual who is employed in agricultural employment of a seasonal or other temporary nature and is not required to be absent overnight from his permanent place of residence—(i) when employed on a farm or ranch performing field work related to planting, cultivating, or harvesting operations; or (ii) when employed in canning, packing, ginning, seed conditioning or related research, or processing oper-

ations, and transported, or caused to be transported, to or from the place of employment by means of a day-haul operation." Specifically excluded from the definition of a seasonal agricultural worker are any migrant agricultural worker, any immediate family member of an agricultural employer or a farm labor contractor, and any temporary nonimmigrant agricultural H-2 alien worker.

(11) The term "Secretary" is defined as "the Secretary of Labor or the Secretary's authorized representative."

(12) The term "State" is defined to include "any of the States of the United States, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and Guam."

Section 4.—This section addresses the applicability of this Act and specifically excludes certain persons.

Subsection (a) enumerates the persons who are not subject to this Act.

(1) The family business exemption applies to any individual who engages in a farm labor contracting activity on behalf of a farm, processing establishment, seed conditioning establishment, cannery, gin, packing shed, or nursery, which is owned or operated exclusively by such individual or an immediate family member of such individual, if such activities are performed only for such operation and exclusively by such individual or an immediate family member, but without regard to whether such individual has incorporated or otherwise organized for business purposes.

(2) The small business exemption applies to any person, other than a farm labor contractor, for whom the man-days exemption for agricultural labor provided under section 13(a)(6)(A) of the Fair Labor Standards Act of 1938 (29 U.S.C. 213(a)(6)(A)) is applicable.

(3) Other exemptions include—

(A) Any common carrier which would be a farm labor contractor solely because the carrier is engaged in the farm labor contracting activity of transporting any migrant or seasonal agricultural worker.

(B) Any labor organization, as defined in section 2(5) of the Labor Management Relations Act (29 U.S.C. 152(5)) (without regard to the exclusion of agricultural employees in that Act) or as defined under applicable State labor relations law.

(C) Any nonprofit charitable organization or public or private nonprofit educational institution.

(D) Any person who engages in any farm labor contracting activity solely within a twenty-five mile intrastate radius of such person's permanent place of residence and for not more than thirteen weeks per year.

(E) Any custom combine, hay harvesting, or sheep shearing operation.

(F) Any custom poultry harvesting, breeding, debreaking, desexing, or health service operation provided the employees of the operation are not regularly required to be away from their domicile other than during their normal working hours.

(G) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to detassel, rogue, or otherwise engage in the production of seed and to engage in related and incidental agricultral employment, unless such full-time students or other individuals are required to be away from their permanent place of residence overnight or there are individuals under eighteen years of age who are providing transportation on behalf of such person. The exemption is further extended to certain persons to the extent that they are supplied with the specified workers.

(H) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to string or harvest shade grown tobacco and to engage in related and incidental agricultural employment, unless there are individuals under eighteen years of age who are providing transportation on behalf of such person. The exemption is further extended to certain persons to the extent that they are supplied with the specified workers.

(I) Any employee of any person described in subparagraphs (A) through (H) when performing farm labor contracting activities exclusively for such person.

Subsection (b) states that Title I of this Act does not apply to any agricultural employer or agricultural association or to any employee of such an employer or association.

TITLE I—FARM LABOR CONTRACTORS

Section 101.—This section requires that no person shall engage in any farm labor contracting activity unless the person has a certificate of registration from the Secretary specifying which farm labor contracting activity is authorized. This section further prohibits a farm labor contractor from hiring, employing or using any individual to perform farm labor contracting activities unless such individual has a certificate of registration, or a certificate of registration as an employee of a farm labor contractor, which authorizes the activity. The section states that a farm labor contractor shall be held responsible for violations of this Act by any employee regardless of whether the employee possesses a certificate based on the contractor's certificate of registration.

The section also requires the farm labor contractor and the farm labor contractor employee to carry the certificate of registration at all times while engaging in farm labor contracting activities and to exhibit the certificate, upon request, to all persons with whom he is dealing as a contractor.

The section would deny the use of the State employment service system, as provided through the Wagner-Peyser Act, to any contractor who refused or failed to produce, when asked, a certificate of registration.

Section 102.—This section authorizes the Secretary, after appropriate investigation, to issue a certificate of registration or a certificate of registration as an employee of a farm labor contractor to any person who has filed a written application which contains the following information: a declaration stating the applicant's permanent place of residence and the contracting activities for which the certificate is requested, and any other relevant information; a statement identifying each vehicle to be used to transport migrant or seasonal workers and the appropriate documentation concerning ownership or control and compliance with the motor vehicle safety requirements of section 401; a statement identifying each facility or real property to be used to house migrant workers and the appropriate documentation concerning ownership or control and compliance with the safety and health standards of housing under section 203; a set of fingerprints; and a declaration consenting to the designation of the Secretary as an agent available to accept service of summons if the contractor has left the jurisdiction in which the action is commenced, or is otherwise unavailable.

Section 103.—This section provides for determinations with respect to a certificate of registration. In accordance with regulations, the Secretary may refuse to issue or renew, or may suspend or revoke, a certificate if the applicant or holder: has knowingly made any misrepresentation; is not the real party in interest and the real party in interest has been refused a certificate, or has had a certificate suspended or revoked, or does not qualify for a certificate; has failed to comply with this Act or the regulations; has failed to pay a court judgment under the Farm Labor Contractor Registration Act of 1963 (FLCRA) or to comply with a final order issued by the Secretary, as a result of a violation under this act or FLCRA; or has been convicted within the preceding five years, or a crime relating to gambling or to the sale, distribution or possession of alcoholic beverages, in connection with any farm labor contracting activity, or of any felony involving robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, prostitution, peonage or smuggling or harboring individuals who have entered the country illegally.

Any person who is refused the issuance or renewal of a certificate or whose certificate is suspended or revoked will be afforded an opportunity for an agency hearing, upon request made within 30 days after the date of issuance of the notice of the refusal, suspension, or revocation. The hearings are held in accordance with the Administrative Procedures Act and the agency determination shall be made by final order.

If no hearing is requested, the refusal, suspension, or revocation shall constitute a final and unappealable order. If a hearing is requested, the initial agency decision shall be made by an administrative law judge and the decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of an intent to modify or vacate the decision shall be issued to the parties within 30 days after the decision of the administrative law judge.

Any person against whom a final order has been entered after an agency hearing may obtain review by the district court by filing a notice of appeal within 30 days from the date of such order, simultaneously sending a copy to the Secretary. The Secretary shall certify the record to the court. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence. Any decision, order or judgment of the United States District Court shall be subject to appeal to the appropriate circuit courts.

Section 104.—This section provides that a certificate of registration may not be transferred or assigned. Unless suspended or revoked, a certificate shall expire 12 months from the date of issuance, except that certificates issued between December 1, 1982 and November 30, 1983 may be issued for a period of up to 24 months to provide for an orderly transition. Certificates may also be temporarily extended by filing an application with the Secretary at least 30 days prior to its expiration date. The Secretary may renew a certificate for additional 12-month periods or for periods in excess of 12 months but not greater than 24 months. The eligibility for renewals of periods in excess of 12 months shall be limited to contractors who have not been cited for a viola-

tion of this Act or FLCRA during the preceding 5 years.

Section 105.—The section requires each farm labor contractor to provide to the Secretary, within 30 days, a notice of each change of permanent place of residence. The section also authorizes the Secretary to amend a certificate whenever a contractor intends to: engage in another farm labor contracting activity; use another vehicle to transport migrant or seasonal workers; or use another facility or real property to house migrant workers.

Section 106.—This section states that no farm labor contractor shall recruit, hire, employ, or use, with knowledge, the services of any illegal alien. The contractor will be considered to have complied with this provision if he demonstrates that he relied in good faith on documentation prescribed by the Secretary and that he had no reason to believe that the individual was an illegal alien.

TITLE II—MIGRANT AGRICULTURAL WORKER PROTECTIONS

Section 201.—This section provides for informing migrant agricultural workers of their wages and working conditions and for the maintenance of records.

The section requires each farm labor contractor, agricultural employer and agricultural association which recruits migrant workers to ascertain and disclose to the worker the following information in writing at the time of the worker's recruitment: the place of employment; the wage rates to be paid; the crops and kinds of activities on which the worker may be employed; the period of employment; the transportation, housing and other employee benefits and their costs; the existence of a strike or other concerted work stoppage, slowdown, or interruption of operations at the place of employment; and the existence of any arrangements under which the farm labor contractor, agricultural employer or association is to receive a commission as a result of any sales to the workers.

The section requires each farm labor contractor, agricultural employer and agricultural association which employs migrant workers to post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded the workers under this Act, including their right to receive, upon request, a written statement of the information described in the preceding paragraph.

If housing is provided by a farm labor contractor, agricultural employer or agricultural association, they must post or present to the migrant workers a statement of the terms and conditions, if any, of occupancy.

The section requires, with respect to each worker, that each farm labor contractor, agricultural employer and agricultural association which employs migrant workers make, keep and preserve, for three years, records of the following: The basis on which wages are paid; the number of piecework units earned; the number of hours worked; the total pay period earnings; the specific sums withheld and the purpose of each withholding; and the net pay. The above information must also be provided through an itemized written statement to each migrant worker for each pay period.

If a farm labor contractor furnishes migrant workers to another contractor, agricultural employer or association, the farm labor contractor must provide copies of all records with respect to the above information for the workers so provided; the recipient of the records must keep them for a period of three years from the end of the period of employment.

The section further provides that no farm labor contractor agricultural employer or association shall knowingly provide false or misleading information to any migrant worker concerning the terms, conditions, or existence of employment required to be disclosed by the preceding paragraphs.

The information required to be disclosed to migrant workers when recruited, employed or housed must be in written form in English, or as necessary and reasonable, in Spanish or other fluent or literate in English. The Department will provide forms in English, Spanish and other languages, as necessary, which may be used in providing migrant workers with the required information.

Section 202.—This section provides for further protections for migrant workers with respect to wages, supplies and other working arrangements.

This section requires each farm labor contractor, agricultural employer and association to pay the wages owed to the migrant workers when due. The section also prohibits the contractor, employer or association from requiring migrant workers to purchase any goods or services solely from them. Finally, the section states that no contractor, employer or association shall, without justification, violate the terms of any working arrangements made with any migrant worker.

Section 203.—This section provides for the safety and health of housing. This section requires that each person who owns or controls a facility or real property which is used as housing for migrant workers shall be responsible for ensuring that the housing complies with substantive Federal and State safety and health standards applicable to that housing.

The section prohibits the occupancy of such housing by migrant workers unless the housing has been certified by an appropriate State or local health authority that it meets the applicable safety and health standards, and a copy of the certification of occupancy is posted at the site. The section notes that the receipt of such a certification does not relieve any person of the responsibilities of ensuring that the housing complies with substantive Federal and State safety and health standards. The owner of the housing is required to retain the original certification for a period of three years.

If a request for inspection and certification of a facility or real property is made to the appropriate State or local health agency at least 45 days prior to the anticipated date of occupancy by migrant workers and the agency has not conducted the investigation, this section permits the housing to be occupied, although occupancy would not relieve any person of the responsibilities of ensuring that the housing complies with substantive Federal and State safety and health standards.

Finally, this section does not apply to any person who, in his ordinary course of business, regularly provides housing on a commercial basis to the general public, such as an innkeeper.

TITLE III—SEASONAL AGRICULTURAL WORKER PROTECTIONS

Section 301.—This section provides for informing seasonal agricultural workers of their wages and working conditions and for the maintenance of records.

The section requires each farm labor contractor, agricultural employer and agricultural association which recruits seasonal workers, other than day-haul workers, to ascertain and disclose to the worker, upon request, the following information in writing when an offer of employment is made to such worker: the place of employment; the wage rates to be paid; the crops and kinds of activities on which the worker may be employed; the period of employment; the transportation and other employee benefits and their costs; the existence of a strike or other concerted work stoppage, slowdown, or interruption of operations at the place of employment; and the existence of any arrangements under which the farm labor contractor, agricultural employer or association is to receive a commission as a result of any sales to the workers.

In the case of day-haul workers, the information shall be required to be disclosed at the place of recruitment.

The section requires each farm labor contractor, agricultural employer and agricultural association which employs seasonal workers to post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded the workers under this Act, including their right to receive, upon request, a written statement of the information described in the preceding paragraphs.

The section requires, with respect to each worker, that each farm labor contractor, agricultural employer and agricultural association which employs seasonal workers make, keep and preserve, for three years, records of the following: the basis on which wages are paid; the number of piecework units earned; the number of hours worked; the total pay period earnings; the specific sums withheld and the purpose of each withholding; and the net pay. The above information must also be provided through an itemized written statement to each seasonal worker for each pay period.

If a farm labor contractor furnishes seasonal workers to another contractor, agricultural employer or association, the farm labor contractor must provide copies of all records with respect to the above information for the workers so provided; the recipient of the records must keep them for a period of three years from the end of the period of employment.

The section further provides that no farm labor contractor, agricultural employer or association shall knowingly provide false or misleading information to any seasonal worker concerning the terms, conditions, or existence of employment required to be disclosed by the preceding paragraphs.

The information required to be disclosed to seasonal workers when recruited or employed must be in written form in English, or as necessary and reasonable, in Spanish or other language common to the seasonal workers who are not fluent or literate in English. The Department will provide forms in English, Spanish and other languages, as necessary, which may be used in providing seasonal workers with the required information.

Section 302.—This section provides for further protections for workers with respect to wages, supplies and other working arrangements.

This section requires each farm labor contractor, agricultural employer and association to pay the wages owed to the seasonal workers when due. The section also prohibits the contractor, employer or association from requiring seasonal workers to purchase any goods or services solely from them. Finally, the section states that no contractor, employer or association shall, without justi-

fication, violate the terms of any working arrangements made with any seasonal worker.

TITLE IV—FURTHER PROTECTIONS FOR MIGRANT AND SEASONAL AGRICULTURAL WORKERS

Section 401.—This section provides for motor vehicle safety and applies to the transportation of any migrant or seasonal agricultural worker. The section does not apply to transportation of any migrant or seasonal agricultural worker on a tractor, combine, harvester, picker, or other similar machinery and equipment while such worker is actually engaged in the planting, cultivating, or harvesting of any agricultural commodity or the care of livestock or poultry.

The section requires each farm labor contractor, agricultural employer and agricultural association to ensure that any vehicle used to transport a migrant or seasonal agricultural worker conforms to certain standards to be prescribed by the Secretary and other applicable Federal and State safety standards. The section would also ensure that the driver of each vehicle possess a valid and appropriate license and provides for the existence of an insurance policy or liability bond insuring against liability for damage to persons or property arising from the ownership or operation of the vehicle. The Secretary is required to issue regulations which would prescribe standards to protect the health and safety of migrant and seasonal agricultural workers and in issuing the standards for the protection of those workers, consider, among other factors, the type of vehicle used, the passenger capacity in the vehicle, the distance which such workers will be carried in the vehicle, the type of roads and highways on which such workers will be carried in the vehicle, and the extent to which a proposed standard would cause an undue burden on agricultural employers, agricultural associations, or farm labor contractors.

The standards prescribed by the Secretary shall be in addition to, and shall not supersede or modify, any standard under the Interstate Commerce Act relating to the transportation of migrant workers which is independently applicable. A violation of these standards shall also constitute a violation under this Act.

In the event the Secretary fails to prescribe the standards by the effective date of this Act, the standards prescribed under the Interstate Commerce Act relating to the transportation of migrant workers shall be deemed to be the standards prescribed by the Secretary and shall, as appropriate and reasonable in the circumstances, apply: (1) without regard to the mileage and boundary line limitations of that Act, and (2) until superseded by standards actually prescribed by the Secretary.

The level of insurance required by this section should be at least the amount required for common carriers under the Interstate Commerce Act.

If the farm labor contractor, agricultural employer or association is the employer of any migrant or seasonal worker for the purposes of State workers' compensation law and thus provides coverage for the workers in the case of bodily injury or death, the section would excuse the requirement of an insurance policy or liability bond if the workers are only transported under circumstances where there is coverage under State law. An insurance policy or liability bond will be required for those circumstances where there is no coverage under State law.

Finally, the section requires the Secretary to promulgate regulations, not later than the effective date of this Act and in accordance with section 511 of this Act.

Section 402.—This section requires that prior to utilizing the services of a farm labor contractor all persons should take reasonable steps to determine that the contractor posseses a valid certificate of registration which authorizes the activity to be performed. The section states that the person may rely on the possession of a certificate of registration or on confirmation by the Department of Labor. The section also requires the Secretary to maintain a central public registry of all persons issued a certificate of registration.

Section 403.—This section requires each farm labor contractor to obtain at each place of employment and make available for inspection to the workers he furnishes a written statement of the conditions of employment described in sections 201 and 301.

Section 404.—This section states that no farm labor contractor shall violate, without justification, the terms of any written agreements made with agricultural employers or associations pertaining to any contracting activity or worker protection under this Act. The provision also notes that written agreements under this section do not relieve the parties of any responsibilities that they would otherwise have under the Act.

TITLE V—GENERAL PROVISIONS

Part A—Enforcement provisions

Section 501.—This section provides for criminal sanctions of a fine of not more than $1,000 or a prison term not to exceed three years, or both, for willful and knowing violations of this Act. The section also provides for a fine of not more than $10,000 or a prison term not to exceed three years, or both, for any person who has been denied a certificate, or has failed to obtain a certificate or has had his certificate suspended or revoked and such person has been found to have recruited, hired, employed or used, with knowledge, the services of an illegal alien.

Section 502.—This section provides for judicial enforcement by permitting the Secretary to petition any appropriate district court for temporary or permanent injunctive relief if the Secretary determined that this Act, or any regulation, has been violated. This section also permits the Solicitor of Labor to appear for, and represent, the Secretary in any civil litigation brought under this Act, subject to the direction and control of the Attorney General.

Section 503.—This section provides for administrative sanctions of a civil money penalty of not more than $1,000 for each violation of this Act or the regulations. In determining the amount to be assessed the Secretary must take into account the previous record of the person in terms of compliance with this Act and with comparable requirements of FLCRA, and the gravity of the violation. Any person assessed a civil money penalty will be afforded an opportunity for an agency hearing, upon request made within 30 days after the date of issuance of the notice of assessment. The hearings are held in accordance with the Administrative Procedures Act and the agency determination shall be made by final order.

If no hearing is requested, the assessment shall constitute a final and unappealable order. If a hearing is requested, the initial agency decision shall be made by an administrative law judge and the decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of an intent to modify or vacate the decision shall be issued to the parties within 30 days after the decision of the administrative law judge.

Any person against whom a final order has been entered after an agency hearing may obtain review by the district court by filing a notice of appeal within 30 days from the date of such order, simultaneously sending a copy to the Secretary. The Secretary shall certify the record to the court. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence. Any decision, order or judgment of the United States District Court shall be subject to appeal to the appropriate circuit courts.

All penalties collected under the authority of this section shall be paid into the Treasury of the United States.

Section 504.—This section provides for a private right of action by any person aggrieved by a violation of this Act, or the regulations, by a farm labor contractor, agricultural employer, agricultural association or other person. The aggrieved party may file suit in any district court having jurisdiction of the parties, without respect to the amount in controversy and without regard to the citizenship of the parties and without regard to exhaustion of any alternative administrative remedies. The court is authorized to appoint an attorney for such complainant, upon application, and may authorize the commencement of the action.

If the court finds that the respondent has intentionally violated any provision of this Act, or the regulations, it may award damages up to and including an amount equal to the amount of actual damages, or statutory damages of up to $500 per plaintiff per violation, or other equitable relief. Multiple infractions of a single provision of this Act, or the regulations, shall constitute only one violation for purposes of determining statutory damages due a plaintiff. If a complaint is certified as a class action, the court shall award no more than the lesser of up to $500 per plaintiff per violation, or up to $500,000 or other equitable relief.

In determining the amount of damages to be awarded, the court is authorized to consider whether an attempt was made to resolve the issues in dispute before resort to litigation.

Civil actions brought under this section shall be subject to appeal to the appropriate circuit courts.

Section 505.—This section prohibits the discrimination against any migrant or seasonal agricultural worker and provides that no person shall intimidate, threaten, restrain, coerce, blacklist, discharge, or in any other manner discriminate against such worker because the worker has filed a complaint or caused a complaint to be filed under this Act, or has exercised any rights or protections afforded by this Act.

A worker who believes that he has been discriminated against by any person in violation of this section, may within 180 days after the violation occurs, file a complaint with the Secretary. The Secretary shall investigate the complaint and if he determines that the provisions of this section have been violated, he shall bring an action in any appropriate district court against such person. The courts shall have jurisdiction, for cause shown, to restrain the violation and to order all appropriate relief, including rehiring or reinstatement of the worker, with back pay, or damages.

Section 506.—This section states that agreements by employees purporting to

waive or to modify their rights under this Act shall be void as contrary to public policy, except for waivers or modifications in favor of the Secretary which shall be valid for purposes of enforcement of this Act.

Part B—Administrative provisions

Section 511.—This section authorizes the Secretary to issue rules and regulations as are necessary to carry out this Act.

Section 512.—This section authorizes the Secretary to investigate and pursue complaints, including the inspection of places and records and the questioning of persons and gathering of information to determine compliance with the Act or its regulations. The provision authorizes the Secretary to issue subpoenas requiring the attendance of witnesses or the production of evidence. The provision extends to the Secretary the authority contained in sections 9 and 10 of the Federal Trade Commission Act relating to the attendance of witnesses and the production of documents. The provision also makes it a violation of this Act for any person to interfere in any manner with an official during the performance of his investigation or law enforcement function under the Act.

Section 513.—This section permits the Secretary to enter into agreements with Federal and State agencies to use their facilities, and to delegate authority, other than rulemaking, as may be useful in carrying out this Act to a State agency pursuant to a written State plan. The State plan must include a description of the functions to be performed, the methods of performance and the resources to be devoted to the performance of such functions. The State plan must also provide assurances that the State agency's performance of functions so delegated will be at least comparable to the performance of such functions by the Department. The provision also permits the allocation or transfer of funds to the agencies for expenses incurred pursuant to such agreements.

Part C—Miscellaneous provisions

Section 521.—This section states that the Act is intended to supplement State action and therefore does not excuse anyone from compliance with State law or regulation.

Section 522.—This is a transition provision which permits the Secretary to deny a certificate of registration to any farm labor contractor who has a judgment outstanding against him under FLCRA or is subject to a final order of the Secretary under FLCRA assessing a civil money penalty which has not been paid. The provision also permits the use of any findings under FLCRA to be applied to determinations of willful and knowing violations under this Act.

Section 523.—This section repeals FLCRA.

Section 524.—This section establishes December 1, 1982 as the effective date of this Act and provides for its classification in title 29, United States Code.

S. 2930

Be in enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act, together with the following table of contents may be cited as the "Migrant and Seasonal Agricultural Worker Protection Act."

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. Purpose.
Sec. 3. Definitions.
Sec. 4. Application of Act.

TITLE I—FARM LABOR CONTRACTORS
Sec. 101. Certificate of registration required.
Sec. 102. Issuance of certificate of registration.
Sec. 103. Registration determinations.
Sec. 104. Transfer or assignments; expiration; renewal.
Sec. 105. Notice of address change; amendment of certificate of registration.
Sec. 106. Prohibition against employing illegal aliens.

TITLE II—MIGRANT AGRICULTURAL WORKER PROTECTIONS
Sec. 201. Information and recordkeeping requirements.
Sec. 202. Wages, supplies, and other working arrangements.

PART C—MISCELLANEOUS PROVISIONS
Sec. 521. State laws and regulations.
Sec. 522. Transition provision.
Sec. 523. Repealer.
Sec. 524. Effective date.

PURPOSE

SEC. 2. It is the purpose of this Act to remove the restraints on commerce caused by activities detrimental to migrant and seasonal agricultural workers; to require farm labor contractors to register under this Act; and to assure necessary protections and migrant and seasonal agricultural workers, agricultural associations, and agricultural employers.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "agricultural association" means any nonprofit or cooperative association of farmers, growers, or ranchers, incorporated or qualified under applicable State law, which recruits, solicits, hires, employes, furnishes, or transports any migrant or seasonal agricultural worker.

(2) The term "agricultural employer" means any person who owns or operates a farm, ranch, processing establishment, cannery, gin, packing shed or nursery, or who produces or conditions seed, and who either recruits, solicits, hires, employs, furnishes, or transports any migrant or seasonal agricultural worker.

(3) The term "agricultural employment" means employment in any service or activity included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)), or section 3121(g) of the Internal Revenue Code of 1954 (26 U.S.C. 3121(g)) and the handling, planting, drying, packing, packaging, processing, freezing, or grading prior to delivery for storage of any agricultural or horticultural commodity in its unmanufactured state.

(4) The term "day-haul operation" means the assembly of workers at a pick-up point waiting to be hired and employed, transportation of such workers to agricultural employment, and the return of such workers to a drop-off point on the same day.

(5) The term "employ" has the meaning given such term under section 3(g) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(g)) for the purposes of implementing the requirements of that Act.

(6) The term "farm labor contracting activity" means recruiting, soliciting, hiring, employing, furnishing, or transporting any migrant or seasonal agricultural worker.

(7) The term "farm labor contractor" means any person, other than an agricultural employer, an agricultural association, or an employee of an agricultural employer or agricultural association, who, for any money or other valuable consideration paid or promised to be paid, performs any farm labor contracting activity.

(8)(A) Except as provided in subparagraph (B), the term "migrant agricultural worker" means an individual who is employed in agricultural employment of a seasonal or other temporary nature, and who is required to be absent overnight from his permanent place of residence.

(B) The term "migrant agricultural worker" does not include—

(i) any immediate family member of an agricultural employer or a farm labor contractor; or

(ii) any temporary nonimmigrant alien who is authorized to work in agricultural employment in the United Staes under sections 101(a)(15)(H)(ii) and 214(c) of the Immigration and National Act.

(9) The term "person" means any individual, partnership, association, joint stock company, trust, cooperative, or corporation.

(10)(A) Except as provided in subparagraph (B), the term "seasonal agricultural worker" means an individual who is employed in agricultural employment of a seasonal or other temporary nature and is not required to be absent overnight from his permanent place of residence—

(i) when employed on a farm or ranch performing field work related to planting, cultivating, or harvesting operations; or

(ii) when employed in canning, packing, ginning, seed conditioning or related research, or processing operations, and transported, or caused to be transported, to or from the place of employment by means of a day-haul operation.

(B) The term "seasonal agricultural worker" does not include—

(i) any migrant agricultural worker;

(ii) any immediate family member of an agricultural employer or a farm labor contractor; or

(iii) any temporary nonimmigrant alien who is authorized to work in agricultural employment in the United States under sections 101(a)(15)(H)(ii) and 214(c) of the Immigration and Nationality Act.

(11) The term "Secretary" means the Secretary of Labor or the Secretary's authorized representative.

(12) The term "State" means any of the States of the United States, the District of

Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and Guam.

APPLICABILITY OF ACT

SEC. 4. (a) The following persons are not subject to this Act:

(1) FAMILY BUSINESS EXEMPTION.—Any individual who engages in a farm labor contracting activity on behalf of a farm, processing establishment, seed conditioning establishment, cannery, gin, packing shed, or nursery, which is owned or operated exclusively by such individual on an immediate family member of such individual, if such activities are performed only for such operation and exclusively by such individual or an immediate family member, but without regard to whether such individual has incorporated or otherwise organized for business purposes.

(2) SMALL BUSINESS EXEMPTION.—Any person, other than a farm labor contractor, for whom the man-days exemption for agricultural labor provided under section 13(a)(6)(A) of the Fair Labor Standards Act of 1938 (29 U.S.C. 213(a)(6)(A)) is applicable.

(3) OTHER EXEMPTIONS.—(A) Any common carrier which would be a farm labor contractor solely because the carrier is engaged in the farm labor contracting activity of transporting any migrant or seasonal agricultural worker.

(B) Any labor organization, as defined in section 2(5) of the Labor Management Relations Act (29 U.S.C. 152(5)) (without regard to the exclusion of agricultural employees in that Act) or as defined under applicable State labor relations law.

(C) Any nonprofit charitable organization or public or private nonprofit educational institution.

(D) Any person who engages in any farm labor contracting activity solely within a twenty-five mile intrastate radius of such person's permanent place of residence and for not more than thirteen weeks per year.

(E) Any custom combine, hay harvesting, or sheep shearing operation.

(F) Any custom poultry harvesting, breeding, debeaking, desexing, or health service operation provided the employees of the operation are not regularly required to be away from their domicile other than during their normal working hours.

(G)(i) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to detassel, rogue, or otherwise engage in the production of seed and to engage in related and incidental agricultural employment, unless such full-time students or other individuals are required to be away from their permanent place of residence overnight or there are individuals under eighteen years of age who are providing transportation on behalf of such person.

(ii) Any person to the extent he is supplied with students or other individuals for agricultural employment in accordance with clause (i) of this subparagraph by a person who is exempt under such clause.

(H)(i) Any person whose principal occupation or business is not agricultural employment, when supplying full-time students or other individuals whose principal occupation is not agricultural employment to string or harvest shade grown tobacco and to engage in related and incidental agricultural employment, unless there are individuals under eighteen years of age who are providing transportation on behalf of such person.

(ii) Any person to the extent he is supplied with students or other individuals for agricultural employment in accordance with clause (i) of this subparagraph by a person who is exempt under such clause.

(I) Any employee of any person described in subparagraphs (A) through (H) when performing farm labor contracting activities exclusively for such person.

(b) Title I of this Act does not apply to any agricultural employer or agricultural association or to any employee of such an employer or association.

TITLE I—FARM LABOR CONTRACTORS

CERTIFICATE OF REGISTRATION REQUIRED

SEC. 101. (a) No person shall engage in any farm labor contracting activity, unless such person has a certificate of registration from the Secretary specifying which farm labor contracting activities such person is authorized to perform.

(b) A farm labor contractor shall not hire, employ, or use any individual to perform farm labor contracting activities unless such individual has a certificate of registration, or a certificate of registration as an employee of the farm labor contractor employer, which authorizes the activity for which such individual is hired, employed, or used. The farm labor contractor shall be held responsible for violations of this Act or any regulation under this Act by any employee regardless of whether the employee possesses a certificate of registration based on the Contractor's certificate of registration.

(c) Each registered farm labor contractor and registered farm labor contractor employee shall carry at all times while engaging in farm labor contracting activities a certificate of registration and, upon request, shall exhibit that certificate to all persons with whom they intend to deal as a farm labor contractor or farm labor contractor employee.

(d) The facilities and the services authorized by the Act of June 6, 1933 (29 U.S.C. 49 et. seq.), known as the Wagner-Peyser Act, shall be denied to any farm labor contractor upon refusal or failure to produce, when asked, a certificate of registration.

ISSUANCE OF CERTIFICATE OF REGISTRATION

SEC. 102. The Secretary, after appropriate investigation and approval, shall issue a certificate of registration (including a certificate of registration as an employee of a farm labor contractor) to any person who has filed with the Secretary a written application containing the following:

(1) a declaration, subscribed and sworn to by the applicant, stating the applicant's permanent place of residence, the farm labor contracting activities for which the certificate is requested, and such other relevant information as the Secretary may require;

(2) a statement identifying each vehicle to be used to transport any migrant or seasonal agricultural worker and, if the vehicle is or will be owned or controlled by the applicant, documentation showing that the applicant is in compliance with the requirements of section 401 with respect to each such vehicle;

(3) a statement identifying each facility or real property to be used to house any migrant agricultural worker and, if the facility or real property is or will be owned or controlled by the applicant, documentation showing that the applicant is in compliance with section 203 with respect to each such facility or real property;

(4) a set of fingerprints of the applicant; and

(5) a declaration, subscribed and sworn to by the applicant, consenting to the designation by a court of the Secretary as an agent available to accept service of summons in any action against the applicant, if the applicant has left the jurisdiction in which the action is commenced or otherwise has become unavailable to accept service.

REGISTRATION DETERMINATIONS

SEC. 103. (a) In accordance with regulations, the Secretary may refuse to issue or renew, or may suspend or revoke, a certificate of registration (including a certificate of registration as an employee of a farm labor contractor) if the applicant or holder—

(1) has knowingly made any misrepresentation in the application for such certificate;

(2) is not the real party in interest in the application or certificate of registration and the real party in interest is a person who has been refused issuance or renewal of a certificate, has had a certificate suspended or revoked, or does not qualify under this section for a certificate;

(3) has failed to comply with this Act or any regulation under this Act;

(4) has failed—

(A) to pay any court judgment obtained by the Secretary or any other person under this Act or any regulation under this Act or under the Farm Labor Contractor Registation Act of 1963 or any regulation under such Act, or

(B) to comply with any final order issued by the Secretary as a result of a violation of this Act or any regulation under this Act or a violation of the Farm Labor Contractor Registration Act of 1963 or any regulation under such Act; or

(5) has been convicted within the preceding five years—

(A) of any crime under State or Federal law relating to gambling, or to the sale, distribution or possession of alcoholic beverages, in connection with or incident to any farm labor contracting activities; or

(B) of any felony under State or Federal law involving robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, prostitution, peonage, or smuggling or harboring individuals who have entered the United States illegally.

(b)(1) The person who is refused the issuance or renewal of a certificate or whose certificate is suspended or revoked under subsection (a) shall be afforded an opportunity for agency hearing, upon request made within thirty days after the date of issuance of the notice of the refusal, suspension, or revocation. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. If no hearing is requested as herein provided, the refusal, suspension, or revocation shall constitute a final and unappealable order.

(2) If a hearing is requested, the initial agency decision shall be made by an administrative law judge, and such decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of intent to modify or vacate the decision of the administrative law judge shall be issued to the parties within thirty days after the decision of the administrative law judge. A final order which takes effect under this paragraph shall be subject to review only as provided under subsection (c).

(c) Any person against whom an order has been entered after an agency hearing under this section may obtain review by the United States district court for any district

in which he is located or the United States District Court for the District of Columbia by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered mail to the Secretary. The Secretary shall promptly certify and file in such court the record upon which the order was based. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code. Any decision, order or judgment of the United States District Court shall be subject to appeal as provided in Chapter 83 of title 28, United States Code.

TRANSFER OF ASSIGNMENT; EXPIRATION; RENEWAL

SEC. 104. (a) A certificate of registration may not be transferred or assigned.

(b)(1) Unless earlier suspended or revoked, a certificate shall expire twelve months from the date of issuance, except that (A) certificates issued under this Act during the period beginning December 1, 1982, and ending November 30, 1983, may be issued for a period of up to 24 months for the purpose of an orderly transition to registration under this Act, (B) a certificate may be temporarily extended by the filing of an application with the Secretary at least thirty days prior to its expiration date, and (C) the Secretary may renew a certificate for additional 12-month periods or for periods in excess of 12 months but not in excess of 24 months.

(2) Eligibility for renewals for periods of more than 12 months shall be limited to farm labor contractors who have not been cited for a violation of this Act, or any regulation under this Act, or the Farm Labor Contractor Registration Act of 1963, or any regulation under such Act, during the preceding 5 years.

NOTICE OF ADDRESS CHANGE; AMENDMENT OF CERTIFICATE OF REGISTRATION

SEC. 105. During the period for which the certificate of registration is in effect, each farm labor contractor shall—

(1) provide to the Secretary within 30 days a notice of each change of permanent place of residence; and

(2) apply to the Secretary to amend the certificate of registration whenever the farm labor contractor intends to—

(A) engage in another farm labor contracting activity,

(B) use, or cause to be used, another vehicle than that covered by the certificate to transport any migrant or seasonal agricultural worker, or

(C) use, or cause to be used, another real property or facility to house any migrant agricultural worker other than that covered by the certificate.

PROHIBITION AGAINST EMPLOYING ILLEGAL ALIENS

SEC. 106. (a) No farm labor contractor shall recruit, hire, employ, or use, with knowledge, the services of any individual who is an alien not lawfully admitted for permanent residence or who has not been authorized by the Attorney General to accept employment.

(b) A farm labor contractor shall be considered to have complied with subsection (a) if the farm labor contractor demonstrates that the farm labor contractor relied in good faith on documentation prescribed by the Secretary, and the farm labor contractor had no reason to believe the individual was an alien referred to in subsection (a).

TITLE II—MIGRANT AGRICULTURAL WORKER PROTECTIONS

INFORMATION AND RECORDKEEPING REQUIREMENTS

SEC. 201. (a) Each farm labor contractor, agricultural employer, and agricultural association which recruits any migrant agricultural worker shall ascertain and disclose in writing to each such worker who is recruited for employment the following information at the time of the worker's recruitment:

(1) the place of employment;

(2) the wage rates to be paid;

(3) the crops and kinds of activities on which the worker may be employed;

(4) the period of employment;

(5) the transportation, housing, and any other employee benefit to be provided, if any, and any costs to be charged for each of them;

(6) the existence of any strike or other concerted work stoppage, slowdown, or interruption of operations by employees at the place of employment; and

(7) the existence of any arrangements with any owner or agent of any establishment in the area of employment under which the farm labor contractor, the agricultural employer, or the agricultural association is to receive a commission or any other benefit resulting from any sales by such establishment to the workers.

(b) Each farm labor contractor, agricultural employer, and agricultural association which employs any migrant agricultural worker shall, at the place of employment, post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded such workers under this Act, including the right of a migrant agricultural worker to have, upon request, a written statement provided by the farm labor contractor, agricultural employer, or agricultural association, of the information described in subsection (a). Such employer shall provide upon request, a written statement of the information described in subsection (a).

(c) Each farm labor contractor, agricultural employer, and agricultural association which provides housing for any migrant agricultural worker shall post in a conspicuous place or present to such worker a statement of the terms and conditions, if any, of occupancy of such housing.

(d) Each farm labor contractor, agricultural employer, and agricultural association which employs any migrant agricultural worker shall—

(1) with respect to each such worker, make, keep, and preserve records for three years of the following information:

(A) the basis on which wages are paid;

(B) the number of piecework units earned, if paid on a piecework basis;

(C) the number of hours worked;

(D) the total pay period earnings;

(E) the specific sums withheld and the purpose of each sum withheld; and

(F) the net pay; and

(2) provide to each such worker for each pay period, an itemized written statement of the information required by paragraph (1) of this subsection.

(e) Each farm labor contractor shall provide to any other farm labor contractor, and to any agricultural employer and agricultural association to which such farm labor contractor has furnished migrant agricultural workers, copies of all records with respect to each such worker which such farm labor contractor is required to retain by subsection (d)(1). The recipient of such records shall keep them for a period of three years from the end of the period of employment.

(f) No farm labor contractor, agricultural employer, or agricultural association shall knowingly provide false or misleading information to any migrant agricultural worker concerning the terms, conditions, or existence of agricultural employment required to be disclosed by subsection (a), (b), (c), or (d).

(g) The information required to be disclosed by subsections (a) through (c) of this subsection to migrant agricultural workers shall be provided in written form. Such information shall be provided in English or, as necessary and reasonable, in Spanish or other language common to migrant agricultural workers who are not fluent or literate in English. The Department of Labor shall make forms available in English, Spanish, and other languages, as necessary, which may be used in providing workers with information required under this section.

WAGES, SUPPLIES, AND OTHER WORKING ARRANGEMENTS

SEC. 202. (a) Each farm labor contractor, agricultural employer, and agricultural association which employs any migrant agricultural worker shall pay the wages owed to such worker when due.

(b) No farm labor contractor, agricultural employer, or agricultural association shall require any migrant agricultural worker to purchase any goods or services solely from such farm labor contractor, agricultural employer, or agricultural association.

(c) No farm labor contractor, agricultural employer, or agricultural association shall, without justification, violate the terms of any working arrangement made by that contractor, employer, or association with any migrant agricultural worker.

SAFETY AND HEALTH OF HOUSING

SEC. 203. (a) Except as provided in subsection (c), each person who owns or controls a facility or real property which is used as housing for migrant agricultural workers shall be responsible for ensuring that the facility or real property complies with substantive Federal and State safety and health standards applicable to that housing.

(b)(1) Except as provided in subsection (c) and paragraph (2) of this subsection, no facility or real property may be occupied by any migrant agricultural worker unless either a State or local health authority or other appropriate agency has certified that the facility or property meets applicable safety and health standards. No person who owns or controls any such facility or property shall permit it to be occupied by any migrant agricultural worker unless a copy of the certification of occupancy is posted at the site. The receipt and posting of a certificate of occupancy does not relieve any person of responsibilities under subsection (a). Each such person shall retain the original certification for three years and shall make it available for inspection and review in accordance with section 512.

(2) Notwithstanding paragraph (1) of this subsection, if a request for the inspection of a facility or real property is made to the appropriate State or local agency at least 45 days prior to the date on which it is occupied by migrant agricultural workers and such agency has not conducted an inspection by such date, the facility or property may be so occupied.

(c) This section does not apply to any person who, in the ordinary course of that person's business, regularly provides housing on a commercial basis to the general public and who provides housing to migrant agricultural workers of the same character and on the same or comparable terms and

conditions as is provided to the general public.

TITLE III—SEASONAL AGRICULTURAL WORKER PROTECTIONS

INFORMATION AND RECORDKEEPING REQUIREMENTS

SEC. 301. (a)(1) Each farm labor contractor, agricultural employer, and agricultural association which recruits any seasonal agricultural worker (other than day-haul workers described in section 3(10)(A)(ii)) shall ascertain and, upon request, disclose in writing the following information when an offer of employment is made to such worker:

(A) the place of employment;

(B) the wage rates to be paid;

(C) the crops and kinds of activities on which the worker may be employed;

(D) the period of employment;

(E) the transportation and any other employee benefit to be provided, if any, and any costs to be charged for each of them;

(F) the existence of any strike or other concerted work stoppage, slowdown, or interruption of operations by employees at the place of employment; and

(G) the existence of any arrangements with any owner or agent of any establishment in the area of employment under which the farm labor contractor, the agricultural employer, or the agricultural association is to receive a commission or any other benefit resulting from any sales by such establishment to the workers.

(2) Each farm labor contractor, agricultural employer, and agricultural association which recruits seasonal agricultural workers through use of a day-haul operation described in section 3(10)(A)(ii) shall ascertain and disclose in writing to the worker at the place of recruitment the information described in paragraph (1).

(b) Each farm labor contractor, agricultural employer, and agricultural association which employs any seasonal agricultural worker shall, at the place of employment, post in a conspicuous place a poster provided by the Secretary setting forth the rights and protections afforded such workers under this Act, including the right of a seasonal agricultural worker to have, upon request, a written statement provided by the farm labor contractor, agricultural employer, or agricultural association, of the information described in subsection (a). Such employer shall provide, upon request, a written statement of the information described in subsection (a).

(c) Each farm labor contractor, agricultural employer, and agricultural association which employs any seasonal agricultural worker shall—

(1) with respect to each such worker, make, keep, and preserve records for three years of the following information:

(A) the basis on which wages are paid;

(B) the number of piecework units earned, if paid on a piecework basis;

(C) the number of hours worked;

(D) the total pay period earnings;

(E) the specific sums withheld and the purpose of each sum withheld; and

(F) the net pay; and

(2) provide to each such worker for each pay period, an itemized written statement of the information required by paragraph (1) of this subsection.

(d)(1) Each farm labor contractor shall provide to any other farm labor contractor and to any agricultural employer and agricultural association to which such farm labor contractor has furnished seasonal agricultural workers, copies of all records with respect to each such worker which such farm labor contractor is required to retain by subsection (c)(1). The recipient of these records shall keep them for a period of three years from the end of the period of employment.

(e) No farm labor contractor, agricultural employer, or agricultural association shall knowingly provide false or misleading information to any seasonal agricultural worker concerning the terms, conditions, or existence of agricultural employment required to be disclosed by subsection (a), (b), or (c).

(f) The information required to be disclosed by subsections (a) and (b) of this section to seasonal agricultural workers shall be provided in written form. Such information shall be provided in English or, as necessary and reasonable, in Spanish or other language common to seasonal agricultural workers who are not fluent or literate in English. The Department of Labor shall make forms available in English, Spanish, and other languages, as necessary, which may be used in providing workers with information required under this section.

WAGES, SUPPLIES, AND OTHER WORKING ARRANGEMENTS

SEC. 302. (a) Each farm labor contractor, agricultural employer, and agricultural association which employs any seasonal agricultural worker shall pay the wages owed to such worker when due.

(b) No farm labor contractor, agricultural employer, or agricultural association shall require any seasonal agricultural worker to purchase any goods or services solely from such farm labor contractor, agricultural employer, or agricultural association.

(c) No farm labor contractor, agricultural employer, or agricultural association shall, without justification, violate the terms of any working arrangement made by that contractor, employer, or association with any seasonal agricultural worker.

TITLE IV—FURTHER PROTECTIONS FOR MIGRANT AND SEASONAL AGRICULTURAL WORKERS

MOTOR VEHICLE SAFETY

SEC. 401. (a)(1) Except as provided in paragraph (2), this section applies to the transportation of any migrant or seasonal agricultural worker.

(2) This section does not apply to transportation of any migrant or seasonal agricultural worker on a tractor, combine, harvester, picker, or other similar machinery and equipment while such worker is actually engaged in the planting, cultivating, or harvesting of any agricultural commodity or the care of livestock or poultry.

(b)(1) When using, or causing to be used, any vehicle for providing transportation to which this section applies, each agricultural employer, agricultural association, and farm labor contractor, shall—

(A) ensure that such vehicle conforms to the standards prescribed by the Secretary under paragraph (2) of this subsection and other applicable Federal and State safety standards,

(B) ensure that each driver has a valid and appropriate license, as provided by State law, to operate the vehicle, and

(C) have an insurance policy or a liability bond that is in effect which insures the farm labor contractor, the agricultural employer, or the agricultural association against liability for damage to persons or property arising from the ownership, operation, or the causing to be operated, of any vehicle used to transport any migrant or seasonal agricultural worker.

(2)(A) For purposes of paragraph (1)(A), the Secretary shall prescribe such regulations as may be necessary to protect the health and safety of migrant and seasonal agricultural workers.

(B) To the extent consistent with the protection of the health and safety of migrant and seasonal agricultural workers, the Secretary shall, in promulgating regulations under subparagraph (A), consider, among other factors—

(i) the type of vehicle used,

(ii) the passenger capacity of the vehicle,

(iii) the distance which such workers will be carried in the vehicle,

(iv) the type of roads and highways on which such workers will be carried in the vehicle, and

(v) the extent to which a proposed standard would cause an undue burden on agricultural employers, agricultural associations, or farm labor contractors.

(C) Standards prescribed by the Secretary under subparagraph (A) shall be in addition to, and shall not supersede or modify, any standard under part II of the Interstate Commerce Act (49 U.S.C. 301 et seq.), or any successor provision of subtitle IV of title 49, United States Code, or regulations issued thereunder, which is, independently applicable to transportation to which this section applies. A violation of any such standard shall also constitute a violation under this Act.

(D) In the event that the Secretary fails for any reason to prescribe standards under subparagraph (A) by the effective date of this Act, the standards prescribed under section 204(a)(3a) of the Interstate Commerce Act (49 U.S.C. 304(a)(3a)), relating to the transportation of migrant workers, shall, for purposes of paragraph (1)(A), be deemed to be the standards prescribed by the Secretary under this paragraph, and shall, as appropriate and reasonable in the circumstances, apply (i) without regard to the mileage and boundary line limitations contained in such section, and (ii) until superseded by standards actually prescribed by the Secretary in accordance with this paragraph.

(3) The level of the insurance required by paragraph (1)(C) shall be at least the amount currently required for common carriers of passengers under part II of the Interstate Commerce Act (49 U.S.C. 301 et seq.), and any successor provision of subtitle IV of title 49, United States Code, and regulations prescribed thereunder.

(c) If an agricultural employer, agricultural association, or farm labor contractor is the employer of any migrant or seasonal agricultural worker for purposes of a State worker's compensation law and such employer provides worker's compensation coverage for such worker in the case of bodily injury or death as provided by such State law, the following adjustments in the requirements of subsection (b)(1)(C) relating to having an insurance policy or liability bond apply:

(1) No insurance policy or liability bond shall be required of the employer, if such workers are transported only under circumstances for which there is coverage under such State law.

(2) An insurance policy or liability bond shall be required of the employer for circumstances under which coverage for the transportation of such workers is not provided under such State law.

(d) The Secretary shall, by regulations promulgated in accordance with section 511 not later than the effective date of this Act, prescribe the standards required for the purposes of implementing this section. Any

subsequent revision of such standards shall also be accomplished by regulation promulgated in accordance with such section.

CONFIRMATION OF REGISTRATION

SEC. 402. No person shall utilize the services of any farm labor contractor to supply any migrant or seasonal agricultural worker unless the person first takes reasonable steps to determine that the farm labor contractor possesses a certificate of registration which is valid and which authorizes the activity for which the contractor is utilized. In making that determination, the person may rely upon either possession of a certificate of registration, or confirmation of such registration by the Department of Labor. The Secretary shall maintain a central public registry of all persons issued a certificate of registration.

INFORMATION ON EMPLOYMENT CONDITIONS

SEC. 403. Each farm labor contractor, without regard to any other provisions of this Act, shall obtain at each place of employment and make available for inspection to every worker he furnishes for employment, a written statement of the conditions of such employment as described in sections 201(b) and 301(b) of this Act.

COMPLIANCE WITH WRITTEN AGREEMENTS

SEC. 404. (a) No farm labor contractor shall violate, without justification, the terms of any written agreements made with an agricultural employer or an agricultural association pertaining to any contracting activity or worker protection under this Act.

(b) Written agreements under this section do not relieve a person of any responsibility that such person would otherwise have under this Act.

TITLE V—GENERAL PROVISIONS

PART A—ENFORCEMENT PROVISIONS

CRIMINAL SANCTIONS

SEC. 501. (a) Any person who willfully and knowingly violates this Act or any regulation under this Act shall be fined not more than $1,000 or sentenced to prison for a term not to exceed one year, or both. Upon conviction for any subsequent violation of this Act or any regulation under this Act, the defendant shall be fined not more than $10,000 or sentenced to prison for a term not to exceed three years, or both.

(b) If a farm labor contractor who commits a violation of section 106 has been refused issuance or renewal of, or has failed to obtain, a certificate or registration or is a farm labor contractor whose certificate has been suspended or revoked, the contractor shall, upon conviction, be fined not more than $10,000 or sentenced to prison for a term not to exceed three years, or both.

JUDICIAL ENFORCEMENT

SEC. 502. (a) The Secretary may petition any appropriate district court of the United States for temporary or permanent injunctive relief if the Secretary determines that this Act, or any regulation under this Act, has been violated.

(b) Except as provided in section 518(a) of title 28, United States Code, relating to litigation before the Supreme Court, the Solicitor of Labor may appear for and represent the Secretary in any civil litigation brought under this Act, but all such litigation shall be subject to the direction and control of the Attorney General.

ADMINISTRATIVE SANCTIONS

SEC. 503. (a)(1) Subject to paragraph (2), any person who commits a violation of this Act or any regulation under this Act, may be assessed a civil money penalty of not more than $1,000 for each violation.

(2) In determining the amount of any penalty to be assessed under paragraph (1), the Secretary shall take into account (A) the previous record of the person in terms of compliance with this Act and with comparable requirements of the Farm Labor Contractor Registration Act of 1963, and with regulations promulgated under such Acts, and (B) the gravity of the violation.

(b)(1) The person assessed shall be afforded an opportunity for agency hearing, upon request made within thirty days after the date of issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

(2) If a hearing is requested, the initial agency decision shall be made by an administrative law judge, and such decision shall become the final order unless the Secretary modifies or vacates the decision. Notice of intent to modify or vacate the decision of the administrative law judge shall be issued to the parties within thirty days after the decision of the administrative law judge. A final order which takes effect under this paragraph shall be subject to review only as provided under subsection (c).

(c) Any person against whom an order imposing a civil money penalty has been entered after an agency hearing under this section may obtain review by the United States district court for any district in which he is located or the United States District Court for the District of Columbia by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered mail to the Secretary. The Secretary shall promptly certify and file in such court the record upon which the penalty was imposed. The findings of the Secretary shall be set aside only if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code. Any decision, order or judgment of the United States District Court shall be subject to appeal as provided in Chapter 83 of title 28, United States Code.

(d) If any person fails to pay an assessment after it has become a final and unappealable order, or after the court has entered final judgment in favor of the agency, the Secretary shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

(e) All penalties collected under authority of this section shall be paid into the Treasury of the United States.

PRIVATE RIGHT OF ACTION

SEC. 504. (a) Any person aggrieved by a violation of this Act or any regulation under this Act by a farm labor contractor, agricultural employer, agricultural association, or other person may file suit in any district court of the United States having jurisdiction of the parties, without respect to the amount in controversy and without regard to the citizenship of the parties and without regard to exhaustion of any alternative administrative remedies provided herein.

(b) Upon application by a complainant and in such circumstances as the court may deem just, the court may appoint an attorney for such complainant and may authorize the commencement of the action.

(c)(1) If the court finds that the respondent has intentionally violated any provision of this Act or any regulation under this Act, it may award damages up to and including an amount equal to the amount of actual damages, or statutory damages of up to $500 per plaintiff per violation, or other equitable relief, except that (A) multiple infractions of a single provision of this Act or of regulations under this Act shall constitute only one violation for purposes of determining the amount of statutory damages due a plaintiff; and (B) if such complaint is certified as a class action, the court shall award no more than the lesser of up to $500 per plaintiff per violation, or up to $500,000 or other equitable relief.

(2) In determining the amount of damages to be awarded under paragraph (1), the court is authorized to consider whether an attempt was made to resolve the issues in dispute before the resort to litigation.

(3) Any civil action brought under this section shall be subject to appeal as provided in chapter 83 of title 28, United States Code.

DISCRIMINATION PROHIBITED

SEC. 505. (a) No person shall intimidate, threaten, restrain, coerce, blacklist, discharge, or in any manner discriminate against any migrant or seasonal agricultural worker because such worker has, with just cause, filed any complaint or instituted, or caused to be instituted, any proceeding under or related to this Act, or has testified or is about to testify in any such proceedings, or because of the exercise, with just cause, by such worker on behalf of himself or others of any right or protection afforded by this Act.

(b) A migrant or seasonal agricultural worker who believes, with just cause, that he has been discriminated against by any person in violation of this section may, within 180 days after such violation occurs, file a complaint with the Secretary alleging such discrimination. Upon receipt of such complaint, the Secretary shall cause such investigation to be made as he deems appropriate. If upon such investigation, the Secretary determines that the provisions of this section have been violated, the Secretary shall bring an action in any appropriate United States district court against such person. In any such action the United States district courts shall have jurisdiction, for cause shown, to restrain violation of subsection (a) and order all appropriate relief, including rehiring or reinstatement of the worker, with back pay, or damages.

WAIVER OF RIGHTS

SEC. 506. Agreements by employees purporting to waive or to modify their rights under this Act shall be void as contrary to public policy, except that a waiver or modification of rights in favor of the Secretary shall be valid for purposes of enforcement of this Act.

PART B—ADMINISTRATIVE PROVISIONS

RULES AND REGULATIONS

SEC. 511. The Secretary may issue rules and regulations as are necessary to carry out this Act, consistent with the requirements of chapter 5 of title 5, United States Code.

AUTHORITY TO OBTAIN INFORMATION

SEC. 512. (a) To carry out this Act the Secretary, either pursuant to a complaint or otherwise, shall, as may be appropriate, investigate, and in connection therewith, enter and inspect such places (including

housing and vehicles) and such records (and make transcriptions thereof), question such persons and gather such information to determine compliance with this Act, or regulations prescribed under this Act.

(b) The Secretary may issue subpenas requiring the attendance and testimony of witnesses or the production of any evidence in connection with such investigations. The Secretary may administer oaths, examine witnesses, and receive evidence. For the purpose of any hearing or investigation provided for in this Act, the authority contained in sections 9 and 10 of the Federal Trade Commission Act (15 U.S.C. 49, 50), relating to the attendance of witnesses and the production of books, papers, and documents, shall be available to the Secretary. The Secretary shall conduct investigations in a manner which protects the confidentiality of any complainant or other party who provides information to the Secretary in good faith.

(c) It shall be a violation of this Act for any person to unlawfully resist, oppose, impede, intimidate, or interfere with any official of the Department of Labor assigned to perform an investigation, inspection, or law enforcement function pursuant to this Act during the performance of such duties.

AGREEMENTS WITH FEDERAL AND STATE AGENCIES

SEC. 513. (a) The Secretary may enter into agreements with Federal and State agencies (1) to use their facilities and services, (2) to delegate, subject to subsection (b), to Federal and State agencies such authority, other than rulemaking, as may be useful in carrying out this Act, and (3) to allocate or transfer funds to, or otherwise pay or reimburse, such agencies for expenses incurred pursuant to agreement under clause (1) or (2) of this section.

(b) Any delegation to a State agency pursuant to subsection (a)(2) shall be made only pursuant to a written State plan which—

(1) shall include a description of the functions to be performed, the methods of performing such functions, and the resources to be devoted to the performance of such functions; and

(2) provides assurances satisfactory to the Secretary that the State agency will comply with its description under paragraph (1) and that the State agency's performance of functions so delegated will be at least comparable to the performance of such functions by the Department of Labor.

PART C—MISCELLANEOUS PROVISIONS

STATE LAWS AND REGULATIONS

SEC. 521. This Act is intended to supplement State law, and compliance with this Act shall not excuse any person from compliance with appropriate State law and regulation.

TRANSITION PROVISION

SEC. 522. The Secretary may deny a certificate of registration to any farm labor contractor, as defined in this Act, who has a judgment outstanding against him under the Farm Labor Contractor Registration Act of 1963 (7 U.S.C. 2041 et seq.), or is subject to a final order of the Secretary under that Act assessing a civil money penalty which has not been paid. Any findings under the Farm Labor Contractor Registration Act of 1963 may also be applicable to determinations of willful and knowing violations under this Act.

REPEALER

SEC. 523. The Farm Labor Contractor Registration Act of 1963 (7 U.S.C. 2041 et seq.), is repealed.

EFFECTIVE DATE

SEC. 524. The provisions of this Act shall take effect on December 1, 1982, and shall be classified to title 29, United States Code.

STATEMENT OF ROBERT B. COLLYER, DEPUTY UNDER SECRETARY OF LABOR

Mr. Chairman and Members of the Subcommittee: Thank you for your invitation to appear before the Subcommittee today to describe the Administration's proposed legislation to replace the Farm Labor Contractor Registration Act (FLCRA).

The Administration's bill was developed because of concerns raised about FLCRA in the Congress and in the agricultural community among both employer and worker groups. In response to these concerns, we entered upon a cooperative effort to replace FLCRA with a new law better designed to provide needed protections for farmworkers and, at the same time, eliminate unnecessary regulatory requirements that FLCRA has placed on agricultural employers.

This cooperative effort has now resulted in a consensus bill, endorsed by the AFL-CIO, the Migrant Legal Action Program and by major agricultural employer organizations, such as the American Farm Bureau Federation, the National Food Processors Association and the National Council of Agricultural Employers. While none of these groups believes the bill to be ideal from its individual standpoint, there is important agreement that the bill materially improves the law. As a public administrator, there is no doubt in my mind that it does. Therefore, the Administration urges the Congress to give our proposal careful consideration and expedite its enactment.

Before describing our bill, I want to provide the Subcommittee with a brief background sketch of current law. FLCRA was enacted in 1964, following considerable media attention about the conditions of migrant agricultural workers. That concern was centered on crewleaders, who are the middlemen between agricultural workers and farm operators. In this capacity, crewleaders often transport agricultural workers to jobsites; they may also have some supervisory responsibility for these workers in the fields; they may act as a paymaster for the workers or furnish and maintain farmworker housing, collect rent or occasionally supply meals.

Evidence was developed at the time of the original Congressional hearings that crewleaders did not always provide these services to farm operators or to farmworkers in an honest way. The original Act was designed, therefore, to prevent exploitation by crewleaders engaged in interstate activities and to improve working conditions of migrant farmworkers who were employed by crewleaders. The Act required all farm labor contractors covered by its provisions to register with the U.S. Department of Labor and to observe certain requirements in dealing with farmworkers and farm operators.

In 1974—ten years after enactment of the original statute—Congress reviewed farmworker conditions and determined that an expansion of coverage was appropriate. These 1974 amendments to FLCRA had the effect of broadening coverage of individuals and entities other than the traditional crewleader by including any person who, for a fee for himself or another, recruited, solicited, hired, furnished, or transported any migrant worker for agricultural employment, either within a State or across State lines. One result of this broadening language was that large numbers of fixed-situs agricultural employers such as growers and processors were included as farm labor contractors and are now required to register as contractors under the Act. The situations however, under which these fixed-situs employers must register were not clearly stated in the amendments, and the exemptions from registration were even less clear.

The 1974 amendments dealt with other issues as well. For example, they eliminated the requirement pertaining to the recruitment of 10 or more workers and extended the Act's application to intrastate farm labor contracting activities. They also provided greater protection for workers injured while being transported in a contractor-owned or controlled motor vehicle, by increasing motor vehicle insurance requirements. Applicants for registration were required to have proof of a liability insurance policy equivalent to that required for vehicles transporting passengers under the Interstate Commerce Act. The amendments also strengthened the statutory enforcement machanisms.

Thus, it is clear that the 1974 amendments made several important improvements in the law, but it is also clear that the amendments created substantial uncertainty about the status of fixed-situs agricultural employers and have resulted in great numbers of these employers being treated as if they were crewleaders with no fixed addresses or financial integrity. As a result, the Labor Department's administration of the 1974 amendments with regard to fixed-situs agricultural employers has become controversial, and our efforts to register fixed-situs employers have led to a great deal of litigation.

These matters have caused substantial concern in the Congress. In late 1979, the Department received a letter signed by 52 United States Senators expressing their concern about the issues I have just discussed. In 1980, legislation passed the Senate which would have substantially amended FLCRA. Soon after the Reagan Administration took office in 1981, the Department, therefore, set out to resolve these problems. Our guiding principle, as I have stated, Mr. Chairman, was to develop consensus legislation which would provide essential protections for farmworkers within a rational statutory structure that eliminated unnecessary paperwork and reduced the constant litigation which has been the hallmark of current law. We have achieved that goal.

Now, Mr. Chairman, let me describe this consensus bill.

We are proposing a completely new statutory structure. Our proposal repeals FLCRA and creates a new law, the "Migrant and Seasonal Agricultural Worker Protection Act"—MSPA. The bill encompasses five basic principles:

First, it distinguishes between the traditional crewleader and the fixed-situs agricultural employer, eliminating the fiction that fixed-situs employers are crewleaders and thus must register as such with the Labor Department.

Second, it provides important worker protections, irrespective of whether the worker is employed by a crewleader, a fixed-situs employer or both: vehicle safety, housing safety and health requirements, disclosure of wages, hours and working conditions,

maintenance of necessary records, and provision to workers of itemized information concerning pay and withholding.

Third, the bill distinguishes between migrant workers, seasonal workers and day-haul workers. Day-haul workers are included within the seasonal worker category.

Fourth, the bill provides exemptions for both family businesses and small businesses.

Fifth, the bill deletes the ambiguous words and phrases which have caused extensive litigation under the current law.

In examining these five principles, I want to emphasize the importance of distinguishing between fixed-situs employers and traditional crewleaders. Nothing under the current law has caused more bitterness—not to mention more litigation—than the failure to do so. Under MSPA, therefore, we have excluded fixed-situs employers from the definition of farm labor contractor. Agricultural employers and associations—and the employees of both—would not be required to register as farm labor contractors or carry out the requirements designed specifically for contractors under the Act, such as being fingerprinted. However, as we have emphasized in our second principle, these fixed-situs employers and associations would be required to comply with the substantive labor protections provided in the new law when they are the employers of migrant or seasonal agricultural workers. Of course, traditional crewleaders would also be required to comply with all of these worker protection provisions and would be required, in addition, to adhere to registration requirements, such as designating the farm labor contracting activities to be performed, providing the address of their permanent place of residence, providing documentation on housing and vehicle compliance, providing a set of fingerprints, and consenting to have the Secretary accept service of summons in certain instances. Agricultural employers and associations are specifically excluded from these registration requirements which apply to farm labor contractors.

As noted in our third principle, the bill would establish two categories of covered farmworkers. The term "migrant agricultural worker" has been redefined so it includes only those farmworkers who are away from their home overnight for purposes of agricultural employment. A new category of covered worker is established, namely "seasonal agricultural worker", to include persons who are employed on a farm or ranch but do not live away from their permanent residence. A seasonal agricultural worker employed on a farm or ranch to perform field work relating to planting, cultivating or harvesting operations is covered by the bill; but the bill does not cover local "in-plant" workers who commute daily to their jobs and are not part of a day-haul operation. "Field work" would typically be hand-work such as setting out plants, hoeing, or picking, but could also include loading baskets on a truck or riding on a potato harvester to sort the potatoes. It would not, for example, include tractor drivers, operators of complex or major farm machinery or truck drivers.

The bill would fully cover day-haul workers, including those employed by canneries, processing plants and similar agricultural employers, as listed in the bill. Day-haul is defined to mean the assembly of workers at a pick-up point where they are waiting to be hired and employed, transported to the agricultural employment, and then returned to a drop-off point at the end of the same day. Experience has shown that protection is needed for day-haul agricultural workers, irrespective of whether they are living away from home, as they are often highly vulnerable individuals who can be easily subjected to abuse.

As stated in our fourth basic principle, the bill contains a separate section which enumerates various exemptions from the Act. Included are exemptions for family and small businesses. The family business exemption applies where all farm labor contracting activity is performed exclusively by the owner (or owners) or a member of the immediate family, whether or not the family business is incorporated. The small business exemption is structured to exempt those employers who are also exempt from the minimum wage and overtime requirements of the Fair Labor Standards Act by reason of the "500 man-day" test for small agricultural employers under the FLSA.

Other exemptions in FLCRA are retained in MSPA—for example, the exemption for any custom combine, hay harvesting or sheep shearing operations. In the past, the Department has limited the custom combine exemption to grain combining. This interpretation will be continued.

The current exemption for employment of full-time students in the production of seed corn and sorghum has been clarified to include all seed production and to eliminate the four-week limitation on employment. A similar exemption has been provided for the employment of full-time students in the stringing and harvesting of shade grown tobacco.

To resolve the paradox concerning employees of otherwise exempt entities, the bill provides an exemption to ensure that employees of exempt employers are not subject to the new Act.

The exemption provision also provides a specific coverage exclusion for labor unions.

Finally, in order to deal with the potentially ambiguous situation where workers may be jointly employed by a farm labor contractor and an agricultural employer, the bill adopts the definition of the term "employ" used under the Fair Labor Standards Act (FLSA) as that term has been interpreted by the courts over the years for joint-employment circumstances. For example, under the FLSA regulations a worker may be an employee of two or more employers. That determination is based on the facts of the individual case. Joint employment includes situations where there is an arrangement between employers to share the service of an employee or where one employer is acting directly or indirectly in the interest of another employer in relation to the employee. For example, crew members would be considered jointly employed by the labor contractor and farmer if the crewleader assembles a crew and brings them to the farm, and the farmer exercises the power to direct, control or supervise the work or to determine the pay rates and the methods of payment.

Our goal in dealing with "joint employer" issues was very simple: if a fixed-situs agricultural business "employs" a covered farmworker for FLSA purposes, it also "employs" that farmworker for MSPA purposes. The exact same principles will be used to define the term "employ" in MSPA "joint employment" situations as are used under FLSA.

As a related matter, the current definition of "agricultural employment" in the FLCRA would be retained under the new law.

Now, Mr. Chairman, I would like to describe the employer responsibility and worker protection provisions in the bill. Title I of the bill establishes the basic obligations of farm labor contractors—traditional crewleaders—beginning with the requirement that they be registered with the U.S. Department of Labor. There is a clear statement in the bill that this title will not apply to other types of agricultural employers or agricultural associations. The registration of employees of farm labor contractors who perform farm labor contracting activities for their employer remains unchanged. We intend that contractors should be fully responsible for the farm labor contracting activities of their employees.

Title II of the bill sets out the specific protections for migrant agricultural workers—those working away from their permanent residence. Title III sets out specific protections for seasonal workers. Title IV sets out protections for both.

For migrant workers, information about wages and working conditions must be provided in writing at the time of recruitment. For seasonal workers this basic information must be available, upon request, at the time employment is offered. Employers are required to keep certain payroll records, and employees must be given an itemized statement of earnings and deductions for each pay period. Each employer is also required to post at the place of employment a poster which sets forth the rights of workers under the Act, such as wage rates, period of employment, crops and activities on which the worker will be employed, the existence, if any, of a strike or work stoppage at the place of employment, and the right of a worker to have, upon request, a written statement pertaining to work and conditions of work. When there is joint employment, compliance by either employer will satisfy any requirement.

The bill also would expand the protections related to housing for migrant agricultural workers. For example, when more than one entity is involved in providing the housing, such as when the grower owns it and the farm labor contractor operates it, both will be responsible for the safety and adequacy of the housing. This is a significant change from the present law which fixes responsibility only on the farm labor contractor who may or may not own the housing. Substantive Federal and State housing health and safety standards must be complied with at all times. The bill provides for State and local health authorities to certify that the housing meets these standards based on inspection prior to occupancy. The bill, however, also provides sufficient enforcement flexibility so that employers will not be cited for mere technical or non-substantive violations that do not impact worker safety and health.

An exemption to the housing requirement is provided for hotels and motels that may provide accommodations to migrants and others in the general course of doing business. We do not, of course, intend that migrant labor camps would qualify for this "innkeeper exemption" simply by offering lodging to the general public.

The MSPA transportation provisions differ in several respects from the current FLCRA. MSPA recognizes that standards now in place under the Interstate Commerce Act are not always appropriate with respect to transportation of agricultural workers under certain circumstances, particularly on farms and for other local travel. The bill directs the Secretary to develop regulations that will apply to the transportation of farmworkers not covered by De-

partment of Transportation regulations. The Department of Labor regulations will take into account the distances traveled, the type of vehicle used, the number of passengers, the types of roads to be traveled and the extend to which any standards would impose an undue burden on the person providing the transportation, while continuing to provide for the health and safety of migrant and seasonal agricultural workers.

The transportation standards will not be applied to farm equipment or machinery when used for its intended purpose, but use of such equipment or machinery purely for the transportation of workers from place-to-place will be regulated. The vehicle insurance requirement of the current FLCRA will be retained, except that no additional insurance will be required where transportation is fully covered by a State workers' compensation law and the employer provides such coverage.

The bill prohibits the using of services of a farm labor contractor without first taking reasonable steps to determine that a contractor is properly registered. Unlike the current law, the bill would not penalize farmers who do take those reasonable steps.

The enforcement provisions of the bill retain FLCRA's civil and criminal penalties, and the investigative authority of the Department of Labor. A new provision makes it unlawful to interfere with officials of the Department in the performance of their duties under the bill. This section has been added as a result of the increasing number of incidents involving threats of bodily harm to our compliance officers.

The bill would change the current Act's provisions on private rights of action. It is our basic intent to encourage resolution of differences without resorting to litigation, while retaining full access to the Federal courts by injured private parties. Currently, however, FLCRA exposes employers to substantial monetary awards for highly technical violations, especially those related to registration status, when there may be very little actual damages. Where an intentional violation of the Act has been committed, the bill would allow courts to award up to $500 per plaintiff, per violation, as statutory damages in a private lawsuit with an upper limit of $500,000 for a class action. However, there is no limit on the amount of actual damages that can be awarded by a court.

Multiple infractions of a single provision, however, would be counted as only one violation. For example, failure to keep accurate hours-worked records over a period of several weeks would be considered one violation for each worker involved. In determining the amount of damages, the Federal courts are authorized to consider whether an attempt was made to resolve the issues in dispute before resorting to litigation. The provision in the bill prohibiting individuals from waiving their rights is not intended to preclude their entering into settlements under the private right of action section in order to avoid litigation and reach resolution.

The bill also retains the current FLCRA provision prohibiting discrimination with respect to individuals who have filed a complaint or have testified in any proceeding under the Act. The Secretary of Labor will continue to have authority to investigate complaints alleging such discrimination and may seek redress in the Federal courts. The bill expands upon the provision of the FLCRA allowing for agreements with Federal and State agencies in order to ensure that those functions delegated, especially to the States, are performed with adequate resources and in a manner comparable to Federal enforcement efforts.

There will, of course, be the matter of the transition from the application of the current statute to the new one. With regard to enforcement and compliance, the bill provides that for the purposes of determining appropriate action under the new law, the record of violations under the current FLCRA will be a factor to be considered if that individual or entity violates this Act.

Certificates of registration may be denied under this bill if the applicants under FLCRA have either failed to pay their court judgments obtained under FLCRA or failed to comply with a final order issued by the Secretary under FLCRA. Registration under the new Act will also require a phase-in. It is our intention to use a 12-month period for each certificate of registration based on the applicant's date of birth rather than the current calendar year method which creates an unnecessary administrative burden upon the Department at the close of each calendar year.

Mr. Chairman, in concluding my statement, I want to reemphasize two major points. First, the revised farm labor statute that we are proposing today greatly enhances the Labor Department's ability to protect migrant and seasonal agricultural workers. Second, the bill eliminates the unnecessary, burdensome and costly regulation of fixed-situs agricultural employers which has been so troublesome under current law. Enactment of the bill will, therefore, enable the Department to concentrate its enforcement efforts on those areas of farmworker employment where the most egregious violations of workers' rights occur.

I also want to again thank all those persons and organizations who participated in the cooperative effort over the past 18 months to develop this legislation. Without their thoughtful assistance—not to mention their vigorous advocacy—we would not be here, today.●

By Mr. GORTON (for himself and Mr. JACKSON):

S. 2931. A bill to provide for the disposition of funds appropriate to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission docket No. 218 and for other purposes; to the Select Committee on Indian Affairs.

DISPOSITION OF COWLITZ INDIAN JUDGMENT FUNDS

● Mr. GORTON. Mr. President, today I am pleased to introduce a bill that will provide for the disposition of funds appropriate to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission docket No. 218.

The bill provides for the distribution of money which was appropriated to the Cowlitz Tribe and its members more than 9 years ago. The money is in compensation for the taking by the Federal Government more than 100 years ago of the tribe's aboriginal lands which today constitute several counties in the State of Washington.●

ADDITIONAL COSPONSORS

S. 2309

At the request of Mr. CHAFEE, the name of the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 2309, a bill to amend the Endangered Species Act of 1973, to authorize funds for fiscal year 1983, and for other purposes.

S. 2837

At the request of Mr. GARN, the name of the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 2837, a bill to unify the export administration functions of the U.S. Government within the Office of Strategic Trade, to improve the efficiency and strategic effectiveness of export regulation while minimizing interference with the ability of engage in commerce, and for other purposes.

S. 2902

At the request of Mr. THURMOND, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 2902, a bill to define the affirmative defense of insanity and to provide a procedure for the commitment of offenders suffering from a mental disease or defect, and for other purposes.

SENATE JOINT RESOLUTION 220

At the request of Mr. QUAYLE, his name was added as a cosponsor of Senate Joint Resolution 220, a joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia to honor and commemorate members of the Armed Forces of the United States who served in the Korean war.

SENATE CONCURRENT RESOLUTION 122—CONCURRENT RESOLUTION RELATING TO AGRICULTURAL EXPORTS

Mr. PERCY (for himself, Mr. BURDICK, Mr. HELMS, Mr. LUGAR, Mr. NUNN, Mr. QUAYLE, Mr. GRASSLEY, Mr. PRESSLER, Mr. DIXON, Mr. SASSER, Mr. HUDDLESTON, Mr. BOSCHWITZ and Mr. ABDNOR) submitted the following concurrent resolution; which was referred to the Committee on Finance:

S. CON. RES. 122

Whereas without ignoring other concerns in the trade field, the American economy urgently needs the stimulus of increased agricultural markets to create jobs, increase personal income, improve our balance of payments position, and broaden and expand the tax base for needed Government revenue; and

Whereas the efficient productivity of the agricultural sector provides one of the greatest opportunities for such expanded exports; and

Whereas it is in the best interest of American agriculture and economy that export expansion include processed, as well as unprocessed agricultural products; and

Whereas export of value-added processed agricultural products has not shared proportionately in the growth of world demand for

such products as has the export of unprocessed products; and

Whereas economic studies by the United States Department of Agriculture show export value-added agricultural products creates a great multiplier of economic benefits in terms of jobs and income and increased revenue to the Government; and

Whereas expanding exports of such value-added processed agricultural products increases Government revenues from the broadened tax base of the resulting stimulated economy and increase in employment and personal income; now, therefore, be it

Resolved, by the Senate (the House of Representatives concurring), That it is the sense of this Congress that the President should take every possible action to encourage increasing the processed product share of United States agricultural exports, including but not limited to:

(1) Urging our negotiators to attempt to include a quantity of value-added processed agricultural products in any further extension or renewal of grains agreements with the Soviet Union, or other non-market economy countries;

(2) Seeking the elimination of unfair trade practices by foreign competitors, through vigorously pursuing international trade negotiations to assure fair competition for United States agricultural processors in world markets;

(3) Utilizing the authority of Public Law 480 to encourage inclusion of a greater share of processed products under both title I concessional sales and title II food aid programs; and

(4) Utilizing authorities of the Commodity Credit Corporation of the United States Department of Agriculture and the Export-Import Bank to ensure that credit arrangements for agricultural and agricultural product exports are on terms equal to those offered by other countries to assure fair competition.

Mr. PERCY. Mr. President, I send to the desk a concurrent resolution on behalf of myself and Senators BURDICK, HELMS, LUGAR, NUNN, QUAYLE, GRASSLEY, PRESSLER, DIXON, SASSER, and HUDDLESTON, and ask for its appropriate referral.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? Without objection, the concurrent resolution will be appropriately referred.

Mr. HELMS. Mr. President, I wonder if the Senator from Illinois will be willing to yield to me.

Mr. PERCY. I yield.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I join with the Senator from Illinois in urging the distinguished majority leader to act promptly on this resolution. At the same time, I think it would be appropriate for us to take note of the remarkable efforts by the distinguished Secretary of Agriculture, one of Senator PERCY's fellow Illinoisans, who has dedicated a tremendous amount of his time to this problem. He has traveled the world over urging purchases of American products.

Mr. President, the distinguished Senator from Illinois is exactly right. For a long time, we have engaged in a bipartisan folly of not pressing the interests of the U.S. farmers and workers in terms of exports. We have, too often, as the saying in North Carolina goes, taken a "dumb pill" each morning on this question. We have let other countries ride roughshod over us. It is time for the United States to exercise some backbone. Jack Block is doing that and Bill Brock is doing that. The President of the United States, as recently as Tuesday of this week, gave absolute assurance to a group of us who went there on an identical problem relating to textiles.

I commend the Senator from Illinois on his fine statement, and I join with him wholeheartedly in the legislation that he is offering. I thank him very much for allowing me to be a cosponsor.

Mr. PERCY. Mr. President, I am delighted that the chairman of the Committee on Agriculture, Senator HELMS is in the Chamber. A growing number of American businessmen in the community from which I come, labor leaders and policymakers, are concerned about increasing U.S. exports of processed agricultural products because of the sizable potential economic benefit which could be realized if a greater proportion of our agricultural exports were processed or finished at home.

My colleague, Senator BURDICK, and I are submitting a Senate concurrent resolution which expresses the sense of Congress that the President should take every possible action to encourage the increase of U.S. exports of processed or value-added agricultural products.

The American food system is a mainstay of the U.S. economy, accounting for 20 percent of the gross national product (GNP), 23 percent of all U.S. employment, and 19 percent of all U.S. export earnings. America's agribusiness is the largest contributing factor to the U.S. balance of payments. Its economic benefits extend far beyond the farm into farm supply industries, food processing distribution, and other agribusiness. These processing and service activities, accompanying the flow of agriculture commodities from farm to consumer, directly raise U.S. employment and income.

Agricultural exports are vital to the economic health of this Nation. It is only appropriate that we capitalize on our abundance to insure that the maximum economic benefits are being generated to the U.S. economy.

As one of our distinguished Senators said to us yesterday, and I believe Senator HELMS might have been in the room at the time, there are three principal issues facing this country: jobs, jobs, and jobs. That is all I will hear about when I go to Illinois this afternoon. I am sure it is what the distinguished Senator from North Carolina hears about every time he returns, as he does so frequently, to North Carolina.

This is what our job is, to create jobs in the United States of America, and we can, through the proposal that we will be making, a number of us, in this resolution.

I am delighted that the chairman of the Agriculture Committee, Senator HELMS, is a cosponsor of this concurrent resolution.

Encouraging exports of processed or value-added commodities makes sound economic sense. According to a U.S. Department of Agriculture study, if even 10 percent of current raw exports of wheat, corn, and soybeans were shipped as processed products, the GNP would increase by nearly $16 million, personal income would rise by over $3 billion—that personal income would go just where it is most needed—and more than 300,000 new U.S. jobs would be created.

Our colleague in the House, Congressman TIP O'NEILL, the Speaker of the House, is introducing a measure which would cost the American taxpayer $1 billion. It would create 200,000 dead-end jobs. In other words, they are made jobs. They are Government jobs. There is no guarantee they will continue unless we continue to put more billions into those jobs.

Here is a proposal that will create 300,000 new U.S. jobs. They will be continuing jobs. They will be jobs that will create income that can be taxed both at the personal and the corporate level.

This proposal, we think, is a fundamentally sound proposal in line and in keeping with the philosophy of this administration that private sector jobs, not public sector jobs, are the most important thing.

As a last resort, you can always consider that, but we have not gone to the last resort because there are many things that can be done.

I might add that by encouraging exports of value-added agricultural commodities, this legislation does not seek to decrease U.S. exports of raw materials; rather, the goal to increase value-added exports is an additional effort to enhance and expand U.S. export markets to insure that processed food products share in the future growth of food exports.

Last year I was pleased to help launch the Export Processing Industry Coalition (EPIC). EPIC is a unique coalition uniting labor and industry to strengthen the American agricultural processing and export economies.

The cross-section of support EPIC has received is an indication of the urgency of the resolution we are submitting today.

The organizations that are supporting this resolution include:

National Association of State Departments of Agriculture;

National Governors' Association;

Poultry and Egg Institute of America;

American Farm Bureau Federation;

Wine Institute;
American Association of Port Authorities;
Potato Chip/Snack Food Association;
National Cattlemen's Association;
Protein Grain Products International;
Western Great Lakes Maritime Association;
North Dakota Agricultural Products Utilization Commission;
National Broiler Council;
Food Processing Machinery and Supplies Association;
Rice Millers Federation;
National Turkey Federation;
National Farmers Organization;
National Conference of State Legislatures;
Independent Bankers Association;
National Rural Electric Cooperative Association; and
National Sunflower Association.

At a time when our markets for raw agricultural products have been reduced, we must think of innovative ways of marketing our agricultural abundance overseas.

We have quality products that can benefit consumers in both the developed and lesser developed countries. In the past, we have placed a low priority on the establishing of our presence in these markets for processed or value-added food. By value-added, I simply mean improving the quality of the product as it moves from farm to market. In Illinois, for instance, value-added processors have added billions of dollars to the State economy. As an example, the sugar and confectionary industry in Illinois employ 160,900 employees and generates $674 million in income, according to the latest census data. Yet candy manufacturers have to overcome a variety of tariff and nontariff barriers, when they try to expand their markets overseas.

Let us just take, for instance, the second industrial giant in the world, the economy of Japan, the second most powerful economic nation on Earth. Yet here they are, after we had given a tremendous amount of help in the postconstruction period, after the war—here they are protecting—what do they call it, an infant industry?

Candy manufactured in Illinois is subject to a 7-percent tariff or duty at our borders. We let in candy from all over the world, including Japan, Switzerland, and other countries, and charge 7-percent duty, which is not a protective tariff at all. It is an income-bearing measure.

What does Japan do? Thirty-one percent. What if we put a 31-percent duty on automobiles? You would not have Datsuns, you would not have Toyotas, driving around our streets. We would just shut them off.

That is why a wave of protectionism is going through these Chambers, the House and the Senate, and across this country.

The House and the Senate, across this country—I have never heard so much anti-Japanese talk as I have on the trade issue. They must recognize this. A Los Angeles Times survey, a nationwide survey released just a few days ago, indicated that Americans feel imports are one of the greatest causes of lost jobs and the depressed economy in the United States today. That means we all have to stop, look, and listen, all of our friends, and I speak to Japan as a friend.

I have been a friend of Japan since the war. We have worked together. I have manufactured in Japan, we have shipped to it and bought from it. I have led the fight for years in industry and here to have an era of freer trade. But we certainly cannot countenance a disparity of 7 percent and 31 percent and try to say that we have fairness in trade today.

Processed meats offer another promising area for exports, yet our processors are faced with rigid sanitary requirements that go beyond commonly accepted health standards in the United States.

In some cases, in order to sell specialty foods in certain European countries, the vendor must belong to a particular trade association. For U.S. manufacturers, this is an impossibility because membership is only open to domestic firms in those countries. Therefore, U.S. firms are effectively excluded from the marketplace.

The list of these nontariff barriers is quite long. To keep the trade lanes open, it is critical that nations that export processed food items to the United States understand that they must give equal treatment to processed food items from the United States. The supermarkets of America are bulging with wine, cheeses, crackers, distilled water, and other specialty food items from other countries, yet it has been pointed out that it is very difficult to locate a U.S.-origin processed product on a supermarket shelf in those countries that sell to us.

Almost a year ago, I announced the formation of EPIC at a Senate hearing in Urbana, Ill. Urbana is right in the heart of east central Illinois, where raw corn and soybeans are processed into such valuable byproducts as high fructose corn sweeteners, ethanol, soybean meal and oil, starch, corn gluten feed, and distillers dried grains.

We must begin a well-organized program, utilizing all sectors of the economy, to export these and other products to potential buyers. There are a number of ways that the public and private sectors can work together to accomplish this. For example, I commend the actions taken by the National Soybean Processors Association in educating Soviet agricultural officials on the benefits of soybean meal. Instead of waiting for the Soviets to show interest in this value-added product, NSPA officials have traveled directly to Moscow to provide personal briefings. This is the type of direct industry marketing effort that is required to get the message out about the benefits of value-added products. I would like to see it supplemented by the Government making the sale of soybean meal and other protein feed ingredients a part of any new grain agreement with the Soviet Union.

I ask unanimous consent to print a statement on value-added exports that was made by Mr. Larry Werries, director of the Illinois Department of Agriculture. Mr. Werries describes the promise of value-added exports and some of the major obstacles that must be removed if the United States is to market processed foods in overseas markets.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF ILLINOIS DEPARTMENT OF AGRICULTURE, MR. LARRY A. WERRIES, DIRECTOR, BEFORE THE SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES, U.S. SENATE, OCTOBER 16, 1981

The vital importance of American agricultural products in world trade is well-known, especially in regard to raw commodities such as wheat, feed grains, and soybeans. American agricultural exports have grown to more than $40 billion, generating new demand for farm products and income for farmers, and greatly offsetting America's negative balance of trade. In 1981, anticipated agricultural exports of $46 billion are expected to create $94 billion of activity throughout the United States economy, and jobs will be provided for 1.2 million full-time equivalent workers.[1]

This hearing focuses on the increasingly protectionist moves of the European Economic Community (EEC) against processed agricultural products from the United States. Since the particular products in question are soybean oil and corn gluten meal, the immediate impacts of protectionist moves against these products will be felt in the Illinois economy. The Illinois Department of Agriculture is concerned about expanding international agriculture trade, and supports open access to markets such as the EEC.

Since the particular questions in regard to soybean oil and corn gluten meal are being addressed in other testimony; I would like to discuss the importance of value added exports in general. In spite of impressive export figures, the question can always be asked, "Are we fully exploiting our competitive advantage in production of food and agricultural products?"

It has been the posture of the Illinois Department of Agriculture for several years to support the concept that the United States take fuller advantage of world demand for our food and agricultural products. The Illinois Department of Agriculture developed and maintained a program of services to aid farmers, agribusinesses and food processors in exporting their products. This program continues to serve the needs of large and small exporters of agricultural products from Illinois.

Illinois is a populous and industrialized state, and is also the leading agricultural export state, ranking first in exports of feed grains, soybeans, protein meals, and soybean oils. Economic activity resulting from agricultural exports greatly benefit this state's economic health.

Almost all of the agricultural products exported from the United States undergo a series of processing steps before reaching the ultimate consumers. Economic activity resulting from these processes is substantial. The theoretical gains to be had from further processing of our agricultural products will be more farm income and industry revenues, higher employment, and economies of scale in agricultural processing. Much of the marketing effort by state departments of agriculture, along with federal and regional groups, has been to support value added exports. While raw agricultural commodities are exported by relatively few, highly competent and efficient companies, the processing of agricultural commodities into a tremendous array of products is carried on by thousands of firms. The Illinois Department of Agriculture facilitates exports from any of these sources.

Few attempts have been made to quantify the domestic economic and employment benefits that are implied by adding more value to our agricultural exports. Social, political, and economic trade realities greatly affect the attainment of our potentials.

By looking at the Illinois census data from 1977, one can see the importance of value added by manufacture of agricultural products to the state's economy. The following table [2] summarizes some of this activity for domestic and export consumption:

Illinois industry	Total number of establishments	Total number of employees [1]	Value added by manufacturer [2]
Food and kindred products	1,270	103.9	4,725.6
Meat products	218	14.6	426.9
Dairy products	154	6.6	340.8
Preserved fruits and vegetables	119	10.8	456.4
Grain mill products	146	14.4	921.8
Bakery products	173	16.1	584.6
Sugar and confectionary	93	16.9	674.2
Fats and oils	51	5.3	194.2
Beverages	142	10.9	717.5
Miscellaneous	174	8.2	409.1

[1] Times 1,000.
[2] Times dollars in millions.

These data give an indication of the absolute size of the food products manufacturing activity in Illinois without showing any trends or analysis of its effect on exports.

Schluter and Clayton recently developed a net agricultural exports model that isolated the differential impacts of processed products, and they were able to present some preliminary estimates of the economic activity and employment associated with exports of raw versus processed agricultural commodities.[3] They concluded that certain sizable benefits do exist for the United States economy and employment situation from having a greater proportion of processed products in our agricultural export mix. Both direct and indirect advantages result from exporting processed commodities, since an export market is enlarged for the services required to assemble, process, and distribute the processed products. Greater employment prospects and new disposable income generated have indirect impacts on the economy, seen as a sequence of economic activity in the demand chain.

Table 2 shows a summary of Schluter's and Clayton's work with examples of the effects of processing on three economic indicators.

Net increases in gross output, employment, and income reflects a range of impacts from exporting certain processed products in place of the raw commodities. Dressed poultry exported in place of corn has considerably greater impact than the differential between raw and processed soybean exports.

Schluter and Clayton point out that due to the usual location of processing plants near the sources of raw commodity supplies, the net effects of exporting processed products tends to be concentrated in the same regions as the effects of exporting the raw products. New expansions of processing capacity could cause some regional shifts.

Problems are encountered with attempts to change the proportion of processed products in the agricultural export mix.

External factors are very important in determining the nature of United States agricultural exports including: (1) trade and agricultural policies of major importing and exporting countries, (2) level of agricultural production, (3) the pace of economic activity, (4) demographic trends, (5) the international exchange value of the United States dollar, and (6) market acceptance of processed products.[4]

An increasing number of countries today pursue policies that are designed to stimulate high levels of agricultural production and to encourage the development of their own domestic processing industries. The desire for food self-sufficiency, for favorable balances of payment situations, and for domestic employment and income benefits provide the impetus for countries to develop a variety of policies for price and income support, for resource use, and for new technologies. Various degrees of governmental intervention in foreign trade have developed and are increasing, serving to insulate national food and agricultural sectors from foreign competition. Policies that keep agricultural prices above world market levels can be maintained only by restricting the terms of entry of competitive products through tariff and nontariff barriers.[5] In general, trade barriers are lower for products that serve as inputs to a further stage of processing i.e., raw commodities. A variety of nontariff barriers also are faced by United States agricultural exporters; licensing, state valuations, state trading, special duties on imports for port improvement, special standards, and health regulations.[6] As a leading export state and a major processing state, Illinois is very vulnerable to increased trade barriers.

By nature, further processing diversifies and expands the product mix offered for export. By purchasing value added products, additional demands are often placed on a country's limited foreign exchange earnings. Market demand is more selective and complex requiring more sophistication in meeting those demands, however, a country can derive long-term benefit from processed product imports. For example, if the Soviet Union were to import more protein concentrates, such as soybean meal, their ration formulations in animal feeds could be less dependent on imported feed grains.

External factors are not alone in holding down growth of processed agricultural product exports. Domestic considerations also influence American ability to increase the proportion of processed products in the export mix. Processed products require greater marketing efforts and expenditures per unit of sales than do raw materials, so incentives for individuals or firms to pursue these markets must be greater. Profit potential and long-term market consistency are necessary to our exporters. Continued expansion of our exports in processed agricultural products requires more investments in transportation and infrastructure to handle more specialized and diverse products. Small, medium, and large sized processors require the availability of credit and export aids. Increased processed food exports mean a greater need for qualified international marketing people. To commit the necessary resources, United States firms must see open market opportunities that will not be constantly threatened by new restrictions, external or domestic.

The agricultural community is concerned today about declining farm prices, in the face of rising interest rates. A stronger dollar is reflected in higher prices overseas for our agricultural products. Perhaps it is time to reevaluate some of our strategies and policies for international agricultural trade. In the present climate, it is unlikely that any massive new supports or subsidies will be instituted for American agricultural exports.

The United States has always been at a psychological disadvantage in international trade, simply because we are blessed with a huge domestic market and have not been forced to acquire international trade skills or to develop a coherent, long-term agricultural trade policy. Times have changed. In the past couple of decades, the United States has taken an ever greater role in world agricultural trade. Consequently, we have become more vulnerable to the fluctuation of world markets and changes in trade restrictions.

As a first step toward realizing our potential, farmers, businessmen, labor, promotional organizations, and government must come together to lobby for national agricultural export policies. A favorable export credit policy, providing competitive credit terms that are accessible to all exporters, would encourage more export activity. Production and investment in processing could be encouraged through tax incentives for exporting. Tax incentives that are competitive with other major exporting nations would encourage more companies to hire American personnel for their overseas positions, and would encourage more companies to acquire international trade management expertise. American firms need the management skills that will enable them to put their international marketing efforts on a par with their domestic efforts.

We wish to adhere as much as possible to the principles of free trade. American agricultural policies should insure American reliability as a supplier and should institute some systematic measures that would discourage protectionist actions overseas. If our buyers and competitors were certain that their actions would be followed by an American reaction, perhaps the doors would open more widely to the vast array of American food and agricultural products.

Finally, marketing efforts, especially in the case of processed products, are of paramount importance. Orders will not fall in our laps without first perceiving the needs of the world's diverse customers and marketing our products to them in a way that will provide the buyers with clear benefits. Systematic and readily available market research is necessary for up-to-date information on market potentials, buyers, and trade barriers.

Export promotion are presently carried on at several levels; industry and industry groups, commodity associations, chambers of commerce, and federal, state, and municipal government programs. Each of these efforts needs the support of the others to define their functions, avoid duplication of services, and to develop reliable supplier-overseas buyer relationships.

TABLE 2.—NATIONAL NET EFFECTS OF RAW VERSUS PROCESSED EXPORTS [1]

[Dollars in millions]

	Gross output			Gross employment (workers)			Personal income		
	Raw product	Processed product	Net change	Raw product	Processed product	Net change	Raw product	Processed product	Net change
Flour for wheat	$5.42	$14.26	$8.84	143	335	192	$1.54	$3.45	$1.91
Dressed poultry for corn	5.32	50.22	44.90	147	1,300	1,153	1.40	10.69	9.29
Soybean oilmill products for soybeans	5.21	8.00	2.79	135	183	48	1.48	1.91	.43
Cottonseed mill products for cottonseed	5.61	13.28	7.67	209	372	163	1.36	2.96	1.60
Wet corn milling products for corn	5.32	14.21	8.89	147	337	190	1.40	3.37	1.97

[1] Based on million dollars in sales of raw commodity exports and equivalent amount of processed product.

Mr. PERCY. I thank my colleague very much. It would have sounded parochial if I had, once again, lauded the distinguished Secretary of Agriculture, Jack Block, who was formerly Secretary of Agriculture of Illinois under Governor Thompson. I was with him last Sunday, and with the Governor. I agree that he has been absolutely outstanding in protecting the interests of agriculture and also looking after the value that we can contribute to the economies of the world.

When I say that, I mean that, in Japan, they pay 70 percent more for food—every Japanese, on the average, pays 70 percent more than the people of New York, primarily because of the protectionist policies imposed upon them by 10 percent. That means the other 90 percent are paying the bill and reducing their standard of living and increasing their cost of living. Jack Block is just trying to point out around the world that the great abundance of American agriculture can bring down the cost and improve the quality of life for all over the world if we just have access to markets and if they would not try to protect those markets in such a way that they protect inefficiency.

We should reward efficiency all over the world. Certainly, we are a model—agriculture is the clearest demonstration we have that the Communist system has failed in the most basic thing mankind has tried to do for itself, just feed itself. Communism has failed miserably in that regard. We have such an abundance that we produce for ourselves and then export more than all other countries combined and still have abundance left over. It is to get that left over out to people so that a billion people do not go to bed hungry at night, that they have access to this food, that we are trying to work together.

I appreciate very much the way in which the distinguished chairman of the Committee on Agriculture has worked so closely with the Secretary of Agriculture in working for the American farmer. Not just the farmers of North Carolina—they are really protected by my distinguished colleague. All the farmers in this country owe him a debt of gratitude for what he has done.

Mr. HELMS. I thank the Senator.

SENATE RESOLUTION 468—RESOLUTION TO PAY TRIBUTE TO EARL WEAVER

Mr. MATHIAS (for himself and Mr. SARBANES) submitted the following resolution; which was considered and agreed to:

S. RES. 468

Whereas Earl Weaver, manager of the Baltimore Orioles for the past 13½, years, has led the Birds to six eastern division championships, four American League pennants and one world championship, and

Whereas Earl's won-lost percentage ranks third on the all time list, and he is tied with the Yankees' great Joe McCarthy and trails only the immortal Connie Mack in winning 100 games or more per season, and

Whereas Earl's intensity for inspiring Oriole victories by feisty finagling and limitless legerdemain has won the unflagging support of Oriole fans and the ire of umpire and opponent, and

Whereas Earl has achieved distinction in alternate careers as author, Shakespeare scholar and nurturer of prize Maryland tomatoes, which in yonder bullpen groweth, and

Whereas Earl has managed the same team for a longer period than any current manager: Now, therefore, be it

Resolved, That the United States Senate wishes to honor and pay tribute to Earl Weaver on the occasion of "Thanks Earl Day" Sunday, September 19, 1982, at Memorial Stadium, Baltimore, Maryland.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to Earl Weaver.

AMENDMENTS SUBMITTED FOR PRINTING

TEMPORARY EXTENSION OF PUBLIC DEBT LIMIT

AMENDMENT NO. 3279

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for Mr. HATCH, for himself, Mr. SYMMS, Mr. EAST, Mr. DENTON, Mr. BOREN, and Mr. ZORINSKY) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 520) to provide for a temporary increase in the public debt limit.

AMENDMENT NO. 3280

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. RANDOLPH, Mr. STAFFORD, and Mr. BENTSEN) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3281

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LAXALT, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. ZORINSKY, and Mr. RUDMAN) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3282

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr.

BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LAXALT, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. ZORINSKY, and Mr. RUDMAN) submitted an amendment intended to be proposed by them to the reported amendment to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3283

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LAXALT, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. ZORINSKY, and Mr. RUDMAN) submitted an amendment intended to be proposed by them to the amendment of Mr. HELMS concerning school prayer to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3284

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LAXALT, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. ZORINSKY, and Mr. RUDMAN) submitted an amendment intended to be proposed by them to the amendment of Mr. HELMS concerning school prayer to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3285

(Ordered to be printed and to lie on the table.)

Mr. SYMMS (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. CANNON, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. EAST, Mr. GARN, Mr. GOLDWATER, Mr. GRASSLEY, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. JEPSEN, Mr. JOHNSTON, Mr. KASTEN, Mr. LAXALT, Mr. LONG, Mr. LUGAR, Mr. MCCLURE, Mr. MATTINGLY, Mr. MELCHER, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. QUAYLE, Mr. PRESSLER, Mr. PRYOR, Mr. RANDOLPH, Mr. ROTH, Mr. SASSER, Mr. SCHMITT, Mr. STEVENS, Mr. THURMOND, Mr. WALLOP, Mr. WARNER, Mr. ZORINSKY, and Mr. RUDMAN) submitted an amendment intended to be proposed by them to the amendment of Mr. WEICKER (No. 2039) to the joint resolution (H.J. Res. 520), supra.

AMENDMENTS NOS. 3286 THROUGH 3421

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted 135 amendments intended to be proposed by him to the joint resolution (H.J. Res. 520), supra.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will hold a meeting to consider pending legislative and administrative business on Wednesday, September 22, 1982, at 9:30 a.m., in room 301, Russell. The agenda for the meeting will include death gratuities, printing resolutions, and requests for equipment.

For further information concerning this meeting, please call Rules Committee staff at extension 40278.

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Committee on the Budget will hold a hearing on budget act reform on Tuesday, September 21, beginning at 10 a.m. in room 6202, Dirksen Senate Office Building. Dr. Alice Rivlin, Director, Congressional Budget Office, and Mr. Charles A. Bowsher, Comptroller General of the United States will testify.

ADDITIONAL STATEMENTS

HERITAGE FOUNDATION PAPER SUPPORTS MILITARY REFORM VIEW

● Mr. HART. Mr. President, I would like to bring to the attention of my colleagues an excellent paper recently published by the Heritage Foundation, "Close Air Support and the Soviet Threat," by Dr. Jeffrey G. Barlow of the Heritage Foundation staff.

Dr. Barlow's paper builds on a viewpoint held by many military reformers; namely, that for airpower to be effective in combat, it must be closely linked to the action of ground forces. This means that the missions of close air support and battlefield interdiction take on great importance. Unfortunately, the U.S. Air Force has tended to downgrade these missions, instead focusing on deep interdiction—what was called strategic bombing in World War II—against enemy supply lines, infrastructure, industry, and so on.

After Vietnam, the Air Force did become interested in close air support, and procured an aircraft, the A-10, specially designed for the mission. Now, however, there are disturbing signs the Air Force is reverting to its traditional emphasis on deep interdiction, and is planning to neglect close air support. The clearest evidence was the acquiescence of the Air Force in the Congressional cancellation of the A-10 program in the fiscal year 1983 authorization bill—a cancellation done with the Air Force's approval, even though the President's budget request included 20 additional A-10's.

Even more significant is the failure to move forward with a replacement for the A-10. As Dr. Barlow's study notes, two major improvements could be made over the A-10 in a new aircraft: the size, and thus the vulnerability and cost, could be reduced, and the aircraft could be made more agile. In its VISTA 1999 study, the National Guard has called for such an aircraft. But the Air Force apparently has no plans to develop one.

Mr. President, the Heritage Foundation study does a good job of bringing these issues to the fore. They are important issues for the Senate, because they relate directly to the question of whether our investment in tactical aviation will prove effective in combat. I strongly urge my colleagues to read the study, and to join with me in urging the Air Force to begin development of the new close support aircraft recommended by the National Guard.

Mr. President, I ask that Dr. Barlow's paper, "Close Air Support and the Soviet Threat," be printed in the RECORD.

The paper follows:

Close Air Support and the Soviet Threat

INTRODUCTION

Close air support (CAS) is defined by the Joint Chiefs of staff as "air attacks against hostile targets which are in close proximity to friendly forces and which require detailed integration of each air mission with the fire and movement of those forces." Thus, for an air mission to qualify as close air support, it must be in direct support of engaged troops and be coordinated with the ground commander. Although known by a number of different names over the decades, the CAS mission has officially existed for some sixty years.[1] For much of its existence, however, it had been neglected by airpower proponents, in favor of air missions that have promised to provide a more decisive application of military force. It is a mission in direct support of one service (the Army), but it is a mission which is the responsibility of another service (the Air Force) with vastly different priorities and strategic conceptions. In a very real sense, then, it is a mission destined by circumstances to be neglected except in times of most immediate need.

Following its experiences with tactical airpower in Southeast Asia and its subsequent analysis of the emergency conventional force disparities in Central Europe, the Air Force, to its credit broke with tradition and procured an aircraft designed specifically for close air support. This aircraft, the A-10 Thunderbolt II (immediately nicknamed the Warthog), has been operational in Europe since 1979. Moreover, the Air Force has perfected a series of low-level flying tactics that will help the A-10 perform its tank-killing mission during a Central Front war, even in the face of the Soviet Army's formidable air defenses.

Now, however, there are disturbing signs that budget constraints are prompting the Air Force to weaken its commitment to CAS and concentrate once again almost exclusively on air superiority and interdiction as the roles for tactical airpower.[2] This could be a serious mistake, since effective CAS could well make the difference in allowing NATO to maintain a viable defense on the Central Front in the first, crucial days of a Warsaw Pact invasion. The Warsaw Pact invasion. The Air Force now has an A-10 force that will peak in strength at just over 700 aircraft in 1984. With peacetime attrition, this specially designed CAS force will begin declining in fighting effectiveness just when it is needed more than ever.

CLOSE AIR SUPPORT: A DOCTRINAL HISTORY

During America's participation in the First World War, air warfare was completely controlled by ground commanders, and the support of ground forces was seen as the predominant offensive mission for military aviation, once air superiority had been achieved. The close air support mission began in October 1918, during the latter stages of the Meuse-Argonne Offensive, when Brigadier General William "Billy" Mitchell, commander of the Air Service, Army Group, AEF, recognized the important role that Army pursuit aircraft were playing in keeping the German forces continually off balance during the offensive (at one point disrupting German reserves poised for a counterattack) by bombing and strafing enemy troop concentrations in the battle zone.[3] Accordingly, just before the hostilities ended, the Air Service, AEF, began planning for a number of designated ground attack squadrons.

Between the Wars, the fate of the close air support mission was very much intertwined with the attempts by the Air Service to carve out an an independent role for itself. During the early inter-war period, the theory of General Guilio Douhet (Command of the Air), Lord Trenchard and Count Gianni Caproni—that strategic bombardment of enemy industrial centers would prove to be the decisive factor in future wars—gained increasing credence from American airpower enthusiasts. The doctrine of strategic bombardment not only offered a belief in the decisive role of airpower but, in light of this belief, lent the Air Corps as a whole a significant argument to use in favor of its eventual autonomy from the Army. On the other hand, the ground attack mission merely enhanced the Air Corps' existing subordinance to the ground army.[4] The result was a diminution of the role of attack and other tactical aviation in doctrine and planning. As one author remarked in connection with the Air Corps Tactical School: "Attachment to this commitment [strategic bombardment] was, however, so inflexible that it inhibited the development of tactics for escort, for air defense, for support of ground forces and for reconnaissance and transport aviation."[5] The first attack group was formed in 1921 and this was followed by the formation of only one additional attack group more than a decade later.[6] Thus, where in 1922 there had been four attack and seven bombardment squadrons, by 1932 there were still only four attack squadrons, but the number of bombardment squadrons had increased to twelve.

The mission of these attack squadrons, as defined at the time, was: "To assist the ground troops in their action against enemy positions; to attack hostile front line troops, supports, reserves, troop concentrations, road traffic of whatever nature, tanks, airdromes, and hostile batteries."[7]

During the Second World War, the close air support mission continued to suffer relative to the strategic bombardment and interdiction missions. Wartime Army Air Forces trends in doctrinal support of "independence of control and operations" reached their zenith in mid-1943, with the publication of Field Manual 100-20—Command and Employment of Air Power—which set forth the new doctrine that "Land power and air power are co-equal and interdependent forces; neither is an auxiliary of the other."[8] This document noted:

"Massed air action on the immediate front will pave the way for an advance. However, in the zone of contact, missions against hostile units are most difficult to control, are most expensive, and are, in general, least effective. . . . Only at critical times are contact zone missions profitable."[9]

In operational practice, Army Air Force units in the Mediterranean, European, and Pacific Theaters flew thousands of direct support missions for Allied troops and with some spectacular results—witness the XIX Tactical Air Command's success in protecting the exposed right flank of Patton's Third Army along the Loire River in 1944. In looking back, however, it becomes apparent that the AAF's primary interest lay in strategic bombardment and secondarily in interdiction missions.

The Army Air Force's principal interest in strategic airpower continued to dominate the postwar Air Force, garnering the bulk of the attention and most of the available funding. Though the Korean and Vietnam Wars demonstrated the need for adequate tactical air support, particularly CAS, in neither situation was the Air Force prepared at the outset with the proper mix of aircraft for tactical missions involving close support of ground forces.[10] In fact, the Air Force was forced, at the start of its combat deployment in South Vietnam, to use World War II-design Navy A-1E and A-1H Skyraider aircraft in order to provide reliable close air support to the South Vietnamese troops.[11]

The Air Force's general lack of interest in the CAS mission was to change by the time that the war in Vietnam was winding down for the United States. One reason was perception of tactical air needs on the NATO Central Front.

THE THREAT TO NATO'S CENTRAL FRONT

The central front

The forward edge of NATO's Central Front stretches south from the Elbe-Trave Canal in the West German State of Lower Saxony to Germany's southern border with Austria—a line about 650 miles long. Some twenty-six NATO divisions are deployed in this area. Adding in the in-country European forces earmarked for the Central Front (including those in Great Britain) brings the total to thirty-two divisions, equipped with 7,150 tanks and about 3,470 artillery pieces and mortars.[12] The aircraft deployed with these NATO forces number 1,869 fixed-wing planes, including fighter/bombers, interceptors, and reconnaissance types.

The bulk of NATO's forces on the Central Front are deployed close to the intra-German border because of political necessity. Such "forward defense" serves to reassure Bonn that, if war breaks out, NATO forces will endeavor to protect against the loss of any West German territory by forming a coherent defense line as far forward as possible, holding back the Warsaw Pact forces while awaiting the release of tactical nuclear weapons, and confining collateral damage to a minimum. NATO's supply lines, of necessity, run near and parallel to the intra-German border, making it likely that initial Warsaw Pact penetrations of NATO's defense will disrupt or even sever the supply lines.

Warsaw pact strength

Of the four groups of Soviet forces deployed in Eastern Europe, two are oriented directly toward operations against the NATO Central Front.[13] These are the Group of Soviet Forces, Germany (GSFG), headquartered in Zossen-Wünsdorf, near Berlin, and the Soviet Central Group of Forces (CGF), headquartered in Milovice, Czechoslovakia, northeast of Prague. Together, they have twenty-six Soviet Category I divisions, twelve of them tank divisions.[14] If the Soviet armies deployed within the USSR which would be used in direct support of Central Front operations and the available Eastern European forces are included, NATO faces on the Central Front a formidable Warsaw Pact military force of about ninety divisions, about half of which are capable of an unreinforced, standing-start attack. The tanks alone in this unreinforced offensive force number over 13,000,[15] while an additional 7,000 tanks are readily available in Soviet Central Front-committed Military Districts. Over two-thirds of the tanks deployed in Eastern Europe and over one-half deployed in the USSR's Western Military Districts are modern design T-62s

---

Footnotes at end of article.

and T-64/T-72s, while the rest are obsolescent T-54s and T-55s.

The offensive

The Soviet Army practices three primary forms of offensive action—the meeting engagement, the breakthrough attack (now primarily the breakthrough attack from the march, in contrast to the World War II-derived steamroller breakthrough attack from contact), and the pursuit. The meeting engagement, which occurs when both the attacking and defending forces are on the move, is considered by the Soviets to be the most important form of offensive action. As David Isby describes it:

"The advance guard of a Soviet unit will attack upon encountering the enemy, seize the initiative, penetrate the enemy covering forces, and pin down the enemy main body while simultaneously covering the deployment of the Soviet main body, which will attempt to envelop or outflank the enemy. The Soviets will fully exploit the cross-country mobility of their vehicles and their willingness to take advantage of any path or track to carry out their outflanking or enveloping maneuvers.[16]

At the operational level, it is expected that Soviet commanders would launch a series of thrusts across the length of the Central Front. NATO military responses to these thrusts would determine how each effort would be followed up. Those attacks successfully contained by NATO troops would be converted into holding actions by the Soviets, keeping just enough pressure on the engaged NATO forces to prevent their being readily shifted to other positions. However, those attacks that pushed through the initial defenses would be augmented by reinforcements as rapidly as possible.[17]

Rapid rates of advance would be essential to the Soviet plan for a short war. Soviet military commanders estimate that under such circumstances their forces would need to make advances of 70-100 kilometers a day in nuclear conditions and 25-35 kilometers a day in conventional warfare.[18] The aim would be to quickly breach the NATO defenses, wedging open gaps sufficient for Soviet second echelon tank formations to penetrate deep into NATO rear areas.[19] Thus, tanks are the key to the successful exploitation of the offensive penetration and the Warsaw Pact's maintenance of rapid rates of advance.

Clearly then, one of the essential tactics for delaying the Warsaw Pact's offensive timetable and for giving the overextended and maldeployed NATO forces additional time to respond to the enfolding Soviet offensive would be early employment of NATO's tactical airpower.[20] In the short-war-structured offensive, given the NATO Central Front's numerical inferiority and the linear nature of its defensive preparations, close air support and battlefield air interdiction (BAI) would be crucial to a successful NATO defense.[21]

By picking off the tanks in large numbers and by creating bottlenecks that canalize Soviet movement, these close support aircraft could impede the offensive, perhaps giving NATO Commanders the time to patch together a coherent defense until reinforcements arrive.

THE A-10 AND CLOSE AIR SUPPORT

A-10 program development

The U.S. air effort in Vietnam was in full swing in 1966 when Air Force Chief of Staff John McConnell proposed that his service procure a specialized close air support aircraft, which would embody the best characteristics of the A-1 Skyraider and the soon-to-be-flown A-7D Corsair II. In March 1967, the Air Force sent out Request for Proposals (RFP) for design studies to twenty-one companies; in May, it awarded study contracts to four of these companies for the aircraft then designated A-X.[22] Three years later, RFPs for competitive prototype development were issued to twelve companies. By August 1970, six companies, including Boeing and Lockheed, had responded with proposals. This number, in turn, was whittled down to a final two—Northrop and Fairchild—by that December.

The fact that by 1970 the Air Force leadership was on the verge of contracting for a specialized close air support aircraft illustrated the pronounced change that had overtaken earlier attitudes. As General William Momyer, commander of the Tactical Air Command, explained to the members of the Senate subcommittee in October 1971:

"In the past, the Air Force has developed its aircraft on the principle of multipurpose systems. As a result[,] all current fighter and attack aircraft have varying capabilities for close air support. However, several factors have developed which impinge significantly on the force structure of tactical air forces. These factors establish a requirement for a large number of airframes and tend to emphasize specialization." [23] Among the factors were the high cost of the technology required to overcome the enemy's defenses and the requirement for the Air Force to employ its tactical fighter forces in widely divergent missions simultaneously.

Northrop and Fairchild each built two prototypes of their version of the A-X, designated by the Air Force the A-9 and the A-10, respectively. Service testing began in October 1972 and was completed two months later, with Fairchild's A-10 emerging as the winner. As both the Department of Defense and the Air Force saw it, tanks were to be the CAS aircraft's primary target, and the A-10 had been shown to be almost twice as effective at tank-killing as Northrop's A-9. In March 1973, Fairchild Republic Company was awarded a cost-plus-incentive-fee contract for continued prototype testing and for the pre-production aircraft. Earlier, the Air Force had settled upon 733 aircraft as the total A-10 buy.

General Electric and Philco-Ford competed for the contract for the A-10's principal armament, designed especially for tank-killing, the GAU-30mm gun. In June 1973, the Air Force awarded the contract to General Electric.

Following the six pre-production aircraft funded in fiscal year 1974, fifty-two production models were contracted for FY 1975 and 1976A. Equipping the first training wing with A-10s—the 355th Tactical Fighter Wing at Davis-Monthan Air Force Base, Arizona—was completed in March 1976. Air Force follow-on operational testing (FOT&E) of the production A-10s began in August of that year and lasted through the following February. Test results showed that despite deficiencies noted in system components—such as the head-up display, the stability augmentation system, and the fuel system—the A-10 was superior to other USAF aircraft for the close air support mission.

The tests, among other things, judged the aircraft's capability in nine CAS mission subareas. Some of the Evaluations noted:

Troops in Contact— ". . . The A-10A can provide effective, accurate, and timely support to ground forces in direct contact with the enemy. . . ."

Armed escort— ". . . AE of a ground column/convoy is a mission well-suited for the A-10A. The maneuverability, firepower, and escort time offered by the A-10A is unmatched by any other aircraft in the inventory. . . ."

Low visibility operations— ". . . The capability of the A-10A to operate in low ceiling/visibility is unmatched by any other aircraft in the inventory today. . . ." [24]

The first operational squadron was activated in June 1977 and achieved operational status that October. In August 1978, the 354th Tactical Fighter Wing at Myrtle Beach Air Force Base, South Carolina, became the Air Force's first fully combat-ready A-10 wing. Five months later, a squadron of the 81st Tactical Fighter Wing, based at RAF Bentwaters/Woodbridge, Great Britain became the first European stationed A-10 squadron, followed eight months later by the first delivery of A-10s to the Air National Guard.

In the fiscal year 1981 Five Year Defense Program, the Department of Defense increased the number of A-10s to be procured from the original 733 to 825 to provide for peacetime attrition and to maintain the aircraft's required force-level life.[25] At the beginning of 1981, however, the Carter Administration's outgoing fiscal year 1982 defense budget, because of fiscal considerations, reduced the number to 687. The Reagan Administration's fiscal year 1982 defense budget restored the original procurement level of 733 A-10As and added fourteen two-seat A-10Bs, for a total of 747 aircraft.[26] This later was reduced during Pentagon budget cuts to 727. The fiscal year 1983 budget originally requested funding for the last twenty of these 727 aircraft of the program, but in May the Pentagon, suddenly claiming that it did not need any additional A-10s, acquiesced to the Senate's decision to cut the funding for these last twenty. As it now stands, the total A-10 production will remain at 707 aircraft.

THE A-10 AND THE CENTRAL FRONT

When the last of the A-10 production aircraft have entered Air Force inventory in February 1984, the Service will have fully equipped six CAS wings.[27] Only the 81st Tactical Fighter Wing at RAF Bentwaters/Woodbridge, with it six squadrons and 108 aircraft, is forward deployed in Europe. In wartime, these A-10s will fly into West Germany to operate out of German airbases, designated Forward Operating Locations, close to the battle area. Eight-aircraft CAS detachments from the 81st are familiarizing themselves with the operational technique by operating for short periods of time alternately out of each of the four Forward Operating Locations that are active in peacetime—Ahlhorn, Noervenich, Sembach, and Leipheim.[28]

Once in combat, the A-10s should prove themselves extremely capable close air support aircraft. The foremost characteristics of a good CAS aircraft are lethality, survivability, reliability, and responsiveness. The A-10 meets all four.

The A-10's high lethality against the whole variety of armored vehicles and soft targets derives from a number of factors—its deadly accurate GAU-8/A, seven-barrel, 30mm gun; its heavy payload-carrying capacity, which enables it to carry a large (up to 16,000 pounds), mixed-ordnance payload of optimized CAS munitions; and, because of its relatively slow-speed approach, its ability to deliver its free fall munitions with reasonably small mean miss distances.

The 30mm gun is the key to its superior lethality against armored vehicles compared to weapons fired by faster and more sophisticated aircraft such as the F-15 and F-16. The GAU-8/A is mounted internally, along the centerline of the aircraft, which gives the gun excellent stability. Armed with 1,174 rounds of depleted uranium penetrator ammunition—each penetrator weighing .66 pound—the gun has muzzle velocities of 3,280 feet per second and is capable of firing at rates of 2,100 or 4,200 rounds per minute. The 30mm gun produces bursts capable of killing tanks now in the Soviet arsenal at a slant range of 4,000 feet. Lightly armored vehicles can be destroyed as far away as two miles.[29]

The A-10's high survivability rating is due to the aircraft's design and the low-level penetration tactics employed in flying it. The plane carries 3,177 pounds of survival provisions, including armor plate and foam for the fuel tank. The pilot is protected by a titanium armor plate "bathub" weighing over 1,400 pounds, which can stop direct hits from Soviet 23mm and 57mm shell.[30]

The A-10's low altitude tactics were developed primarily by the 66th Fighter Weapons Squadron at Nellis Air Force Base, Nevada. Their characteristics include: very low altitude ingress to the target (100 feet above ground level); short exposure above terrain masking while jinking (three seconds or less exposure while flying at 300-400 feet above ground level) to locate the target; short attack exposure while jinking; and very low altitude egress and maneuver for reattack.[31] Because of its slower approach speed, the A-10 can turn faster than a higher-performance aircraft, making it easier for it to reacquire the target and reattack. Using these low altitude tactics, the A-10 is able to counteract and defect formidable anti-aircraft missile defenses and major low-level, anti-aircraft gun threats, such as the Soviet ZSU-23-4 system, with its radar-controlled, quadruple 23mm guns.[32] The short exposure times prevent radar lock-on, necessitating the use of manual aiming. In addition, the A-10's GAU-8/A gun outranges the ZSU-23-4.

The A-10 is designed for easy maintenance, including such things as the large doors and panels provided for ready access to aircraft equipment and the onboard auxiliary power unit. And with its short scramble time and its low ceiling and visibility flying capability, the A-10 can operate from short fields, close to the forward edge of the battle area.

THE NEED FOR MORE CAS AIRCRAFT

In sum, the A-10 is an extremely capable CAS aircraft, well-suited to the vital role of engaging and killing Soviet first and second echelon armored vehicles. The problem is that there are not nearly enough aircraft available to NATO, which like the A-10, are dedicated to the close air support and battlefield air interdiction missions and can be used in the early stages of a possible Warsaw Pact offensive to blunt the armored onslaught.

The planned size of the force currently envisioned by the Air Force will see peacetime attrition decrease before 1987 the available aircraft below the Service's reduced Required Force Level.[33] Once that point is reached, such attrition will begin eating away at the aircraft in the operational inventory at a gradual rate. The planned procurement level of 825 aircraft called for in the Carter FY 1981 Five Year Defense Program would have kept the A-10 force above the Required Force Level until 1993, given the continuance of the present attrition rate.[34]

The Air Force's response to this situation recalls its earlier, pre-Vietnam views of the value of the CAS mission. Having decided that it has enough A-10 aircraft (given the tight budget situation), commanders have begun looking to the possibility of converting models of the more complex and much faster F-16 and F-15 into true multi-role aircraft, by equipping them for the long-range interdiction mission. The lure of F-15E Strike Eagles and F-16Es or XLs seems hard for senior Air Force generals to resist.

Although such aircraft would undoubtedly be capable of handling a variety of air superiority and interdiction missions, they could not handle the close air support mission nearly so well as could the A-10. For example, lethality studies conducted during the Carter Administration, comparing the A-10 with such aircraft as the A-7 and F-16, showed that the A-10 achieved almost three times the armored vehicle kill rate of the A-7 and F-16.[35] And, it should be noted, neither the F-15 nor the F-16 has the level or armor protection in the A-10. Of equal import, the CAS and BAI missions will have a more significant impact in the early stages of a short-war-structured, Soviet combined-arms offensive.

CONCLUSION

In the short term, the Air Force should increase procurement of A-10s to the 825 level called for in 1980, even at the expense of additional fighter assets. This increase at least would provide a stable A-10 force until the mid-1990s. Fulfilling requirements for additional close air support squadrons or for bringing National Guard and Reserve squadrons up to full strength would necessitate increases above this minimum benchmark. Over the longer term, however, it is clear that a new CAS aircraft will be needed.

The A-10 simply has become too expensive for the Air Force to afford in the large quantities needed for augmenting NATO's ground force strength on the Central Front. Since FY 1978, the A-10's flyway unit cost has climbed from $5 to $12 million (in FY 1982).[36] And once the cost of a close air support aircraft reaches or surpasses that of a first-line fighter such as the F-16, the Air Force will always choose to spend the money on the "more capable" plane. Of course, much of the A-10's cost increase has had to do with the low and uneconomical rates of the aircraft's recent procurement, the cost of equipment add-ons, and the increases caused by inflation. A good portion of the increased costs, however, are related to the aircraft's size: the A-10 is too big. Larger, heavier aircraft, over time, tend to become more costly to procure than smaller, lighter aircraft. A big aircraft, moreover, presents larger targets. In this case, admittedly, Fairchild was following the Air Force's lead—it wanted a heavily-armored aircraft capable of carrying a large ordnance payload.[37]

Exactly what the follow-on CAS aircraft should look like is still an issue of intense debate. However, several design aspects appear to be relevant. It should be smaller than the A-10, with a maximum external payload only a quarter to a third that of the A-10. It should be powered by engines designed for low fuel consumption in low-level cruising. And it should retain the internally-mounted 30mm gun that has proved so successful in the A-10, although, if judged necessary, the GAU-8/A's 4,000 pound weight penalty could be reduced by going with the lighter, four-barreled GAU-13/A.

The Air National Guard came out with its proposal for a "combined forces fighter" to eventually take the place of the A-10, in its March 1982 report. Paralleling many of the design concepts espoused by TacAir consultant Pierre Sprey, the Air National Guard called, among other things, for a smaller aircraft than the A-10, which would have better maximum Gs (the gravitational pull on the pilot), much better acceleration, and better roll/pitch transients (particularly in the 150 to 350 knots region) and which could operate from roads and grassfields.[38]

Precisely because such a new development project will be very prolonged, if past history is any judge, the Air Force should immediately begin increasing its procurement of A-10s to ensure an adequate close air support force until the mid-1990s. The A-10A is still the best CAS aircraft in the inventory and one that can have a major role in the event of a Soviet invasion of Europe during the next decade.

From the early days of its existence as a component element of the Army to times as recent as a decade ago, the U.S. Air Force has almost continually ignored the value of the close air support mission as a decisive factor in the land battle. Preferring to concentrate its efforts on loftier missions, such as strategic bombardment and deep interdiction, which promise an early end to wars, Air Force leaders have slighted those aspects of tactical aviation that hearken back to their Service's earlier subservience to the Army.

The changed Air Force thinking of the 1970s, which owed its rationale to the lessons of Vietnam and the emerging reality of the dangers facing NATO's Central Front and produced service support for the A-10, seems now to be reverting to traditional channels of thought. At a time when the gap between NATO's and the Warsaw Pact's deployed military power is growing larger, it is vital to maintain sufficient close air support assets to help reduce the disparities in the military capability now favoring the Soviets. This can be done only if the leadership of the Air Force reaffirms the essential nature of this long disparaged mission.

JEFFREY G. BARLOW, Ph.D.,
Policy Analyst.

FOOTNOTES

[1] The term "mission" as it is used in this case and as it is most often used throughout this paper means: "Any particular business, service, or duty assigned to be accomplished by a person, organization, office, detachment, or the like with the object of contributing functionally to an overall objective." Woodford Agee Heflin, ed., The United States Air Force Dictionary (Maxwell Air Force Base, Alabama: Air University Press, 1956), p. 329.

[2] Air superiority refers to obtaining control of contested airspace.

[3] For example, the First Army Air Service's Battle Order No. 44 of November 3, 1918, noted: "1. The Allied Armies have forced the enemy into a precipitate retreat . . . . The aviation of the enemy has been destroyed or driven back wherever found, his balloons have been burned, and our air planes continually harry and demoralize his ground troops with bombs and machine guns . . . . (emphasis added). "48. Battle Orders Air Service, First Army September-November 1918," in The U.S. Air Service in World War I, Volume II: Early Concepts of Military Aviation, edited and compiled by Maurer Maurer (Washington, D.C.: The Office of Air Force History, Headquarters USAF, 1978), p. 249.

[9] Quoted in ibid., p. 168.

[10] Perry McCoy Smith noted: "The doctrinal dedication to strategic bombardment at the expense of close air support and interdiction led to difficulties, among them lack of adequate support for ground forces during the Korean conflict, deemphasis of tactical training, and lack of development of tactical weapons systems and tactical munitions (much of the development in these areas was done by the Navy in the two decades following World War II). Smith, Air Force Plans for Peace, p. 28.

[11] The AD/A-1 Douglas Skyraider was first produced in 1945 for the Navy, as a replacement for the SB2C and TBM torpedo bombers. The last attack version of the A-1 was retired in April 1968. "Appendix IV. U.S. Navy Airplanes, 1911-1969," in Dictionary of American Naval Fighting Ships, Volume 5 (Washington, D.C.: Naval History Division, Navy Department, 1970), p. 546. For comments on the Air Force's procurement of A-1s, see General William W. Momyer, USAF (Ret.), Air Power in Three Wars (WW II, Korea, Vietnam) (Washington, D.C.: Government Printing Office, 1978), pp 263-264.

[12] The totals are derived from subtracting the (approximately) two Danish divisions and the German VI Armored Infantry Division assigned to Allied Forces Northern Europe (AFNORTH) for the defense of Schleswig-Holstein and Jutland from the combined AFNORTH/AFCENT totals given in NATO and the Warsaw Pact: Force Comparisons (Brussels: North Atlantic Treaty Organization, 1982), figure six, p. 29.

[13] The four are the Group of Soviet Forces, Germany, the Soviet Northern Group of Forces (based in Poland), the Soviet Central Group of Forces (based in Czechoslovakia), and the Soviet Southern Group of Forces (based in Hungary). Although the Northern Group and Southern Group could support offensive operations on NATO's Central Front, it is apparent that their Primary responsibilites would be to the Baltic area and Southern Europe, respectively.

[14] "Soviet Army order of battle," in David C. Isby, Weapons and Tactics of the Soviet Army (London: Jane's Publishing Company Limited, 1981), p. 24; and Friedrich Weiner and William J. Lewis, The Warsaw Pact Armies (Vienna: Carl Ueberreuter Publishers, 1977), pp. 62-63.

[15] Total derived by comparing and adding tank figures (for GSFG, CGF, East German Army and first-line Czech units) from "Estimated Soviet tank inventory (mid-1979)," in Isby, Weapons and Tactics of the Soviet Army, p. 30.; Weiner and Lewis, Warsaw Pact Armies, pp. 25 and 31; and Military Balance 1981-1982, pp. 18-19. NATO's most recent published estimate for the Warsaw Pact forces—lumping together the first and follow-on echelon divisions together and including some forces that would be deployed against the southern portion of AFNORTH's territory—is ninety-five divisions and 25,500 tanks. NATO and the Warsaw Pact, figure six, p. 29.

[16] Isby, op. cit., p. 35.

[17] See Steven L. Canby, A Comparative Assessment of the NATO Corps Battle ([Potomac, Maryland: C&L Associates ?], November 24, 1978), copy of a typescript document, pp. 19-22.

[18] Isby, Weapons and Tactics of the Soviet Army, p. 33. John Erickson commented: "The duration of these [Soviet high-speed] operations depends critically on early initial success and the reduction of NATO as an effective military entity before the arrival and deployment of reserve forces, a requirement which necessitates striking to a depth of 600 km within 10 to 14 days." John Erickson, "Trends in the Soviet Combined-Arms Concept," Strategic Review, Vol. 5 (Winter 1977), p. 46.

[19] Soviet tactics are tank tactics writ large. As David Isby remarked: "Their mission is to outflank, envelop and pursue, defeating the enemy through maneuver rather than by frontal attack." Isby, ibid., p. 71.

[20] As Air Force General William Momyer noted: ". . . we recognize that there is a deficiency in the NATO armored forces to counter the anticipated massive ground thrust. The application of air power is the only possible military action that could constrain or reduce the Communist ground forces to a level that the NATO ground forces could contain." "Statement of General William W. Momyer, USAF, Commander, Tactical Air Command, U.S. Air Force," in Congress, Senate, Committee on Armed Services, Special Subcommittee on Close Air Support: Hearings, 92nd Congress, 1st session, October 22, 26, 28, 29; November 1, 3, 8, 1971, USGPO, 1972; p. 180.

[21] The purpose of battlefield air interdiction is "to bring airpower to bear on those enemy forces not yet engaged but positioned to directly effect the land battle." Thus BAI missions would be directed against enemy second echelon regiments and divisions. "Allied Tactical Publication (ATP) 27 (B), Offensive Air Support," quoted in Lieutenant Colonel Donald J. Alberts, "An Alternate View of Air Interdiction," Air University Review, Vol. 32 (July-August 1981), p. 40.

CREDIT SCORING SYSTEMS: A CRITICAL ANALYSIS

● Mr. MATHIAS. Mr. President, the statistical and factual bases on which many current economic and fiscal decisions are founded are being widely questioned. If our assumptions are in error, can our judgment be accurate?

Our colleague and friend, Jacob Javits of New York, has called my attention to a study by Noel Capon, associate professor of business, Graduate School of Business, Columbia University, which deals with credit scoring practices.

In the present economic climate this is a serious subject for borrowers whose business survival depends on the availability of credit. It has implications for the economic future of the country.

I agree with Senator Javits that the article merits wide attention and I ask that it be inserted in the RECORD.

The article follows:

[From the Journal of Marketing, Spring 1982]

CREDIT SCORING SYSTEMS: A CRITICAL ANALYSIS

(By Noel Capon)

"Our society has been taught to believe that an individual's creditworthiness is primarily related to their personal credit history. I feel certain that for anyone who has any regard for the concept of individuality, reviewing the credit-scoring systems of some of our major national creditors would be a chilling experience." [1]

The importance of consumer credit in the U.S. economy has grown markedly through the 20th century. A combination of growth in the supply and form of credit and increased consumer demand has led to an average annually compounded rate of growth in consumer credit outstanding of 7.5 percent from 1919, the first year for which Federal Reserve figures are available, to the present. This figure is much greater than the average growth rate of GNP for the same period (Board of Governors of the Federal Reserve System 1976a, 1976b, 1980).

The ever-increasing ability to offer credit has important sales and profit implications for marketers, just as the ability to obtain credit has important quality-of-life implications for consumers. However, despite the growth in credit availability, many consumers are unable to gain access to the credit that they need and believe they deserve. The importance of this issue was recognized by Congress, which in 1974 passed the Equal Credit Opportunity Act prohibiting discrimination in the granting of credit on the basis of sex and marital status (ECOA 1975). In 1976 the Act was amended to include race, color, religion, national origin, receipt of income from a public assistance program, and age as proscribed characteristics. Further, in 1977, the Federal Trade Commission decided to devote a significant percentage of its then increased resources to the handling of all forms of credit abuse problems (Advertising Age 1977).

The federal legislation was directed largely at abuses in judgmental methods of granting credit. However, at that time judgmental methods that involve the exercise of individual judgment by a credit officer on a case-by-case basis were increasingly being replaced by a new methodology, credit scoring. William Fair has recently estimated that between 20 and 30% of all consumer credit decisions are now made by credit scoring, and that most of the very large credit granters including banks, finance compa-

[1] Opening Statement of Senator PAUL E. TSONGAS (D., Mass.). See *Credit Card Redlining* 1979, p. 2.

nies, oil companies, retail merchants, and travel and entertainment cards now score their applicants (Credit Card Redlining 1979, p. 183–184).

This paper provides a critical analysis of credit scoring and may be viewed in part as a response to Nevin and Churchill's (1979) paper in this journal, which generally endorsed credit scoring systems. It will be shown that not only has their adoption led to major changes in the manner in which credit decisions are made but that these changes and the methodologies employed raise significant public policy issues.

CREDIT DECISION METHODS

The conceptual framework for judgmental credit decisions has endured for many decades. This framework consists of the three "c's" of credit, character, capacity and capital, often joined by collateral and conditions, and indicated primarily by credit history and such other characteristics as income, occupation and residential stability. However, for such reasons as credit officer error, inconsistency in application of credit policies across credit officers, and high costs both in training and employing credit officers and in purchasing credit reports, innovative creditors have long sought more automated ways of making credit decisions.

Numerical scoring systems, first developed in the mail order industry in the 1930s and later used by large personal finance companies, were an attempt to address these concerns (Smalley and Sturdivant 1973, p. 229; Wonderlic 1952). In a typical system a number of predictor characteristics were chosen for their ability to discriminate between those who repaid their credit (goods) and those who did not (bads), and points were awarded to different levels of each characteristic. An individual applicant was judged on the relationship between his/her summated score across characteristics and independently set accept/reject cut-off values. Early systems employed such characteristics as occupation, length of employment, credit bureau clearance, personal references, marital status, bank account, neighborhood, collateral, length of residence, income, rent, life insurance ownership, sex and race. Although the Spiegel system (Smalley and Sturdivant 1973, p. 229) and a major study for the National Bureau of Economic Research (Durand 1941) used statistical procedures (one characteristic at a time) to determine the point assignments, most systems were based on trial and error.

Although the ability to make credit decisions on a quantitative rather than a judgmental basis represented an important advance, the widespread diffusion of quantitative methods did not occur until development of the necessary computer technology in the early 1960s. In computer-based systems, hereafter termed *credit scoring systems*, the computational power of the computer is employed to identify, from a creditor's own historic files, those characteristics that best discriminate between the goods and the bads and to determine the point values for the various levels of each selected characteristic.

CREDIT SCORING SYSTEMS: DEVELOPMENT

The basic procedure for developing credit scoring systems involves the selection of samples of goods and bads from the creditor's files. Upwards of 50, and as many as 300 (Duffy 1977) potential predictor characteristics are obtained from the application blank. A multivariate statistical technique such as regression or discriminant analysis (see, for example, Beranek and Taylor 1976; Chatterjee and Barcun 1970; Long 1976; Myers and Forgy 1963) is employed, frequently in a stepwise manner, to identify those predictor characteristics, typically from eight to twelve, which contribute most to separation of the two groups. These selected characteristics, determined in part by the initial set of characteristics available from the application blank and in part by the data, and their point values are unique to an individual system. An example of a regionally based system of a major national retailer is shown in Table 1.

An applicant for credit is evaluated in a credit scoring system by simply summing the points received on the various application characteristics to arrive at a total score. This score may be treated in a number of ways depending on the system design. In the single cut-off method, the applicant's total score is compared to a single cut-off point score. If this score exceeds the cut-off, credit is granted; otherwise the applicant is rejected. More complex systems are based on a two-stage process. For example, the applicant's total score may be compared to two cut-off figures. If the score exceeds the higher cut-off, credit is awarded automatically, while if it falls below the lower cut-off, credit is automatically denied. If the score is between the two cut-offs, credit history information is obtained, scored, and the points added to the total score obtained from the application blank. If this new score is above a new higher cut-off, credit is awarded; if not, credit is denied.

The creditor sets his/her cut-off values on the basis of the probabilities of repayment and nonpayment associated with the various point scores and the trade-offs between type I and type II errors. The higher an acceptance cut-off is set, the lower the type I error (accepting applicants who fail to repay), while the lower a rejection cut-off value, the lower the type II error (failing to accept applicants who would have repaid).

Since the early 1960s the use of credit scoring systems has expanded enormously, as journals serving practitioners have been filled with articles extolling their virtues (e.g., Churchill, Nevin and Watson 1977a, b; Cremer 1972; Long and McConnell 1977; Main 1977; Myers 1962; Weingartner 1966). Further, passage of the Equal Credit Opportunity Act Amendments (*Federal Register* 1976) offered further endorsement of credit scoring systems when instructions regarding their use were specifically included in Regulation B, which implements the Act (*Federal Register* 1977).

In the hearings on the amendments creditors argued that adherence to the law would be improved if credit scoring systems were used. They contended that whereas credit decisions in judgmental systems were subject to arbitrary and capricious behavior by credit evaluators, decisions made with a credit scoring system were objective and free from such problems. Regulation B thus envisioned two categories of credit decision systems, statistically sound and empirically derived credit scoring systems, and all others not satisfying the criteria of statistical soundness and empirical derivation, which are termed judgmental systems. This distinction has practical importance. For example, although age is a proscribed characteristic under the Act, if the system is statistically sound and empirically derived, it can be used as a predictive characteristic, provided that the elderly receive the maximum points awarded to any age category. The appropriate manner in which both types of

systems should be used was spelled out in the Regulations.

Presently credit scoring systems are used extensively, especially among major credit granters. It is claimed that their use reduces bad debt losses, that more consumers are granted credit, and that organizational consistency in decision making is achieved. Further, the costs of granting credit are reduced, since less skilled personnel are required and fewer credit reports need be purchased (*Credit Card Redlining* 1979, pp. 234–240; Fair, Isaac and Company 1977). However, despite the torrent of words endorsing credit scoring systems, when they are subject to detailed analysis many troubling issues of a consumer and public policy perspective can be identified.

ANALYSIS OF CREDIT SCORING SYSTEMS: VARIABLES AND POINTS

The critical distinction between extant credit scoring systems and other methods of credit evaluation is the absence, in credit scoring, of an explanatory model. While judgmental systems are based, however imperfectly, upon a credit evaluator's explanatory model of credit performance, credit scoring systems are concerned solely with statistical predictability. Since prediction is the sole criterion for acceptability, any individual characteristic that can be scored, other than obviously illegal characteristics, has potential for inclusion in a credit scoring system. A partial list of characteristics used by creditors in the development of their systems is presented in Table 2. Few of these variables bear an explanatory relationship to credit performance. At best they might be statistical predictors whose relationship to payment performance can exist only through a complex chain of intervening variables. The overwhelming concern of creditors for prediction and a total unconcern for other issues was perhaps most tellingly demonstrated in the exchange between Senator Carl Levin (D., Michigan) and William Fair, chairman of Fair, Isaac and Company, the leading developer of credit scoring systems, at the Senate hearings on S. 15. Senator Levin asked Mr. Fair whether he *should be allowed* to use certain characteristics in the development of credit scoring systems (*Credit Card Redlining* 1979, p. 221):

Table 2.—Partial list of factors used to develop credit scoring systems

Telephone at home	First letter of last name
Own/rent living accommodations	Bank savings account
Age	Bank checking account
Time at home address	Zip code of residence
Industry in which employed	Age of automobile
Time with employer	Make and model of automobile
Time with previous employer	Geographic area of U.S.
Type of employment	Finance company reference
Number of dependents	Debt to income ratio
Types of credit reference	Monthly rent/ mortgage payment
Income	Family size
Savings and Loan references	Telephone area code
Trade union membership	Location of relatives
Age difference between man and wife	Number of children
Telephone at work	Number of other dependents
Length of product being purchased	Ownership of life insurance
	Width of product being purchased

Senator Levin: "You feel that you should be allowed to consider *race?*" (emphasis added)

Mr. Fair: "That is correct."

Senator Levin: "Would the same thing be true with *religion?*"

Mr. Fair: "Yes."

Senator Levin: "Would the same thing be true with *sex?*"

Mr. Fair: "Yes."

Senator Levin: "Would the same thing be true with *age?*"

Mr. Fair: "Yes."

Senator Levin: "The same thing be true with *marital status?*"

Mr. Fair: "Yes."

Senator Levin: *"Ethnic origin?"*

Mr. Fair: "Yes."

This exchange demonstrates very clearly that in the development of credit scoring systems, for Fair, Isaac and Company at least, no issue other than statistical predictability is of any consequence.[2] Although professing a commitment to obey the law, Fair, Isaac and Company, if statistical predictability were found and it were so able, would provide its customers with credit scoring systems that discriminated on the basis of race, religion, sex, age, marital status and ethnic origin.

The result, for consumers, of such a focus on prediction can be seen by examining two scoring tables which, in the author's experience, are typical of those in general use today. Table 1 presents the scoring table of the major national retailer. Of particular note are the following items:

There are no economic variables such as income, debts, living expenses and the like.

There are no variables for credit history.

Zip code is a very important characteristic, and a "bad" residential location can put the applicant at a tremendous disadvantage.

Applicants score fewer points if they rent their accommodations than if they own or are buying their home.

The length of time the applicant has been at his/her present address or has been with his/her current employer are important characteristics. However, rather than greater residential and employment stability being worth an increasing number of points, as stability increases, the points awarded first decrease and then later increase.

An applicant's occupation is an important characteristic. However, to be gainfully employed in the categories of driver, labor, or outside gains no more points than being unemployed.

If the applicant fills out the application honestly and admits that he/she borrowed money from a finance company, he/she is severely penalized. Whether or not the loan was satisfactorily repaid is irrelevant.

For many of the characteristics more points are awarded if the question goes unanswered than are awarded for many of the possible answers. Thus, the second most favorable way to score on the zip code characteristic is not to provide the information.

A second system, developed and used by the finance subsidiary of a major consumer durables manufacturer, is noted in Table 3. The following items are of interest:

Income is an important variable. However, the points relationship does not increase monotonically; rather, the points fluctuate wildly as income increases.

There are no variables for credit history.

Applicants who own their own home score many more points than those with other arrangements.

Increasing residential and employment stability are worth increasing numbers of points.

The points awarded for age have a curvilinear relationship.

Occupation is an important characteristic, and the unemployed category achieves the highest possible point score.

Honestly providing a small loan reference results in being penalized.

Many points are awarded for maintenance of either a checking or savings account, irrespective of the balances.

Though Congress embraced credit scoring systems, believing that their claimed objectivity offered advantages in enforcement of the Equal Credit Opportunity Act, the key goal of the Act was to:

". . . establish(ed) as clear national policy that no credit applicant shall be denied the credit he or she needs and wants *on the basis of characteristics that have nothing to do with his or her creditworthiness . . .*" (*Equal Credit* 1976, p. 3) (emphasis added)

Congress insisted that creditors advise applicants of the reasons for adverse action since it was concerned with the educational value of such knowledge:

". . . rejected applicants will now be able to learn where and how their credit status is deficient and this information should have a pervasive and valuable educational benefit . . ." (*Equal Credit* 1976, p. 4)

In identifying a set of proscribed characteristics (enumerated in ECOA), the clear intent of Congress was that acceptable characteristics are those that related to creditworthiness. While "relationship to creditworthiness" was not spelled out, many of the characteristics noted in Tables 1 and 3 do not evince a face valid relationship, for instance, those variables whose values are fluctuating—time at present address, time with employer (Table 1), and unpaid cash balance, age and income (Table 3). Given the concern for consumer education, it is difficult to believe that Congress would have accepted the fact that increased income (Table 3) and greater residential and employment stability (Table 1) should be regarded as indicators of *reduced* creditworthiness.[3]

Many other problems concerning the variables used and the points awarded exist with credit scoring systems. There is a real question of misleading the applicant. One might expect that provision of a financial reference would be reviewed positively, yet in both systems noted above, honesty is penalized. Also, there is the possibility that characteristics actually employed act as surrogates for proscribed characteristics. Thus the Senate has heard testimony that a zip code acts as a surrogate for race (*Credit Card Redlining* 1979, p. 20–63, 261–264, 314–317). Accordingly, discrimination can result when zip code is used as a predictor charac-

[2] A logical extension of Mr. Fair's position would allow the inclusion of such characteristics as color of hair (if any), left or right-handedness, wear eyeglasses, height, weight, early morning drink preference (tea, coffee, milk, other), first digit of social security number, last digit of social security number, sexual preference (none, same, different, both), educational level, sports preference (football, baseball, tennis, soccer, golf, other), and favorite movie star (select from list), if it could be shown that they were statistically related to payment performance.

[3] The Senate Committee report asserts that: ". . . consumers particularly should benefit from knowing, for example, that the reason for their denial is their *short residence in the area, or their recent change of employment . . .*" (emphasis added).

teristic, when different cut-off values are employed for different zip codes, or when credit scoring systems are developed at the individual zip code level. Differential treatment of types of income, such as that from part-time employment, alimony, child support and separate maintenance payments, discriminates against women. Furthermore, own/rent accommodation may discriminate against minorities as a result of historical discrimination in granting of mortgage loans, just as occupation and length of time with employer may discriminate against women because of historic employment practices and reduced employment stability due to pregnancy and childbearing, respectively. In the same way, age of automobile may discriminate against the handicapped.[4]

Since credit history information only enters credit scoring systems at a second stage, if at all, many applicants are denied credit despite the fact that they had excellent credit records (Chandler and Ewert 1975; *Credit Card Redlining* 1979, p. 63-70). Their reputations are unjustly injured, and severe psychological trauma may also ensue (*Credit Card Redlining* 1979, p. 135-136). The use of mere statistical prediction to make decisions may violate the constitutional guarantees of the equal protection and due process clauses of the 5th and 14th Amendments (*Credit Card Redlining* 1979, p. 137-138). The equal protection clause addresses the question of making decisions on individuals on the basis of characteristics that are both "irrelevant and unchangeable," while due process states that "individual cases must be decided on their own merits." In passing ECOA, Congress proscribed characteristics that were either immutable (race, color, national origin, sex) or central to the individual's life (religion, marital status). Characteristics still frequently employed in credit scoring systems such as number of dependents, age, occupation and place of residence appear to have many similarities to these proscribed characteristics, both in terms of being "irrelevant and unchangeable" and having little or nothing to do with "merit" in the case of a credit decision.[5]

ANALYSIS OF CREDIT SCORING SYSTEMS: DEVELOPMENT

The focus of the previous section was on problems involving the selection of predictor characteristics and the award of point values. In this section a series of methodological issues in the development of credit scoring systems is addressed. It will be shown that there are real questions as to whether credit scoring systems satisfy the legal requirements of empirical derivation and statistical soundness. The areas of concern are several and are discussed below.

Bias

The correct way to develop a credit scoring system is to sample randomly an historic applicant population. Creditors typically do not sample in this manner, however, for only data from those applicants previously awarded credit can provide samples of goods and bads. Since a considerable percentage of applicants was historically denied credit, systems based only on a population of accepted applicants where there is a corresponding population of denied applicants must be biased. Indeed, it has been shown that not only are biased estimates obtained, it is not possible to estimate in which direction the bias lies (Avery 1977). This problem is more severe in those systems that were originally developed before enactment of ECOA, when variables that are now illegal were used to make credit decisions. Despite revalidation, these systems are both biased and contaminated by illegal discrimination.

Developers of credit scoring systems are aware of the problem of using biased samples and have developed techniques in attempts to solve it. In the augmentation method, a sample of denied applicants is separated into goods and bads on the basis of the relationship of their application characteristics to those of the actual goods and bads. The actual and denied goods are then grouped, as are the actual and denied bads, and the credit scoring system is developed from the augmented sample. However, as Shinkel (1977) has shown, biased estimates are still obtained with this and alternative procedures.[6]

Multicollinearity

Credit scoring systems are developed from a large group of contender characteristics. In stepwise procedures the characteristic that explains the greatest variance enters the discriminatory function first, followed by other characteristics which in turn explain the greatest residual variance. However, there is no requirement that despite their ability to explain residual variance, subsequently entered variables are not correlated with variables previously entered. Thus, the coefficients of variables entered early to the equation are continually modified as successive variables are entered. The final point values assigned are far from being a true reflection of the discriminatory power of the single variable and are contaminated by a host of intercorrelations (Hsia 1978). A variable with good predictive ability but highly correlated to an entered variable will not enter the final equation. No greater concern for multicollinearity is shown in systems where the characteristics are preselected.[7]

An associated problem of intercorrelation of variables arises in the development of the second stage of two-stage systems in which the potentially discriminating credit history variables act only on the residual variance. Because of the intercorrelation between credit history variables and those variables already entered, the effect of credit history is severely circumscribed.

Sample size

Credit scoring systems are frequently developed with insufficiently large samples to achieve reliability in the assignment of point values. Thus, for the occupation characteristic of a credit scoring system employed by a major oil company, the occupations of farm foremen and laborers, enlisted personnel, clergymen, entertainers, farmers and ranchers, and government and public officials received few points. However, the sample sizes on which the point scores are based were, respectively, three, twenty-three, four, four, three and three. The point values are clearly unreliable. Similar patterns occur when zip code is used as a characteristic. Thus, for a regional trading area with hundreds of zip codes, the use of sample sizes of 3,000 or fewer subjects results in the point scores for many zip codes being based on very few data points. The system described in Table 3 was developed from a mere 640 data points (which may in part explain the strange income relationship).[8]

Judgmental aggregation

The empirical requirement for credit scoring systems is vioated when credit scores attempt to overcome the reliability problem. Then they aggregate individual units of a variable but in a nonempirical, arbitrary manner. The geographic unit, for example, may be defined not as a small unit such as zip code but as a state or regional grouping of states under no rationale other than, perhaps, geographic contiguity.[9] In the system described in Table 1, the 20 gross occupation categories were developed from 300 or more fine level occupations (*Credit Card Redlining* 1979, p. 166-168).

Not only are the occupation categories developed in an arbitrary manner, they are not a mutually exclusive set: an individual applicant could be assigned to a number of different categories. Thus, for example, a sales manager could be assigned as executive (62 points), manager (46 points), office staff (46 points), professional (62 points) or sales (46 points). A U.S. Senator might be classified as executive (62 points), professional (62 points), manager (46 points) or all other (46 points).

Judgmental system constraints

Since the methodology used to develop credit scoring systems is brute force empiricism, point value assignments to levels of characteristics in the final scoring table are often absurd, as indicated in the previous section. To overcome the consequent problems of credit scoring personnel ignoring the system, developers impose constraints on point assignments a priori (Churchill, Nevin and Watson 1977b; Fair, Isaac and Company 1977). While final scoring tables may thus be less absurd than otherwise, the impact of this procedure is to violate the empirical requirement of ECOA.

---

[4] Whether or not such surrogate variables could legally be employed in a credit scoring system would depend upon the results of application of an "Effects Test." See *Griggs v. Duke Paper Co.*, 401 U.S. 424 (1971), and *Albermarle Paper Co., v. Moody*, 422 U.S. 405 (1975).

[5] Nevin and Churchill (1979) present empirical support for the proposition that if characteristics correlated with proscribed characteristics were disallowed in credit scoring systems, the predictive ability of the model would be reduced. On the basis of an example in which "we have tried to make the assumptions realistic with respect to industry experience" (p. 102), they show that not only would the fictional consumer finance company earn less profit, fewer applicants would be awarded credit, using a restricted model. They fail to note that a profit maximizing finance company should award credit to all applicants, in which case profits would be $1.9M versus $1.78M and 9,000 versus 6,019 "good" applicants would be granted credit.

[6] Eisenbeis (1978) has discussed a number of statistical problems relating to the use of discriminant analysis in credit scoring. They include violations of the assumption about the underlying distributions of the characteristics, use of linear instead of quadratic discriminant functions when group dispersions are unequal, difficulty in demonstrating the significance of each characteristic included in the system, and estimation of classification error rates.

[7] The multicollinearity problem could perhaps be addressed by factor analysis and the use of factor scores. However, such a procedure would run into the problem of a legal requirement to disclose reasons for adverse action, where the "reason" would now be a factor score correlated to a greater or lesser extent with many original variables.

[8] The zip code analysis for the Table 1 system was based on between 500 and 600 individual zip codes, which, at an estimated maximum sample size in the 3,000 to 5,000 range, implies that many zip codes contained very few data points.

[9] For a worked example of the problems of aggregation with geographic units, see *Credit Card Redlining*, p. 122-125. Also see p. 384-86 for a discussion of aggregation and homogeneity problems in the use of zip codes.

Table 3.—Final scoring table for finance subsidiary of consumer durables manufacturer

Unpaid cash balance:	
0–$299	26
$300–$499	16
$500–$599	20
$600–$699	15
$700 and above	4
Time at present address:	
Less than 1 year	4
1–2 years	6
3–9 years	8
10 years or longer	10
Time with present employer:	
Less than 1 year	2
1–2 years	10
3–5 years	12
6–9 years	16
10 years or longer	22
Residence:

$600–$699	47
$700–$799	40
$800–$899	36
$900–$1,099	44
$1,100–$1,299	39
$1,300 and above	49
Coapplicant: Employed	6
Financial:	
Major credit card	22
Small loan reference	(7)
No checking or savings account	(18)
Occupation: *	

Group 1–19

Accountants, Auditors	Machinists
Architects, Designers	Physicians, Dentists
Bank tellers/clerks	Pilots (nonmilitary)
Business executives	Postal employees
College professors	Real estate personnel
Computer programmers	Reporters, newsmen
Engineers, Chemists	Salesmen (not department store)
Factory inspectors	Supervisors, nonoffice
Factory workers (semi-skilled)	Supervisors, office
Farm owners	Systems analysts
Field representatives	Teachers, instructors
Firemen, Rangers	Unemployed
Insurance agents, Appraisers	

Group 2–13

Building superintendents	Medical and Dental assistants
Carpenters, Craftsmen	Office managers
Clergymen	Plumbers, Pipefitters
Clerical workers, Bookkeepers	Policemen, Detectives
Computer operators	President/Owner of small firm
Electricians	Printers, Pressmen
Foremen, factory	Railroad employees
Government employees	Registered nurses
Guards	Repairmen
Installers	Sales clerks
Lawyers, Judges	Seamen (nonmilitary)
Maintenance men	Secretaries, Stenographers
Managers, other than office	Shipping and stock clerks
Mechanics	Stewards, Stewardesses
Taxi drivers, Chauffeurs	Technicians, Researchers

Group 3–0

Artists, Entertainers, Writers	Hospital employees (unskilled)
Assemblers	Hotel and Restaurant employees
Bartenders	Laborers (unskilled)
Construction workers	Machine operators
Contractors, Builders	Painters
Cooks, Bakers, Butchers	Social workers
Delivery and Route men	Tailor/Seamstress
Dishwashers	Truck and Bus drivers
Domestics, Janitors	Waiter/Waitress
Heavy equipment operators	Warehousemen
	Welders

Group 4–0

Other—Not directly related to Groups 1, 2 or 3 above.

* All self-employed should be investigated.

Overriding

The overriding procedure is also a violation of the empirical requirement. Overriding exists when a declined applicant calls to complain and, either on the basis of no information other than the protest or on the basis of some extra information, the decision is reversed and credit is awarded. Not only is use of the overriding procedure a statement that the system is not doing the job it was designed to do, it is descriminatory procedure against those who are less vociferous following credit denial.

Histogram error

When continuous characteristics such as time are used, serious errors may be introduced to the scoring table by using a series of discrete categories rather than the underlying continuous characteristic. Thus, for the characteristic "time at present address" in the scoring system described in Table 1, there are a series of histogram errors. For instance, an applicant with a residency of seven years and five months scores 30 points and one month later scores 39 points, a "present" of nine points. Conversely, a person with a residency of five months scores 39 points and one month later "loses" nine points. Errors of over 25 percent misclassification have been noted because of this histogram effect (The Sorites Group 1978).

In this section, seven areas of methodological concern have been noted. Not only were troubling statistical issues raised, it was shown that the procedures employed for the development of credit scoring systems may violate the legal requirements of ECOA that they be empirically derived and statistically sound. Certainly, the institution of careful procedures may obviate some problems, for example, overriding, but fatal methodological flaws may render some insoluble.

DISCUSSION

In this paper the background, development and rationale of credit scoring systems have been described. The benefits to creditors of such systems have been so vigorously promoted that regulations concerning their use have been specifically written into the law, and their adoption has been extremely widespread, especially among major creditors. Thus, within the past 20 years a major change in credit granting practice affecting millions of consumers has occurred in the United States. However, public debate has been virtually absent on this topic.

This paper redresses the balance and focuses a critical eye on credit scoring systems. When subject to intensive examination, a very different picture emerges from that portrayed by the multitude of credit scoring boosters.

An examination of the development of credit scoring systems reveals a host of statistical issues that may pose severe legal problems for creditors. Statisticians have only recently begun to investigate these systems, yet their early findings are very troubling. It is perhaps not unlikely that 20 years of intensive study of these systems paralleling the 20 years of development just past may lead to conclusions even more serious than are justified by our present knowledge.

The more troubling aspect, however, has less to do with statistical issues than with conceptual ones. The brute force empiricism that characterizes the development of credit scoring systems leads to a treatment of the individual applicant in a manner that offends against the traditions of our society. When predictive decisions regarding individuals have to be made, they are based typically on variables that bear an explanatory rather than a statistical relation to the behavior being predicted, notably the actual historic performance in a similar or related area. For instance, job promotion rests heavily on job performance; selection for college is based on high school grades and aptitude tests. Yet credit scoring developers use any characteristic that discriminates as long as they can get away with it; they have even used the first letter of a person's last name.[10]

As far as individuals not yet in the credit marketplace are concerned, who have no credit history, the characteristic of extant systems that they ignore credit history is no argument for their use. It is arbitrary and unfair to make decisions on these applicants on the basis of points awarded arbitrarily for the characteristics of those already in the market. Experience of enterprising retailers suggests that a system characterized by low initial credit limits and tight controls is a better way to treat new applicants.

What is needed, clearly, is a redirection of credit scoring research efforts toward development of explanatory models of credit performance and the isolation of variables bearing an explanatory relationship to credit performance. Such variables are likely related to economic factors (ability to pay) and credit history factors (demonstrated willingness to pay). In present systems, economic factors do not always enter the credit scoring tables, in part because they are highly correlated with other entering variables, for instance, zip code and income. Furthermore, since creditors are unwilling to pay the cost of credit reports, credit history factors are relegated to the second stage and their use is thus minimized, despite ample evidence that they provide the strongest relationship to future credit performance (Chandler and Ewert 1975; *Credit Card Redlining* 1979, p. 376; Long and McConnell 1977).

It is, of course, possible that well-developed explanatory models would be less predictive overall and more costly to implement than currently employed credit scoring systems. Even if this were true, and it may not

[10] Disclosure by Morton Schwartz, General Credit Manager, J. C. Penney Company, at a meeting of the Trustees of the Credit Research Center, Atlanta, Ga., November 10, 1977.

be so, such increased costs should be weighed against the social cost of employing systems such as those described in this paper that provide a dispassionate observer with "a chilling experience."

This analysis should not be construed as advocacy for traditional judgmental systems nor as argument against the thrust toward objectivity and consistency in credit decision making. Such a direction is clearly a positive one. What is critical, however, is treatment of the individual in a fair and just manner and his/her protection from arbitary treatment. The individual should be judged on characteristics that are ultimately related to the decision under consideration; brute force empiricism has no place in decisions of such importance to individual citizens.●

THE CONSTITUTION AND FREEDOM—ADDRESS BY FORMER SENATOR SAM J. ERVIN, JR.

● Mr. EAST. Mr. President, on April 30, 1982, the Sam J. Ervin, Jr., program in public affairs was dedicated at the School of Humanties and Social Sciences at North Carolina State University. The renaming of the program in public affairs at this outstanding university is a fitting tribute to North Carolina's favorite son. While he was always a loyal Democrat, Senator Ervin earned the respect and love of all North Carolinians for his outspoken defense of constitutional liberties as he understood them. I ask that former Senator Ervin's remarks given at the dedication ceremony be printed in the RECORD for the edification of my colleagues and as another small tribute to this remarkable man.

THE CONSTITUTION AND FREEDOM

(Remarks prepared by Sam J. Ervin, Jr. for delivery at North Carolina State University at Raleigh at 2 p.m. April 30, 1982. For release at that time)

IMPLICATIONS OF TODAY'S EVENTS

Words cannot adequately express my gratitude to former aides and the other friends whose generosity made the painting of my portrait and today's events possible; to Marcos Blahove whose artistic genius and charity of heart enabled him to paint this outstanding portrait of me; to North Carolina State University at Raleigh, one of earth's most useful institutions of learning and research, for accepting my portrait, and naming a significant program of its School of Humanities and Social Seciences "The Sam J. Ervin, Jr. Program in Public Affairs;" and to my ever young sweetheart, Margaret Bell Ervin, for gracing this occasion by her presence, and for standing beside me in sunshine and shadow with inspiration and love for fifty eight years.

Today's events have a portent for the future which vastly transcends in importance the high honor they accord to me. These events reveal these things:

1. Those who made them possible share my abiding conviction that the causes I have cherished and championed, namely the government of laws ordained by the Constitution and the freedoms enshrined in the North Carolina Declaration of Rights and the Bill of Rights, must prevail if America is to enjoy constitutional government and Americans are to be free; and,

2. The State University is determined that the yound men and women who come to her for intellectual enlightment in the years ahead are to have the opportunity to know the truth that can keep America and Americans free, that is to say, the truth about constitutional government and freedom.

MY REVERENCE FOR CONSTITUTIONAL GOVERNMENT AND FREEDOM

As a citizen, I have cherished and championed constitutional government and freedom all my life; and as a public servant for some fifty years, I have endeavored to preserve them and make them realities in our land at all times between my service in the days of my youth in the North Carolina Legislature through my last week in the United States Senate, when I piloted to enactment the Speedy Trial Act and the Privacy Act.

My motivation has been my certainty that "whatever government is not a government of laws is a despotism, let it be called what it may";[1] that "the condition upon which God hath given liberty to man is eternal vigilance";[2] and that "a frequent recurrence to fundamental principles is absolutely necessary to preserve the blessings of liberty."[3]

Despite the *Miranda Case*, I will make a confession that while serving in the North Carolina Legislature I made a concession to the enemies of freedom. While opposing the resolution to prohibit the teaching of evolution in North Carolina's schools and colleges, I conceded its adoption would delight the monkeys in the jungle because it would absolve them from responsibility for the conduct of the Legislature in particular and the human race in general.

MY OFFICIAL ACTIVITIES

During my 20 years in the Senate, I sought to preserve constitutional government and freedom by opposing the concentration of power in the federal government; the abdication of state power to that government; confiscatory taxes, deficit financing, and unbalanced budgets; taxation to finance religious institutions; proposals to amend the First Amendment to confer on school boards the power to teach religion by prescribing prayer in public schools; compulsory unionism to enable unions to obtain members by legal coercion rather than by voluntary persuasion; preventive detention imprisoning Americans for crimes they had not committed and might never commit; no-knock proposals nullifying Fourth Amendment prohibitions of unreasonable governmental searches and seizures; the withholding by President and federal departments and agencies of information necessary to enable Congress to legislate wisely, and non-security information necessary to enable Americans to know what their government is doing; presidential evasion of the treaty making power of the Senate under the Constitution by executive agreements; wanton invasions of the privacies of Americans by Presidents and federal departments and agencies; encroachments by Presidents and federal departments and agencies on the freedom of thought, speech, and association, and the private lives of federal employees; the use of the army to spy on Americans exercising their First Amendment rights of freedom of thought, speech, association, and peaceable assembly; congressional suspension of the power to legislate reposed in the States by the Constitution; and the tyranny of federal bureaucrats and judges who order forced busing of helpless children to integrate them in the schools in racial proportions pleasing to them.

Unhappily my opposition and that of like-minded senatorial colleagues did not outlaw some of these tyrannies. Happily, however, we were able to forestall some of them, or at least ameliorate their most evil consequences.

During my years in the Senate, I sought to promote and protect constitutonal government and freedom in America in a positive way by proposing and seeking adoption of bills, resolutions, and amendments drafted by me to achieve that objective. Unfortunately, some of them were defeated by national legislators more concerned with magnifying the power of the federal government than with making it just and the people free.

Fortunately, however, Congress did add to the laws of the land proposals sponsored by me to secure constitutional rights to mentaly ill persons in the District of Columbia; rights to Indians residing on reservations comparable to those conferred on other Americans by the Bill of Rights; rights to poor people unable to give monetary bail to freedom while awaiting trial on charges of crime in federal courts; rights to representation by law trained counsel to poor people charged with crime in federal courts; rights to procedural and other safeguards in administrative proceedings and courts-martial to persons serving in the armed forces; prohibitions of unwarranted invasions by federal departments and agencies of the privacies of the people; rights to speedy trials in federal courts to persons charged with crime; and nullification of the inexcusable agreement made by the Administrator of General Services with former President Nixon and revealed on the day the pardon was granted by President Ford which empowered former President Nixon to hinder historical truth by destruction of the Watergate tapes.

COMMENTS ON CURRENT NEGATIONS OF CONSTITUTIONAL GOVERNMENT AND FREEDOM

My devotion to constitutional government and freedom impels me to comment on prevalent negations of them, which are popular in many quarters. These comments are likely to prompt persons whose sincerity I do not question to charge me with racism.

I make these comments solely on my own authority and without the known approval of any institution or any other than myself participating in today's events.

I am no racist. Like Abou Ben Adhem, I love all men whom the Tennessee poet, Walter Malone, rightly calls fellow travelers to the tomb. I esteem the Constitution for this reason.

The Constitution in its present form is color blind. It confers on all Americans of all races equality of constitutional and legal rights, and forbids government at any level to nullify this objective by using race as a criterion for the bestowal of rights or the imposition of responsibilities.

I wholeheartedly applaud the legitimate endeavors of Americans of all races to make of themselves everything their ambition, talent, industry, and Creator gave them any possibility of becoming.

Many persons of undoubted sincerity labor under the honest delusion that the federal government has a paramount obligation to banish all racial discrimination and even all racial preference from America by any means available, and that the most ef-

[1] Daniel Webster: *Speech at Bangor, Me.*, 25 August, 1835.

[2] John Philpot Curran: *Speech Upon The Right of Election*, 10 July, 1790.

[3] North Carolina Constitution of 1776, *A Declaration of Rights*, Section.

fective means of achieving this objective is for it to heap new racial discriminations on Americans, including those in no wise reponsible for any discrimiation, past or present.

I deny the validity of this obsession. Government negates constitutional government, and freedom, when it subjects the basic rights of any Americans to the personal demands of members of any particular race.

THE FIRST AMENDMENT

I revere the First Amendment. It was added to the Constitution to make and keep Americans politically, economically, intellectually, and spiritually free.

The federal government is now practicing racial discrimination in reverse. By affirmative action programs, it requires the establishment of racial quotas, which it euphemistically calls goals, and which command employers to employ specified numbers of blacks before they employ any whites; and by substituting race for merit, it requires the employment of blacks in preference to whites in industry and educational institutions, and the admission of blacks in preference to whites to colleges and professional schools.

This is not all by any means.

GOVERNMENTAL ORTHODOXY

The Supreme Court interpreted the First amendment aright in *West Virginia State Board of Education v. Barnette,* when it ruled:

"If there is any fixed star in our constitutional constellation, it is that no official, high or petty, can prescribe what shall be orthodox in politics, nationalism, religion, or other matters of opinion or force citizens to confess by word or act their faith therein. If there are any circumstances which permit an exception, they do not now occur to us."[4]

This constitutional declaration is now being flouted by Congress, the President, the Supreme Court, and federal departments and agencies. They usurp and exercise the power to establish governmental oxthodoxies which decree what truth is in respect to matters in controversy among Americans. I cite three exemples.

The Internal Revenue Service establishes as its criterion for granting or withholding exemptions from income taxation of contributions of individuals to educational institutions the acceptance or rejection by such institutions of its determinations of truth in respect to race and what religion teaches about race.

The Department of Health and Welfare spends tax moneys to influence the private habits of Americans, and induce them to stop smoking cigarettes in obedience to the Surgeon General's determination of what truth is in respect to that habit.

Acting under distortions by the Supreme Court of the Thirteenth Amendment and the Civil Rights Act of 1866, which began in 1968 in the case of *Jones v. Alfred H. Mayer Company,*[5] federal courts are now compelling individual white persons against their wills to make personal contracts with blacks, to convey private property to them, to employ them in private undertakings, and to admit them to private white schools and social clubs operated entirely at their own expense.

Irrespective of whether this judicial compulsion is righteous, it negates constitutional government and freedoms Americans have always enjoyed, finds no support in the Thirteenth Amendment and the Civil Rights Act of 1866, and conflicts with every Supreme Court decision antedating the *Jones Case* which interprets them.

The most peculiar offspring of the *Jones Case* is the recent pronouncement of the Supreme Court in *McDonald v. Santa Fe Trail Transportation Company,*[6] where a majority of the Justices adjudged that the Amendment and Act as revamped by them made it illegal for an employer to fire two white employees for misappropriating goods they were hired by him to transport safely because he did not fire their black accomplice as well. The majority of the Justices reached this conclusion, notwithstanding white persons have never been slaves in the United States and notwithstanding the Civil Rights Act of 1866 does not confer any right on any white person.

CONCLUSION

Justice Brandeis, one of the wisest men who ever sat on the Supreme Court, made this comment on the dangers of governmental contempt for constitutional government and freedom in his illuminating dissenting opinion in *Olmstead v. United States:*

1. "Experience should teach us to be most on our guard to protect liberty when the government's purposes are beneficient. Men born to freedom are naturally alert to repel invasion of their liberty by evil minded rulers. The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well meaning, but without understanding."

2. "In a government of laws, existence of the government will be imperiled if it fails to observe the law scrupulously. Our government is the potent, the omnipotent, teacher. For good or ill, it teaches the whole people by its example. If the government becomes a law-breaker, it breeds contempt for law; it invites every man to become a law unto himself; it invites anarchy."[7]

My remarks end with this observation: The tides of distrust of government are rising. The anchors of faith in it are dragging. It is at such a time America needs constitutional government and freedom the most.●

DEFENSE SPENDING EDITORIAL

● Mr. LEAHY. Mr. President, one of the leading newspapers in Vermont, the Times Argus of Montpelier, has provided an excellent analysis of the recent veto of the supplemental appropriations bill. The editorial reveals the inconsistency in President Reagan's claim that the supplemental was a budget buster and yet his seeming unconcern with waste and sky-high cost overrides in the Defense Department. I urge all of my colleagues to pay careful attention to this thoughtful article written by Nicholas Monsarrat, the editor of the Times Argus. I ask that the editorial be printed in the RECORD.

The editorial follows:

BEYOND THE VETO OVERRIDE

President Reagan tried last week to tar the $14.1 billion supplemental appropriations bill and anyone supporting it with the labels "budget buster" and "big spender". The truth is, however, that nobody has been recommending more spending, with less careful investigation of what the money might be spent for, than President Reagan in the area of defense spending.

The congressional decision last week to override the president's veto of this supplemental appropriations bill seems a perfect time for Congress to start doing something about this gross imbalance in the Administration's budget-making.

The president has no leg to stand on when, despite huge and mounting federal budget deficits, he continues to refuse to pare significantly his preposterous plan to spend $1.5 trillion in the next five years on new weapons systems and other defense related projects. He magnifies his credibility problems when be demands; cajoles and pleads with members of Congress to kill a supplemental appropriations bill that would benefit necessary human service programs that are already reeling from earlier cuts. And members of Congress have looked like perfect patsies when they have failed to deal critically, carefully or prudently with the massive defense budget proposals that keep pouring in from the White House.

You would think there had never been a cost-overrun in the history of defense spending, instead of a litany of massive and disgraceful cost-overruns over the years. Yet Congress has had to approve laws protecting federal employees from government reprisals for speaking up when they see gross mismanagement and outright thievery in the defense spending area—priorities backwards as usual

It's as if one member of a family, in trying to prepare a new household budget, said to the rest of the family: "We're going to cut mom's spending for food drastically, junior's spending for gas drastically, and sis's spending for clothes, but we're going to double our spending for dad's beer budget and life insurance policy."

We would like to think that the congressional override of the president's veto of the supplemental appropriations bill was not just an election-eve appeal for votes by Congress, although it was surely that in part. We would like to believe that it was also a long overdue acknowledgement by Congress of two things:

1. That there is a limit to how far the federal government can go in cutting federal spending for people programs.

2. That no budget, particularly for defense spending, can be above criticism and cuts.

As for the charge of "budget busting," the fact remains that the bill vetoed by the president was actually $1.3 billion less than the bill the president himself had originally asked Congress to pass. The real difference was that, once again, the president had wanted still more money spent on the military and less on people programs than the bill approved by Congress.●

SOCIAL SECURITY DISABILITY

● Mr. HEINZ. Mr. President, the problems surrounding the current social security disability review system have been well documented. The Senate Finance Committee recently held hearings on this subject. And just this week, a number of our colleagues in the House communicated to our distinguished chairman of the Finance Committee, BOB DOLE, their conviction, which I and other Senators share, that Congress must take urgent action to alleviate these problems.

The goal of reviewing the disability status of individuals on the social security rolls is a sound and necessary principle. But when Congress mandated, in 1980, a 3-year review of individuals on the disability rolls, no one foresaw the high rates of termination and the poor quality of reviews that we are witnessing today. The Social Security Administration has been terminating 45 percent of the beneficiaries it reviews. When Congress passed the Disability Amendments of 1980, the periodic disability reviews were not expected to produce any net savings during the first 3 years of operation; fiscal years 1982 through 1984. And, during the 4-year period fiscal year 1982 through fiscal year 1985, the periodic reviews were projected to save only $10 million. Yet, the President's fiscal year 1983 budget indicates that the program of periodic reviews will now save $3.25 billion in fiscal year 1982-84—or 325 times the original estimate.

On the front page of today's Los Angeles Times, there appears a troubling story relating the tales of 11 individuals who have died from disabilities which the Social Security Administration denied their having. I submit this article for the RECORD and urge my colleagues to read it with care. It emphasizes the need to continue working with the administration to enact legislation at the earliest opportunity to redress this sorry situation.

The article follows:

[From the Los Angeles Times, Sept. 17, 1982]

PURGED AS FIT TO WORK—11 Denied Social Security Disability Die of Illnesses

(By Doug Brown)

Four Californians who were cut off from or denied long-term Social Security disability payments during current federal cutbacks—ostensibly because they were well enough to work—have died within the last four months of the same disabilities that sidelined them in the first place.

These deaths and at least seven others across the nation are the first to be documented since the Reagan Administration began its purge of the Social Security disability rolls in an attempt to cut costs and reduce abuse of the $22-billion-a-year disability insurance system.

The deaths have raised angry cries from congressional critics who were already aroused by stories of what they considered cold and arbitrary decision-making in the removal of 200,000 people from the Social Security disability payment rolls during the past fiscal year.

The benefit cutoffs have not been medically blamed for any of the deaths. But critics of the way the purge has been conducted insist that the circumstances are far more than coincidental, and say the facts form a persuasive argument that the benefits should have been continued—at least while the cases were still under appeal.

All but one of the 11 people who died had filed appeals seeking reinstatement of benefits. Slightly more than half of cases that are appealed end with the benefits being reinstated.

The Californians who died were:

Thomas A. Alvey, 47, of La Habra. He died Aug. 16 of heart disease six months after he had been declared fit for work and no longer eligible for disability benefits. After his benefits were cut off, the former supermarket manager was forced to subsist on an $81.67 monthly federal stipend and help from his mother, whose only income was from Social Security.

Ernestina Orozco, 45, of La Puene. A mother of two teenagers, she was to have been informed by the Social Security Administration that her two types of cancer were not sufficiently serious to keep her from working. But on Aug. 9—two days before the notification was mailed—Orozco died of cancer of the colon.

Willie Simmons, 47, of Reseda. He was purged from the disability rolls in February because his extremely painful "multiple neurological degenerative diseases" were not considered debilitating enough to keep him from working as a hospital clerk. He died of those multiple ailments in May.

Victor Graf, 59, of Stockton, who had been receiving disability benefits because of a heart condition. He received a letter from Social Security in July saying his disability payments would cease in September. He visited his cardiologist on Aug. 2 to get more medical evidence in an attempt to show disability evaluators they had erred in his case. But within six hours after he left the doctor's office, Graf died of a heart attack. "That letter killed him," his widow said.

Besides the Californians, four people from Oklahoma, two from Ohio and one from Arkansas have died since April of ailments after having been denied further disability benefits, according to medical and legal records provided by congressmen, their aides, and the victims' attorneys.

To be eligible for Social Security disability benefits, an individual must be unable to engage in "substantial gainful activity" by reason of a medically determinable physical or mental impairment that is expected to last at least 12 months.

"What these deaths shows is that the Social Security Administration is cruel and without any compassion," said Rep. Michael L. Synar (D-Okla.), a member of the House Select Committee on Aging, noting that four of his constituents were among those who died. "Their insensitivity is so incomprehensible that you would think that they have never sat at a table across from a disabled person and seen what it means to be unable to work."

A conservative Republican member of the same committee, Rep. John Paul Hammerschmidt of Arkansas, said, "We've got to change the law. . . . There's going to be a lot more damage to people's lives unless things are corrected."

Hammerschmidt has a bill pending in Congress that would slow the continuing disability review, allow recipients to continue to receive benefits until the appeal process has been completed and allow recipients to meet the disability evaluators face to face. Nearly all reviews of medical records and other documents have been done by mail.

Meanwhile, reacting to complaints from Hammerschmidt and other Congressmen, the Social Security Administration last week announed it is slowing the pace of eligibility reviews and making other changes.

In addition, Social Security officials said that at the outset of future eligibility reviews there will be face-to-face interviews between disability evaluators and recipients facing termination of benefits.

Social Security Administrator John Svahn, a Reagan appointee who was among the inner circle of officials who designed an overhaul of welfare programs in California when Reagan was governor, refused to be interviewed about the deaths, but John Trollinger, a deputy press secretary in the agency, defended the cutoff policy.

"Our evaluations are based on the best evidence available at the time," Trollinger said. "The fact that a recipient dies following our review doesn't mean our evaluations were incorrect.

"We may not have had all the evidence on the medical condition of the recipient at the time," he said. "And their conditions could have worsened after the evaluation."

But Trollinger also said, "We have made some mistakes, with some people being taken off the rolls who should not have been."

Trollinger said he has ordered Thomas Alvey's disability file sent to Washington for review by the Social Security Administration.

"We can't respond to the 11 documented cases . . . without more information on their particular cases," Trollinger said.

Trollinger said that before inquiries by The Times, he had been aware of only one death related to the loss of disability benefits, and that case was far less direct than those found by The Times. It involved a virtually blind Michigan man who took a cemetery job after his benefits were cut off, and was then hospitalized for gangrene. He subsequently died of a heart attack.

The Social Security Administration runs two separate disability programs: Disability Insurance, which is financed through payroll taxes and pays benefits to disabled workers and their families based on the worker's past earnings, and Supplemental Security Income (SSI), which is funded by general revenues and pays benefits to low-income, blind and disabled people based on proven need.

It is the operation of the Disability Insurance program that has come in for the heaviest criticism.

In the fiscal year ending last June 30, 200,000 workers, their spouses or their children were trimmed from the Disability Insurance rolls, bringing the level down to 4.2 million people. The Social Security Administration said this meant a saving of $372 million in fiscal 1981-82, but Trollinger acknowledged that $156 million of this was eaten up by administrative costs, lowering the net savings to $216 million.

In announcing that it will slow the pace of its disputed eligibility reviews, Social Security said the number of planned reviews in the next year is to be reduced by 20%, down to 640,000 cases from the previously announced target of 806,000 cases.

However, Hammerschmidt and Synar said the new administrative changes will not prevent them from pushing to revise disability review laws. They said the changes announced last week by the Social Security Administration will not guarantee against situations in which people with terminal illnesses are cut off from disability benefits.

PLEADING LETTER

Carolyn Jones, an Orange County Legal Aid Society attorney, who had represented Alvey, said Alvey had written to Social Security imploring that he not be cut off from benefits.

Alvey presented the Social Security Administration with extensive medical records and recommendations from his doctor that

his "chronic obstructive pulmonary disease" precluded him from returning to work.

Rejecting his evidence, Social Security sent Alvey a letter on March 10 that stated: "Medical evidence reveals that you are post myocardial infarction (heart attack) with objective medical evidence no longer reflecting an impairment of sufficient severity to preclude you from returning to your past work.

"Medical data further reflects no changes per your electrocardiogram and it is felt your pulmonary condition to be of a mild nature. Your overall condition is no longer of a severe nature to prevent you from performing your usual duties." His benefits were cut off.

Alvey, who had been receiving $437 a month in disability benefits based on his past earnings as a supermarket manager, appealed the ruling but was receiving no benefits pending his hearing. He died less than two months before the hearing was to be held.

"He used to call me twice a week about his case," said Legal Aid's Jones, who had been helping him with his appeal. "He was a very nice man, but the stress was getting to him and every time he talked he would get more and more upset."

There were similar tales in the cases of three other Californians who died.

The notice denying Ernestina Orozco's request for disability payments arrived at her La Puente home Aug. 13. It said: "You said you could not work because you have cancer of the neck and cancer of the colon. The medical evidence shows that your cancer is currently under control and being treated. We have concluded, therefore, that your condition does not restrict you from doing your usual activities."

But Mrs. Orozco never read the letter. She had died four days earlier of cancer of the colon. Mrs. Orozco was the only one of the 11 recorded deaths who applied for disability benefits but had not yet received any.

She had not worked since February at her job on an assembly line making blood bags at a Covina hospital supply manufacturing company. Both Mrs. Orozco's employer of 11 years and her doctor said her mobility was limited by the cervical collar she was forced to wear because the cancer had made her neck bones brittle.

"She really tried to work," said her husband, Fred Orozco, "but the chemotherapy really drained her. She had to do a lot of sitting on a stool on her job and that was really hard to do eight hours a day."

Mrs. Orozco was not the only disabled person to find that the pain of sitting for long periods of time on the job was beyond endurance.

Willie Simmons, who had been on disability for five years, was terminated in February because Social Security believed his condition would allow him to take work as a hospital records clerk. But Simmons found sitting for long periods to be extremely painful. He died in May of the multiple neurological degenerative diseases that had caused him such extreme discomfort.

Victor Graf, a construction worker who had been on disability since December, 1976, received a letter in July from an evaluator saying a review of his medical records showed he had recovered sufficiently from his heart aliment to allow his return to work.

"The medical evidence shows that you had a heart attack in 1978 but your condition has improved," the evaluator wrote.

"You have responded well to treatment and medication. You are considered able to carry out the following work activities: lift 50 pounds maximum, stand/walk six to eight hours per eight-hour workday."

Graf, who had been treated by Stockton cardiologist Edward Caul and heart specialists at Stanford University in Palo Alto, was confused and angered by the letter, his wife, Myrtle, recalled.

DOCTOR'S FINDINGS

On Aug. 2, Graf went to Caul's office in Stockton to try to find out if Social Security had made a mistake. In his notes on the visit, Caul said, "Social Security office has totally misunderstood the significance of the patient's problem. He has marked damage of his left ventrical from cardiovascular diseases resulting in a large akinetic heart proved by echocardiographic studies.

"The patient gets along well in a relative sense by restricted physical activity," Caul continued. "He requires multiple medications and is constantly at risk for sudden death and determination in the future of congestive heart failure.

"In no way can the patient return to remunerative work conducive to his background, education and training."

Within six hours after leaving Caul's office, Graf died of a heart attack.

In a letter to Social Security after Graf's death, Caul labeled the decision to end Graf's benefits "arbitrary and without attention to the facts of record."

In an ironic footnote, two weeks after Graf died and 10 days after Caul's letter, Social Security sent a letter addressed to Graf announcing that since it had received no additional medical information showing that Graf was still disabled, it was going forward with its plans to terminate benefits.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification which has been received. The classified annex referred to in the covering letter is available to Senators in the office of the Foreign Relations Committee, room 4229 of the Dirksen Building.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 14, 1982.

In reply refer to: I-03569/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN. Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-90 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter of Offer to Pakistan for defense articles and services estimated to cost $27 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 82-90]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Pakistan.

(ii) Total Estimated Value:

	Million
Major defense equipment [1]	$18
Other	9
Total	27

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or Services Offered: Five AN/TPO-36 radar systems with spares, support equipment, technical assistance, and training.

(iv) Military Department: Army (VCH).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agree to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in section 28 report.

(viii) Date Report Delivered to Congress: September 14, 1982.

POLICY JUSTIFICATION

Pakistan—AN/TPQ-36 radar systems

The Government of Pakistan has requested the purchase of five AN/TPQ-36 radar systems with spares, support equipment, technical assistance, and training at an estimated cost of $27 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Pakistan to increase its capability to provide for its own security and defense, particularly in view of the increased threat resulting from the Soviet invasion of Afghanistan.

The Government of Pakistan requires these Firefinder weapon locating radar systems as a primary means of countering hostile mortar fire. This sale is a part of Pakistan's overall force modernization plan.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Hughes Aircraft Corporation of Fullerton, California.

Implementation of this sale will require the assignment of four additional U.S. Government personnel and one contractor representative to Pakistan for four months.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales

under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the record in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on September 15, 1982.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room 4229 Dirksen Building.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 15, 1982.
In reply refer to: I-24160/82.
Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to an Asian Country tentatively estimated to cost in excess of $50 million.

Sincerely,

PHILIP C. GAST,
Director.●

PROPOSED ARMS SALES

The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., September 13, 1982.
In reply refer to: I-02848/82ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-74, concerning the Department of the Air Force's proposed Letter of Offer to France for defense articles and services estimated to cost $275 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 82-74]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: France.
(ii) Total Estimated Value:

	Millions
Major defense equipment[1]	0
Other	$275
Total	275

[1]As defined in Section 47(6) of the Arms Export Control act.

(iii) Description of Articles or Services Offered: Incremental purchase and installation of 11 modification kits consisting of all hardware items, to include CFM-56 engines, necessary to accomplish the Class V modification of the 11 French C-135F aircraft.

(iv) Military Department: Air Force (YAD).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Two of these Class V modification kits were included in the report for the quarter ending 30 June 1982.

(viii) Date Report Delivered to Congress: September 13, 1982.

POLICY JUSTIFICATION

France—Class V modification of French C-135F aircraft

The Government of France has requested the incremental purchase and installation of 11 modification kits consisting of all hardware items, to include CFM-56 engines, necessary to accomplish the Class V modification of the 11 French C-135F aircraft at an estimated cost of $275 million.

This sale will contribute to the foreign policy and security objectives of the United States by improving the defensive capabilities of an ally. Although French forces are not now committed to NATO command, France nevertheless bases its defense on cooperation and interoperability with NATO. As a further potential benefit, this sale will contribute to the standardization and interoperability of French and U.S. equipment, as well as demonstrate the seriousness of the U.S. commitment to cooperative arms programs with alliance partners. France's commitment to this program may well have positive effects on French willingness to participate in other multinational, cooperative arms programs.

France intends to re-engine all 11 of their C-135F tanker aircraft with CFM-56 turbo fan engines. The 11 engine production kits will be installed by Boeing Aircraft Company; The CFM-56 is a commercially available engine produced by CFM International, a General Electric (U.S.)/SNECMA (France) joint owned company. Re-engining the tankers will reduce fuel consumption, improve take-off performance, lower operating and support costs, improve fuel off-load capability, enhance aircraft survivability, and reduce smoke and noise pollution.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Boeing Military Airplane Company of Wichita, Kansas.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to France.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., Sepetmber 15, 1982.
In reply refer to: I-03191/82ct.
Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 82-81, concerning the Department of the Air Force's proposed Letter of Offer to Turkey for defense articles and services estimated to cost $76 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 82-81]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Turkey.
(ii) Total Estimated Value:

	Millions
Major defense equipment*	0
Other	$76
Total	76

* As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Cooperative logistics supply support (FMSO II) for follow-on spares and supplies in support of C-130H, F-4E, F/RF-5A, F-100C/D/F, RF/F-104G, T-33, T-37C, and T-38 aircraft and other systems and subsystems of U.S. manufacture.

(iv) Military Department: Air Force (KBN).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: September 15, 1982.

POLICY JUSTIFICATION

Turkey—Cooperative logistics supply support

The Government of Turkey has requested the purchase of cooperative logistics supply support (FMSO II) for follow-on spares and supplies in support of C-130H, F-4E, F-/RF-5A, F-100C/D/F, RF/F-104G, T-33, T-37C, and T-38 aircraft and other systems and subsystems of U.S. manufacture at an estimated cost of $76 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey in fulfillment of its NATO obligations; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

Turkey needs these logistics support systems to maintain the readiness of the Turkish Air Force weapon systems of U.S. origin. The cooperative logistics support will be provided in accordance with, and subject to the limitations on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

Procurement of these items and services will be from the many contractors providing similar items and services to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

U.S. DEPARTMENT OF STATE, UNDER SECRETARY OF STATE FOR SECURITY ASSISTANCE, SCIENCE AND TECHNOLOGY,

Washington, D.C., September 10, 1982.

Pursuant to section 620C(d) of the Foreign Assistance Act of 1961, as amended (the Act), and the authority vested in me by Department of State Delegation of Authority No. 145, I hereby certify that the provision to Turkey of cooperative logistics supply (FMSO II) is consistent with the principles contained in section 620C(b) of the Act.

This certification will be made part of the certification to the Congress under section 36(b) of the Arms Export Control Act regarding the proposed sale of the above named articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

JAMES L. BUCKLEY.●

Mr. HEFLIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business, which the clerk will state by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 520) to provide for a temporary increase in the public debt limit.

The Senate resumed consideration of the joint resolution.

AMENDMENT NO. 2040

The PRESIDING OFFICER. The pending question is the Baucus amendment No. 2040.

Under the previous order, the Senator from Montana (Mr. BAUCUS) is now recognized.

Mr. BAUCUS. Mr. President, I rise once again in support of the pending amendment, which declares that the Federal courts must remain open to citizens who wish to litigate their constitutional rights.

I also rise to express my fierce opposition to the underlying Helms amendment.

Mr. President, I guess that labeling these days is a fact of life in our society. Particularly for those of us in public life labeling is something we have to learn to live with.

However, I continue to be distressed that the underlying Helms amendment and the debate here in the Chamber continue to be labeled as a school prayer amendment and a school prayer debate.

The underlying Helms amendment does not alter the Supreme Court's school prayer decisions. It simply prevents the Supreme Court from hearing future school prayer cases. This is a court stripping, not a school prayer amendment.

Mr. President, if the Senate, for example, were considering legislation that prevented the Supreme Court from hearing taxation cases, would that be considered tax reform? Absolutely not. That would be court stripping.

If the Senate were considering legislation that prevented the Supreme Court from hearing cases involving the right to bear arms, would that be considered gun control legislation? Again, no. That would be court stripping.

Mr. President, in the same vein, we do not have the school prayer legislation before us today. We have court stripping.

Mr. President, I believe that what is being missed by many who are involved or are observing the debate is that the Senate is being asked to totally alter the rules by which we have protected constitutional rights in this country for 200 years.

Today constitutional rights are protected by the Supreme Court, and if Congress or the people want to alter a constitutional right or the Court's interpretation of such rights, that alteration requires approval by two-thirds of the Congress and three-quarters of the States.

However, the proposal before us would permit Congress by a simple majority vote to dilute or entirely remove constitutional protections.

If this Helms revision, this provision, is passed by Congress and upheld as constitutional, each of our constitutional rights will be hanging on the slenderest of threads—that is, on a mere majority acting according to the whims of the times.

If freedom of the press is no longer the order of the day, let us pass a statute and get the President to sign it. That is all it would take, and the Supreme Court could no longer enforce the constitutional guarantee of freedom of the press.

If freedom of religion is no longer the order of the day, let us pass a statute and get the President to sign it. That is all that would take, and the Supreme Court would no longer enforce any constitutional guarantee of freedom of religion.

If the Government decides that citizens can now have the privacy of their homes invaded by Government officials operating without a warrant, let us pass a statute and get the President to sign it. That is all it would take, and the Supreme Court could no longer enforce the constitutional protection against unwarranted searches and seizures.

The pattern is clear. What is being proposed here is a fundamental change in the rules by which constitutional protections are guaranteed. What is more, this can happen here on the floor of the Senate by a simple majority vote. That is all it takes.

If the proponents of these measures want us to begin to dismantle the Constitution by simple majority vote, then let them put together a national consensus of two-thirds of the Congress and three-quarters of the States to permanently alter the rules by which constitutional protections are guaranteed. Let them propose a constitutional amendment, but let us not permit them to make the kind of fundamental change in our form of government by a simple majority vote that is being offered here as "school prayer legislation."

Mr. President, it is important to remind this body that President Reagan and his Attorney General understand the necessity for responding to constitutional decisions of the Court by constitutional amendment. This adminstration has proposed a constitutional amendment involving school prayer, and the President has reiterated his support for that proposal. He did so just yesterday. That pro-

posal is pending before the Senate Judiciary Committee. A third day of hearings on that proposal was held yesterday afternoon.

I might add, Mr. President, that the Attorney General has stated often that he is not in favor of this approach pending today, the statutory approach, because, as the country's highest legal officer, he knows that the way to change Supreme Court decisions, the way to change fundamental constitutional rights, is by proposing and enacting constitutional amendments. It is not by prohibiting Supreme Court jurisdiction over review of such rights.

The Attorney General by letter and in various forms has indicated that the administration advocates the constitutional rather than the statutory approach, I believe the administration takes such a position because it knows full well that to set the precedent of prohibiting Supreme Court review of Federal constitutional issues will begin a process of undermining the Constitution and thereby will undermine our form of government as we know it, in such a way that American citizens will no longer have Federal constitutional guarantees.

I do not wish to discuss the merits of the school prayer issue today. This is another matter, but I do know the constitutional amendment process is the correct way of resolving the school prayer issue, and I commend the administration for advocating that process because it is the process that our framers provided for. It is the right process; it is the process by which we would continue to have strong constitutional guarantees.

I believe the Attorney General's assessment of the serious dangers of the court-stripping proposal pending before us is what led to the administration's decision to support a constitutional amendment—not only the amendment itself, but the whole process as well. I think it is important to review that analysis, and I now wish to read it for the benefit of my colleagues.

Before I read that analysis contained in the letter from the Attorney General, I would like to point out that today, September 17, is the 195th anniversary of the signing of the Constitution. Just think of that, 195 years ago today on September 17, 1787, our Constitution was signed, and I think it is particularly appropriate and particularly fitting for us here today to stand up on that anniversary, the 195th anniversary, in defense of and in support of our Constitution because it has served us so well.

For nearly 200 years our Constitution has withstood assaults of various kinds, of various forms, and I think, Mr. President, that we again should stand up today on the 195th anniversary to protect our Constitution.

I now have before me, Mr. President, a letter from the Attorney General of the United States, Attorney General William French Smith. This letter is to the chairman of the Senate Judiciary Committee, the Honorable STROM THURMOND, Senator from South Carolina. This letter concerns the court-stripping proposal before us and, in particular, school prayer. This letter is dated May 6 of this year:

DEAR MR. CHAIRMAN: This letter is written to you as Chairman of the Committee on the Judiciary. It is written in response to a number of earlier inquiries from members of your Committee concerning S. 1742, a proposal which would withdraw jurisdiction from the Supreme Court to consider "any case arising out of any State statute, ordinance, rule, (or) regulation . . . which relates to voluntary prayers in public schools and public buildings." A second provision of the bill would withdraw the jurisdiction of the district courts over any case in which the Supreme Court has been deprived of jurisdiction. This bill raises fundamental and difficult questions regarding the role of the Supreme Court in our constitutional system, as well as the power of Congress to define and circumscribe that role. The issues involved have been the subject of intense scholarly debate and prominent constitutional scholars have differed as to the extent of congressional power to limit Supreme Court jurisdiction.

This is perhaps to be expected since the question of congressional power over the appellate jurisdiction of the Supreme Court implicates in a basic way the relations between Congress and the Supreme Court, two co-equal branches of government. Relations between the different branches in our tripartite system are generally governed by the doctrine of separation of powers. Neither the Constitution nor the decisions of the Supreme Court have attempted to define the precise contours of this doctrine. As two astute students of our constitutional system have noted:

"The accommodations among the three branches of government are not automatic. They are undefined, and in the very nature of things could not have been defined, by the Constitution. To speak of *lines* of demarcation is to use an inapt figure. There are vast stretches of ambiguous territory." Frankfurter & Landis, *Power of Congress Over Procedure in Criminal Contempts in "Inferior" Federal Courts*, 37 Harv. L. Rev. 1010, 1016 (1924) (emphasis in original).

The doctrine of separation of powers touches fundamentally on how the Nation is governed, and, as the Supreme Court noted last term in a separation of powers case, "it is doubtless both futile and perhaps dangerous to find an epigrammatical explanation of how this country has been governed." *Dames & Moore* v. *Regan*, 101 S. Ct. 2972, 2977 (1981). In this area more than any other, we must heed Justice Holmes' wise admonition that "(t)he great ordinances of the Constitution do not establish and divide fields of black and white." *Springer* v. *Philippine Islands*, 277 U.S. 189, 209 (1928) (dissenting opinion).

There is no doubt that Congress possesses some power to regulate the appellate jurisdiction of the Supreme Court. The language of the Constitution authorizes Supreme Court appellate jurisdiction over enumerated types of cases "with such Exceptions, and under such Regulations as the Congress shall make." The Supreme Court has upheld the congressional exercise of power under this clause, even beyond widely accepted "housekeeping" matters such as time limits on the filing of appeals and minimum jurisdictional amounts in controversy. See *Ex parte McCardle*, 74 U.S. (7 Wall.) 506 (1869).

Congress may not, however, consistent with the Constitution, make "exceptions" to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.

Think of that, Mr. President. That is a statement of Attorney General William French Smith in a letter, dated May 6, 1982, to the chairman of the Judiciary Committee. Let me repeat that paragraph from Attorney General William French Smith:

Congress may not, however, consistent with the Constitution, make "exceptions" to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.

Continuing in that letter, the Attorney General goes on to say:

In determining whether a given exception would intrude upon the core functions of the Supreme Court, it is necessary to consider a number of factors, such as whether the exception covers constitutional or non-constitutional questions, the extent to which the subject is one which by its nature requires uniformity or permits diversity among the different states and different parts of the country, the extent to which Supreme Court review is necessary to ensure the supremacy of federal law, and whether other forums or remedies have been left in place so that the intrusion can properly be characterized as an exception.

Concluding that Congress may not intrude upon the core functions of the Supreme Court is not to suggest that the Supreme Court and the inferior federal courts have not occasionally exceeded the properly restrained judicial role envisaged by the Framers of the Constitution. Nor does such a conclusion imply an endorsement of the soundness of some of the judicial decisions which have given rise to various of the legislative proposals now before Congress. The Department of Justice will continue, through its litigating efforts, to urge the courts not to intrude into areas that properly belong to the State legislatures and to Congress. The remedy for judicial overreaching, however, is not to restrict the Supreme Court's jurisdiction over those cases which are central to the core functions of the Court in our system of government.

To repeat:

The remedy for judicial overreaching, however, is not to restrict the Supreme Court's jurisdiction over those cases which are central to the core functions of the Court in our system of Government. This remedy would in many ways create problems equally or more severe than those which the measure seeks to rectify.

Those are the words of our Attorney General, William French Smith:

With respect to other pending legislation, the Department of Justice has concluded that Congress may, within constraints imposed by provisions of the Constitution

other than Article III, limit the jurisdiction or remedial authority of the inferior federal courts. See letter from the Attorney General to Chairman Rodino concerning S. 951. The question of congressional power over lower federal courts is quite different from the question of congressional power over Supreme Court jurisdiction, and the two issues should not be confused.

The letter now goes into various sections. I shall now begin the first section, roman numeral I.

I.

Proponents of Congressional constitutional authority to limit the Supreme Court's entire appellate jurisdiction have contended that such authority exists under the "Exceptions Clause" of Article III of the Constitution. Article III provides, in pertinent part:

Section 1

The judicial power of the United States, shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish . . .

Section 2

The judicial power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all cases of admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—between Citizens of different States;—between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be a Party, the Supreme Court shall have original jurisdiction. In all the other Cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to Law and Fact, *with such Exceptions, and under such Regulations as the Congress shall make.* (Emphasis Added.)

The language of the Exceptions Clause, underscored above, does not support the conclusion that Congress possesses plenary authority to remove the Supreme Court's appellate jurisdiction over all cases within that jurisdiction. The concept of an "exception" was understood by the Framers, as it is defined today, as meaning an exclusion from a general rule or law. An "exception" cannot, as a matter of plain language, be read so broadly as to swallow the general rule in terms of which it is defined.

The Constitution, unlike a statute, is not drafted with specific situations in mind. Designed as the fundamental charter of our political system, its most important provisions are phrased in broad and general terms. As eloquently expressed by Justice Holmes in *Missouri v. Holland,* 252 U.S. 416, 433 (1920):

"(W)hen we are dealing with words that also are a constituent act, like the Constitution of the United States, we must realize that they have called into life a being a development of which could not have been foreseen completely by the most gifted of begetters. It was enough for them to realize or to hope that they had created an organism; it has taken a century and has cost their successors much sweat and blood to prove that they created a nation. The case before us must be considered in light or our whole experience and not merely in that of what was said a hundred years ago."

For example, a literal interpretation of Article III as a whole would seem to mandate that Congress vest the full judicial power of the United States either in the Supreme Court or in an inferior federal court. Under such an interpretation, Congress could make "exceptions" to the Supreme Court's appellate jurisdiction only if it vested the jurisdiction at issue either in an interior federal court or in the Supreme Court's original jurisdiction. This interpretation, which would require the conclusion that any measure which entirely ousted the federal courts from exercising any portion of the judicial power of the United States and vested that authority in state courts would be unconstitutional, is rejected by all authorities today.

The Constitution contains a number of other pronouncements which, although seemingly unambiguous and absolute, have necessarily been interpreted as limited in their applicability. See e.g., *Home Building & Loan Ass'n.* v. *Blaisdell,* 290 U.S. 398 (1934) (Contract Clause); *Everson* v. *Board of Education,* 330 U.S. 1 (1947) (Establishment Clause); *Reynolds* v. *United States,* 98 U.S. 145 (1878) (Free Exercise Clause); *Brandenburg* v. *Ohio,* 395 U.S. 444 (1969) (per curiam) (Free Speech Clause). The Supreme Court has also recognized that even when a statute is otherwise within a power granted to Congress by the Constitution, extrinsic limitations on congressional power contained in the Bill of Rights or elsewhere may nevertheless render the statute unconstitutional. See. e.g., *National League of Cities* v. *Usery,* 426 U.S. 833 (1976) (limitations on Commerce Clause); *McCulloch* v. *Maryland,* 17 U.S. (4 Wheat.) 316, 421 (1819) (limitations on Necessary and Proper Clause).

In light of these principles of constitutional interpretation, the Exceptions Clause may not be analyzed in a vacuum, but must be understood in terms of Article III as a whole, as evidenced by the history of its framing and ratification, its place in the system of separation of powers embodied in the structure of the Constitution, and its consistency with external limitations on congressional power implicit in the Constitution and contained in The Bill of Rights. The construction of the Exceptions Clause that is most consistent both with the plain language of the Clause and with other evidence of its meaning is that Congress can limit the Supreme Court's appellate jurisdiction only up to the point where it impairs the Court's core functions in the constitutional scheme.

The events at the Constitutional Convention support a construction of the Exceptions Clause that would preclude Congress from interpreting with the Supreme Court's core functions. The framers agreed without dissent on the necessity of a Supreme Court to secure national rights and the uniformity of judgments. The resolves which were agreed to by the Convention and given to the Committee of Detail provided, simply, that "the jurisdiction (of the Supreme Court) shall extend to all cases arising under the Natl. Laws: And to such other questions as may involve the Natl. peace & harmony." No mention was made of any congressional power to make exceptions to the Court's jurisdiction. The Committee of Detail, charged with drafting a provision to implement these Resolves, proposed the language of the Exceptions Clause. It seems unlikely that the Committee of Detail could have deviated so dramatically from the Convention's Resolves as to have given Congress the authority to interfere with the Supreme Court's core functions without considerably more attention to the subject at the Convention.

This inference is strengthened by the events surrounding the adoption of the Judicial Article by the full Convention. In determining the scope of the Court's jurisdiction, the Convention agreed to provisions expressly confirming that the jurisdiction included cases arising under the Constitution and treaties; but it rejected, by a 6-2 vote, a resolution providing that, except in the narrow class of cases under the Court's original jurisdiction, "the judicial power shall be exercised in such manner as the legislature shall direct."

To repeat, the committee rejected, by a 6-to-2 vote, a resolution providing that, except in a narrow class of cases under the court's original jurisdiction, "the judicial power shall be exercised in such manner as the legislature shall direct."

That resolution, rejected by a 6-to-2 vote, is what the proponents of the underlying amendment want, in effect—that the judicial power shall be exercised in such manner as the legislature shall direct.

To adopt such a measure here today would mean that Congress, willy-nilly, according to its discretion and in the manner it provides, would limit the Supreme Court's jurisdiction, effectively nullifying the Supreme Court of the United States and thereby also effectively nullifying one of the three coequal branches of Government.

To continue with the letter, Mr. President, from Attorney General William French Smith in opposition to the statutory approach of limiting the Supreme Court jurisdiction:

The Convention thus rejected a clear statement of plenary congressional power over the Court's appellate jurisdiction. Nevertheless, on the same day—without any recorded debate or explanation—the Framers adopted the Exceptions and Regulations language now contained in Article III. In light of the value placed on the Supreme Court's appellate jurisdiction, as evidenced by other actions of the Convention, it seems highly unlikely that the Framers would have agreed, without the slightest hint of controversy, to a provision that would authorize Congress to interfere with the Court's core constitutional functions.

There are additional reasons why the lack of controversy surrounding the adoption of the Exceptions Clause supports the inference that no power to intrude on the Court's core functions was intended. First, the historical materials show the great importance which the Framers attached to these functions. They envisaged that the Supreme Court was a necessary part of the constitutional scheme and believed that the Court would review state and federal laws for consistency with the Constitution. These sentiments were echoed by the authors of the *Federalist Papers,* a work which is justly regarded as an important guide to the meaning of the Constitution. In light of this explicit recognition by the Founding Fathers of the Court's vital role in the con-

stitutional scheme, it seems unlikely that they would have adopted, without controversy, a provision which would effectively authorize Congress to eliminate the Court's core functions.

A second reason for inferring a more limited construction of the Exceptions Clause from the lack of discussion at the Convention concerns the compromise agreed to by the Framers regarding the establishment of inferior federal courts. While the necessity of a Supreme Court was accepted without significant dissent among the Framers, there was vigorous disagreement over whether inferior federal courts should be provided. The Convention first approved a provision calling for mandatory inferior federal courts, then struck this provision by a divided vote, and finally determined to leave to Congress the question whether to establish inferior federal courts. The Supreme Court was viewed as a necessary part of the constitutional structure and was established by the Constitution itself; Congress was given no control over whether the Court would be created. The inferior federal courts, however, were viewed as an optional part of the Government and were authorized but not estabished by the Constitution.

The decision whether to create them was given to Congress. This distinction, and the role explicitly assigned to Congress with respect to the inferior federal courts implies that the powers of Congress were to be quite different with respect to the Supreme Court and the inferior federal courts.

If the Exceptions Clause authorized Congress to eliminate the Supreme Court's appellate jurisdiction, thus limiting it to the exercise of original jurisdiction, the power Congress over the Supreme Court would be virtually indistinguishable from its power over inferior federal courts. Just as Congress could decline to create inferior federal courts it could, in the guise of creating "exceptions" to the Supreme Court's appellate jurisdiction, deny the Supreme Court the vast majority of the judicial powers which the Framers insisted "shall be vested" in the federal judiciary. Congress could not eliminate Supreme Court, but it could reduce it to a position of virtual impotence with only its limited original jurisdiction remaining. Such an interpretation cannot be squared with the stark difference in treatment which the Framers accorded to the Supreme Court and the inferior federal courts. Given the intensity of the debate regarding inferior federal courts, and the compromise arrived at by the Framers, it seems highly unlikely that the Convention would have adopted without comment a provision which, for most practical purposes, would place the Supreme Court and the inferior federal courts in the same poition vis-a-vis Congress.

A third reason to infer a limited construction of the Exceptions Clause from the lack of debate accompanying its adoption is found in the theory of separation of powers which formed the conceptual foundation for the system of government adopted by the Convention. The Framers intended that each of the three branches of Government would operate largely independently of the others and would check and balance the other branches. The purpose of this approach was to insure that governmental power did not become concentrated in the hands of any one individual or group, and thereby to avoid the danger of tyranny which the Framers believed inevitably accompanied unchecked governmental power.

I might add, Mr. President, parenthetically, that our framers had much experience with respect to unchecked tyrannical governmental power.

Continuing with the letter from the Attorney General to the chairman of the Committee of the Judiciary:

Indeed, it is not an exaggeration to say that the single greatest fear of the Founding Fathers was tyranny, and that concentration of power was, in their minds, "the very definition of tyranny."

Essential to the principle of separation of powers was the proposition that no one branch of government should have the power to eliminate the fundamental constitutional role of either of the other branches. As Madison stated in Federalist No. 151:

(T)he great security against a gradual concentration of the several powers in the same department consists in giving to those who administer each department the necessary consitutional means and personal motives to resist encroachments of the others. The provision for defense must in this, as in all other cases, be made commensurate to the danger of attack.

This basic principle of the Constitution—that each branch must be given the necessary means to defend itself against the encroachments of the two other branches—has special relevance in the context of legislative attempts to restrict judicial authority. The Framers "applaud(ed) the wisdom of those states who have committed the judicial power, in the last resort, not to a part of the legislature, but to distinct and independent bodies of men." Federalist No. 81 (Hamilton). They believed that, by the inherent nature of their power, the legislature would tend to be the strongest and the judiciary the weakest of the Branches.

This insight is reflected in the very structure of the Constitution: the provisions governing the legislature are placed first, in Article I; those establishing and governing the Judicial Branch are in the third position, in Article III. Madision recognized the great inherent power of the Legislative Branch in Federalist No. 48. Drawing extensively from Jefferson's Notes on the State of Virginia, Madison concluded that in a representative republic "(T)he legislative department is everwhere extending the sphere of its activity and drawing all power into its impetuous vortex." See also Federalist No. 51 (Madison).

It was in no sense a derogation on the concept of governance responsive to popular will that the Founding Fathers desired checks on the power of the Legislature they were creating. The Acts of Parliament as well as those of the King formed the litany of grievances which produced the Revolution. The Founding Fathers believed in the voice of the people and their elected representatives and placed substantial power in the Legislature. At the same time, however, they were acutely sensitive to the rights of individuals and minorities. Most of them had first-hand experience with persecution. The idea of a written Constitution was precisely to place a check on the popular will and, in large part, to restrain the most powerful branch. They crafted a representative republic with restraints on the legislature. "(A)n elective *depotism* was not the government we fought for. . . ." *Federalist* No. 48 (Madison), quoting Jefferson's *Notes on the State of Virginia* (emphasis in original).

The Supreme Court was viewed as a part of this restraint, but, nonetheless, inherently as the last dangerous branch. Hamilton, in a famous passage from Federalist No. 87, eloquently testified to the inherent weakness of the Judicial Branch:

Whoever attentively considers the different departments of power must perceive that, in a government in which they are separated from each other, the judiciary, from the nature of its functions, will always be the least dangerous to the political rights of the Constitution; because it will be least in a capacity to annoy or injure them. The executive not only dispenses the honors but holds the sword of the community. The legislature not only commands the purse but prescribes the rules by which the duties and rights of every citizen are to be regulated. The judiciary, on the contrary, has no influence over either the sword or the purse; no direction either of the strength or of the wealth of the society, and can take no active resolution whatever. If may truly be said to have neither FORCE nor WILL but merely judgment; and must ultimately depend upon the aid of the executive arm even for the efficacy of its judgments. As a consequence of this view, Hamilton believed that it was necessary for the judiciary to remain "truly distinct from the Legislature and the Executive. For I agree that 'there is no liberty, if the power of judging be not separated from the Legislative and executive power'." Id., quoting Montesquieu's Spirit of Laws. Thus, he concluded: "The complete independence of the courts of justice is peculiarly essential in a limited Constitution."

Mr. President, I now ask unanimous consent that I might yield to the Senator from Vermont without losing my right to the floor, and that upon being rerecognized a continuation of my speech not be counted as a second speech under rule XIX, and that I be allowed to leave the Chamber while I have so yielded.

I also ask unanimous consent that the Senator from Vermont be permitted to yield the floor under the same circumstances.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. I thank the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. I thank the Chair and the distinguished Senator, my friend from Montana, for yielding under these curcumstances.

Mr. President, I stand here 195 years after the Constitution was signed. However necessary it may be, it is always a little sad when the Members of this body are compelled to rise to defend the most obvious, most fundamental features of our constitutional system of Government, and the present rider to the debt ceiling on school prayer should bring true sadness to anyone who sees the strength of the Constitution arising from the way it disperses power among the branches of Government and the zeal with which it protects individual liberties. The debate over the school prayer rider is not only a debate over religion. We are also debating the temptation of one branch of Govern-

ment to subdue another branch by relieving it of its authority.

Ironically enough, Mr. President, the most conservative of the Members of this body should be the ones in the forefront seeking the rejection of this rider, because this is nothing more than a device for stripping the courts of their authority. It is nothing less than a wholesale rejection of what the framers of the Constitution intended 195 years ago.

The ongoing debate over limiting Federal court jurisdiction to make changes in the nature and quality of rights declared by the Supreme Court under the Constitution is not new. It seems that every generation is bound to test the strength and the limits of the principles of an independent judiciary and the separation of powers. I compare the current assault on Federal court jurisdiction to attacks through our history on the first amendment. It is by now a truism that the first amendment is most ardently embraced when there is relatively little dissent in the society and most challenged when unpopular views seem to disturb the placid consensus.

Much the same can be said of our courts, the branch of government devoted to interpreting our Constitution and laws, free of the pressures of the passing majority. A healthy and independent judiciary is never more necessary than at a time when there is impatience and discontent with the way the Supreme Court chooses to interpret the Constitution.

In addition to the present school prayer rider to the debt ceiling bill, there are numerous other bills before the Senate that seek to limit or eliminate the jurisdiction of the Federal courts on issues like abortion, school prayer, and busing. On some of the issues a majority of this body will agree with the underlying social goals of particular bills. This Senate was willing to adopt a measure that would limit the jurisdiction of both the lower Federal courts and the Supreme Court in order to limit busing. But much more than busing, school prayer, and abortion are at stake, and much more than court jurisdiction will be limited if we let expediency become the engine of change.

In all of these examples, the right involved is a right declared and protected by the courts. The impatience and outrage of some Americans is directed to the fact that the courts move more slowly than legislative bodies, and a change in the law is brought about not in response to a public outcry for change but as a byproduct of a legal dispute arising under our laws—that is, a case or controversy.

In normal times we all perceive a great personal stake in the independence of the courts. No one can safely predict whose rights will depend on that independence in the future.

Mr. President, I say to all my colleagues, all 99 of them, can any one of us say at what time it might be our individual rights that are protected by the independence of these courts? Is there any one of us who is willing to strip the courts of that independence and tell our constituents in each of the 50 States that someday their rights may be lost because we, in a moment of passing fancy, stripped the courts of the independence they need to protect the rights not just of the 100 men and women who serve in this body but of the 220 million Americans we represent?

How many of us can vote for this knowing that someday we may have to answer honestly what we did; that someday we may have to go beyond the direct mail appeals for funds that may go out from some who support this amendment and answer honestly about what these court-stripping measures do; that would require each one of us to go back to our 50 States and stand before our constituents and say, "I voted to give away some of your rights; I voted to give away rights that you have had for 195 years; I gave away your right to independent and free courts; I gave away your right for one last chance. I gave it away in a moment of political passion on a vote"?

Mr. President, I cannot do that. I cannot vote that way, and I hope that my colleagues will not.

We favor a strong judiciary, under law, rather than a judiciary that bends first in one popular direction, then in another. But to make this system work, no one has the right to look to the courts for a quick fix. No one has a stake in courts that can be easily persuaded to follow the howls rather than the law.

The amendment before us would seek to use the exceptions clause in article III, section 2, clause 2 of the Constitution to justify eliminating Supreme Court appellate jurisdiction in cases reviewing State enactments on school prayer. Article III gives the court appellate jurisdiction "with such exceptions, and under such regulations as the Congress shall make." Cases from the Court itself and nearly two centuries of legal scholarship have not defined the limits of this congressional power. And I doubt that it is within the realm of likelihood that the scope of the power is about to become the subject of complete agreement among the branches of Government or among legal scholars. I believe that every one of us has a duty to read the Constitution as a living document and to pass on matters before us as if the responsibility for the perpetuation of its genius fell to each one of us, because, quite frankly, it does.

David R. Brink, former president of the American Bar Association, made this point very well in a statement that Senator BAUCUS presented to this body in observance of Law Day last spring. Mr. Brink said, as Senator BAUCUS quoted:

> Sometimes in the press of current problems we forget the origin of our system of government and the source of our liberties. We must never forget the well-springs of our heritage and our progress. But the Constitution is not self-executing. To make its grand policies a reality, it needs interpretation and enforcement by the courts and wise implementation and extension by the legislative and executive branches. It needs the coordinated work of all three branches of government.

In order to conclude that article III of the Constitution permits the Congress in the guise of carving exceptions, to carve up the Supreme Court itself, much of the rest of the Constitution has to be ignored.

Article V of the Constitution lays down very explicit rules for the amendment process. The process is long and arduous, and the Consititution has been amended very few times as a result. It is difficult to believe that the authors of the Constitution, as politically astute a group of people as one might imagine, would have framed a careful mechanism for amendment and then would have permitted a simple statute to work as an amendment by eliminating review of that statute by the Supreme Court. Prof. Leonard Ratner of the University of Southern California Law School argues in a compelling manner that the Constitutional Convention considered and rejected alternative language to the exceptions clause which would have read:

> In all the other cases before mentioned the judicial power shall be exercised in such manner as the legislature shall direct.

Professor Ratner concluded that:

> (H)ad the Convention desired to give Congress (plenary control over Supreme Court appellate jurisdiction), the reasonable course would have been to adopt the unequivocal language of the amendment in place of the more ambiguous phrasing of the Committee's draft. The defeat of the amendment thus may reasonably be construed as a rejection by the Convention of plenary congressional control over the appellate jurisdiction of the Court and as indicating that the purpose of the clause was to authorize exceptions and regulations by Congress not incompatible with the essential constitutional functions of the Court.

I do not accept the proposition that if Congress creates lower Federal courts, it must endow them with unlimited authority to vindicate every federally created right. There have been limitations on Federal court jurisdiction such as increases in the jurisdictional amount, changes in the nature of diversity and removal jurisdiction, and a few—very few—instances where Congress has limited Federal court jurisdiction altogether, such as the Norris LaGuardia Act and the Tax Injunction Act of 1937.

But not even the few instances where Congress limited the jurisdiction of the Federal courts in specific subject areas did Congress ever go so far as to remove from the total protection of the Federal courts rights guaranteed under the Constitution. Through this lengthy and sometimes tumultuous history of Congress, many bills have been introduced to do just that, and none has ever passed. Through that long history the power of Congress to establish lower Federal courts and to make exceptions to the appellate jurisdiction of the Supreme Court has been exercised to adjust the scope and authority of the judiciary to better serve the needs of the litigants, to promote efficiency, to maintain a healthy balance between the State and Federal systems.

But there should be a clear distinction in the minds of every Senator between legislation to improve the courts and legislation to use the courts to accelerate changes in substantive constitutional law. The thrust of the court-stripping bills now before the Senate is to short circuit the normal processes for amending the Constitution, which are difficult and time consuming. But they are difficult and time consuming for a reason. The Constitution should reflect the wise resolve of the people, tested over time.

In the Constitution Subcommittee hearings on court jurisdiction conducted in May and June 1981, we observed the Nation's finest legal scholars in a sincere and technically complex discussion of the constitutionality of various proposals to limit lower and appellate Federal court jurisdiction on an issue-by-issue basis. It is hard to predict the outcome of that same debate in the courts, simply because there is a scarcity of precedents truly on point. The scarcity, however, results from the devotion of past Congresses to the principle of shared powers and an unwillingness to buy fast changes in law at a steep constitutional price.

Among the eminent law professors who appeared before the Constitution Subcommittee some believed that there were few limitations imposed by the Constitution on Congress under article III and that an underlying purpose of Congress to extinguish particular rights did not, in general, signal a violation of the Constitution. But it is interesting that most of the scholars who read article III broadly—and that includes all of those who appeared before the committee besides two committed supporters of S. 158, the Human Life Statute, also believe that it would be a tradegy for Congress to forgo the self-restraint that has united each generation with the next.

One witness, Prof. Martin Redish of Northwestern University Law School, believed that Congress has a broad authority under article III and that the court-stripping bills may be constitutional. But he ended his visit with us on a very different note:

> In past years, previous Congresses were also disturbed with many substantive decisions of the Supreme Court. They, too, considered legislation to curb that Court's jurisdiction. But, with rare exception, those Congresses declined to take such drastic action. I strongly urge you to exercise similar restraint, both for the good of the nation and for the rule of law.

The hearings and the opinions can only help us to decide if we have the authority to act. We must answer the question of whether we ought to act. It is that issue which must concern us all. The current debate on stripping the Federal court jurisdiction gives us an interesting look at how the judicial branch can be both underestimated and overestimated in the loose talk of politics. The court's power and responsibility are overestimated when the court is made the repository of our unsolved social agenda. The courts did not create the deep division in this country over issues like abortion and school busing. The courts did not create the environmental and poverty problems that have resulted in statutes which institutionalize difficult and complex judicial decisions interpreting these laws. The courts did not create racial discrimination and did not set into motion the two-century old conflict between the Federal Government and the States, two other problems that have spawned controversial litigation. Mr. Brink of the ABA put it well in his Law Day statement:

> It must be remembered, first, that, unlike the executive and the legislative, the courts do not initiate policy on their own motion; they simply decide actual cases between opposing parties that have not been resolved by the other branches. What has happened, I think, is that the executive and legislative branches have either failed to develop constitutional solutions to state or federal problems, have failed to enforce laws already on the books, or have left policies unclear so that they require court interpretation. In some instances they have dumped implementation of policies in controversial areas on the courts, which have to decide the cases and which have no means to defend themselves from the attacks by the public and but other branches of government that follow their decisions.

At the same time, the flexibility and resourcefulness of the institution of the Supreme Court have been underestimated. The Court is never locked into a mode of thought that ignores developments in the other branches and in the public generally. The growth of law is never static, but can always evolve if the stimulus to evolution is proper and change is needed in light of the historical development of our constitutional law. Professor Ratner in a recent law review article pointed out a number of ways in which the power of the courts in judicial review is overestimated. Criticism from elected officials, private citizens, and the media is not without weight. Congress can affect unpopular decisions with statutes where the Constitution is not contravened. The power to appoint judges has an immense role to play in the direction of future courts. Amendments and the threat of amendments to the Constitution have a part in shaping the norms that inevitably affect the courts.

If changes may be brought about through such means, it may be asked why many of us in the Senate express such intense interest in bills that simply bring about the same substantive changes, but through other means; namely, the limitation of court jurisdiction.

Nothing less than the rule of law is at stake. It may be shocking to think that not every syllable of every word necessary to protect the rights of citizens under the Constitution is located within the four corners of that document, that so much of the quality of constitutional government rests with the judgment of the fallible men and women who serve in Government.

Limiting the jurisdiction of the courts as a means of reversing particular decisions or limiting their effects is a grave and protential threat to our system of checks and balances.

The separation of powers has never been absolute in our system of government. The three branches overlap. The lines of authority are at times unclear.

Underlying the success of the system over nearly 200 years is a strong notion of comity and accommodation among the branches. The self-restraint exercised by each branch is strengthened by genuine concern about destroying that sense of comity, just as one is careful to nurture a faithful relationship with a good neighbor.

The 75th Congress was faced with a dilemma not unlike our own when it considered and rejected President Roosevelt's court-packing proposal. The Senate Judiciary Committee rose to the occasion, despite the great pressure to speed along legislation that was designed to ease the pains of the Great Depression. The words of that committee could be our own today:

> Let us, of the Seventy-fifth Congress, in words that will never be disregarded by any succeeding Congress, declare that we would rather have an independent court, a fearless court, a court that will dare to announce its honest opinions in what it believes to be the defense of liberties of the people, than a court that, out of fear or sense of obligation to the appointing power or factional passion, approves any measure we may enact. We are not the judges of the judges. We are not above the Constitution.

Mr. President, I said earlier that each one of us has a responsibility not only to our constituents but to every American. How many of us could vote

for these court-stripping bills and then go back and look our constituents in the eye and have to tell them, "We removed some of your freedom; we removed the freedoms that Americans have enjoyed for all these years; we cut back on your freedom"?

Mr. President, I am not going back to Vermont to say that. I will oppose every one of these court-stripping bills.

I applaud the distinguished Senator from Montana for the efforts that he has made and I applaud the rather lonely fights in this Chamber which he and the distinguished Senator from Connecticut (Mr. WEICKER), have conducted. It is in the finest tradition of the Senate, but even more so, it is in the finest tradition of protecting the freedoms our country has always treasured.

CLOTURE MOTION

(The following proceedings occurred during Mr. LEAHY's remarks and are printed at this point by unanimous consent:)

Mr. BAKER. Mr. President, I send a cloture motion to the desk and ask that it be reported.

The PRESIDING OFFICER (Mr. SYMMS). The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, James A. McClure, Roger W. Jepsen, Jake Garn, Howard Baker, John P. East, Steve Symms, Strom Thurmond, Charles E. Grassley, Don Nickles, Gordon Humphrey, William Armstrong, and Edward Zorinsky.

(NOTE.—The above cloture motion was subsequently withdrawn and a replacement therefor filed. See later proceedings in today's RECORD.)

Mr. BAKER. Mr. President, this is a cloture motion against further debate on the Helms prayer amendment which will occur on Tuesday, if cloture is not invoked on Monday. There will be a vote on Monday on a cloture motion filed yesterday.

I call the attention of Senators to the fact that there is no time agreement by unanimous consent for that vote, and the vote will occur 1 hour after we convene, to follow the establishment of a quorum, under the provisions of rule XXII.

ORDER FOR RECESS UNTIL 2 P.M. ON MONDAY NEXT

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 2 p.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR NUNN ON MONDAY NEXT

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order on Monday next, I ask unanimous consent that the distinguished Senator from Georgia (Mr. NUNN) be recognized on special order for not to exceed 15 minutes.

It is anticipated that after the execution of the special order, there may be a brief period for the transaction of routine morning business; but, in any event, it will not interfere with the establishment of a quorum under the provisions of rule XXII and the cloture vote to follow thereafter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. BAUCUS. Would it be in order for the Senator from Montana to request that the majority leader ask unanimous consent that when the Senate returns to the debt limit bill on Monday, after the cloture vote, the Senator from Montana be recognized?

Mr. BAKER. I am sure that will be all right, and I will be pleased to put such a request. Let me first do one check on our side as to a notation on our calendar, which I think is not a problem. But as soon as that is done, I will be happy to make that request.

Mr. BAUCUS. I thank the Senator.

(Conclusion of earlier proceedings.)

Mr. LEAHY. Mr. President, I ask unanimous consent that I be allowed to yield the floor at this point without this being construed as the end of a speech for the purposes of the two-speech rule and to yield back to the Senator from Montana under the unanimous-consent agreement, originally entered into.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I thank the Senator from Vermont from the bottom of my heart.

The Senator from Vermont in all the time I have known him—and it has been several years—has continually and consistently stood up for basic principles of our constitutional form of government, and he has consistently stood up for honesty and got what is right. Over the long haul he has been able, I think, more than most people I have ever known, to withstand temptations that sometimes occur in political life to immediately satisfy some short-term whim where over the longer haul to do so would be to jeopardize or undermine some longer goal or gain.

I very much thank the Senator from Vermont for his efforts in these regards.

Mr. President, in that same vein, the Senator from Vermont has touched on the difference between the temptation to vote for this underlying amendment because it is sometimes characterized as a "school prayer amendment," on the one hand, and, on the other hand, need to withstand that temptation and instead protect the Constitution.

Mr. President, I might ask those who were supporting this amendment, What is really more important? Is it more important to vote for a statute which at some level apparently but not in reality satisfies those who disagree with the Court's decision in school prayer; or is it more important—and I am not exaggerating this one bit—to vote against such a statute in order to protect the Constitution of the United States?

I suggest perhaps presumptuously that those who think they would be pleased with a favorable vote on this underlying statute would actually be very displeased and very unhappy with the consequences of the action taken—the jeopardizing of their own rights, as well as the rights of others, under the Constitution. That is the issue here today.

It is a matter of education. It is a matter of understanding. If Americans realize that the underlying Helms school prayer amendment, which is essentially a courtstripping amendment, in fact would not give what they think they are getting but rather would take away their constitutional rights, I doubt that they would ask their Senators and Representatives to vote for it.

That is the issue up here today.

Mr. President, I see the distinguished Senator from Connecticut in this Chamber.

I ask unanimous consent that I might yield to the Senator from Connecticut without losing my right to the floor and upon being rerecognized the continuation of my speech not be counted as a second speech under rule XIX and that I be allowed to leave the Chamber while I have so yielded and that the Senator from Connecticut be permitted the floor under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, before I completely yield, I again commend the Senator from Connecticut for his yeoman efforts here. He has been a stalwart in protecting the Constitution of the United States. I admire his efforts very much.

Mr. WEICKER. I thank my distinguished colleague and good friend, the Senator from Montana. He is out there in the forefront, at the constitutional wall, and were it not for his efforts a long time ago the result might be quite different than it is today, and the result today is that the Constitution is as good today as it was yesterday. How long that is going to last, I do not know. Everyone seems to be taking a pretty good run at it. There is only a handful out here who are protecting it. I would hope we would have even more of our colleagues stand up on these issues.

Let me say at the outset that I could not help but note that there was comment in the paper that possibly it might be that the record vote should be taken on the matter of school prayer so it could be used against those who are up for reelection in the sense that they are not for prayer and are somewhat lacking in their enthusiasm for religion.

I use this occasion to point out it really should not have anything to do with the argument, that men who are standing up here and arguing on behalf of the Constitution, more particularly the first amendment, who are arguing against the establishment of any religion are not an irreligious group. Indeed, there are many of us who are of very deep faith. But it is that very fact, the fact that we believe in all prayer and all faith, we do not want a state prayer and we do not want a state religion.

That is what is at issue, pure and simple. It has nothing to do with being religious. It has nothing to do with belief in prayer.

I would hope that everyone prays mightily. I hope everyone prays his particular faith with overwhelming enthusiasm daily.

But all this to be done and can be done only in a free society. As soon as the society dictates as to what is going to happen in religious terms or more specifically the words that apply to that religion, then our freedom is whittled just that much and is something a good deal less than it is at present.

Mr. President, today is the 195th anniversary of the signing of the Constitution of the United States of America at the Constitutional Convention of September 17, 1787. So it has been about 200 years probably since as much attention has been paid to that document as is the case right now, as we have a flood of amendments seeking to alter or end-run it.

We are right now debating an amendment to the debt limit bill. An amendment, as I understand it, falls in the category of legislation. If the amendment is adopted, such adoption is concurred in by the House of Representatives, and signed by the President, it then becomes law.

The first amendment to the Constitution of the United States is as follows:

> Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

Without even getting into the substance, we are in violation of the Constitution. Nobody is going to deny that this certainly has to do with religion. It does not have anything to do with the economy; it does not have anything to do with housing; it does not have anything to do with the labor unions; it does not have anything to do with minorities; it does not have anything to do with railroads. It has to do with religion.

Do we have a copy of the amendment here on the desk? Let us just see what we are talking about. Here is the amendment:

> Notwithstanding the provisions of sections 1253, 1254, and 1257 of this chapter, the Supreme Court shall not have jurisdiction to review, by appeal, writ of certiorari, or otherwise, any case arising out of any State statute, ordinance, rule, regulation, or any part thereof, or arising out of any act interpreting, applying, or enforcing a State statute, ordinance, rule, or regulation, which relates to voluntary prayers in public schools and public buildings.

The Senator from Montana has eloquently argued the constitutional principle involved in stripping the Supreme Court of its jurisdiction. I will leave those arguments to him because he does it very well. But is there anybody who is going to argue that this amendment deals with religion? Yet the Constitution of the United States is very precise on the point:

> Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof.

I would ask the question next, what salutary result is going to stem from all this official prayer, this state prayer, this state intrusion into religion? What is going to happen? Is the interest rate going to go down 5 or 6 points? Right now small businesses are going belly-up about 600 a week; is that going to stop? Are the conflicts in the Middle East, in Northern Ireland, throughout this world, Central America, and so forth, going to cease?

Is the fact that only 3 percent of this country can buy homes right now going to stop? What is it? The problem is, in this debate, that I have yet to hear why anybody wants this amendment, and probably in the explanations you will find the best reason for its defeat.

There is nothing wrong with the Constitution of the United States. There is a lot wrong with the economy, a lot wrong with unemployment, a lot wrong with housing, a lot wrong with the world, but there is nothing wrong with the Constitution. There is nothing wrong with my religion, nothing wrong with somebody else's. I do not even know what the religion is. If there was anything wrong about it I would not know about it.

Religions—you know, they belong in another category. I do not see what we are trying to do out here when we cannot even take care of the United States in terms of its secular problems and its secular needs. All of a sudden now we have become great theologians. We cannot even be great politicians. I do not think we are needed in terms of what resides in the human spirit, in terms of that which is in each of us and in what we believe, to whom we look as being our superior and our supreme being. I do not need to help anybody on that score.

Believe me when I say it that even there I have got all I can do to handle myself, and in that regard I am probably very inadequate in the expression of my faith. So why am I going to go around and start urging somebody else as to what he should or should not do?

Then I always appreciate the fact that, "Well, believe me this will be innocuous, it won't offend anybody, this prayer." Well, if I were a minister or priest or rabbi or however the shepherd of the flock is termed in whatever the faith happens to be, I think the last thing I would accede to would be to something that would be innocuous. At least, as I understand religion, it is not supposed to be innocuous. It is supposed to stand for something. Indeed even to a far greater extent in the ecclesiastical sense than that which mankind professes in a secular sense, it is supposed to be the ideal, the zenith of excellence, the epitome of courage. All of these things, as I understand it, apply to any faith regardless of what the specific belief.

But what we are going to have is an innocuous state prayer. It seems to me that is not only an insult to the Constitution but an insult to religion.

Mr. President, I ask unanimous consent that I be allowed to yield the floor to the distinguished Senator from Maryland (Mr. MATHIAS) at this point without its being construed as the end of a speech for the purposes of the two-speech rule, and I ask that upon the conclusion of his remarks that I then be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, before the Senator from Maryland speaks, I just want to express my great admiration for all he has stood for over the years as being a man of great courage, great perception, and certainly one of those who has proven in a lifetime's work of his adherence to and his advocacy of the Constitution of this Nation.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator from Maryland.

Mr. MATHIAS. Madam President, I want to thank the Senator from Con-

necticut for yielding to me, and to thank him for his generous words. He has undertaken an important battle and I hope Senators will rally to his cause and that citizens will rally to his cause because it is important. I join with him in opposition to the amendment offered by the Senator from North Carolina (Mr. HELMS) which, in my view, would deprive the Supreme Court and all Federal courts of jurisdiction to consider voluntary school prayer cases.

Today's debate is the latest step in a determined and sustained effort in the 97th Congress to restrict the remedial powers or the jurisdiction of Federal courts.

Never before in my 20 years in Congress have I witnessed such a concerted assault on the Federal judiciary as has been mounted in the 97th Congress. In fact, Senator HELMS' amendment is just one of more than 30 such proposals that are before us. And, on March 2 of this year, one of these legislative proposals was actually passed by the Senate. At that time the Senate adopted the most extensive restrictions on the power of Federal judges to issue remedial busing orders ever passed by either House of Congress.

I have opposed such jurisdictional and remedial limitations in the past; I will continue to do so today and I will continue to do so in the future. They are, in my opinion, contrary to the letter and to the spirit of the Constitution and, beyond that, they are unwise as a matter of public policy.

This is certainly not the first time court curbing has been a hot topic in America. In fact, it goes back to at least 1793, when the U.S. Supreme Court ruled that States could be sued in Federal court in the case of Chisholm against Georgia. That decision raised a hue and cry of really dreadful proportions. One newspaper said it "involved more danger to the liberties of America than the claims of the British Parliament to tax us without our consent." The Georgia House of Representatives reacted even more violently. It passed a bill providing that anyone who executed any process issued in the case would be "guilty of a felony, and shall suffer death, without benefit of clergy, by being hanged." Fortunately for the citizens of Georgia, that bill died in the Georgia Senate.

The Chisholm decision was in fact overturned, in 1978, but it was done according to the procedures specified in the Constitution, specifically by an amendment, the 11th, to the Constitution. Nevertheless, since then literally hundreds of legislative proposals have been introduced in Congress and in State legislatures to counteract controversial court decisions or to preclude unwanted judicial pronouncements, frequently to do so by means other than the amending process laid out in the Constitution. President Franklin D. Roosevelt's abortive attempt in 1937 to pack the Supreme Court with justices who would support his New Deal was only the most flamboyant in a long line of efforts to curb the Court. Some of these court-curbing proposals called for constitutional amendments to rebuke the Court, but others followed a straight statutory route. Most were prompted by a single decision by the Court, a few by a series of judicial rulings. Neither liberals nor conservatives have been immune to the temptation to curb the Court, so it is not an ideological question. Lawmakers of every political coloration have introduced such measures. Despite their political differences, they were all motivated by a single desire: to undo the work of the Court.

In the past, Congress has considered constitutional amendments that would not simply change the effect of a Court decision, but rather would change our constitutional scheme by allowing Congress to review and veto certain high court rulings. It has contemplated amendments that would require more than a simple majority of the Supreme Court to invalidate an act of Congress. It has entertained a bill that would require unanimous court agreement to void any act of Congress, State law, or State constitutional provision. And it has even deliberated over a resolution that called for a constitutional amendment providing that Supreme Court Justices would be appointed by a panel composed of one judge from each of the highest State tribunals.

Since the Supreme Court's decision in Brown vensus Board of Education in 1954, almost every controversial high court ruling has provoked a legislative response aimed at limiting the Court's jurdisdiction. Rulings on reapportionment, obscenity, criminal confession, school segregation, and Communist subversion have all triggered such proposals. But not one of these post-Brown bills became law. On a few occasions, these legislative efforts got off to a fast start; but, each time, people on Capitol Hill and perhaps more importantly people off Capitol Hill, took a hard look at the proposal and realized the grave threat it posed to our constituional system of government; and, each time, Congress backed off. I hope history will repeat itself now. Although the proponents of the court jurisdiction bills seem to have had the early momentum in the 97th Congress, the tide is shifting. A number of developments bear this point out:

In August 1981, the American Bar Association overwhelmingly adopted a resolution opposing congressional curtailment of the jurisdiction of the Supreme Court or inferior Federal courts for the purpose of effecting changes in constitutional law.

On January 30, 1982, the Conference of State Chief Justices expressed its "serious concerns" about the court jurisdiction bills and characterized them as "a hazardous experiment with the vulnerable fabric of the Nation's judicial systems * * *."

In hearings before subcommittees of both the House and Senate Judiciary Committees, the overwhelming majority of legal scholars urged Congress not to enact any of these court jurisdiction proposals.

On March 17, 1982, 14 Members of this body took the floor of the Senate to express grave concern over the court-stripping bills. Among those speakers was the distinguished Senator from Arizona (Mr. GOLDWATER), who worried about the impact these proposals would have on the independence of the Federal judiciary and termed them "destructive of our federal system" and "contrary to the will of the Framers (of the Constitution)."

On May 6, 1982, Attorney General William French Smith strongly suggested that S. 1742, the school prayer court jurisdiction bill, was unconstitutional and expressed concern over such proposals as a matter of public policy.

In July 1982, a message was sent to Congress by 25 prominent lawyers calling on Congress to reject "all efforts to remove Federal court jurisdiction over constitutional rights and remedies." And this message was signed not just by 25 rank-and-file, garden-variety members of the bar, but by four former Attorneys General, four former Solicitors General, and by a former Justice of the Supreme Court of the United States.

So clearly, I think, we who oppose amendments of this kind are gaining momentum. Nonetheless, supporters of the court jurisdiction bills persist both in their legislative efforts and in their belief that these bills are a constitutional and wise response to controversial Supreme Court decisions.

The supporters of the Helms amendment are quite candid about their opposition to the Supreme Court's school prayer decisions and their intention to bypass these constitutional rulings. When Senator HELMS introduced his school prayer jurisdiction bill, early last year, he laid his cards right on the table. After condemning the Supreme Court's school prayer decisions as a distortion of "the intent and language of the (first) amendment," Senator HELMS stated:

> The limited and specific objective of this bill is, then, to restore to the American people the fundamental right of voluntary prayer in the public schools.

The proponents of the amendment of the Senator from North Carolina do not question its legitimacy under the Constitution. They argue that the amendment is a valid exercise of con-

gressional authority set forth in two provisions of article III of the Constitution:

> The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish.
>
> In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the Supreme Court shall have original jurisdiction. In all other Cases before mentioned, the Supreme Court shall have appellate jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

It is obvious that these provisions mean something. They give Congress some authority to regulate the jurisdiction of both the Supreme Court and the lower Federal courts. But, it is equally obvious that they do not deprive our entire Federal court system of the jurisdiction to decide certain types of constitutional issues. Clearly they do not give Congress free license to alter unpopular Supreme Court interpretations of the Constitution. Court decisions may be changed either by the means provided within the Constitution itself—in this case by invoking article V—or by the Court itself when it alters one of its prior constitutional holdings. There is no question in my mind that what this amendment is seeking to do is to find a back door for changing the organic law of the land. That is not our constitutional system of government. Nor should it be.

By approving the amendment now before us, Congress would preclude the Supreme Court and lower Federal courts from dealing with an important issue. Once Congress starts down this road, there is no area of human endeavor that could not be reached by a simple act of Congress altering the jurisdiction of the Federal courts to control the outcome of cases. Tomorrow, our most basic constitutional protections could be at stake. The entire Bill of Rights, it is not too much to say, could literally be "up for grabs."

David Brink, former president of the American Bar Association, told the House Judiciary Committee that proponents of the Court jurisdiction bills read the relevant portions of article III "as though they were the sole provisions of the Constitution." Supporters of these proposals ignore what Mr. Brink called our "total plan of government." They gloss over several key elements of our constitutional scheme, including the doctrines of separation of powers, judicial independence and judicial review, the supremacy clause of article VI and the constitutional amendment procedures set forth in article V. Above all, they fail to acknowledge the radical and deleterious alteration this amendment and related proposals would work on our constitutional edifice.

The Constitution's division of power among three branches of Government is hardly a product of happenstance. Rather, it is the keystone to the Founding Fathers' deliberate development of a theory of government. The authors of the Constitution were worldly men. They were scholars steeped in the history of civilization. Having no television to watch, they read history books. They knew how the human race had dealt in the past with problems of government, authority, power, and conflict. They knew what had been successful and what had failed. And they distilled this knowledge of the history of mankind into the Constitution. I feel confident that a majority of them had read Montesquieu's The Spirit of the Laws and adapted his conception of the appropriate division of governmental powers to fit their own ideas, to fit this climate, this geography. Thus the Founding Fathers constructed strong and independent branches of Government specifically to prevent the concentration of too much power in one branch, and in the words of Justice Louis Brandeis, "to save the poeple from autocracy." Then, to make sure that no one branch would dominate the others, they added some institutional checks and balances. One was judicial review—the power given to the Supreme Court to void State and Federal laws that it judged as violating the Constitution.

Alexander Hamilton pointed out the fundamental importance of this power in Federalist 78. "Without this," he wrote, "all the reservations of particular rights or privileges would amount to nothing." Yet it is precisely this check—the power of judicial review—that this amendment would emasculate.

Of all the concepts that we should conserve, that we should be conservative about, this is surely one.

Moreover, this diminution of the scope of judicial review would undermine both the uniformity in constitutional interpretations provided by the Supreme Court and the constitutional requirement of the supremacy of the Constitution and laws of the United States. There would no longer be a single tribunal to act as the final arbiter as to the meaning of certain provisions let us say, of the first amendment. Each State would be able to determine the meaning of this constitutional language in its own way.

I would predict that we would soon have 50 interpretations.

The result, as a distinguished Marylander, a former Secretary of State, a former Attorney General, William Rogers warned over 20 years ago would be that a person's constitutional rights would depend on where a person lived, in which State he happened to have his residence.

Enactment of this amendment would also make a mockery of the supremacy clause set forth in article VI, clause 2, of the Constitution:

> This Constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the Land; and the Judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

This constitutional command would be, as Prof. Leonard G. Ratner told the Senate Judiciary Subcommittee on the Constitution, "no more than an exhortation," if there were no tribunal with nationwide authority to interpret and apply the supreme law, over a century ago, Chief Justice Roger Taney, of Frederick, Md., made this very point.

He began his historic career as a member of the bar in Frederick County, Md., the bar to which I also belong. When he was Chief Justice, he made this same point. He said:

> But the supremacy thus conferred on this Government could not peacefully be maintained, unless it was clothed with judicial power, equally paramount in authority to carry it into execution; . . . Without such a tribunal, it is obvious that there would be no uniformity of judicial decision; and that the supremacy (which is but another name for independence), so carefully provided in the clause of the Constitution above referred to, could not possibly be maintained peacefully, unless it was associated with this paramount judicial authority.

But the danger is not limited to this. These bills also undermine the doctrine of judicial independence, which is a principle worth preserving. It is not a new principle; it is an ancient one. Its origin can be traced back long before the Constitution of the United States was written. Herodotus, the historian of ancient Greece, has passed down to us this description of the Persian legal system of his day:

> These royal judges are specially chosen men, who hold office either for life or until they are found guilty of some misconduct; their duties are to determine suits and to interpret the ancient laws of the land, and all points of dispute are referred to them.

I am sure our Founding Fathers had read Herodotus. They were aware that by grafting judicial independence into the Constitution they were embodying the wisdom of the ages into our organic law. In this area, they were not creating a new experiment in government.

In addition, they were all too familiar personally with the abuses associated with a dependent judiciary, and they were determined to avoid them. In fact, one of the principal grievances listed against the British in the Declaration of Independence was that the King had made the colonial judges "dependent on his will alone, for the tenure of their offices, and the

amount and payment of their salaries."

As a result, the Constitutional Convention adopted a system of life tenure for Federal judges, subject only to the power of impeachment, and protected their salaries from diminution. It also specifically rejected the concept of legislative control over the judiciary by defeating a proposal to create "a national judiciary * * * to consist of one or more supreme tribunals, and of inferior tribunals to be chosen by the National Legislature to hold office during good behavior." As one scholar has written, the Founding Fathers "hoped to make Judges free from popular pressure and legislative control. Their purpose was to create a truly independent judiciary limited only by the cumbersome process of impeachment."

Clearly, the framers conferred on Federal judges a degree of independence unprecedented in the annals of history. As the Supreme Court noted in United States against Will:

> A judiciary free from control by the Executive and legislature is essential if there is a right to have claims decided by judges who are free from potential domination by other branches of government.

But, we may ask ourselves how independent and free from domination from the legislature are our Federal judges, if they must constantly be fearful that their decisions may offend a majority of the Congress and result in enactment of a proposal like the one before us? As Whitney North Seymour, distinguished New York lawyer and former Assistant Solicitor General, told the Senate Judiciary Subcommittee on Internal Security 24 years ago:

> It is imperative in our system of government, that no branch of government can be subservient to other branches and that the courts retain the ultimate freedom to exercise independent judgment. No court can be completely independent if it is forced to feel that, when its decisions are unpopular, it may be stripped of its right to hear and decide similar cases. In the field of individual rights, such a shadow on the independence of courts might seriously jeopardize those rights.

Finally, the amendment now before the Senate is wholly inconsistent with the clear and unambiguous language of article V which sets forth the constitutionally permissible means of amending our organic law.

To be sure, the Founding Fathers realized there would be need periodically to change our organic law, and they wanted the procedures for amending the Constitution to be more flexible than those in the Articles of Confederation, which required the unanimous agreement of the States. But they did not want to make the process too easy. Only after lengthy debate was a compromise struck that, to quote James Madison:

> Guards equally against that extreme facility, which would render that Constitution too mutable; and the extreme difficulty, which might perpetuate its discovered faults.

This amendatory procedure set forth in article V of the Constitution was designed specifically to deal with the types of changes in the Constitution sought by the proponents of this amendment. But they want no part of the constitutionally prescribed procedures. They prefer, I regret to say, to substitute congressional legislation for the carefully crafted procedures set forth in article V. With all due respect to my colleagues in the Senate, I side with our Founding Fathers on how to go about altering our organic law. Their approach has stood the test of time and has served us well. It should be conserved.

It is inconceivable to me that the authors of the Constitution, who took such pains to construct a delicate balance between the coordinate branches of Government, who conferred on Federal judges a degree of independence unparalleled in the annals of history, and who devoted so much time and care to devising a method of amending the Constitution, would today endorse a method of circumventing constitutional rulings by a simple majority vote of both Houses of Congress. The fact is, they would not.

Constitutional considerations aside, there are other undesirable side effects to this amendment. It is advertised as a simple and easy way of undoing the effect of controversial Supreme Court decisions. It is suggested that a cure for "judicial tyranny" has been discovered. A discovery—eureka! But, I think that, in the end, these expectations will surely be dashed for one or more good reasons.

First, the amendment, if enacted, could be ruled unconstitutional—and I believe it would be. That, of course, would end the issue for once and for all. Court opponents would be back at square one, with no option but to follow the route they should have used in the first place: the constitutional amendment process.

Second, even if sustained by the courts, there is no certainty that this amendment would achieve the desired result. The Supreme Court's interpretations of the Constitution are the law of the land. As the Supreme Court stated in Cooper against Aaron:

> Article VI of the Constitution makes the Constitution the "supreme Law of the Land." . . . (*Marbury* v. *Madison*) declared the basic principle that the federal judiciary is supreme in the exposition of the law of the Constitution, and that principle has ever since been respected by this Court and the Country as a permanent and indispensable feature of our constitutional system. It follows that the interpretation of the Fourteenth Amendment enunicated by this Court in the *Brown* case is the supreme law of the land, and Art. VI of the Constitution makes it of binding effect on the States "any Thing in the Constitution or Laws of any State to the contrary notwithstanding."

Thus, Madam President, for this amendment to achieve the ends which its proponents seek, State judges would have to ignore their oath to support the Constitution and render decisions counter to the prevailing Supreme Court rulings on school prayer. Understandably, this very point was quite troubling to the Conference of State Chief Justices:

> First these proposed statutes give the appearance of proceeding from the premise that state court judges will not honor their oaths to obey the United States Constitution, nor their obligation to follow Supreme Court decisions interpreting and applying that Constitution, thus breaking with a 200 year practice and tradition. So viewed, these efforts to transfer jurisdiction to the state courts for these purposes neither enhance the image of those institutions, nor demonstrate confidence that state court judges will do their duty.

I think that the Senator from North Carolina and other advocates of this amendment misjudge the loyalty that State jurists feel to the Constitution. I am certain that these judges would observe the supremacy clause and continue to follow Supreme Court precedent. Thus, the net effect of this entire venture might be to perpetuate the very decisions that prompted all the fuss in the first place.

Even though State judges are surely loyal to the Constitution, this amendment would work a great—indeed, a cruel—hardship on the exercise of that loyalty because it would shift the legal battleground for a controversial social issue from the Federal to the State courts. Unlike their colleagues on the Federal bench, most State judges are elected to office. They do not have the security of life tenure, and they are not free from political pressures. They are, in fact, very vulnerable to the public mood and the tyranny of the majority. Thus, as the American Bar Association has noted, proposals like the one before us would "subject State judges to often hard choices between oath and career."

Last September, we saw a strenuous attempt in the Senate Judiciary Committee to force a Supreme Court nominee to commit herself, prior to confirmation, to voting to overturn the Court's 1973 decision on abortion. It does not take much imagination to picture the pressures that would be brought to bear to elicit such assurances from State judges during election campaigns.

One of the great strengths of the American system is that we have not allowed our Constitution to be pulled and hauled with each ebb and flow of the tide of public opinion. Today, however, the tug-of-war in Congress over these court-curbing bills threatens to rend the fabric of our Constitution—"the most wonderful work ever struck

off at a given time by the brain and purpose of man."

We must not let that happen.

Madam President, at the time he announced his retirement from the Supreme Court, former Justice Potter Stewart had the following conversation with a reporter:

He was asked the question:

(T)here are numerous proposals in Congress that would strip the Supreme Court of jurisdiction in subject matter areas. Without asking you about the constitutionality of this, does that concern you as a procss and as a prospect?

Justice STEWART. Yes; it does concern me. There is nothing new about having such bills in Congress. I think there have been such bills in Congress ever since I've been here, in fact long before that. The reason that people are concerned about it nowadays is that there seems to be considerably more of a possibility that one or more of such bills might be enacted. If they were enacted, if any such bill were enacted, it would present immediately very difficult constitutional questions. I'm glad I am not going to be here to have to wrestle with those, and I hope this Court will never have to wrestle with such questions because I hope that no such legislation will be enacted. So yes, I am concerned.

Madam President, I share Justice Stewart's concern. I do not share his sense of relief that he is not there to wrestle with it. I wish, in fact, he were there to wrestle with it because his service on the Court was of great distinction and of great value to the country, I do share with him the hope that the Court will never have to rule on the constitutionality of one of these Court jurisdiction bills. Obviously we in the Senate have much to say about whether or not the Court will ever have to render such a decision. And, by defeating the amendment now before us decisively and overwhelmingly, we can send out a clear signal that these proposals have no place in our constitutional government and that they should be shelved for once and for all. I urge my colleagues to join me in doing that and to defeat this amendment.

Madam President, I ask unanimous consent that I may be allowed to yield the floor at this point to the Senator from Ohio without such action being construed as the end of a speech for the purpose of the two-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Ohio.

Mr. METZENBAUM. Madam President, I think we have here a situation that goes far beyond the matter before us. We are dealing with a proposal specifically spelling out that and I quote:

The Supreme Court shall not have jurisdiction to review by appeal, writ of certiorari, or otherwise, any case arising out of any State statute, ordinance, rule, regulation or any part thereof, or arising out of any act interpreting or applying or enforcing a State statute, ordinance, rule or regulation—and there we talk about what the bill is all about—which relates to voluntary prayers in public schools and public buildings.

If this measure is accepted by the Congress of the United States and signed into law by the President, then we have truly made a grave mistake in our Nation's approach to the separation of powers—its approach to the question of whether or not the Congress of the United States is going to say what the Supreme Court can hear and what they cannot hear. If we can enact legislation of this kind, which this Senator believes is patently unconstitutional, and if it is held valid and it succeeds in depriving the Court of jurisdiction relating to voluntary prayers in public schools and public buildings, then what is to keep us from going further and including within the prohibition any laws, regulations, ordinances, rules, or statutes relating to free speech? It would totally destroy the magnificent rights of free speech that we in this country have by saying that the Court could not rule in such cases.

What about the right of a free press? What would be the attitude of the people of this Nation if we were suddenly to say that the Court could not deal with any cases having to do with a free press? What would the newspapers, the radio, and the TV—say if some of us in Congress determined that we ought to limit the Court's jurisdiction as it pertains to the issues of a free press or the guarantees provided in the Bill of Rights and the Constitution?

Looking further, what about the right of freedom of assembly, the right of trial by jury, the question of slavery or involuntary servitude? What about the question of equal protection of the laws, the deprivation of life, liberty, or property without due process of law, the taking of property without just compensation? How about that particular right?

If we offered an amendment to this proposal that the Court could not have jurisdiction of any cases relating to the taking of property without just compensation, would some of those who are the great advocates of this particular proposal feel the same way about the Court's jurisdiction? Or would they start to concern themselves about the proper rights of individuals as those rights are protected by the Constitution of the United States?

We have to examine our consciences, examine where we are coming from and what our concerns are.

Once we have broken down that barrier and taken away from the Supreme Court of the United States the right to hear cases having to do with voluntary prayer in public schools and public buildings, then we have made the fateful inroad. The dike has been broken, and it is thereafter possible to enact legislation which would deprive the people of this country of the rights they truly treasure as provided in the Constitution of the United States.

This is a proposal that says, in essence, that the Consititution of the United States should no longer be followed. That is the whole issue before the Congress of the United States. There are those who, for political purposes, would attempt to make the issue of voluntary prayer in schools an issue on the merits, but you cannot look at the issue in that way so far as the measure before us is concerned; because this measure does not deal with the question of voluntary prayer in schools as an issue itself, but, rather, deals with the denial of the court's jurisdiction to hear cases pertaining to that particular subject.

If you can open the door, if you can take the lock off the gate guarding the courts' jurisdiction in one area there is no question that you have opened a Pandora's box, and you have probably totally destroyed the Constitution of the United States in the process.

A vote for this measure, in this Senator's opinion, is a vote to destroy the efficacy and the effectiveness of the Constitution of the United States.

Take other subjects: unreasonable searches and seizures; the question of slavery, involuntary servitude; the right of citizens to vote. Should we take away jurisdiction in any of those areas? If we enact this particular measure, have we not truly then said that the Court may be deprived of jurisdiction in any area in which we disagree with that particular part of the Constitution of the United States?

The issue here is the integrity of the court system and our constitutional way of government. Either you believe in that constitutional way of government, either you believe in the integrity of the court systems, or you do not. If you believe in the integrity of the court system, if you believe in the Constitution of the United States, then this proposal cannot be supported. This proposal goes further than the language of the proposal itself, and the implications of this proposal are totally unlimited. The implications are that the Constitution can be broken indirectly when the people of the country would not be willing to undo any of the constitutional provisions by the normal procedures as provided in that document, and that is by amending the Constitution.

The issue before the people of the country on these measures which would deny the courts jurisdiction is not an issue having to do with the matter of abortion or busing or school prayer or any of the other very emotional issues. All of these are issues it is fashionable these days to deal with through court-stripping legislation.

But, stripping the Federal courts of jurisidiction because transient political majorities do not like the court's constitutional interpretations undermines our society's democratic framework. It is bad public policy, and it is shortsighted. Simply stated, if you do not like the court's decisions, then use the procedures that we have in the constitution to change them. Do not do it by an amendment depriving the court of jurisdiction.

Madam President, such court-stripping amendments do not make sense. I find it hard to believe that the Members of this body support that approach. That simply cannot be the position of any person who believes that our constitutional system of Government is a sacred system and is one that we all want to protect.

Let me read what the Attorney General of the United States himself said on this subject:

> Congress may not, however, consistent with the Constitution, make "exceptions" to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.
>
> The remedy for judicial overreaching, however, is not to restrict the Supreme Court's jurisdiction over those cases which are central to the core functions of the Court in our system of government. This remedy would in many ways create problems equally or more severe than those which the measure seeks to rectify.
>
> Essential to the principle of separation of powers was the proposition that no one branch of government should have the power to eliminate the fundamental constitutional role of either of the other branches.
>
> It is appropriate to note, however, that even if it were concluded that legislation in this area could be enacted consistent with the Constitution, the Department would have concerns as a policy matter about the withdrawal of a class of cases from the appellate jurisdiction of the Supreme Court. History counsels against depriving that Court of its general appellate jurisdiction over Federal questions. Proposals of this kind have been advanced periodically, but have not been adopted since the civil war. There are sound reasons that explain why Congress has exercised restraint in this area and not tested the limits of constitutional authority under the exception clause.

Madam President, I ask unanimous consent that I be allowed to yield the floor at this point without this being construed as the end of the speech for the purpose of the two-speech rule, and I yield to the Senator from Oregon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Madam President, I wish to share with our colleagues my impression of one of the real issues in this debate, which I fear has been overlooked, and that is as it relates to the first amendment to the Constitution and the way in which the first amendment today is being applied that infringes upon the rights of students to free speech and which discriminates against them because of the religious content of their speech.

I am introducing statutory language which will accomplish this goal without utilizing the ill-advised method of stripping the Federal court jurisdiction over school prayer.

In Widmar against Vincent the Supreme Court held that, absent a compelling purpose, a public university may not deny the use of its facilities to student groups who wish to meet and speak on religious subjects if it makes its facilities generally available to student groups for meetings on nonreligious subjects. The Court based this holding not on the free exercise of religion clause but on the freedom of speech clause of the first amendment as made applicable to the States through the 14th amendment, for once the university "created a forum generally open for use by student groups," the Court said the university could not "discriminate against student groups and speakers based on their desire to . . . engage in religious worship and discussion * * *."

I recall that while I was Governor of my State a well-known Communist speaker by the name of Gus Hall was making a round of college and university campuses across the country. There was a great outcry by many in my State for me to prevent Gus Hall from the use of the public universities from which to make his statements relating to Karl Marx. I could not and would not, due to the constitutional guarantee of free speech, in any way attempt to intervene to prohibit Gus Hall from speaking on our campuses.

However, that being the case, not only in Oregon but other States to have had Billy Graham come to the campus or any other prominent religious leader and speak in the same forum about Jesus Christ would have been interpreted to violated the establishment of religion" clause and thereby a violation of separation of church and state.

Madam President, I find this ridiculous in a free society dedicated to the principles of free thought.

The denial of opportunities to exercise free speech because of its religious content is now occurring throughout the country today.

Let me cite a few examples:

At Guilderland High School in New York, Christian students sought and have been denied the right to meet before classes for prayer and Bible study. The meetings were strictly voluntary, required no school announcements, no school sponsorship, but a Federal district court and appeals court have upheld the school board's refusal to allow the group to meet.

And yet students can voluntarily associate themselves in that school for other purposes, philosophical societies, camera-photography societies or clubs, all the kinds of clubs in which they voluntarily associate themselves there because of mutual interest and have open and freedom of discussion, but they cannot meet to study the Bible.

I do not support the school prayer amendment. I oppose the idea of any kind of mandated prayers in schools. I do not believe that is in line with our constitutional separation of church and state.

Frankly, I do not have time to write all the prayers, and I do not trust anyone else to. So consequently I have to oppose the whole concept.

But I am speaking today not on the right of religious exercise but I am speaking on the freedom of speech, the first amendment of the Constitution, that is being denied under this ridiculous interpretation by the courts relating to freedom of religious activity.

In Lubbock, Tex., the school board drafted a careful policy that accommodated student initiated religious activity on an equal basis with other student groups in the use of school facilities for meetings before and after school. The U.S. Court of Appeals for the Fifth Circuit struck down this school board policy and forced a total ban of voluntary, student-initiated religious activity. *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1308 (5th Cir. 1982) is the citation of that case.

And yet in that same school district they could meet and probably have a political discussion on any part of political philosophy they wanted to. They could have a meeting on economic philosophy. They could have a meeting on social philosophy, but not on religion.

Madam President, once a school board establishes the forum for the pursuit of information or knowledge then that forum cannot discriminate on the content of that association or voluntary organization. That is what the Supreme Court ruled as it related to universities and colleges.

What I want to do in my bill is to apply that same constitutional principle the Court applied to the colleges and universities to the elementary and secondary school systems of this country.

Let me cite a third example.

In Williamsport, Pa., the public high school allows students to participate in student clubs and groups such as Student Government, Key Club, Language Clubs, Future Homemakers, music and publication groups. The clubs allow students to exchange ideas and personal opinions on a broad range of topics, subjects, and issues, and no one attempts to intervene to determine the content of those discussions. The clubs meet from 7:55 a.m. to 8:23 a.m. each Tuesday and Thursday

mornings during a regularly scheduled activity period. The clubs may also meet before and after school hours.

In September 1981, a group of students at Williamsport High School requested permission to form a student club to be called Petros which would meet voluntarily during the regularly scheduled activity period on Tuesday and Thursday mornings. The purpose of this student club was for students to aid one another in their personal, social, emotional, and intellectual growth and development by studying the Bible, discussing religious subjects, praying together, and sharing personal experiences. The principal of the high school and the superintendent of the district denied the request on the ground that the meetings would be religious in content. In January 1982, at a meeting of the school board, the request by the students was denied on the same ground.

Hopefully, the students will prevail in their complaint that they are being denied their first amendment rights of free speech because of the religious content of the proposed meetings. However, if the Brandon and Lubbock decisions are followed by the court, a further unfortunate precedent would be set.

The bill I introduce today extends the principle of the Widmar decision to the public secondary school. When a school generally allows groups of students to meet during a noninstructional part of the school day, that school cannot discriminate against any meeting because of the religious content of the speech at the meeting.

What would it be if we had a political club meeting and the students decided they wanted to discuss Karl Marx and communism? I would defend that right of that student group to engage in that discussion as I would defend anyone's right but I also say I would defend their right to have a meeting to study the Bible and discuss the person of Jesus Christ, or Buddha, or Mohammed, or any other religious leader.

School boards and school administrations have no right to abridge the first amendment, freedom of speech, by declaring what the contents of those meetings are or will be only in the case of religion.

The legislation that I introduce also insures that school officials will continue to have discretion to insure that the meetings are voluntary, orderly, lawful, do not in any way engage in illicit or illegal or inappropriate activity. That is the right of administering any school organization. But it should be applied across the board.

Most importantly, this language specifically states that no student can be forced to participate in prayer or any religious activity. It has to be strictly voluntary.

Moreover, State or school officials will have no authority to influence the form or content of any prayer or other religious activity that such clubs may engage in. This language is similar to the amendment suggested by the National Association of Evangelicals in testimony with respect to the President's prayer amendment to the Constitution.

What needs to be addressed is the recent series of lower court decisions that have singled out religious speech as the one form of speech unworthy of protection in the schools. It is even more alarming to see school officials throughout the country deciding to ban all religious speech from public schools. By protecting the free speech rights of students in public high schools the bill is consistent with the Widmar decision.

In prohibiting State sponsorship or influence in formulating the content of prayer or other religious activities, the legislation is consistent with the original Supreme Court decisions of Engel against Vitale and Abington against Schempp.

Madam President, I ask unanimous consent to have printed in the RECORD a copy of my testimony before the Senate Judiciary Committee on this issue and the memorandum mentioned in the statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR MARK HATFIELD

In 1962 the Supreme Court invalidated a non-denominational prayer that had been written by the New York Board of Regents and approved by local school boards. By imposing a "watered down" prayer on young students, the New York Regents adopted a useless gesture that was neither "spiritual" nor "prayer."

Since that decision, the Supreme Court's ruling has been blamed for the deteriorating quality of public education, for the breakdown of the American family, for the decay in moral principles and abdication of governmental institutions to the norm of secular humanism. The school prayer decision has served as a symbol for all that is wrong in America. "Prayer Amendments" to the U.S. Constitution, legislative initiatives and even attempts to remove the jurisdiction of the U.S. Supreme Court have been vigorously pursued in the Congress. Most recently, President Reagan submitted his proposed Constitutional Amendment which would allow "Voluntary Prayer" in public schools.

Mr. Chairman, I strongly believe that this nation needs to have a spiritual renaissance—one that begins in the hearts and minds of individuals and works its way through our churches, schools and public institutions. The First Amendment to the U.S. Constitution is a limitation on the power of government to promote, establish, or discourage religion but it sets no limit on private initiated prayer, observances of religious customs or political action that stems from moral beliefs. Instead of concentrating our attention on initiatives like a School Prayer Amendment, I would urge my Colleagues to devote their energies to rooting out ridiculous barriers that have been erected to forbid voluntary meetings of students who seek to meet and pray in non-disruptive ways.

Let me give you two examples that demonstrate the problems that vibrant believing students are facing across the country.

(1) At Guilderland High School in New York, Christian students sought and have been denied the right to meet before classes for prayer. The meetings were voluntary, required no school announcements or sponsorship. A federal district court and Appeals Court have upheld the school board's refusal to allow the group to meet. *Brandon* v. *Guilderland Control School District*, 635 F.2d 971 (2d Cir. 1980), Cont. denied, 102 S.Ct. 970 (1981).

(2) In Lubbock, Texas the school board drafted a careful policy that accommodated student initiated religious activity on an equal basis with other student groups in the use of school facilities for meetings before and after school. The United States Court of Appeals for the 5th Circuit struck down this school board policy and forced a total ban of voluntary, student-initiated religious activity. *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1308 (5th Cir. 1982)

Mr. Chairman, it is unduly restrictive actions like those in Lubbock and Guilderland High School to which the Congress should devote its attention. By chilling sincere efforts to pray for God's grace, and forgiveness in voluntary meetings that do not disrupt the academic functions of a public school, we do far more damage to the nation's moral fiber than through any Supreme Court decision that invalidates a routine, formalistic, and spiritually bankrupt prayer that the New York Regents drafted in the 1960s.

Because of these concerns, I asked the Christian Legal Society to provide me with a legal memorandum outlining the problems that have developed in restricting the religious freedom which may be enjoyed by students on public campuses. CLS has done some extraordinary work in researching, litigating and advocating on behalf of religious freedom. I would like to have the Committee consider the CLS memorandum and recommendations for legislative initiatives as a realistic alternative to the School Prayer Amendment.

MEMORANDUM OF JULY 13, 1982

To: Samuel E. Ericsson.
From: Stephen H. Galebach and Lowell V. Sturgill, Jr.
Question Presented: What is the best legislative means to apply the principles of the *Widmar* v. *Vincent* decision to the context of public schools?

President Reagan recently introduced an amendment to overturn the Supreme Court's controversial decisions of the early 1960's against state-initiated prayer and Bible-reading in public schools. Some of the most serious obstacles to religious activity by students in public schools, however, have received little public attention. In recent years many school administrators, and some lower courts, have begun to prohibit even those forms of religious speech by high school students that are purely voluntary and initiated by students with no sponsorship by the state. Administrators and judges have prohibited student clubs that are religious in nature, and have banned before and after school small-group meetings—thus

going beyond any prohibitions the Supreme Court has required.

Because these more extreme measures against religious expression are not mandated by the Supreme Court, they can be remedied more quickly than by constitutional amendment. While the President's amendment would protect such purely voluntary student meetings, it is possible at the same time for Congress to pass a stop-gap statute to provide immediate protection for those forms of student religious activity that are most clearly voluntary and removed from state sponsorship.

The more extreme actions of school administrators and judges are especially subject to persuasive attack, because they are contrary to the reasoning of the Supreme Court's *Widmar* v. *Vincent* decision of December, 1981. That decision rested on the principle that states may not discriminate against forms of speech that are religious in content. Many of the more extreme restrictions on student religious speech are precisely discriminations based on content. This memorandum considers the possible legislative means to apply the Widmar principle not only to state universities (as the Supreme Court did in that case), but also to state secondary schools.

I. THE PRINCIPLE OF *WIDMAR* V. *VINCENT*

In *Widmar* v. *Vincent*, 102 S. Ct. 269 (1981), a student group called "Cornerstone" requested access to public facilities on the campus of the University of Missouri, for the purpose of holding religious meetings. Id. at 272. Cornerstone sought access on the same terms that applied to the use of university facilities by more than 100 other student groups. The University denied the request pursuant to a university policy prohibiting religious meetings on campus. Id. The Supreme Court ruled against the University, holding that it could not deny use of its facilities for religious meetings if it allowed similar use by non-religious groups on a general basis. Id. at 278.

In so ruling, the Supreme Court reaffirmed the First Amendment principle that regulation of speech must be "content-neutral." See *Heffron* v. *International Society for Krishna Consciousness, Inc.*, 101 S. Ct. 2559 (1981). This principle means that a state may not discriminate against a particular type of speech based on the content of the speech, without offering a compelling interest in justification. See *Carey* v. *Brown*, 447 U.S. 455 (1980).

The Widmar decision confirms that the principle of "content-neutrality" governs state action in the context of a state university. Widmar holds that once a state university creates an "open forum" for speech—for instance, by allowing student groups to meet freely on campus—it may not discriminate against meetings where the speech has religious content or any other particular content. The Widmar Court left open, however, the question of how the principle of content neutrality will apply to state action in the context of student meetings in public secondary and elementary schools.

II. THE PROBLEM: PUBLIC SCHOOL AUTHORITIES AND LOWER FEDERAL COURTS HAVE REFUSED TO ENFORCE THE WIDMAR CONTENT-NEUTRALITY PRINCIPLE WITH RESPECT TO PUBLIC SECONDARY SCHOOLS

A. The Supreme Court decisions on "prayer in school."

In the context of public schools, the Supreme Court has struck down only forms of prayer and religious activity that are initiated in various ways by the state. Specifically, the Court has ruled unconstitutional state policies that initiated student recitation of the Lord's Prayer in class, *Engel* v. *Vitale*, 370 U.S. 421 (1962); reading from the Bible over a school intercom, *School District of Abington Township* v. *Schempp*, 374 U.S. 203 (1963); bringing a religious teacher on campus to do class instruction, *McCollum* v. *Board of Education*, 333 U.S. 203 (1948); and posting of the Ten Commandments on school walls, *Stone* v. *Graham*, 449 U.S. 39 (1980). The Supreme Court thought these practices violated the principle of state neutrality toward religion, because the state initiated the religious activity, the context indicated state sponsorship of the religious activity, and the students could avoid the religious activity only by taking the affirmative step of asking to be excused. The Supreme Court has never held against religious activity which is purely voluntary, initiated by students, and merely *allowed* by the school on the same basis as student-initiated non-religious activities.

B. Actions of school authorities and lower courts.

A limited sampling of public schools across the country by the Christian Legal Society has already uncovered the following examples of actions by school authorities which are contrary to the content-neutrality principle of Widmar:

1. In Williamsport, Pennsylvania, a student group applied to the local school board for permission to start a club called "Petros", which planned to hold religious meetings before school, after school, or during a school club period. The school board refused the request, forcing the students to file suit in federal district court to seek protection of their rights of freedom of speech and freedom of assembly.

2. In Anderson, South Carolina a public high school opens its doors one-half hour early each day for peaceable student meetings in vacant rooms. For some time, a group of students has used this opportunity for voluntary meetings to pursue Bible study, prayer, and worship. Recently, the local representative of the American Civil Liberties Union has publicly threatened to file suit against the local school board to require it to police the content of student speech by banning any meetings with religious content.

3. For several years prior to the 1980-81 school year, students at North Allegheny High School in Pittsburgh, Pennsylvania, had met on school grounds to study the Bible and pray. The meetings occurred during a twenty-five minute period of time after the arrival of school buses and before the beginning of homeroom period. When this practice was brought under question, high school administrators and then the superintendent of the school district denied a formal request made by the students to use a classroom before school hours began.

4. In Dixon, Illinois (the hometown of President Reagan), a local school board has voted to ban all voluntary religious activities of students on school grounds. Also, the same school board will allow outside community groups only four opportunities per year to rent or reserve school facilities for meetings after school hours if these groups intend religious speech; non-religious groups enjoy after-hours access without this restriction.

5. In *Brandon* v. *Guilderland Central School District*, 635 F.2d 971 (2d Cir. 1980), cert. denied, 102 S. Ct. 970 (1981), the United States Court of Appeals for the Second Circuit upheld the decision of the Guilderland Board of Education to ban voluntary, student-initiated religious meetings from school property during, before, and after school hours with language implying that no religious activity whatsoever is permissible in public schools. The Second Circuit said that an "adolescent may perceive 'voluntary' school prayer in a different light if he were to see the captain of the school's football team, the student body president, or the leading actress in a dramatic production participating in communal prayer meetings in the 'captive audience' setting of a school." 635 F.2d at 978. This language would logically lead school officials to prevent students from bowing their heads to say a prayer before lunch, carrying their Bible to school, or doing any other overt religious act of free exercise of religion within the boundaries of the school. The Supreme Court declined to review this decision in December, 1981, shortly after deciding Widmar.

6. In *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1308 (5th Cir. 1982), the United States Court of Appeals for the Fifth Circuit went even farther than the Second Circuit did in Brandon, by forcing a total ban of voluntary, student-initiated religious activity in a school district that wanted to accommodate the free exercise of religion and freedom of speech rights of public school students. The Fifth Circuit upset a carefully drafted school board policy, adopted after public deliberation, which purported only to treat all student-initiated groups equally with regard to access to school facilities for meetings before and after school.

III. CONGRESSIONAL LEGISLATION TO ADDRESS THE PROBLEM

The basic question is whether Congress can legislate to apply the Widmar principle of content-neutrality to public schools, without violating the Establishment Clause. The Widmar decision held that a content-neutral policy of equal access to state university facilities did not violate the Establishment Clause, because any religious meetings would be student-initiated and would receive only incidental benefits from the state on the same basis as non-religious meetings, with no appearance of state sponsorship.

In a footnote, however, the Widmar Court carefully reserved the question whether the Establishment Clause prevents application of the content-neutrality principle to protect religious speech at the secondary and primary school levels. 102 S. Ct. at 276 n.14.

A. The Establishment Clause As Applied to Public Schools.

In *Widmar* v. *Vincent*, the Supreme Court declined to consider whether an open forum policy in a public elementary or secondary school, allowing students to meet equally in religious and non-religious groups, is neutral toward religion vs. non-religion. The Court suggested, however, that the neutrality of such a policy will turn at least partly on the "impressionability" of students in the public schools. 102 S. Ct. at 276 n.14. In other words, the Court thought that the immaturity of younger students might cause those students to perceive state sponsorship of religion from an open forum policy, even though the same policy would not connote state sponsorship in a university setting.

Therefore, the application of the Establishment Clause to public schools will turn at least partly on the fact question of whether the students involved are significantly less mature than college students. A

further important question will be, given the maturity level of the students, will they be likely to perceive an equal access policy as state favoritism or sponsorship toward religion, or will they be likely to perceive discrimination against meetings with religous content as a form of state hostility toward religion?

B. The Appropriate Role for Congress.

The maturity of public school students and the relationship of maturity to the impression of state sponsorship of religion are factual questions that Congress is well-able to resolve through its investigatory and factfinding powers. Congress is well-suited to exercise its legislative fact-finding capacity to solve the problem at issue here, by investigating relevant facts and deciding at what grade level students are mature enough to choose freely among various types of extracurricular student group activities, both religious and non-religious, without danger of student perception of state sponsorship of religion. For example, Congress might very well decide that secondary school students are mature enough to choose freely among the types of voluntary student activities in which they will participate, while elementary students are not sufficiently mature.

IV. CONGRESS HAS AUTHORITY TO PROVIDE A SOLUTION TO THE PROBLEM

A. Congressional Power Under Section Five of the Fourteenth Amendment.

The Fourteenth Amendment's due process and equal protection clauses incorporate several individual constitutional rights as binding on the states, including the freedom of speech, *Fiske* v. *Kansas*, 274 U.S. 380 (1927), and the freedom of assembly, *DeJonge* v. *Oregon*, 229 U.S. 353 (1937). Section Five of the Fourteenth Amendment provides that "Congress shall have power to enforce, by appropriate legislation, the provisions of this article." Therefore Congress has general authority to enact legislation requiring states to respect constitutional rights of free speech and free association.

The content-neutrality requirement, a fundamental incident of the right of freedom of speech, also falls within the due process and equal protection obligations imposed on the states by the Fourteenth Amendment. See *Widmar* v. *Vincent*, 102 S. Ct. 269 (1981). Therefore, Congress has authority pursuant to Section Five of the Fourteenth Amendment to enforce the content-neutrality principle upon state administered public schools, by appropriate legislation.

Congress should not be deterred from applying Widmar to public schools merely because of the refusal of two circuit courts to do so. See *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1308 (5th Cir. 1982); *Brandon* v. *Guilderland Central School District*, 635 F.2d 971 (2d Cir. 1980), cert. denied 102 S. Ct. 970 (1981). A recent Congressional Research Service memorandum commenting on Senator Jepsen's proposed Widmar bill concludes that since the Supreme Court has not ruled on this issue, Congress has authority under Section Five to make its own determination and legislate accordingly. Congressional Research Service Memorandum at 12. See *Fitzpatrick* v. *Bitzer*, 427 U.S. 445 (1976); *Katzenbach* v. *Morgan*, 384 U.S. 641 (1966). The lower federal courts are split on this issue; a district court in the Sixth Circuit has allowed student-initiated religious expression during non-instructional hours. *Reed* v. *Van Hoven*, 237 F. Supp. 48 (W.D. Mich. 1965). Thus, Congress could supply clarity where the lower courts have created confusion.

B. Congressional Authority Over The Appropriations of the Federal Government.

A bill applying the Widmar principle to public schools is independently supported by Congressional authority over federal government appropriations. Congress has broad power to attach conditions to its grant-in-aid programs, as long as those conditions are themselves constitutional. See, e.g. *Fullilove* v. *Klutznick*, 448 U.S. 448 (1980); *Steward Machine Co.*. v. *Davis*, 301 U.S. 548 (1973); cf. *Harris* v. *McRae*, 448 U.S. 297, reh. den. 448 U.S. 917 (1980).

Again, the absence of any definitive statement by the Supreme Court on whether content-neutrality at the public secondary school level violates the Establishment Clause as applied to religious speech has led the Congressional Research Service to conclude that this "proposed condition cannot at this time be said to impose an unconstitutional condition on federal assistance to such schools." See Congressional Research Service memorandum at 6. In sum, Supreme Court silence on the Establishment Clause question in the public secondary school context leaves the Congress free to enact a statute that would apply the Widmar principle of content-neutrality to public schools in a manner consistent with the Establishment Clause according to the view of Congress.

V. WHAT WOULD BE THE RELATIONSHIP OF A BILL EXTENDING THE WIDMAR PRINCIPLE TO PUBLIC SCHOOLS WITH THE PRESIDENT'S PROPOSED PRAYER AMENDMENT?

The President's Prayer Amendment, under its most likely interpretation, would solve the problem addressed by a bill extending Widmar to public schools, that is, the failure of lower courts and school boards to so apply the Widmar free speech principle of content-neutrality.

The President's proposed Prayer Amendment reads as follows:

"Nothing in this Constitution shall be construed to prohibit individual or group prayer in public schools or other public institutions. No persons shall be required by the United States or by any State to participate in prayer."

The proposed amendment would seem to address the failure of lower courts and school officials to allow voluntary, student-initiated religious group meetings on the same basis as non-religious groups as required by the Widmar content-neutrality principle.

The essence of the prayer amendment is to correct the current judicial and public misconception that the First Amendment Establishment Clause bars religion from any influence on public life in general, and public schools in particular. The effect of the amendment's reaffirmation of an earlier understanding would be to allow reinstatement of non-coerced individual and group prayer in all public institutions insofar as the First Amendment has been considered a bar. But it would not require such reinstatement, if states construed such a bar from state laws or constitutions.

As a corollary effect, the prayer amendment would elminate use of the Establishment Clause as a justification for discrimination against meetings and speech of public school students when religious in nature. Thus, the prayer amendment in part pursues the same objective as would a bill applying the Widmar content-neutrality rule to public secondary schools.

In addition to being compatible with the prayer amendment, a bill applying content-neutrality to public secondary schools enhances the cause of that amendment in several ways. First, Administration and Congressional support of a bill extending the Widmar principle to public secondary schools would demonstrate the resolve of those branches to deal with the loss of voluntary religious activity from public schools. Second, while the President's Amendment will take at least several years to enact, a statute could correct relatively quickly the most recent and perhaps the most extreme of the judicial distortions at which the amendment is aimed. Third, a Widmar bill, within its sphere of impact, could make an affirmative requirement of neutrality, rather than just removing the federal Constitution as the asserted reason for discrimination against religious activity.

Furthermore, a statute extending Widmar to public schools focuses attention on those violations of freedom of speech and association that are most offensive to the overwhelming majority of American people. This has been indicated in informal conversations between Christian Legal Society attorneys and representatives of several groups which normally express reservations about state-sponsored prayer, but which endorse the content-neutrality principle.

Congressional hearings on this bill could easily be consolidated with hearings on the President's Prayer Amendment. They are simply two mutually consistent answers to the same problems. A bill would be only a temporary solution to a part of the problem; thus, it would in no way eliminate the need for an amendment.

VI. PROPOSED LANGUAGE FOR A BILL EXTENDING THE WIDMAR PRINCIPLE TO THE PUBLIC SCHOOLS

Several good proposals have already been offered for such a bill, including proposals by Senator Jepsen, Senator Helms, and the law firm of Ball and Skelly. The only question is which is best. Copies of each proposal are attached to this memorandum for references as appendices.

A. Christian Legal Society Also Has Drafted Language for a Widmar Bill in Public Schools. It Reads As Follows:

"No public secondary school receiving federal financial assistance, which generally allows groups of students to meet during non-instructional periods, shall discriminate against any meeting of students on the basis of the content of the speech at the meeting, provided that the meeting shall be voluntary and orderly and that no activity which is in and of itself unlawful need be permitted." [1]

B. Explanation of Terms of Christian Legal Society Proposal.

1. The proposed statute limits the application of Widmar content-neutrality to secondary schools. The statute omits reference to primary schools. This is in recognition that Congress, and perhaps the Supreme Court as well, might consider the danger of perceiving state sponsorship from equal treatment of religious activity too great for primary-age children.

2. The statute applies only against those schools that receive federal financial assistance. This self-limitation should satisfy those who defend the rights of local schools that do not accept federal funds to administer their programs free from federal intervention. Regarding the time period during

[1] An alternative proposal might add the word "religious" before the word "content" in this statute. See infra at 15.

which a school must have accepted federal funds to come within the requirements of this statute, the statute leaves this matter open as the subject of reasonable and appropriate regulation by proper federal administrative officials, in light of legislative history that should be clearly established after hearings.

3. The statute applies to schools that "generally" allow student meetings. Use of the term "generally" conforms to the decision of the Supreme Court in *Widmar* v. *Vincent*, 102 S. Ct. 269, 277 (1981). The significance of the term is that by its use, the statute applies not to schools which have allowed one or two groups to meet on a one-time basis, but to schools that allow many student groups to meet in general. *Cf.* Congressional Research Service memorandum (arguing that Senator Jepsen's proposal has a weakness in its omission of the term "generally.")

4. Use of the term "groups" of students also comports with the Supreme Court's decision in Widmar. See 102 S. Ct. at 273. The statute by its terms does not require content-neutrality regarding the isolated religious speech of one student absent a listener. (Students are already allowed to pray silently by themselves.)

5. The statute limits application of content-neutrality to "students". Thus, the statute does not address whether faculty, staff, or school administrators may engage in religious group meetings on a public school campus. Again, this limitation comports with Widmar, where the Court expressly limited its holding to students. 102 S. Ct. at 273 n.5.

6. The statute demands that the state must not discriminate against any student "meeting" on the basis of speech. Use of the limiting term "meeting" mirrors the holding in Widmar, which precluded content-based discriminations only against student "meetings". 102 S. Ct. at 273. Of course, the statute incorporates the Widmar Court's implicit teaching that not only may states not discriminate against student meetings on a content basis, but also that the state may not regulate speech occurring in a meeting on a content basis.

7. By use of the term "non-instructional periods", the statute intends to mean any period of time, either before, during, or after the school day, during which the students who wish to meet as a group for religious purposes do not have classes or other scheduled activities. A time period unscheduled for class for several group members constitutes a "non-instructional period" allowing those members to meet for purposes of this statute, even though other members officially part of the group have classes scheduled, and therefore cannot meet at that time.

8. The statute uses the term "discrimination" instead of the word "exclusion" as used in *Widmar* v. *Vincent* for several reasons. First, the term "discrimination" better represents the hostility toward religion that a school board shows by denying meeting privileges to student religious groups on an equal basis with non-religious groups. Second, "discrimination" is a broader term than "exclusion". The term "discrimination" includes a prior restraint policy of total refusal of access to meeting facilities as was the case in Widmar, as well as after-the-fact penalties against students who chose to attend a religious meeting, and subtler forms of discrimination against student religious groups falling short of a total exclusion from meeting privileges.

9. "Content of the speech at the meeting" is a broad phrase precluding school officials from discriminating against many forms of speech, including educational, ethical, religious or vocational speech but not to the exclusion of speech of other subject matter. Any speech "at the meeting" is subject to the content-neutrality requirement against state discrimination, no matter whether the discrimination would occur before the meeting would be held, during the pendency of the meeting, or after the meeting had ended.

10. The statute's requirement that student meetings must be "voluntary" ensures that a public school will neither use student meetings as a means of infringing the free exercise of religion rights or freedom of speech "right to hear" rights of students, nor as a vehicle for state initiated religious or non-religious activity of the sort that would violate the Establishment Clause.

11. The statute requires that student meetings must be "orderly". The term "orderly" is intended to summarize and represent the right and duty of school officials to administer an educational program without material disruption by students, as established in the case of *Tinker* v. *Des Moines Independent School District*, 393 U.S. 503 (1969).

12. The statute used the phrase "in and of itself unlawful" to designate those types of speech that are not normally protected forms of speech under the First Amendment, such as criminal speech. A school could prevent students from meeting to discuss illegal narcotics deals.

13. Finally, it is important to note that the proposed language of this statute, in contrast to the language of other similar proposed statutes, does not use the word "religious", or purport to "guarantee the rights of religious speech on the same basis as non-religious speech" for several reasons. First and foremost, a statute drawn in strictly neutral terms should draw the support of a number of groups engaged in many different forms of speech better than would a statute drawn on religious terms. Second, the Fifth Circuit seized upon the religious focus of a school board's equal access policy in *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1308 (5th Cir. 1982) to strike down that policy as having an impermissible religious purpose condemned by the Establishment Clause.

On the other hand, there are good reasons for drafting the statute to ban discrimination based on the religious content of speech, rather than banning all content-based discriminations. Banning all content-based discriminations may be undesirable if it precludes school officials from protecting students against influence from witchcraft or other harmful activities and ideas.

14. One possible miscellaneous objection to the proposed bill is that, by requiring public secondary schools to treat speech in a content-neutral manner, the bill might open school doors to the influence of unsavory groups such as religious cults or the communist party. The proposed bill should not fall to this objection, however, for two reasons. First, the fear of undue influence by unpopular groups in the public schools is in large part a fear that adult representatives will use access to school facilities as a means to convert unsuspecting and impressionable students. In contrast, the proposed bill leaves intact the authority and discretion of school officials to regulate the access of adult outsiders to school facilities. The bill requires equal treatment of speech only for student initiated groups with student membership.

Second, unpopular groups already have substantial rights on the public school campus as a matter of constitutional law. For example, at least one court has held the public school officials may not discriminate against communist speech in the school campus because of its content. See *Danskin* v. *San Diego Unified School District*, 28 Cal.2d 536, 171 P.2d 885 (1946). Thus, in actual effect the proposed bill would merely extend to religious speech those privileges that courts now require for other forms of student speech.

QUESTIONS AND ANSWERS CONCERNING A BILL REQUIRING NONDISCRIMINATION AGAINST RELIGIOUS SPEECH IN PUBLIC HIGH SCHOOLS

1. Why should Congress act to ensure equal treatment of religious speech with non-religious speech on public secondary school campuses?

American public schools have a tradition of instilling in our young citizens the value of free exchange of ideas. Our schools have taught that robust debate between differing views leads toward mutual understanding, and fuels the search for truth and meaning. Veneration for the right of free speech has even led one court to require a public school to allow a Communist speaker to lecture students in the public school environment. *Danskin* v. *San Diego Unified School District*, 28 Cal. 2d 536, 171 P.2d 885 (1946).

Yet, for some reason, a recent line of court decisions have singled out religious speech as the one form of speech unworthy of protection in the public schools. Worse, these decisions are only the tip of the iceberg. School officials throughout the country are deciding to ban all religious speech from public schools at an alarming rate.

These officials have banned purely voluntary student-initiated meetings for prayer or Bible study during school club periods or before or after schools. Many officials wrongly believe that such prohibitions are required by Supreme Court decisions forbidding school-initiated, state-sponsored forms of prayer in the schools.

Congress must act to correct this error by school administrators and lower courts, by requiring equal treatment of religious and nonreligious speech under the constitutional principle of content-neutrality.

2. What is the free speech principle of content-neutrality, as it applies to public schools?

The idea of content-neutrality in public schools is that once school officials have created a forum generally open to student speech, they may not discriminate against any person or group regarding use of that forum on the basis of the content of speech. For example, in *Widmar* v. *Vincent*, 102 S. Ct. 269 (1982), the United States Supreme Court said that a public university had created a forum generally open for use by student groups by accommodating group meetings on campus, and having done so, could not deny equal access to religious groups.

3. Why cannot students who want to engage in religious speech, merely go off campus to do so?

This question, while often heard, arises from an assumption which is contrary to the First Amendment. A state facility may not justify a content-based ban on speech on grounds that other forums are available. If this theory were tolerated, religious speech could be restricted to church buildings, as in many Soviet-run countries.

4. To what degree will public school teachers be involved in student religious activity guaranteed by the content-neutrality principle?

To begin, the proposed bill does not purport to guarantee the rights of teachers to engage in religious activity in public schools. It refers only to student rights. Therefore, participation of teachers in student religious meetings will remain subject to the discretion of local school officials.

On the other hand, many public schools may require faculty supervision of student religious meetings. Other schools may allow parents to provide the necessary supervision, or may require no supervision at all. In any event, faculty or parent supervision of student religious groups is perfectly proper under the Establishment Clause as long as the school is not undertaking the shaping of the religious content of the meeting through the supervision process.

5. Does the proposed content-neutrality bill mean that school officials will have to let students engage in religious discussions whenever and wherever they please?

No. The Supreme Court has said that public schools and other state agencies always have discretion to limit the expression of protected forms of free speech by reasonable time, place, and manner restrictions. See *Heffron* v. *ISKCON,* 101 S. Ct. 2559 (1981). The proposed bill would have this discretion intact in public schools, as long as school officials promulgate time, place and manner restrictions in content-neutral terms. See id at 2564.

6. How does the bill apply to public schools that allow no student clubs to use school facilities for club meetings?

The bill would allow any public school to adopt a policy allowing no student group, religious or non-religious, to use school facilities. Schools would simply have to treat religous and non-religious groups the same.

7. What are the "non-instructional periods" during which the content-neutrality principle limits state regulation of student speech?

A non-instructional period is any time, either before or after classroom hours or during the school day, during which students are not scheduled for classroom instruction. Non-instructional periods might include recess, lunch time, study hall, club period, or any other time when a public school allows student clubs or groups to meet in general. By contrast, the principle of content-neutrality would not apply during periods when students are undergoing instruction in or out of the classroom.

8. Why does the proposed bill apply the content-neutrality principle only to public secondary schools, and not to elementary schools?

The proposed bill applies the content-neutrality requirement only to secondary schools in recognition that the immaturity of elementary students may cause them to misperceive a public school's accommodation of religious discussion on an equal basis as non-religious speech as state sponsorship of religion. See *Widmar* v. *Vincent,* 102 S. Ct. 269, 276 n.14. Students in secondary schools generally are accustomed to choosing among a variety of student groups in which to participate; elementary school students generally are not.

Mr. HATFIELD. Now, Madam President, although I have no intention of offering this language as a substitute or as an amendment to the court-stripping proposal before the Senate, which I oppose, I believe it is a sound approach to protecting the first amendment free speech rights of public high school students.

Madam President, I only hope some of my good liberal friends, such as in the American Civil Liberties Union, who are always so anxious to protect people's rights of freedom of speech when it comes out of the left and all the Communist organizations and everything else that they are always anxious to jump up and protect that freedom of speech, will demonstrate a little interest in protecting the freedom of speech of people who want to speak on religious subjects. I see no consistency in all this pious outpourings of protecting the rights of speech when it comes out of the left of the political spectrum, but little interest demonstrated once in a while when the same abridgement of constitutional rights happens to come out of conservative areas.

If such groups as the ACLU and other liberal groups, that I associate with and consider as my friends, would have been just as concerned about the rights, constitutional rights, of the people in the area of freedom of speech on religious subjects, we would not be having this issue here today. We would not have all of these efforts to strip the Supreme Court and other courts of their rightful jurisdiction. We would not have these efforts to amend the Constitution to require a kind of balkanization of the prayer issue, to provide mandatory prayer in States like Alabama, that are at least efforts being made in States like Alabama.

I just do not feel that we can any more ignore the abridgement of the right of freedom of speech when it happens to be a religious subject than we can when it happens to be a political subject.

I want to reemphasize that I put my own political future on the line, put it at stake, when I defended the right of Gus Hall to speak as an American Communist on the campuses of my State universities when, at the same time, people who wanted to speak about Jesus Christ or have a Bible study could not even meet on some of these campuses in this country. That is why we had the Widmar decision of the Supreme Court saying that once those forums are established in any school for the pursuit of information or knowledge on a voluntary basis, the school boards have no right to limit it to nonreligious subjects. The first amendment does not exempt religious subjects from the right of free speech. That is why I offered the amendment because of some of the efforts made by these same school administrators to limit the right of speech on religious subjects, and they have provided forums for nonreligious subjects.

I ask unanimous consent to have my legislative proposal printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2928

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no public secondary school receiving Federal financial assistance, which generally allows groups of students to meet during non-instructional periods, shall discriminate against any meeting of students on the basis of the religious content of the speech at the meeting, if (1) the meeting is voluntary and orderly, and (2) no activity which is in and of itself unlawful is permitted.

SEC. 2. Nothing in this Act shall be construed to permit the United States, or any State or political subdivision thereof to (1) influence the form or content of any prayer or other religious activity and (2) require any person to participate in prayer or other religious activity.

SEC. 3. (a) Any individual aggrieved by a violation of this Act may bring a civil action in the appropriate district court of the United States, or in any State court of competent jurisdiction, for damages or for such equitable relief as may be appropriate, or both.

(b) The district courts of the United States shall have jurisdiction of actions brought under this Act without regard to the amount in controversy.

(c) Each district court of the United States, and each State court of competent jurisdiction, shall provide such equitable relief, including injunctive relief, as may be appropriate to carry out the provisions of this Act.

(d)(1) It shall be the duty of the chief judge of the district (or in his absence, the acting chief judge) in which the case is pending immediately to designate a judge in such district to hear and determine the case. In the event that no judge in the district is available to hear and determine the case, the chief judge of the district, or the acting chief judge, as the case may be, shall certify this fact to the chief judge of the circuit (or in his absence, the acting chief judge), who shall then designate a district or circuit judge of the circuit to hear and determine the case.

(2) It shall be the duty of the judge designated pursuant to this subsection to assign the case for hearing within thirty days after the filing with the court. A hearing of a case shall be held within one hundred and eighty days after the proper filing of the case with the court.

SEC. 4. The provisions of this Act shall supersede all other provisions of Federal law that are inconsistent with the provisions of this Act.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Connecticut.

Mr. WEICKER. Mr. President, will the distinguished Senator yield for a question?

Mr. HATFIELD. Yes.

Mr. WEICKER. I agree in terms of voluntary associations, in terms of courses that teach comparative religion, and so forth. It is not my understanding that this in any way is

touched upon by the substance of the amendment we have before us.

It is not the contention of the Senator from Oregon, is it, that a voluntary prayer or rather a prayer in the public schools is something that would be beneficial by its establishment as it relates to the Constitution? I am finding a little difficulty. I agree with all the Senator says, and I am a very dear friend of his, and I think most of the time we see exactly alike, and I agree with him as to the matter of association and discussion and total freedom in this area of religion.

But really the issue before us is whether or not you are going to have a State prayer in our schools and, of course, I believe anything like that cannot be voluntary because merely the nature of having to attend school makes it involuntary.

Mr. HATFIELD. No; I would respond I am sorry the Senator was not on the floor at the beginning of my remarks. I am making the case under the first amendment based upon the Widmar case handled by the Supreme Court recently, that whenever an institution of education establishes a forum for voluntary associations to rise among the students, political societies, fraternal organizations, whatever they might be, music societies, publication societies, that then that institution has no right to say any voluntary association will be permitted outside of a religious one. They cannot use the facilities of that campus for a religious club. I am not talking about voluntary prayers being offered at the beginning of class or anything like that.

So when the Supreme Court recently ruled that the universities and colleges of this Nation cannot discriminate under the first amendment by determining the content of those organizations, I am trying to apply this to the secondary school programs wherein a secondary school establishes an activities hour that is not in any way intruding into the classwork or the other commitments of the school, but an activity hour where students are permitted to voluntarily organize political clubs, music clubs, drama clubs, and so forth.

I cited three specific cases and two court opinions that have said those forums can be organized for anything but a religious club. They are verboten. I am saying that under the Widmar decision of the Supreme Court that is a violation of the freedom of speech right for those students who want to voluntarily associate themselves in an orderly way under the rules and regulations governing any other club, but in which the school association or board or administration has determined the content and said, "We do not permit that kind of association that has a religious commitment or a religious purpose."

I am saying that this is an example of why we are dealing with this subject today because local school boards have overreacted. The Supreme Court never ruled voluntary prayer out of our public schools in the first instance, as the Senator knows.

But because of the nervous Nellies and the overreaction by a lot of local school boards, they got up and said they cannot do this and they cannot do that and they have swung that pendulum so far that it has gone beyond the question of the right of religious freedom.

I am saying now, as proven by the Widmar case, we have seen that pendulum swing so far it is now a question of the right of freedom of speech, the first amendment, is being violated. I think there is a very direct relationship between them, because it is part of the same overall cultural, political, and social reaction against the Court's action that did not really rule out the right of voluntary prayer but only mandated prayer, which I fully support the Court's ruling on that case. And I fully support the position today that we have no right to strip the Court of that jurisdiction and that we have no practical purpose in trying to balkanize it by directing it as to the State's right to decide whether we will have mandated prayer or not.

I do not want mandated prayer in any school of this country. But, by the same token, I believe that there is a right, freedom of speech, together voluntarily to have an association to discuss religious subjects, whether it is Buddhism or Christianity, or Judaism, or whatever religion it may be.

Mr. WEICKER. I thank the distinguished Senator from Oregon. My query was not in the nature of being antagonistic to what the Senator from Oregon has said, but rather agreeing with the premises he laid forth there and having it fully explained.

As I recall, when I attended Yale University, I remember the Hillel Foundation, which represented the Jewish community and the Thomas Moore Society, representing the Catholics, et cetera. They were part of the structure of these organizations that had the opportunity to get together to pursue their particular faiths. And I could not agree more, because I think the point we are trying to make on the floor is that in no way do any of us want to restrict freedom of religion. We want to expand freedom of religion, it only being my opinion that any time you have a state-dictated prayer, that is restrictive of freedom of religion.

Mr. HATFIELD. That is restriction and not expansion.

Mr. President, I ask unanimous consent that I may be allowed to yield the floor to the Senator from Montana at this point without this being construed as the end of a speech for the purposes of the two-speech rule.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I wish to thank the Senator from Oregon for his most recent series of contributions to this subject. I find the latest proposal by the Senator from Oregon very attractive.

I, too, have been bothered by the trend and direction of Supreme Court decisions which go so far in protecting the establishment clause in the first amendment that it is beginning to impinge upon the free exercise clause as well as the free speech provisions of that amendment. I see nothing wrong with activity periods or after school periods when students can come together to exercise their religious prerogatives. I want to commend the Senator from Oregon for taking that approach. I think it is a very salutary and very valuable contribution to resolving some of these dilemmas. I thank the Senator from Oregon.

Mr. HATFIELD. I thank the Senator from Montana.

Mr. BAUCUS. Mr. President, when I last spoke this morning, I was reading into the RECORD portions of a letter from Attorney General William French Smith written to the chairman of the Senate Judiciary Committee on May 6, 1982. I was referring to those portions of the letter which argue against statutes which limit Supreme Court jurisdiction over Federal constitutional questions. The letter pointed out the branches of Government, the executive and the legislative.

The Attorney General was pointing out that, as a matter of essential functions, the judicial branch is probably inherently more weak than the other two branches; that it has less to protect itself with, less to defend itself with from onslaughts of pursuit of the other two branches of Government.

In that regard, the Attorney General quoted Alexander Hamilton in Federalist No. 78 on this very point, the underlying point that our Founding Fathers certainly intended to build into the Constitution measures to protect the judicial branch from onslaughts from the executive and the legislative and that they attempted to prevent the legislative branch from undermining the core functions of the judicial branch, particularly the core functions of the U.S. Supreme Court.

This is the quotation from Alexander Hamilton in Federalist No. 78 pointing out the inherent weakness of the judicial branch and, therefore, the need to strengthen the judicial branch from efforts on the part of the other two branches to undermine that judicial branch.

Whoever attentively considers the different departments of power must perceive

that, in a government in which they are separated from each other, the judiciary, from the nature of its functions, will always be the least dangerous to the political rights of the Constitution; because it will be least in a capacity to annoy or injure them. The executive not only dispenses the honors but holds the sword of the community. The legislature not only commands the purse but prescribes the rules by which the duties and rights of every citizen are to be regulated. The judiciary, on the contrary, has no influence over either the sword or the purse; no direction either of the strength or of the wealth of the society, and can take no active resolution whatever. It may truly be said to have neither Force nor Will but merely judgment; and must ultimately depend upon the aid of the executive arm even for the efficacy of its judgments.

That is Alexander Hamilton in Federalist No. 78 pointing out the essential weaknesses of the judicial branch compared to the other two branches of Government, therefore implying that our Founding Fathers intended to strengthen the judiciary, to make it truly a coequal branch of Government; that is, not to allow the Congress to willy-nilly, in its own discretion, undermine the power of the Supreme Court's right to decide constitutional questions.

Continuing in the letter, Mr. President, from Attorney General William French Smith to Senator THURMOND on May 6, 1982:

As a consequence of this view, Hamilton believed that it was necessary for the judiciary to remain truly distinct from the Legislature and the Executive. For I agree that "There is no liberty, if the power of judging be not separated from the legislative and executive power." *Id.*, quoting Montesquieu's *Spirit of Laws*. Thus, he concluded: "The complete independence of the courts of justice is peculiarly essential in a limited Constitution."

It was in recognition of the inherent weakness of the judiciary, particularly as contrasted with the inherent power of the legislature, that the farmers determined to give special protections to the judiciary not enjoyed by officials of the other branches. Federal judges were given lifetime positions during good behavior, and were protected against siminution of salary while in office. The purpose of these provisions was largely to provide the judiciary, as the weakest Branch, with the necessary tools for self-protection against the encroachments of the other branches.

The notion that the Exceptions Clause grants Congress plenary authority over the Supreme Court's appellate jurisdiction cannot easily be reconciled with these principles of separation of powers. If Congress had such authority, it could reduce the Supreme Court to a position of impotence in the tripartite constitutional scheme. The Court could be deprived of its ability to protect its core constitutional functions against the power of Congress. The salary and tenure protections so carefully crafted in Article III could be rendered virtually meaningless in light of the power of the Congress simply to eliminate appellate jurisdiction altogether, or in those areas where the Court's decision displeased the legislature.

It is significant that while the Framers did not focus on the Exceptions Clause, they did point to the impeachment power as "a complete security" against risks of "a series of deliberate usurpations on the authority of the legislature," *Federalist* No. 31.

To repeat, it is significant that while the framers did not focus on the exceptions clause, they did point to the impeachment power as "a simple, complete, security" against risks of "a series of deliberate usurpations of the authority of the legislature."

That is, the framers felt that the impeachment power was in itself a proper route to follow in trying to overturn what would influence decisions on the Supreme Court rather than giving the legislature the power to overturn such Supreme Court decision.

In light of these basic considerations, it seems unlikely that the Framers intended the Exceptions Clause to empower Congress to impair the Supreme Court's core functions in the constitutional scheme. Even if some of the Framers could have intended this, it is improbable that the Exceptions Clause could have been approved by the Convention without debate or controversy, or indeed without any explicit statement by anyone associated with the framing or ratification of the Constitution that such a deviation from the carefully crafted separation of powers mechanisms provided elsewhere in the Constitution were intended.

Look at that, Mr. President. There was no debate about how much power to give to the legislative branch, except as I pointed out earlier, a 6-to-2 vote the Committee on Detail expressly voted against giving the legislature discretion to undermine the Constitution.

Mr. PERCY. Mr. President, will my distinguished colleague mind yielding to me without losing his right to the floor so that I can introduce a bill on behalf of myself and a number of our colleagues who wanted this legislation introduced today?

Mr. BAUCUS. Mr. President, I will be happy to so yield to the Senator from Illinois so long as the continuation of my speech will not be considered as a second speech and that I will be recognized upon the termination of the remarks by the Senator from Illinois.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. PERCY at this point in connection with the introduction of legislation are printed under "Routine Morning Business," later in today's RECORD.)

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, before the last interlude, I was commenting on a letter from the Attorney General, William French Smith, which he sent to the chairman of the Senate Committee on the Judiciary in opposition to these court-stripping bills, particularly the school prayer bill. The portion of the letter that I was referring to points out how the judiciary branch, among our three branches of Government, is inherently more weak than the other two branches of Government. I quoted, as did the Attorney General, a portion of the Federalist Papers where Alexander Hamilton pointed out this essential weakness. At this point, I would like to continue with the letter.

Mr. BAKER. Mr. President, will the Senator yield to me without losing his right to the floor and without counting this as a second speech?

Mr. BAUCUS. Yes, Mr. President.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I am prepared to go off this bill shortly and go into a period for the transaction of routine morning business if the Senator is agreeable.

Mr. BAUCUS. That will be fine, Mr. President, as far as this Senator is concerned.

Mr. BAKER. Mr. President, the Senator had indicated to me earlier that he would like to have a unanimous-consent request that he be next recognized. I regret to advise him that we cannot clear that at this time, but I urge the Senator to be on the floor. I expect he probably would not have trouble being recognized. I know of no effort to deprive him of recognition, which, of course, no Senator could do in any event.

Mr. BAUCUS. I thank the Senator for making the inquiry and informing the Senator. Yes; I will be on the floor and will be seeking recognition as soon as we return to this bill.

Mr. BAKER. I thank the Senator.

WITHDRAWAL OF CLOTURE MOTION

Mr. BAKER. Mr. President, earlier there was a technical mixup in the cloture motion that was filed. I have cleared this with the minority leader.

I ask unanimous consent that the cloture motion filed earlier today on the Helms amendment, 2031, as modified, be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOTURE MOTION

Mr. BAKER. Mr. President, I send a new cloture motion to the desk and ask the clerk to report.

The PRESIDING OFFICER. The clerk will report the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt,

Paula Hawkins, Orrin G. Hatch, Bob Kasten, Harry F. Byrd, Jr., Steve Symms, S. I. Hayakawa, Don Nickles, Strom Thurmond, Charles E. Grassley, Jake Garn, Malcolm Wallop, and Howard Baker.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I now ask unanimous consent that there be a period for the transaction of routine morning business to extend not past 2 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, before we do the wrapup, I understand that the distinguished Senator from Maryland may seek recognition for the introduction of a matter.

TRIBUTE TO EARL WEAVER

Mr. MATHIAS. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 468) to pay tribute to Earl Weaver.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the request to proceed to the immediate consideration of the resolution as far as this side is concerned.

There being no objection, the Senate proceeded to consider the resolution, which was submitted by Mr. MATHIAS, for himself and Mr. SARBANES.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 468) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 468

Whereas, Earl Weaver, manager of the Baltimore Orioles for the past 13½ years, has led the Birds to six eastern division championships, four American League pennants and one world championship, and

Whereas, Earl's won-lost percentage ranks third on the all time list, and he is tied with the Yankees' great Joe McCarthy and trails only the immortal Connie Mack in winning 100 games or more per season, and

Whereas, Earl's intensity for inspiring Oriole victories by feisty finagling and limitless legerdemain has won the unflagging support of Oriole fans and the ire of umpire and opponent, and

Whereas, Earl has achieved distinction in alternate careers as author, Shakespeare scholar and nurturer of prize Maryland tomatoes, which in yonder bullpen groweth, and

Whereas, Earl has managed the same team for a longer period than any current manager: Now, therefore, be it

Resolved That the United States Senate wishes to honor and pay tribute to Earl Weaver on the occasion of "Thanks Earl Day" Sunday September 19, 1982 at Memorial Stadium, Baltimore, Maryland.

SEC. 2 The Secretary of the Senate shall transmit a copy of this Resolution to Earl Weaver.

Mr. MATHIAS. Mr. President, are we now in morning business?

The PRESIDING OFFICER. We are now in routine morning business.

TRIBUTE TO JOSEPH MEYERHOFF

Mr. MATHIAS. Mr. President, in the Book of Genesis we are told the story of Joseph, and one of the first things that we learn about Joseph is that he was resplendent in a coat of many colors, a coat so famous that its description has lasted for 5,000 years. During that period of time, people have talked and read about Joseph and his coat of many colors.

We have in Maryland, in the city of Baltimore, another Joseph who also wears a coat of many colors, a coat not of wool or cotton or linen but a coat fashioned by himself out of the fabric of life and consisting of the many contributions that he has made during a long and fruitful life. The colors of this coat consist of philanthropy in many parts of the world, charities in the United States, schools and hospitals in the State of Israel. They include the homes that he has helped to construct where families now gather and community facilities that serve daily neighborhood needs.

Most recently, they include a great symphony hall which was dedicated last night in the city of Baltimore. The Baltimore Symphony acquired its own hall largely as a result of the personal efforts of Joseph Meyerhoff.

His is a coat of many colors, more glorious than that of the original Joseph. I suspect that the reason that Joseph of the Bible is remembered is not solely because of his coat but because of the kind of man who wore the coat, and that is why Joseph Meyerhoff will be remembered, because of the kind of man that he is, a man of dedication and vision and commitment. He is in many ways a Biblical figure.

He and his wife Rebecca, who have worked so hard together for the Baltimore Symphony and for the arts, are patriarchal in the Biblical sense; they lead a large family of children and grandchildren and nieces and nephews, each of whom makes a personal and varied contribution to the community.

Like the Joseph in Genesis, we will long remember Joseph Meyerhoff.

Mr. President, I ask unanimous consent that an editorial which appeared in the Baltimore Sun this morning be included in the RECORD at the conclusion of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Sept. 17, 1982]

MEYERHOFF HALL

The Joseph Meyerhoff Symphony Hall that had its gala opening last night enlarges and enriches Baltimore. It is a better—and may prove an ideal—place to present symphony music. It will improve the dynamic between players and audience. The result should be finer music from a better orchestra enjoying greater public support.

The departure of the Baltimore Symphony in turn frees the Lyric Theater to fulfill its destiny as a fully equipped large musical theater for opera, musical comedy and dance. That is a function no other house in Baltimore can provide. The Lyric's reopening later in the season, delayed by a strike at the seat manufacturer, will make clear that Baltimore is getting two large performance halls, each better than the old Lyric.

Together, they will present an array of performing arts in coming years that could not have been contemplated earlier. More world class companies will come. More people will attend them. Baltimore will grow in amenities and in reputation. Too much can be made of how much higher Baltimore will rise in some cultural pecking order, however. Other cities are also adding to cultural plant. For Baltimoreans, the absolute improvement here is what matters most.

Meyerhoff Hall is a tribute to the relentless determination of Joseph Meyerhoff to see it built, as well as to his boundless generosity. The large state contribution resulted from the statesmanship of legislators from every part of Maryland who understood the value of the Baltimore Symphony to their communities.

The hall is one pudding the proof of which is in the hearing. Both planners and architects got the priorities right. Other halls are more expensive, prepossessing outside, grander in their lobbies. Meyerhoff Hall does not overwhelm its neighbors. It complements their rectangularity with its ovals. From a distance, it seems almost small.

Inside, in the great room designed for performing and hearing symphony music, Meyerhoff Hall seeks greatness. This building was designed for one purpose and from the inside out. Acoustics dictated the shape of that room, the size and shape of the balconies as well as the clouds. Its pleasing, somewhat Art Deco style is a happy byproduct.

Acoustics is rapidly becoming more than an occult art. The day is past when a fabled conductor could say, "I don't understand acoustics; neither do architects." Meyerhoff Hall is built for sound in ways that the halls of Lincoln Center in New York and Kennedy Center in Washington were not. Baltimore is a greater city than it was yesterday.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Alabama.

A METHODIST DAY OF PRAYER FOR THE WORLD

Mr. HEFLIN. Mr. President, on Sunday the 19th of September, this very weekend, millions of people from all corners of the globe will be praying that the walls of division which stand between the countless peoples of the world will fall.

The World Methodist Council and the religious publication, "The Upper Room," have called for Sunday to be a day of "Prayer for the World." More than a quarter of a million Methodist congregations spanning the world are expectd to answer the call by observing special prayer services on this day.

In places which are particularly symbolic of the tragedy caused by divisions among people, such as Berlin and Belfast, special prayer events have been planned. In West Berlin, the site of the prayer service will be the Church of the Wall, the "Ruferkirche." This church itself is particularly symbolic for this purpose, for it was formed and built by Methodists in West Berlin who were cut off from their chosen places of worship in East Berlin by the infamous Berlin Wall.

According to Rev. Eddie Fox, North American Regional Secretary for World Evangelism for the World Methodist Council, the millions of Methodists observing the day of prayer will be joined by more than 8 million readers of "The Upper Room."

This daily devotional guide is published in many languages around the world, and has chosen to focus on the theme of "Prayer for the World" during the time leading up to the ceremonies on Sunday in an attempt to fully express the world's needs in prayer.

The day of "Prayer for the World" will focus on four specific issues which serve to divide mankind. These four issues are poverty, racism, war, and spiritual darkness.

I believe it is important for each of us to realize that, although a Berlin or a Belfast may be a more dramatic illustration of the divisions of people, these four issues are also a tragic and divisive influence in this very country, and, indeed, in all areas of our country. These are problems of the world, not of any particular nation or nations—men and women and children in all corners of the world are suffering, and are all in need of help through prayer.

With economic problems and unemployment seeming to increase everywhere, the pains of poverty are naturally increasing. Hunger and physical suffering are multiplying. Countless people continue to suffer from racial and political persecution and oppression. I cannot believe that there is a member of this body, or a person anywhere who would not pay a great price to see an end put to all this suffering.

As the son of a Methodist minister, I have long been a believer in the positive power of prayer.

I hope that on this coming Sunday millions will answer the call of the World Methodist Council, and remember the millions of tragically divided people around the world—and remember them not only in their thoughts but also in their prayers.

Mr. BAKER. Mr. President, I have a few routine matters to take care of unless somebody is seeking recognition.

Mr. President, both of these items I believe have been cleared by the minority leader, and I make the request now for the benefit of the Senate and the acting minority leader and others.

CORRECTIONS IN ENROLLMENT OF H.R. 3517

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 405.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 405) directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 3517.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BOUNDARY OF CIBOLA NATIONAL FOREST

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 778, S. 2405.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2405) to further amend the boundary of the Cibola National Forest to allow an exchange of lands within the city of Albuquerue, N. Mex.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause and insert the following:

That, in order to expedite the acquisition of land authorized by the Act of November 8, 1978 (92 Stat. 3095, as amended), that Act is hereby amended as follows:

(a) Amend section 1 to read as follows:

"A tract of land containing that part of the land described in the Elena Gallegos Grant, illustrated on maps on file with the Chief of the Forest Service, Department of Agriculture, lying east of a line depicted on plat of survey dated April 1982, prepared under the supervision of A. Dwain Weaver, N.M.P.L.S. No. 6544, and further described as beginning at the closing corner between sections 35 and 36 of township 11 north, range 4 east, New Mexico principal meridian, on the south boundary of said grant and extending north 00 degrees 03 minutes 21 seconds east, 2,670.40 feet to a point; thence north 00 degrees 03 minutes 21 seconds east, 1,244.73 feet to the projected section corner common to sections 25, 26, 35, and 36; thence continuing along section line common to said sections 25 and 26, north 00 degrees 17 minutes 37 seconds east, 1,346.11 feet to a point; thence leaving said section line and continuing south 84 degrees 40 minutes 00 seconds east, 178,00 feet to a point; thence south 53 degrees 20 minutes 00 seconds east, 218.00 feet to a point; thence north 52 degress 50 minutes 00 seconds east, 364.00 feet to a point; thence east 225.00 feet to a point; thence north 66 degrees 00 minutes 00 seconds, east, 1,244.14 feet to a point; thence north 06 degrees 12 minutes 25 seconds west, 1,765.08 feet to a point; thence north 07 degrees 27 minutes 00 seconds west, 2,008.00 feet to a point; thence south 80 degrees 38 minutes 00 seconds west, 984.00 feet to a point; thence south 64 degrees 45 minutes 00 seconds west, 621.00 feet to the projected section corner common to sections 23, 24, 25, and 26; thence north 00 degrees 44 minutes 22 seconds west, 1,382.97 feet to the southeast corner of Sandia Heights South, unit 14, as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico on February 12, 1975; thence continuing along the easterly boundary of said unit 14, north 00 degrees 04 minutes 20 seconds east, 1,951.63 feet to the notheast corner of said unit 14, said corner also being the southeast corner of Sandia Heights South, unit 10 as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico on March 11, 1974; thence continuing along the easterly boundary of said unit 10, north 00 degrees 02 minutes 31 seconds east, 1,493.53 feet to the northeast corner of said unit 10, said corner also being the southeast corner of Sandia Heights South, unit 3, as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico on August 3, 1971; thence continuing along the easterly boundary of said unit 3, north 00 degrees 03 minutes 29 seconds east, 1,867.10 feet to the northeast corner of said unit 3, said corner also being the southeast corner of Sandia Heights South, unit 2, as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico on October 20, 1970; thence continuing along the easterly boundary of said unit 2, north 00 degrees 03 minutes 29 seconds east, 1,869.70 feet to the northeast corner of said unit 2, said corner also being the southeast corner of Sandia Heights South, as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico on June 20, 1966; thence continuing along the easterly boundary of said Sandia Heights South, north 00 degrees 03 minutes 29 seconds east, 1,725.76 feet to the northwest of the tract herein described, said

corner being a point on the northerly boundary of the Elena Gallegos Grant; thence continuing along said Grant boundary, south 81 degrees 06 minutes 04 seconds east, 1,983.01 feet to a point; thence south 81 degrees 06 minutes 04 seconds east, 481.50 feet to the 7½-mile corner on the north boundary of said Grant; thence south 81 degrees 06 minutes 04 seconds east, 213.67 feet to the southeast corner of the Sandia Pueblo Grant; consisting of 7,935.84 acres, more or less:"."

(b) Add a new section 5 to read as follows:

"SEC. 5. (a) Notwithstanding any other provision of law, the Secretary of Agriculture, in cooperation with the Secretary of the Interior, is authorized and directed to acquire the lands described in section 1 in lieu of purchase as authorized by section 4 of this Act by exchanging with the city of Albuquerque so much of the Federal lands administered by the Forest Service and Bureau of Land Management in the State of New Mexico and consisting of approximately 32,800 acres, more or less, as the Secretary of Agriculture and the Secretary of the Interior determine are needed to equal the value of the land conveyed by the city of Albuquerque.

"(b) The lands to be conveyed are subject to valid existing rights.

"(c) Transactions necessary to effect the exchange authorized by this section shall be made pursuant to the provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743) and other applicable law except to the extent necessary to expeditiously carry out the provison of ths section and shall be made within 90 days of enactment of this Act: Provided, That the rights and responsibilities of the respective owners shall remain with such owners until such time as the conveyances are executed.".

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

UP AMENDMENT NO. 1263

(Purpose: Technical amendment to S. 2405, as reported)

Mr. BAKER. Mr. President, I have a technical amendment which I send to the desk.

Mr. LONG. Mr. President, will the Senator explain the nature of the committee amendment? Is it similar to the bill or something different?

The PRESIDING OFFICER. The committee amendment struck the language of the original bill and inserted new committee language.

Mr. LONG. Mr. President, will the majority leader give me some idea what the new language to be inserted is?

Mr. BAKER. Mr. President, the Senator from Louisiana has me at a disadvantage, because this was cleared for action on both sides by unanimous consent.

I withdraw my request for consideration of this matter.

Mr. LONG. Does the Senator have a memorandum which would show what this is?

Mr. President, I suggest that we return to this in a few minutes.

Mr. BAKER. Mr. President, this is all I have, so I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I understand that the Senator from Louisiana now has examined the amendment which is at the desk. Is he prepared now to proceed?

Mr. LONG. Yes.

Mr. BAKER. I send the amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for Mr. MCCLURE, proposes an unprinted amendment numbered 1263.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, delete lines 4 through 25 and on page 4, delete lines 1 through 25, and on page 5, delete lines 1 through 23, and insert in lieu thereof:

Delete all of section 1 and insert the following language in lieu thereof:

All that portion of the Elena Gallegos Grant, lying east of a line depicted on a subdivision plat entitled "Summary Plat of a Portion of the Elena Gallegos Grant", (the "Summary Plat") recorded in the office of County Clerk of Bernalillo County, New Mexico, on June 29, 1982, in Volume C19, Folio 183, consisting of eight (8) pages, said line being the western limits of the tract described herein being further described as follows:

Beginning at the closing corner between secs. 35 and 36 of T. 11 N., R. 4 E., NMPM, on the south boundary of said Grant; thence N. 00°03'21" E., 2,670.40 feet to a point; thence N. 00°03'21" E., 1,244.73 feet to the projected section corner common to secs. 25, 26, 35, and 36; thence continuing along the projected section line common to said secs. 25 and 26, N. 00°17'37" E., 1,346.11 feet to a point; thence leaving said section line and continuing S. 84°40'00" E., 178.00 feet to a point; thence S. 53°20'00" E., 218.00 feet to a point; thence N. 52°50'00" E., 364.00 feet to a point; thence East 225.00 feet to a point; thence N. 66°00'00" E., 1,244.14 feet to a point; thence N. 06°12'25" W., 1,765.08 feet to a point; thence N. 07°27'00" W., 2,008.00 feet to a point; thence S. 80°38'00" W., 984.00 feet to a point; thence S. 64°45'00" W., 621.00 feet to the projected section corner common to secs. 23, 24, 25, and 26; thence N. 00°44'22" W., 1,382.97 feet to the southeast corner of Sandia Heights South, Unit 14, as the same is shown and designated on the plat filed in the office of the county clerk of Bernalillo County, New Mexico, on February 12, 1975; thence continuing along the easterly boundary of said Unit 14, N. 00°04'20" E., 1,951.64 feet to the northeast corner of said Unit 14, said corner also being the southeast corner of Sandia Heights South, Unit 10, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on March 11, 1974; thence continuing along the easterly boundary of said Unit 10, N. 00°02'31" E., 1,493.53 feet to the northeast corner of said Unit 10, said corner also being the southeast corner of Sandia Heights South, Unit 3, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on August 3, 1971; thence continuing along the easterly boundary of said Unit 3, N. 00°03'29" E., 1,867.10 feet to the northeast corner of said Unit 3, said corner also being the southeast corner of Sandia Heights South, Unit 2, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on October 20, 1970; thence continuing along easterly boundary of said Unit 2, N. 00°03'29" E., 1,869.70 feet to the northeast corner of said Unit 2, said corner also being the southeast corner of Sandia Heights South, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico on June 20, 1966; thence continuing along the easterly boundary of said Sandia Heights South, N. 00°03'29" E., 1,725.76 feet to the Northwest corner of the tract herein described, said corner being a point on the northerly boundary of the Elena Gallegos Grant: *Provided, however,* That the tract of land described in this section not be included within the Cibola National Forest until the Secretary of Agriculture determines that the City of Albuquerque, New Mexico, has acquired a tract of land containing approximately 640 acres located in such tract for open space or city park use."

● Mr. McCLURE. Mr. President, subsequent to the Senate Energy and Natural Resources Committee ordering S. 2405 as amended reported (Senate Report No. 97-539), the following letter was received from the U.S. Forest Service on August 25, 1982. I ask that the letter be printed in the RECORD.

The letter follows:

U.S. DEPARTMENT OF AGRICULTURE,
FOREST SERVICE,
Washington, D.C., August 25, 1982.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: On June 3, 1982, the U.S. Department of Agriculture provided reports on S. 2021 and S. 2405, two bills pertaining to Federal acquisition of a portion of the Elena Gallegos Grant east of Albuquerque, New Mexico.

Our reports offered technical and clarifying amendments in the form of a substitute bill, a copy of which is enclosed. Of major concern was the need to amend Section 1 of P.L. 95-614 amending the boundary of the Cibola National Forest. Section (a) of our substitute bill included a metes and bounds survey description as illustrated on a plat of survey dated April 1982, prepared under the supervision of A. Dwain Walker, N.M.P.L.S. No. 6544.

Subsequent to our June 3 report and to the May 27 hearing before the Public Lands and Reserved Water Subcommittee, Mr. Weaver's plat of survey was revised on a subdivision plat entitled "Summary Plat of a Portion of the Elena Gallegos Grant" and

recorded in the Office of the County Clerk of Bernalillo County, New Mexico, on June 29, 1982, in Volume C19, Folio 183.

The revised June 1982 plat was used in the description of the property conveyed from the City of Albuquerque to the United States. A copy of the deed signed on July 23, 1982, and recorded in Bernalillo County Record Book D166-A, pages 180-184 is enclosed.

The June 1982 plat and the July 23 deed describe the same lands as shown on the April 1982 plat and in our substitute bill. The proposed amended boundary of the Cibola National Forest does not change. The on-the-ground monuments have not changed. The surveyor merely made some technical changes in the plat.

To ensure that there is uniformity in the pending legislation, in the plat recorded with the county clerk in Volume C19, Folio 183, and in the deed to the United States recorded in Book D166-A, pages 180-184, we recommend that Section (a) of our June 3 substitute bill be revised by using the description used in the 2nd and 3rd paragraphs of the deed to the United States. We have identified this description in the enclosed copy of the Special Warranty Deed.

We regret any inconvenience this may have caused; however, at the time of the hearing the technical changes in the plat were not known.

Sincerely,

GARY E. CARGILL,
Associate Deputy Chief.

Enclosures.

SPECIAL WARRANTY DEED

The city of Albuquerque, a New Mexico municipal corporation, Grantor, acting pursuant to the General Exchange Act of March 20, 1922 (42 Stat. 465, as amended; 16 U.S.C. 485-486) and the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2756; 43 U.S.C. 1716-1717), and in consideration of an exchange of certain public and National Forest lands equal in value to the lands herein conveyed, hereby grants to the United States of America, c/o USDA Forest Service, 517 Gold Avenue S.W., Albuquerque, New Mexico 87102, Grantee, and its assigns, the following described real estate situated in Bernalillo County, New Mexico:

All that portion of the Elena Gallegos Grant, lying east of a line depicted on a subdivision plat entitled "Summary Plat of a Portion of the Elena Gallegos Grant", (the "Summary Plat") recorded in the office of the County Clerk of Bernalillo County, New Mexico, on June 29, 1982, in Volume C19, Folio 183, consisting of eight (8) pages, said line being the western limits of the tract described herein being further described as follows:

Beginning at the closing corner between secs. 35 and 36 of T. 11 N., R. 4 E., NMPM, on the south boundary of said Grant; thence N. 00°03'21" E., 2,670.40 feet to a point; thence N. 00°03'21" E., 1,244.73 feet to the projected section corner common to secs. 25, 26, 35, and 36; thence continuing along the projected section line common to said secs. 25 and 26, N. 00°17'37" E., 1,346.11 feet to a point; thence leaving said section line and continuing S. 84°40'00" E., 178.00 feet to a point; thence S. 53°20'00" E., 218.00 feet to a point; thence N. 52°50'00" E., 364.00 feet to a point; thence East 225.00 feet to a point; thence N. 66°00'00" E., 1,244.14 feet to a point; thence N. 06°12'25" W., 1,765.08 feet to a point; thence N. 07°27'00" W., 2,008.00 feet to a point; thence S. 80°38'00" W., 984.00 feet to a point; thence S. 64°45'00" W., 621.00 feet to the projected section corner common to secs. 23, 24, 25, and 26; thence N. 00°44'22" W., 1,382.97 feet to the southeast corner of Sandia Heights South, Unit 14, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on February 12, 1975; thence continuing along the easterly boundary of said Unit 14, N. 00°04'20" E., 1,951.64 feet to the northeast corner of said Unit 14, said corner also being the southeast corner of Sandia Heights South, Unit 10, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on March 11, 1974; thence continuing along the easterly boundary of said Unit 10, N. 00°02'31" E., 1,493.53 feet to the northeast corner of said Unit 10, said corner also being the southeast corner of Sandia Heights South, Unit 3, as the same is shown and designated on the plat filed in the office of the Count Clerk of Bernalillo County, New Mexico, on August 3, 1971; thence continuing along the easterly boundary of said Unit 3, N. 00°03'29" E., 1,867.10 feet to the northeast corner of said Unit 3, said corner also being the southeast corner of Sandia Heights South, Unit 2, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on October 20, 1970; thence continuing along easterly boundary of said Unit 2, N. 00°03'29" E., 1,869.70 feet to the northeast corner of said Unit 2, said corner also being the southeast corner of Sandia Heights South, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico on June 20, 1966; thence continuing along the easterly boundary of said Sandia Heights South, N. 00°03'29" E., 1,725.76 feet to the Northwest corner of the tract herein described, said corner being a point on the northerly boundary of the Elena Gallegos Grant.

Together with rights of ingress and egress for National Forest administration and for public access to and across the property herein conveyed, along and within a fifty (50) foot access it identified on the Summary Plat as Tracts D and E from Tramway Boulevard easterly to the westerly boundary of the 640-acre tract identified as Excepted Parcel 1 following:

Less and excepting therefrom;

Parcel 1—A certain tract of land situated within the boundaries of the parcel being conveyed, depicted on the Summary Plat as "Tract B, 640 Acre Park Site", and being more particularly described by New Mexico State plane grid bearings (Central Zone) and ground distances as follows:

Beginning at the northwest corner of the tract herein described, the TRUE POINT OF BEGINNING, from whence the mile post 7½ on the northerly boundary of the Elena Gallegos Grant bears N. 00°47'56" E., 3,720.65 feet and S. 81°06'04" E., 481.50 feet; thence, N. 87°59'21" E., 1,331.79 feet to a point; thence, S. 21°17'39" E., 2,458.70 feet to a point; thence, N. 88°22'21" E., 3,212.50 feet to a point; thence, S. 02°20'39" E., 1,677.40 feet to a point; thence, S. 40°25'21" W., 4,494.50 feet to a point, thence, S. 01°05'39" E., 572.07 feet to the southeast corner of the tract herein described, thence continuing along the southerly boundary of the tract herein described, S. 88°54'21" W., 2,505.78 feet to the southwest corner of the tract herein described; thence, N. 00°41'29" W., 7,870.84 feet to the TRUE POINT OF BEGINNING, containing 640 acres, more or less.

Parcel 2—A certain tract of land situated within the boundaries of the parcel being conveyed, depicted on the Summary Plat as "Tract C. Bear Canyon Scenic Easement Area", and being more particularly described by New Mexico State plane grid bearings (Central Zone) and ground distances as follows: Beginning at the southwest corner of the tract herein described, the TRUE POINT OF BEGINNING, from whence the closing corner of secs. 35 and 36, T. 11 N., R. 4 E., NMPM (having New Mexico State plane coordinates, Central Zone, X = 431,287.46; Y = 1,504,207.17) on the south boundary of the Elena Gallegos Grant, bears S. 40°02'20" W., 7,105.15 feet; thence N. 01°05'39" W., 860.00 feet to the northwest corner of the tract herein described, thence continuing along the northerly boundary of the tract herein described, N. 77°27'19" E., 1,447.55 feet to a point; thence, S. 64°18'38" E., 2,801.07 feet to a point; thence, N. 43°01'28" E., 3,065.96 feet to a point; thence, N. 77°27'19" E., 500.00 feet to the northeast corner of the tract herein described; thence S. 07°24'44" W., 1,923.59 feet to a point; thence, S. 39°56'46" W., 4,099.01 feet to the most southerly corner of the tract herein described; thence, N. 29°36'19" W., 2,409.57 feet to a point; thence, N. 75°08'13" W., 2,514.52 feet to the TRUE POINT OF BEGINNING, containing 270 acres, more or less.

Containing, after recognizing the exceptions, 7,025.84 acres, more or less, with special warranty covenants.

Subject to:

1. Reservation to the Albuquerque Academy or its assigns of all interest in and to all mineral rights (other than those reserved by the United States of America by Patent) and all oil and gas rights which mineral and oil and gas rights are subject to the regulations of the Secretary of Agriculture (35 CFR 251.15) "Conditions, Rules and Regulations to Govern Exercise of Mineral Rights Reserved in Conveyances to the United States" as the same may be amended from time to time; provided that no surface occupancy for the purpose of extracting minerals or oil and gas shall occur in the exercise of the rights reserved in this paragraph 1 on the portion of the lands herein conveyed that are included within the Sandia Mountain Wilderness so long as such lands within the Sandia Mountain Wilderness are withdrawn from all forms of surface entry or apropriation under the mining laws and from the operation of the mineral leasing laws of the United States, but the preceding clause shall not prohibit Grantor from nonmotorized entry at any time upon the lands conveyed within the Sandia Mountain Wilderness to explore and prospect for minerals, oil, and gas using non-surface disturbing methods, or from appropriating minerals or oil and gas from such lands within the Sandia Mountain Wilderness by methods other than actual surface entry from the Sandia Mountain Wilderness lands; and provided further that if the mining and/or mineral leasing laws at any time permit entry onto and appropriation from the Sandia Mountain Wilderness lands for the purpose of mining or mineral oil and gas extraction, Grantor, its successors and assigns may enter upon such lands of the Sandia Mountain Wilderness for the purpose of mining or extracting minerals and oil and gas to the extent permitted by law.

2. Reservation by the City of Albuquerque, Grantor, of a fifty (50) foot access road, depicted on the Summary Plat as Tract E, across a portion of the land herein conveyed

to provide public access to the 640-acre parcel identified as Excepted Parcel 1, described preceding, subject to the rights granted the United States identified preceding.

3. Rights of ingress and egress to the 270-acre parcel identified as Excepted Parcel 2, described preceding, within and along the roadway depicted on the Summary Plat as the Bear Canyon Access Road Easement, as previously reserved by the Albuquerque Academy.

4. An easement, outstanding in the City of Albuquerque, for the existing Empedito Canyon training dike, as recorded on September 26, 1978, Misc, Bk. 641, pages 101-104, records of the County Clerk of Bernalillo County.

5. An easement, outstanding in the Albuquerque Metropolitan Arroyo Flood Control Authority, for construction and maintenance of the Upper Bear Canyon Training Dike, as recorded on April 25, 1979, Misc. Bk. 684, pages 789-792, records of the County Clerk of Bernalillo County, together with rights of access along the Access Road Easement to the Training Dike as depicted on the Summary Plat.

6. Reservation by the City of Albuquerque, Grantor, of an easement for a City water reservoir site, depicted on the Summary Plat as Tract F, a twenty (20) foot easement for an associated water line, and a fifty (50) foot easement for an associated service road, both as depicted on the Summary Plat.

7. Rights of the United States and third persons, if any, under the following reservations contained in the patent for the Elena Gallegos Grant:

a. "* * * title to any gold, silver, or quicksilver mines or minerals of the same, but all such mines and minerals shall remain the property of the United States with the right of working the same."

b. "* * * limitations and terms of the act of Congress of March 3, 1891."

8. Rights if any, of claimants under mesne mining claims.

● Mr. DOMENICI. Mr. President, the purpose of S. 2405 as reported, with the technical amendment, is to expedite the acquisition of a 7,985.84 acre portion of the Elena Gallegos grant so that a portion may be added to the Sandia Mountain Wilderness in the Cibola National Forest, N. Mex. The bill corrects the acreage figure and the forest boundary as established in Public Law 95-614; and it directs the Secretary of Agriculture in cooperation with the Secretary of the Interior to exchange approximately 32,800 acres of Federal lands in New Mexico with the city of Albuquerque for the 7,935.84 acre area to be added to the Cibola National Forest. This is to be accomplished within 90 days of the date of enactment of this act.

I should like to compliment the city of Albuquerque, including both the city officials and the citizens of the Duke City, for the numerous actions they have taken during the last year to insure that this acquisition takes place. This bill is the product of their continued support.

First, Albuquerque is purchasing 640 acres of the tract at a cost of over $5 million. Also, the city purchased the remainder of the tract by establishing a quarter-cent sales tax. This tax was supported by almost every organization in the city of Albuquerque.

Several years ago the Government Accounting Office issued a report, "The Drive to Acquire Lands by the Federal Government Should be Reassessed." The report and others called on the Federal Government to find new and innovative ways to acquire lands other than the typical straight purchase at appraised value. In 1978, in response to this report, the Congress authorized the addition and acquisition of the tract to the Cibola National Forest in Public Law 95-614. In 1980, the Congress amended that law by making the tract an addition to the approximately 30,000 acre wilderness. The Congress did this in Public Law 96-248. Last year the Public Lands and Reserved Water Subcommittee of the Energy and Natural Resources Committee held a 2-day workshop on the subject of Federal land acquisition policies.

The city of Albuquerque has come up with an innovative method of land acquisition that allows the Federal Government to acquire a very important parcel of land. In addition it puts over 30,000 acres of unneeded Federal land to use by both city government and the private sector. This is a significant accomplishment in light of the fact that we have had a moratorium on land purchases and the fact that even before that moratorium, these purchases were being criticized.

I again point out that the Forest Service, the city of Albuquerque, the State of New Mexico, which contributed money for the acquisition, enthusiastically support this measure. Environmental groups, civic organizations, countless thousands of New Mexico citizens agree that this bill is a good idea. The Committee on Energy and Natural Resources, which voted unanimously to report the bill, supports this legislation. This is an impressive coalition. I only wish we could reach this type of agreement on all of the legislation we face.

In these difficult economic times the people involved in this Elena Gallegos tract acquisition have shown us a way we can continue to acquire special lands for preservation.

In closing, I thank Senator MALCOLM WALLOP of Wyoming, chairman of the Public Lands and Reserve Water Subcommittee of the Energy and Natural Resources Committee. His assistance in this Wilderness System has been invaluable.

I also thank the chairman of the Energy and Natural Resources Committee, JAMES MCCLURE, as well as committee staff members for their help on this bill which I believe will have longlasting significance far beyond the borders of New Mexico.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1263) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2405

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to expedite the acquisition of land authorized by the Act of November 8, 1978 (92 Stat. 3095, as amended), that Act is hereby amended as follows:

(a) Delete all of section 1 and insert the following language in lieu thereof:

"All that portion of the Elena Gallegos Grant, lying east of a line depicted on a subdivision plat entitled "Summary Plat of a Portion of the Elena Gallegos Grant," (the "Summary Plat") recorded in the office of the County Clerk of Bernalillo County, New Mexico, on June 29, 1982, in Volume C19, Folio 183, consisting of eight pages, said line being the western limits of the tract described herein being further described as follows: Beginning at the closing corner between sections 35 and 36 of township 11 north, range 4 east, New Mexico principal meridian on the south boundary of said grant; thence north 00 degrees 03 minutes 21 seconds east, 2,670.40 feet to a point; thence north 00 degrees 03 minutes 21 seconds east, 1,244.73 feet to the projected section corner common to sections 25, 26, 35, and 36; thence continuing along the projected section line common to said sections 25 and 26, north 00 degrees 17 minutes 37 seconds east, 1,346.11 feet to a point; thence leaving said section line and continuing south 84 degrees 40 minutes 00 seconds east, 178.00 feet to a point; thence south 53 degrees 20 minutes 00 seconds east, 218.00 feet to a point; thence north 52 degrees 50 minutes 00 seconds east, 364.00 feet to a point; thence east 225.00 feet to a point; thence north 66 degrees 00 minutes 00 seconds east, 1,244.14 feet to a point; thence north 06 degrees 12 minutes 25 seconds west, 1,765.08 feet to a point; thence north 07 degrees 27 minutes 00 seconds west, 2,008.00 feet to a point; thence south 80 degrees 38 minutes 00 seconds west, 984.00 feet to a point; thence south 64 degrees 45 minutes 00 seconds west, 621.00 feet to the projected section corner common to sections 23, 24, 25, and 26; thence north 00 degrees 44 minutes 22 seconds west, 1,382.97 feet to the southeast corner of Sandia Heights South, unit 14, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on February 12, 1975; thence continuing along the easterly boundary of said unit 14, north 00 degrees 04 minutes 20 seconds east, 1,951.64 feet to the northeast corner of said unit 14, said corner also being the southeast corner of Sandia Heights South, Unit 10, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on March 11, 1974; thence continuing along the easterly boundary of said Unit 10, north 00

degrees 02 minutes 31 seconds east, 1,493.53 feet to the northeast corner of said Unit 10, said corner also being the southeast corner of Sandia Heights South, Unit 3, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on August 3, 1971; thence continuing along the easterly boundary of said Unit 3, north 00 degrees 03 minutes 29 seconds east, 1,867.10 feet to the northeast corner of said Unit 3, said corner also being the southeast corner of Sandia Heights South, Unit 2, as the same is shown and deisgnated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on October 20, 1970; thence continuing along easterly boundary of said Unit 2, north 00 degrees 03 minutes 29 seconds east, 1,869.70 feet to the northeast corner of said Unit 2, said corner also being the southeast corner of Sandia Heights South, as the same is shown and designated on the plat filed in the office of the County Clerk of Bernalillo County, New Mexico, on June 20, 1966; thence continuing along the easterly boundary of said Sandia Heights South, north 00 degrees 03 minutes 29 seconds east, 1,725.76 feet to the northwest corner of the tract herein described, said corner being a point on the northerly boundary of the Elena Gallegos Grant: *Provided, however,* That the tract of land described in this section not be included within the Cibola National Forest until the Secretary of Agriculture determines that the city of Albuquerque, New Mexico, has acquired a tract of land containing approximately six hundred forty acres located in such tract for open space or city park use.".

(b) Add a new section 5 to read as follows:

"SEC. 5. (a) Notwithstanding any other provision of law, the Secretary of Agriculture, in cooperation with the Secretary of the Interior, is authorized and directed to acquire the lands described in section 1 in lieu of purchase as authorized by section 4 of this Act by exchanging with the City of Albuquerque so much of the Federal lands administered by the Forest Service and Bureau of Land Management in the State of New Mexico and consisting of approximately 32,800 acres, more or less, as the Secretary of Agriculture and the Secretary of the Interior determine are needed to equal the value of the land conveyed by the City of Albuquerque.

"(b) The lands to be conveyed are subject to valid existing rights.

"(c) Transactions necessary to effect the exchange authorized by this section shall be made pursuant to the provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743) and other applicable law except to the extent necessary to expeditiously carry out the provision of this section and shall be made within 90 days of enactment of this Act: *Provided,* That the rights and responsibilities of the respective owners shall remain with such owners until such time as the conveyances are executed.".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR RECOGNITION OF SENATOR BRADLEY ON MONDAY NEXT

Mr. BAKER. Mr. President, I believe there is a special order in favor of the Senator from Georgia (Mr. NUNN) for Monday next. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I add to that a unanimous-consent request that the distinguished Senator from New Jersey (Mr. BRADLEY) be recognized after the Senator from Georgia, on special order, for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, the Senate will convene at 2 p.m. on Monday next.

Under the provisions of rule XXII, 1 hour after convening there will be an automatic quorum call. As soon as a quorum is established, the vote on cloture will occur, pursuant to the cloture motion that has been filed against further debate on the Helms amendment.

RECESS UNTIL 2 P.M. ON MONDAY, SEPTEMBER 20, 1982

Mr. BAKER. Mr. President, I inquire of the acting minority leader if he has any further matter he wishes to address to the Senate.

Mr. BAUCUS. Mr. President, so far as I know, we have no other business on this side at this time.

Mr. BAKER. I thank the Senator.

Mr. President, as I have indicated previously, it is desirable that the Senate stand in recess early today because of the religious observance which requires that certain Members leave the floor prior to sundown, to travel to their hometowns.

At this time, I move, in accordance with the order previously entered, that the Senate stand in recess until 2 p.m. on Monday next.

The motion was agreed to; and at 1:54 p.m. the Senate recessed until Monday, September 20, 1982, at 2 p.m.

NOMINATIONS

Executive nominations received by the Senate September 17, 1982:

DEPARTMENT OF AGRICULTURE

Orville G. Bentley, of Illinois, to be an Assistant Secretary of Agriculture, new position.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

L. Clair Nelson, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988, vice Marian Pearlman Nease, resigned.

DEPARTMENT OF STATE

David Joseph Fischer, of Texas, a Career Member of the Senior Foreign Service, class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Seychelles.

DEPARTMENT OF JUSTICE

James K. Stewart, of California, to be Director of the National Institute of Justice, new position.

COMMODITY FUTURES TRADING COMMISSION

Fowler C. West, of Texas, to be Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1987, vice David Gay Gartner, term expired.

NATIONAL MEDIATION BOARD

Walter C. Wallace, of New York, to be a Member of the National Mediation Board for the term expiring July 1, 1984, vice George S. Ives, term expired.

FOREIGN SERVICE

The following-named Career Members of the Senior Foreign Service for promotion in the Senior Foreign Service to the classes indicated:

Career Members of the Senior Foreign Service of the United States of America, class of Career Minister:

Robert L. Barry, of New Hampshire.
Frederic L. Chapin, of New Jersey.
Joan M. Clark, of New York.
Peter Dalton Constable, of New York.
Morris Draper, of the District of Columbia.
Henry Allen Holmes, of the District of Columbia.
Robert V. Keeley, of Florida.
George W. Landau, of Maryland.
Loren E. Lawrence, of Maryland.
Thomas P. Shoesmith, of Pennsylvania.

Career Members of the Senior Foreign Service of the United States of America, class of Minister-Counselor:

Donald Milton Anderson, of the District of Columbia.
George M. Barbis, of California.
Robert D. Blackwill, of Maryland.
Donald J. Bouchard, of Maine.
M. Lyall Breckon, of Oregon.
Elinor Greer Constable, of New York.
John R. Countryman, of Florida.
Edmund DeJarnette, of Virginia.
Thaddeus J. Figura, of Ohio.
Charles Wellman Freeman, Jr., of Rhode Island.
Frank M. Fulgham, of Maryland.
Charles Wyman Grover, of New Hampshire.
Robert Gordon Houdek, of Illinois.
George Fleming Jones, of Texas.
William E. Knepper, of California.
George E. Knight, of Pennsylvania.
Shepard Cherry Lowman, of Virginia.
Robert W. Maule, of Washington.
Sherrod McCall, of Illinois.
Richard L. McCormack, of Florida.
James M. Montgomery, of New Jersey.
Ernest Andrew Nagy, of California.
Chester E. Norris, Jr., of Maine.
Nancy Ostrander, of Indiana.
William Thornton Pryce, of Pennsylvania.
Alexander L. Rattray, of Washington.
Elmore Francis Rigamer, M.D., of Louisiana.
Fernando Enrique Rondon, of Virginia.
Charles A. Schmitz, of Missouri.
Roger C. Schrader, of Arizona.
William T. Shinn, Jr., of Maryland.
Walter John Silva, of Texas.
Thomas W. Simons, Jr., of the District of Columbia.
N. Shaw Smith, of Virginia.
Walter Edward Stadtler, of New York.
Paul K. Stahnke, of Illinois.

Gordon L. Streeb, of Colorado.
William Lacy Swing, of North Carolina.
Clyde Donald Taylor, of Maine.
Frank G. Trinka, Jr., of Florida.
James Rodney Wachob, of Maryland.
Howard Kent Walker, of New Jersey.
W. Robert Warne, of Virginia.
La Rae Herring Washington, M.D., of Maryland.
Joseph A. B. Winder, of Maryland.
Arthur Hamilton Woodruff, of Florida.
Donald Robert Woodward, of California.

The following-named Career Members of the Foreign Service for promotion into the Senior Foreign Service, and Consular Officer and Secretary in the Diplomatic Service appointments, as indicated:

Career Members of the Senior Foreign Service of the United States of America, class of Counselor:

Alvin P. Adams, Jr., of Virginia.
Charles R. Baquet III, of Louisiana.
Frank C. Bennett, Jr., of California.
David L. Blakemore, of Maryland.
John A. Boyle, of New York.
Charles F. Brown, of Nevada.
John Eignus Clark, of Maryland.
Anthony S. Dalsimer, of Florida.
Charles F. Dunbar, Jr., of Maine.
Clarke N. Ellis, of California.
Robert Duncan Emmons, of California.
Paul L. Engle, of California.
Vincent J. Farley, of New York.
Ronald D. Flack, of Minnesota.
Alan H. Flanigan, of Tennessee.
Anthony G. Freeman, of New Jersey.
Roger R. Gamble, of New Mexico.
John Charles Garon, of Georgia.
Charles A. Gillespie, Jr., of California.
Harry J. Gilmore, of Pennsylvania.
Larry C. Grahl, of Ohio.
Robert T. Grey, Jr., of Connecticut.
Scott S. Hallford, of Tennessee.
Frederick H. Hassett, of Florida.
Irvin Hicks, of Maryland.
Richard C. Howland, of New York.
Arthur H. Hughes, of Nebraska.
Larry Craig Johnstone, of Washington.
John P. Jurecky, of Arizona.
Dalton V. Killion, of California.
John C. Kornblum, of Michigan.
Vladimir Lehovich, of New York.
Mark C. Lissfelt, of Pennsylvania.
George Quincey Lumsden, Jr., of Maryland.
Hugh Cooke MacDougall, of New York.
Robert A. Martin, of Pennsylvania.
James A. Mattson, of Minnesota.
George A. McFarland, Jr., of Texas.
Thomas E. McNamara, of New York.
Gerald Joseph Monroe, of New Mexico.
Robert B. Morley, of New Jersey.
Day Olin Mount, of Massachusetts.
Jerome C. Ogden, of New York.
Robert A. Peck, of California.
Miles S. Pendleton, Jr., of Washington.
John H. Penfold, of Colorado.
Dale M. Povenmire, of Florida.
Donald Fraser Ramage, of California.
Mary A. Ryan, of Texas.
John J. St. John, of Pennsylvania.
P. Peter Sarros, of New York.
Frank M. Schroeder, of Virginia.
William E. Spruce, of Texas.
John Todd Stewart, of California.
David H. Swartz, of Illinois.
Peter Tomsen, of Ohio.
Theresa A. Tull, of New Jersey.
John R. Vought, of New York.
Douglas K. Watson, of California.
James A. Weiner, of California.
Philip C. Wilcox, of Colorado.
Brooks Wrampelmeier, of Ohio.

Career Members of the Senior Foreign Service, class of Counselor, and Consular Officers and Secretaries in the Diplomatic Service of the United States of America:

John H. Clemmons, of Texas.
Kenneth A. French, of Virginia.
Wallace H. Gilliam, of New Jersey.
Frank L. Hart, M.D., of Oklahoma.
James B. Lackey, of Maryland.
Bernard C. Meyer, M.D., of Florida.
Arthur J. Rollins, M.D., of California.
Emmett N. Wilson, Jr., M.D., of Texas.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Harold F. Hardin, Jr., xxx-xx-xxxx [redacted] age 54, U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Donald M. Babers, xxx-xx-xxxx U.S. Army.

HOUSE OF REPRESENTATIVES—*Friday, September 17, 1982*

CONFERENCE REPORT ON H.R. 6133

Pursuant to the order of September 16, 1982, Mr. JONES of North Carolina submitted the following conference report and statement on the bill (H.R. 6133) to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal years 1983, 1984, and 1985, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-835)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6133) to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal years 1983, 1984, and 1985, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Endangered Species Act Amendments of 1982".

SEC. 2. LISTING PROCESS.

(a) Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) is amended as follows:

(1) Subsection (a) is amended—

(A) by redesignating subparagraphs (1) through (5) of paragraph (1) as subparagraphs (A) through (E), respectively;

(B) by amending that part of paragraph (1) which precedes subparagraph (A) (as so redesignated) by inserting "promulgated in accordance with subsection (b)" immediately after "shall by regulation";

(C) by striking out "sporting," in paragraph (1)(B) (as so redesignated) and inserting in lieu thereof "recreational,";

(D) by striking out the last two sentences in paragraph (1); and

(E) by adding at the end thereof the following new paragraph:

"(3) The Secretary, by regulation promulgated in accordance with subsection (b) and to the maximum extent prudent and determinable—

"(A) shall, concurrently with making a determination under paragraph (1) that a species is an endangered species or a threatened species, designate any habitat of such species which is then considered to be critical habitat; and

"(B) may, from time-to-time thereafter as appropriate, revise such designation.".

(2) Subsection (b) is amended to read as follows:

"(b) BASIS FOR DETERMINATIONS.—(1)(A) The Secretary shall make determinations required by subsection (a)(1) solely on the basis of the best scientific and commercial data available to him after conducting a review of the status of the species and after taking into account those efforts, if any, being made by any State or foreign nation, or any political subdivision of a State or foreign nation, to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under its jurisdiction, or on the high seas.

"(B) In carrying out this section, the Secretary shall give consideration to species which have been—

"(i) designated as requiring protection from unrestricted commerce by any foreign nation, or pursuant to any international agreement; or

"(ii) identified as in danger of extinction, or likely to become so within the foreseeable future, by any State agency or by any agency of a foreign nation that is responsible for the conservation of fish or wildlife or plants.

"(2) The Secretary shall designate critical habitat, and make revisions thereto, under subsection (a)(3) on the basis of the best scientific data available and after taking into consideration the economic impact, and any other relevant impact, of specifying any particular area as critical habitat. The Secretary may exclude any area from critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying such area as part of the critical habitat, unless he determines, based on the best scientific and commercial data available, that the failure to designate such area as critical habitat will result in the extinction of the species concerned.

"(3)(A) To the maximum extent practicable, within 90 days after receiving the petition of an interested person under section 553(e) of title 5, United States Code, to add a species to, or to remove a species from, either of the lists published under subsection (c), the Secretary shall make a finding as to whether the petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted. If such a petition is found to present such information, the Secretary shall promptly commence a review of the status of the species concerned. The Secretary shall promptly publish each finding made under this subparagraph in the Federal Register.

"(B) Within 12 months after receiving a petition that is found under subparagraph (A) to present substantial information indicating that the petitioned action may be warranted, the Secretary shall make one of the following findings:

"(i) The petitioned action is not warranted, in which case the Secretary shall promptly publish such finding in the Federal Register.

"(ii) The petitioned action is warranted, in which case the Secretary shall promptly publish in the Federal Register a general notice and the complete text of a proposed regulation to implement such action in accordance with paragraph (5).

"(iii) The petitioned action is warranted, but that—

"(I) the immediate proposal and timely promulgation of a final regulation implementing the petitioned action in accordance with paragraphs (5) and (6) is precluded by pending proposals to determine whether any species is an endangered species or a threatened species, and

(II) expeditious progress is being made to add qualified species to either of the lists published under subsection (c) and to remove from such lists species for which the protections of the Act are no longer necessary,

in which case the Secretary shall promptly publish such finding in the Federal Register, together with a description and evaluation of the reasons and data on which the finding is based.

"(C)(i) A petition with respect to which a finding is made under subparagraph (B)(iii) shall be treated as a petition that is resubmitted to the Secretary under subparagraph (A) on the date of such finding and that presents substantial scientific or commercial information that the petitioned action may be warranted.

"(ii) Any negative finding described in subparagraph (A) and any finding described in subparagraph (B)(i) or (iii) shall be subject to judicial review.

"(D)(i) To the maximum extent practicable, within 90 days after receiving the petition of an interested person under section 553(e) of title 5, United States Code, to revise a critical habitat designation, the Secretary shall make a finding as to whether the petition presents substantial scientific information indicating that the revision may be warranted. The Secretary shall promptly publish such finding in the Federal Register.

"(ii) Within 12 months after receiving a petition that is found under clause (i) to present substantial information indicating that the requested revision may be warranted, the Secretary shall determine how he intends to proceed with the requested revision, and shall promptly publish notice of such intention in the Federal Register.

"(4) Except as provided in paragraphs (5) and (6) of this subsection, the provisions of section 553 of title 5, United States Code (relating to rulemaking procedures), shall apply to any regulation promulgated to carry out the purposes of this Act.

"(5) With respect to any regulation proposed by the Secretary to implement a determination, designation, or revision referred to in subsection (a)(1) or (3), the Secretary shall—

"(A) not less than 90 days before the effective date of the regulation—

"(i) publish a general notice and the complete text of the proposed regulation in the Federal Register, and

"(ii) give actual notice of the proposed regulation (including the complete text of the regulation) to the State agency in each State in which the species is believed to occur, and to each county or equivalent jurisdiction in which the species is believed to occur, and invite the comment of such agency, and each such jurisdiction, thereon;

"(B) insofar as practical, and in cooperation with the Secretary of State, give notice of the proposed regulation to each foreign nation in which the species is believed to occur or whose citizens harvest the species

---

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

on the high seas, and invite the comment of such nation thereon;

"(C) give notice of the proposed regulation to such professional scientific organizations as he deems appropriate;

"(D) publish a summary of the proposed regulation in a newspaper of general circulation in each area of the United States in which the species is believed to occur; and

"(E) promptly hold one public hearing on the proposed regulation if any person files a request for such a hearing within 45 days after the date of publication of general notice.

"(6)(A) Within the one-year period beginning on the date on which general notice is published in accordance with paragraph (5)(A)(i) regarding a proposed regulation, the Secretary shall publish in the Federal Register—

"(i) if a determination as to whether a species is an endangered species or a threatened species, or a revision of critical habitat, is involved, either—

"(I) a final regulation to implement such determination,

"(II) a final regulation to implement such revision or a finding that such revision should not be made,

"(III) notice that such one-year period is being extended under subparagraph (B)(i), or

"(IV) notice that the proposed regulation is being withdrawn under subparagraph (B)(ii), together with the finding on which such withdrawal is based; or

"(ii) subject to subparagraph (C), if a designation of critical habitat is involved, either—

"(I) a final regulation to implement such designation, or

"(II) notice that such one-year period is being extended under such subparagraph.

"(B)(i) If the Secretary finds with respect to a proposed regulation referred to in subparagraph (A)(i) that there is substantial disagreement regarding the sufficiency or accuracy of the available data relevant to the determination or revision concerned, the Secretary may extend the one-year period specified in subparagraph (A) for not more than 6 months for purposes of soliciting additional data.

"(ii) If a proposed regulation referred to in subparagraph (A)(i) is not promulgated as a final regulation within such one-year period (or longer period if extension under clause (i) applies) because the Secretary finds that there is not sufficient evidence to justify the action proposed by the regulation, the Secretary shall immediately withdraw the regulation. The finding on which a withdrawal is based shall be subject to judicial review. The Secretary may not propose a regulation that has previously been withdrawn under this clause unless he determines that sufficient new information is available to warrant such proposal.

"(iii) If the one-year period specified in subparagraph (A) is extended under clause (i) with respect to a proposed regulation, then before the close of such extended period the Secretary shall publish in the Federal Register either a final regulation to implement the determination or revision concerned, a finding that the revision should not be made, or a notice of withdrawal of the regulation under clause (ii), together with the finding on which the withdrawal is based.

"(C) A final regulation designating critical habitat of an endangered species or a threatened species shall be published concurrently with the final regulation implementing the determination that such species is endangered or threatened, unless the Secretary deems that—

"(i) it is essential to the conservation of such species that the regulation implementing such determination be promptly published; or

"(ii) critical habitat of such species is not then determinable, in which case the Secretary, with respect to the proposed regulation to designate such habitat, may extend the one-year period specified in subparagraph (A) by not more than one additional year, but not later than the close of such additional year the Secretary must publish a final regulation, based on such data as may be available at that time, designating, to the maximum extent prudent, such habitat.

"(7) Neither paragraph (4), (5), or (6) of this subsection nor section 553 of title 5, United States Code, shall apply to any regulation issued by the Secretary in regard to any emergency posing a significant risk to the well-being of any species of fish or wildlife or plants, but only if—

"(A) at the time of publication of the regulation in the Federal Register the Secretary publishes therein detailed reasons why such regulation is necessary; and

"(B) in the case such regulation applies to resident species of fish or wildlife, or plants, the Secretary gives actual notice of such regulation to the State agency in each State in which such species is believed to occur.

Such regulation shall, at the discretion of the Secretary, take effect immediately upon the publication of the regulation in the Federal Register. Any regulation promulgated under the authority of this paragraph shall cease to have force and effect at the close of the 240-day period following the date of publication unless, during such 240-day period, the rulemaking procedures which would apply to such regulation without regard to this paragraph are complied with. If at any time after issuing an emergency regulation the Secretary determines, on the basis of the best appropriate data available to him, that substantial evidence does not exist to warrant such regulation, he shall withdraw it.

"(8) The publication in the Federal Register of any proposed or final regulation which is necessary or appropriate to carry out the purposes of this Act shall include a summary by the Secretary of the data on which such regulation is based and shall show the relationship of such data to such regulation; and if such regulation designates or revises critical habitat, such summary shall, to the maximum extent practicable, also include a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify such habitat, or may be affected by such designation.".

(3) Subsection (c) is amended—

(A) by amending paragraph (1) by striking out ", and from time to time he may by regulation revise," in the first sentence thereof, and by adding at the end thereof the following new sentence: "The Secretary shall from time to time revise each list published under the authority of this subsection to reflect recent determinations, designations, and revisions made in accordance with subsections (a) and (b).",

(B) by striking out paragraphs (2) and (3) thereof; and

(C) by redesignating paragraph (4) thereof as paragraph (2).

(4) Such section 4 is further amended—

(A) by amending subsection (d) by striking out "section 6(a)" and inserting in lieu thereof "section 6(c)";

(B) by striking out subsection (f) thereof;

(C) by redesignating subsections (g) and (h) as subsections (f) and (g), respectively;

(D) by amending the second sentence of subsection (f) (as redesignated by subparagraph (C)) by striking out "recovery plans," and inserting in lieu thereof "recovery plans (1) shall, to the maximum extent practicable, give priority to those endangered species or threatened species most likely to benefit from such plans, particularly those species that are, or may be, in conflict with construction or other developmental projects or other forms of economic activity, and (2)";

(E) by amending subsection (g) (as redesignated by subparagraph (C))—

(i) by striking out "subsection (c)(2)" in paragraph (1) and inserting in lieu thereof "subsection (b)(3)",

(ii) by striking out "for listing" in paragraph (3) and inserting in lieu thereof "under subsection (a)(1) of this section", and

(iii) by striking out "subsection (g)" in paragraph (4) and inserting in lieu thereof "subsection (f)"; and

(F) by inserting at the end thereof the following new subsection:

"(h) If, in the case of any regulation proposed by the Secretary under the authority of this section, a State agency to which notice thereof was given in accordance with subsection (b)(5)(A)(ii) files comments disagreeing with all or part of the proposed regulation, and the Secretary issues a final regulation which is in conflict with such comments, or if the Secretary fails to adopt a regulation pursuant to an action petitioned by a State agency under subsection (b)(3), the Secretary shall submit to the State agency a written justification for his failure to adopt regulations consistent with the agency's comments or petition.".

(b)(1) Any petition filed under section 4(c)(2) of the Endangered Species Act of 1973 (as in effect on the day before the date of the enactment of this Act) and any regulation proposed under section 4(f) of such Act of 1973 (as in effect on such day) that is pending on such date of enactment shall be treated as having been filed or proposed on such date of enactment under section 4(b) of such Act of 1973 (as amended by subsection (a)); and the procedural requirements specified in such section 4(b) (as so amended) regarding such petition or proposed regulation shall be deemed to be complied with to the extent that like requirements under such section 4 (as in effect before the date of the enactment of this Act) were complied with before such date of enactment.

(2) Any regulation proposed after, or pending on, the date of the enactment of this Act to designate critical habitat for a species that was determined before such date of enactment to be endangered or threatened shall be subject to the procedures set forth in section 4 of such Act of 1973 (as amended by subsection (a)) for regulations proposing revisions to critical habitat instead of those for regulations proposing the designation of critical habitat.

(3) Any list of endangered species or threatened species (as in effect under section 4(c) of such Act of 1973 on the day before the date of the enactment of this Act) shall remain in effect unless and until determinations regarding species and designations and revisions of critical habitats that require changes to such list are made in accordance with subsection (b)(5) of such Act of 1973 (as added by subsection (a)).

(4) Section 4(a)(3)(A) of such Act of 1973 (as added by subsection (a)) shall not apply

with respect to any species which was listed as an endangered species or a threatened species before November 10, 1978.

SEC. 3. COOPERATION WITH THE STATES.

Section 6 of the Endangered Species Act of 1973 (16 U.S.C. 1535) is amended—

(1) by striking out "66⅔ per centum" in subsection (d)(2)(i) thereof and inserting in lieu thereof "75 percent"; and

(2) by striking out "75 per centum" in subsection (d)(2)(ii) thereof and inserting in lieu thereof "90 percent".

SEC. 4. INTERAGENCY COOPERATION AND COMMITTEE EXEMPTIONS.

(a) Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1536) is amended as follows:

(1) Subsection (a) is amended by redesignating paragraph (3) as paragraph (4), and by inserting immediately after paragraph (2) the following new paragraph:

"(3) Subject to such guidelines as the Secretary may establish, a Federal agency shall consult with the Secretary on any prospective agency action at the request of, and in cooperation with, the prospective permit or license applicant if the applicant has reason to believe that an endangered species or a threatened species may be present in the area affected by his project and that implementation of such action will likely affect such species.".

(2) Subsection (b) is amended to read as follows:

"(b) OPINION OF SECRETARY.—(1)(A) Consultation under subsection (a)(2) with respect to any agency action shall be concluded within the 90-day period beginning on the date on which initiated or, subject to subparagraph (B), within such other period of time as is mutually agreeable to the Secretary and the Federal agency.

"(B) In the case of an agency action involving a permit or license applicant, the Secretary and the Federal agency may not mutually agree to conclude consultation within a period exceeding 90 days unless the Secretary, before the close of the 90th day referred to in subparagraph (A)—

"(i) if the consultation period proposed to be agreed to will end before the 150th day after the date on which consultation was initiated, submits to the applicant a written statement setting forth—

"(I) the reasons why a longer period is required,

"(II) the information that is required to complete the consultation, and

"(III) the estimated date on which consultation will be completed; or

"(ii) if the consultation period proposed to be agreed to will end 150 or more days after the date on which consultation was initiated, obtains the consent of the applicant to such period.

The Secretary and the Federal agency may mutually agree to extend a consultation period established under the preceding sentence if the Secretary, before the close of such period, obtains the consent of the applicant to the extension.

"(2) Consultation under subsection (a)(3) shall be concluded within such period as is agreeable to the Secretary, the Federal agency, and the applicant concerned.

"(3)(A) Promptly after conclusion of consultation under paragraph (2) or (3) of subsection (a), the Secretary shall provide to the Federal agency and the applicant, if any, a written statement setting forth the Secretary's opinion, and a summary of the information on which the opinion is based, detailing how the agency action affects the species or its critical habitat. If jeopardy or adverse modification is found, the Secretary shall suggest those reasonable and prudent alternatives which he believes would not violate subsection (a)(2) and can be taken by the Federal agency or applicant in implementing the agency action.

"(B) Consultation under subsection (a)(3), and an opinion issued by the Secretary incident to such consultation, regarding an agency action shall be treated respectively as a consultation under subsection (a)(2), and as an opinion issued after consultation under such subsection, regarding that action if the Secretary reviews the action before it is commenced by the Federal agency and finds, and notifies such agency, that no significant changes have been made with respect to the action and that no significant change has occurred regarding the information used during the initial consultation.

"(4) If after consultation under subsection (a)(2), the Secretary concludes that—

"(A) the agency action will not violate such subsection, or offers reasonable and prudent alternatives which the Secretary believes would not violate such subsection; and

"(B) the taking of an endangered species or a threatened species incidental to the agency action will not violate such subsection;

the Secretary shall provide the Federal agency and the applicant concerned, if any, with a written statement that—

"(i) specifies the impact of such incidental taking on the species,

"(ii) specifies those reasonable and prudent measures that the Secretary considers necessary or appropriate to minimize such impact, and

"(iii) sets forth the terms and conditions (including, but not limited to, reporting requirements) that must be complied with by the Federal agency or applicant (if any), or both, to implement the measures specified under clause (ii).".

(3) Subsection (c) is amended by amending the penultimate sentence in paragraph (1) by inserting ", except that if a permit or license applicant is involved, the 180-day period may not be extended unless such agency provides the applicant, before the close of such period, with a written statement setting forth the estimated length of the proposed extension and the reasons therefor" immediately after "agency" and before the parenthesis.

(4) Subsection (e)(10) is amended by striking out the first sentence thereof.

(5) Subsection (g) is amended as follows:

(A) The sideheading is amended to read as follows: "APPLICATION FOR EXEMPTION AND REPORT TO THE COMMITTEE.—".

(B) The second sentence of paragraph (1) is amended to read as follows: "An application for an exemption shall be considered initially by the Secretary in the manner provided for in this subsection, and shall be considered by the Committee for a final determination under subsection (h) after a report is made pursuant to paragraph (5).".

(C) Paragraph (2) is amended—

(i) by striking out the first sentence of subparagraph (A) and inserting in lieu thereof the following: "An exemption applicant shall submit a written application to the Secretary, in a form prescribed under subsection (f), not later than 90 days after the completion of the consultation process; except that, in the case of any agency action involving a permit or license applicant, such application shall be submitted not later than 90 days after the date on which the Federal agency concerned takes final agency action with respect to the issuance of the permit or license. For purposes of the preceding sentence, the term 'final agency action' means (i) a disposition by an agency with respect to the issuance of a permit or license that is subject to administrative review, whether or not such disposition is subject to judicial review; or (ii) if administrative review is sought with respect to such disposition, the decision resulting after such review."; and

(ii) by amending subparagraph (B)—

(I) by inserting "(i)" immediately after "promptly",

(II) by striking out "to the review board to be established under paragraph (3) and", and

(III) by inserting "; and (ii) publish notice of receipt of the application in the Federal Register, including a summary of the information contained in the application and a description of the agency action with respect to which the application for exemption has been filed" immediately before the period.

(D) Paragraphs (3), (4), (9), and (11) are repealed.

(E) Paragraph (5) is redesignated as paragraph (3) and is further amended to read as follows:

"(3) The Secretary shall within 20 days after the receipt of an application for exemption, or within such other period of time as is mutually agreeable to the exemption applicant and the Secretary—

"(A) determine that the Federal agency concerned and the exemption applicant have—

"(i) carried out the consultation responsibilities described in subsection (a) in good faith and made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to the proposed agency action which would not violate subsection (a)(2);

"(ii) conducted any biological assessment required by subsection (c); and

"(iii) to the extent determinable within the time provided herein, refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (d); or

"(B) deny the application for exemption because the Federal agency concerned or the exemption applicant have not met the requirements set forth in subparagraph (A)(i), (ii), and (iii).

The denial of an application under subparagraph (B) shall be considered final agency action for purposes of chapter 7 of title 5, United States Code.".

(F) Paragraph (6) is redesignated as paragraph (4) and is further amended to read as follows:

"(4) If the Secretary determines that the Federal agency concerned and the exemption applicant have met the requirements set forth in paragraph (3)(A)(i), (ii), and (iii) he shall, in consultation with the Members of the Committee, hold a hearing on the application for exemption in accordance with sections 554, 555, and 556 (other than subsection (b)(1) and (2) thereof) of title 5, United States Code, and prepare the report to be submitted pursuant to paragraph (5).".

(G) Paragraph (7) is redesignated as paragraph (5) and is further amended—

(i) by striking out that part which precedes subparagraph (A) and inserting in lieu thereof "Within 140 days after making the determinations under paragraph (3) or within such other period of time as is mutu-

ally agreeable to the exemption applicant and the Secretary, the Secretary shall submit to the Committee a report discussing—";

(ii) by striking out the period immediately after "by the Committee" in subparagraph (C) and inserting in lieu thereof "; and"; and

(iii) by adding at the end thereof the following:

"(D) whether the Federal agency concerned and the exemption applicant refrained from making any irreversible or irretrievable commitment of resources prohibited by subsection (d).".

(H) Paragraph (8) is redesignated as paragraph (6).

(I) Paragraph (10) is redesignated as paragraph (7) and is amended to read as follows:

"(7) Upon request of the Secretary, the head of any Federal agency is authorized to detail, on a nonreimbursable basis, any of the personnel of such agency to the Secretary to assist him in carrying out his duties under this section.".

(J) Paragraph (12) is redesignated as paragraph (8) and is further amended by striking out "of review boards" and inserting in lieu thereof "resulting from activities pursuant to this subsection".

(6) Subsection (h)(1) is amended—

(A) by striking out "90 days of receiving the report of the review board under subsection (g)(7)" in the matter preceding subparagraph (A) and inserting in lieu thereof "30 days after receiving the report of the Secretary pursuant to subsection (g)(5)";

(B) by striking out "review board" in subparagraph (A) and inserting in lieu thereof "Secretary, the record of the hearing held under subsection (g)(4)";

(C) by striking out "and" at the end of subparagraph (A)(ii);

(D) by inserting immediately after subparagraph (A)(iii) the following:

"(iv) neither the Federal agency concerned nor the exemption applicant made any irreversible or irretrievable commitment of resources prohibited by subsection (d); and".

(7) Subsection (o) is amended to read as follows:

"(o) Notwithstanding sections 4(d) and 9(a)(1)(B) and (C) or any regulation promulgated to implement either such section—

"(1) any action for which an exemption is granted under subsection (h) shall not be considered to be a taking of any endangered species or threatened species with respect to any activity which is necessary to carry out such action; and

"(2) any taking that is in compliance with the terms and conditions specified in a written statement provided under subsection (b)(4)(iii) shall not be considered to be a taking of the species concerned.".

(b) Paragraph (11) of section 3 of the Endangered Species Act of 1973 (16 U.S.C. 1532(11)) is repealed.

SEC. 5. CONVENTION IMPLEMENTATION.

Section 8A of the Endangered Species Act of 1973 (16 U.S.C. 1537a) is amended—

(1) by amending subsection (c) by inserting "(1)" immediately after "SCIENTIFIC AUTHORITY FUNCTIONS.—", and by adding at the end thereof the following new paragraph:

"(2) The Secretary shall base the determinations and advice given by him under Article IV of the Convention with respect to wildlife upon the best available biological information derived from professionally accepted wildlife management practices; but is not required to make, or require any State to make, estimates of population size in making such determinations or giving such advice.";

(2) by amending subsection (d) to read as follows:

"(d) RESERVATIONS BY THE UNITED STATES UNDER CONVENTION.—If the United States votes against including any species in Appendix I or II of the Convention and does not enter a reservation pursuant to paragraph (3) of Article XV of the Convention with respect to that species, the Secretary of State, before the 90th day after the last day on which such a reservation could be entered, shall submit to the Committee on Merchant Marine and Fisheries of the House of Representatives, and to the Committee on the Environment and Public Works of the Senate, a written report setting forth the reasons why such a reservation was not entered."; and

(3) by amending subsection (e) to read as follows:

"(e) WILDLIFE PRESERVATION IN WESTERN HEMISPHERE.—(1) The Secretary of the Interior (hereinafter in this subsection referred to as the 'Secretary'), in cooperation with the Secretary of State, shall act on behalf of, and represent, the United States in all regards as required by the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere (56 Stat. 1354, T.S. 982, hereinafter in this subsection referred to as the 'Western Convention'). In the discharge of these responsibilities, the Secretary and the Secretary of State shall consult with the Secretary of Agriculture, the Secretary of Commerce, and the heads of other agencies with respect to matters relating to or affecting their areas of responsibility.

"(2) The Secretary and the Secretary of State shall, in cooperation with the contracting parties to the Western Convention and, to the extent feasible and appropriate, with the participation of State agencies, take such steps as are necessary to implement the Western Convention. Such steps shall include, but not be limited to—

"(A) cooperation with contracting parties and international organizations for the purpose of developing personnel resources and programs that will facilitate implementation of the Western Convention;

"(B) identification of those species of birds that migrate between the United States and other contracting parties, and the habitats upon which those species depend, and the implementation of cooperative measures to ensure that such species will not become endangered or threatened; and

"(C) identification of measures that are necessary and appropriate to implement those provisions of the Western Convention which address the protection of wild plants.

"(3) No later than September 30, 1985, the Secretary and the Secretary of State shall submit a report to Congress describing those steps taken in accordance with the requirements of this subsection and identifying the principal remaining actions yet necessary for comprehensive and effective implementation of the Western Convention.

"(4) The provisions of this subsection shall not be construed as affecting the authority, jurisdiction, or responsibility of the several States to manage, control, or regulate resident fish or wildlife under State law or regulations.".

(b) The amendment made by paragraph (1) of subsection (a) shall take effect January 1, 1981.

SEC. 6. EXPERIMENTAL POPULATIONS AND OTHER EXCEPTIONS.

Section 10 of the Endangered Species Act of 1973 (16 U.S.C. 1539) is amended as follows:

(1) Subsection (a) is amended to read as follows:

"(a) PERMITS.—(1) The Secretary may permit, under such terms and conditions as he shall prescribe—

"(A) any act otherwise prohibited by section 9 for scientific purposes or to enhance the propagation or survival of the affected species, including, but not limited to, acts necessary for the establishment and maintenance of experimental populations pursuant to subsection (j); or

"(B) any taking otherwise prohibited by section 9(a)(1)(B) if such taking is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity.

"(2)(A) No permit may be issued by the Secretary authorizing any taking referred to in paragraph (1)(B) unless the applicant therefor submits to the Secretary a conservation plan that specifies—

"(i) the impact which will likely result from such taking;

"(ii) what steps the applicant will take to minimize and mitigate such impacts, and the funding that will be available to implement such steps;

"(iii) what alternative actions to such taking the applicant considered and the reasons why such alternatives are not being utilized; and

"(iv) such other measures that the Secretary may require as being necessary or appropriate for purposes of the plan.

"(B) If the Secretary finds, after opportunity for public comment, with respect to a permit application and the related conservation plan that—

"(i) the taking will be incidental;

"(ii) the applicant will, to the maximum extent practicable, minimize and mitigate the impacts of such taking;

"(iii) the applicant will ensure that adequate funding for the plan will be provided;

"(iv) the taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and

"(v) the measures, if any, required under subparagraph (A)(iv) will be met;

and he has received such other assurances as he may require that the plan will be implemented, the Secretary shall issue the permit. The permit shall contain such terms and conditions as the Secretary deems necessary or appropriate to carry out the purposes of this paragraph, including, but not limited to, such reporting requirements as the Secretary deems necessary for determining whether such terms and conditions are being complied with.

"(C) The Secretary shall revoke a permit issued under this paragraph if he finds that the permittee is not complying with the terms and conditions of the permit.".

(2) Subsection (d) is amended by striking out "subsections (a)" and inserting in lieu thereof "subsections (a)(1)(A)".

(3) Subsection (f) is amended—

(A) by amending paragraph (1)(B) by inserting "substantial" immediately before "etching" and before "carving", and by adding at the end thereof the following new sentence: "For purposes of this subsection, polishing or the adding of minor superficial markings does not constitute substantial etching, engraving, or carving."; and

(B) by adding at the end thereof the following new paragraph:

"(9)(A) The Secretary shall carry out a comprehensive review of the effectiveness of the regulations prescribed pursuant to paragraph (5) of this subsection—

"(i) in insuring that pre-Act finished scrimshaw products, or the raw materials for such products, have been adequately ac-

counted for and not disposed of contrary to the provisions of this Act; and

"(ii) in preventing the commingling of unlawfully imported or acquired marine mammal products with such exempted products either by persons to whom certificates of exemption have been issued under paragraph (4) of this subsection or by subsequent purchasers from such persons.

"(B) In conducting the review required under subparagraph (A), the Secretary shall consider, but not be limited to—

"(i) the adequacy of the reporting and records required of exemption holders;

"(ii) the extent to which such reports and records are subject to verification;

"(iii) methods for identifying individual pieces of scrimshaw products and raw materials and for preventing commingling of exempted materials from those not subject to such exemption; and

"(iv) the retention of unworked materials in controlled-access storage.

The Secretary shall submit a report of such review to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on the Environment and Public Works of the Senate and make it available to the general public. Based on such review, the Secretary shall, on or before October 1, 1983, propose and adopt such revisions to such regulations as he deems necessary and appropriate to carry out this paragraph. Upon publication of such revised regulations, the Secretary may renew for a further period of not to exceed three years any certificate of exemption previously renewed under paragraph (8) of this subsection, subject to such new terms and conditions as are necessary and appropriate under the revised regulations; except that any certificate of exemption that would, but for this clause, expire on or after the date of enactment of this paragraph and before the date of the adoption of such regulations may be extended until such time after the date of adoption as may be necessary for purposes of applying such regulations to the certificate. Notwithstanding the foregoing, however, no person may, after January 31, 1984, sell or offer for sale in interstate or foreign commerce any pre-Act finished scrimshaw product unless such person has been issued a valid certificate of exemption by the Secretary under this subsection and unless such product or the raw material for such product was held by such person on the date of the enactment of this paragraph.".

(4)(A) Subsection (h)(1) is amended—

(i) by striking out "(other than scrimshaw)"; and

(ii) by amending subparagraph (A) to read as follows:

"(A) is not less than 100 years of age; ".

(B) The amendment made by subparagraph (A) shall take effect January 1, 1981.

(5) Subsection (i) is amended to read as follows:

"(i) NONCOMMERCIAL TRANSSHIPMENTS.—Any importation into the United States of fish or wildlife shall, if—

"(1) such fish or wildlife was lawfully taken and exported from the country of origin and country of reexport, if any;

"(2) such fish or wildlife is in transit or transshipment through any place subject to the jurisdiction of the United States en route to a country where such fish or wildlife may be lawfully imported and received;

"(3) the exporter or owner of such fish or wildlife gave explicit instructions not to ship such fish or wildlife through any place subject to the jurisdiction of the United States, or did all that could have reasonably been done to prevent transshipment, and the circumstances leading to the transshipment were beyond the exporter's or owner's control;

"(4) the applicable requirements of the Convention have been satisfied; and

"(5) such importation is not made in the course of a commercial activity,

be an importation not in violation of any provision of this Act or any regulation issued pursuant to this Act while such fish or wildlife remains in the control of the United States Customs Service.".

(6) At the end thereof insert the following new subsection:

"(j) EXPERIMENTAL POPULATIONS.—(1) For purposes of this subsection, the term 'experimental population' means any population (including any offspring arising solely therefrom) authorized by the Secretary for release under paragraph (2), but only when, and at such times as, the population is wholly separate geographically from nonexperimental populations of the same species.

"(2)(A) The Secretary may authorize the release (and the related transportation) of any population (including eggs, propagules, or individuals) of an endangered species or a threatened species outside the current range of such species if the Secretary determines that such release will further the conservation of such species.

"(B) Before authorizing the release of any population under subparagraph (A), the Secretary shall by regulation identify the population and determine, on the basis of the best available information, whether or not such population is essential to the continued existence of an endangered species or a threatened species.

"(C) For the purposes of this Act, each member of an experimental population shall be treated as a threatened species; except that—

"(i) solely for purposes of section 7 (other than subsection (a)(1) thereof), an experimental population determined under subparagraph (B) to be not essential to the continued existence of a species shall be treated, except when it occurs in an area within the National Wildlife Refuge System or the National Park System, as a species proposed to be listed under section 4; and

"(ii) critical habitat shall not be designated under this Act for any experimental population determined under subparagraph (B) to be not essential to the continued existence of a species.

"(3) The Secretary, with respect to populations of endangered species or threatened species that the Secretary authorized, before the date of the enactment of this subsection, for release in geographical areas separate from the other populations of such species, shall determine by regulation which of such populations are an experimental population for the purposes of this subsection and whether or not each is essential to the continued existence of an endangered species or a threatened species.".

SEC. 7. ENFORCEMENT.

Section 11 of the Endangered Species Act of 1973 (16 U.S.C. 1540) is amended as follows:

(1) Subsection (e) is amended by adding at the end thereof the following new paragraph:

"(6) The Attorney General of the United States may seek to enjoin any person who is alleged to be in violation of any provision of this Act or regulation issued under authority thereof.".

(2) Subsection (g) is amended—

(A) by amending paragraph (1)—

(i) by striking out "any State." in subparagraph (B) and inserting in lieu thereof "any State; or",

(ii) by inserting immediately after subparagraph (B) the following new subparagraph:

"(C) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty under section 4 which is not discretionary with the Secretary.", and

(iii) by amending the first sentence following subparagraph (C) (as added by clause (ii) of this subparagraph), by inserting "or to order the Secretary to perform such act or duty," immediately after "any such provision or regulation,"; and

(B) by amending paragraph (2) by adding the following new subparagraph immediately after subparagraph (B) thereof:

"(C) No action may be commenced under subparagraph (1)(C) of this section prior to sixty days after written notice has been given to the Secretary; except that such action may be brought immediately after such notification in the case of an action under this section respecting an emergency posing a significant risk to the well-being of any species of fish or wildlife or plants.".

SEC. 8. AUTHORIZATION OF APPROPRIATIONS.

Section 15 of the Endangered Species Act of 1973 (16 U.S.C. 1542) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 15. (a) IN GENERAL.—Except as provided in subsections (b), (c), and (d), there are authorized to be appropriated—

"(1) not to exceed $27,000,000 for each of fiscal years 1983, 1984, and 1985 to enable the Department of the Interior to carry out such functions and responsibilities as it may have been given under this Act;

"(2) not to exceed $3,500,000 for each of fiscal years 1983, 1984, and 1985 to enable the Department of Commerce to carry out such functions and responsibilities as it may have been given under this Act; and

"(3) not to exceed $1,850,000 for each of fiscal years 1983, 1984, and 1985 to enable the Department of Agriculture to carry out its functions and responsibilities with respect to the enforcement of this Act and the Convention which pertain to the importation or exportation of plants.

"(b) COOPERATION WITH STATES.—For the purposes of section 6, there are authorized to be appropriated not to exceed $6,000,000 for each of fiscal years 1983, 1984, and 1985.

"(c) EXEMPTIONS FROM ACT.—There are authorized to be appropriated to the Secretary to assist him and the Endangered Species Committee in carrying out their functions under section 7(e), (g), and (h) not to exceed $600,000 for each of fiscal years 1983, 1984, and 1985.

"(d) CONVENTION IMPLEMENTATION.—There are authorized to be appropriated to the Department of the Interior for purposes of carrying out section 8A(e) not to exceed $150,000 for each of fiscal years 1983 and 1984, and not to exceed $300,000 for fiscal year 1985, and such sums shall remain available until expended.".

(b) Sections 6(i) and 7(q) of such Act of 1973 are repealed.

SEC. 9. MISCELLANEOUS AMENDMENTS.

(a) Section 2(c) of the Endangered Species Act of 1973 (16 U.S.C. 1532(c)) is amended—

(1) by inserting "(1)" immediately before "It is"; and

(2) by adding the following new paragraph:

"(2) It is further declared to be the policy of Congress that Federal agencies shall coop-

erate with State and local agencies to resolve water resource issues in concert with conservation of endangered species.".

(b) Section 9 of the Endangered Species Act of 1973 (16 U.S.C. 1538) is amended—

(1) by amending subsection (a)(2) by redesignating subparagraphs (B), (C), and (D) as subparagraphs (C), (D), and (E), respectively, and by inserting the following new subparagraph immediately after subparagraph (A) thereof:

"(B) remove and reduce to possession any such species from areas under Federal jurisdiction;";

(2) by amending subsection (b)(1) to read as follows:

"(b)(1) SPECIES HELD IN CAPTIVITY OR CONTROLLED ENVIRONMENT.—The provisions of subsections (a)(1)(A) and (a)(1)(G) of this section shall not apply to any fish or wildlife which was held in captivity or in a controlled environment on (A) December 28, 1973, or (B) the date of the publication in the Federal Register of a final regulation adding such fish or wildlife species to any list published pursuant to subsection (c) of section 4 of this Act: Provided, That such holding and any subsequent holding or use of the fish or wildlife was not in the course of a commercial activity. With respect to any act prohibited by subsections (a)(1)(A) and (a)(1)(G) of this section which occurs after a period of 180 days from (i) December 28, 1973, or (ii) the date of publication in the Federal Register of a final regulation adding such fish or wildlife species to any list published pursuant to subsection (c) of section 4 of this Act, there shall be a rebuttable presumption that the fish or wildlife involved in such act is not entitled to the exemption contained in this subsection."; and

(3) by amending subsection (b)(2)(A) by striking out "This section shall not apply to" and inserting in lieu thereof "The provisions of subsection (a)(1) shall not apply to".

(c) Section 11(a)(1) and (b)(1) of such Act of 1973 are each amended by striking out "or (C)" immediately after "(a)(2)(A), (B)," and inserting in lieu thereof "(C), or (D)".

And to the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment to the title of the bill, insert the following: "An Act to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal years 1983, 1984, and 1985, and for other purposes."

And the Senate agree to the same.

WALTER B. JONES,
JOHN BREAUX,
GERRY E. STUDDS,
DAVID R. BOWEN,
GENE SNYDER,
EDWIN B. FORSYTHE,
DAVE EMERY,

Solely for consideration of section 4 of the House bill and modification committed to conference:

DON BONKER,
JIM LEACH,
Managers on the Part of the House.

ROBERT T. STAFFORD,
JOHN H. CHAFEE,
SLADE GORTON,
JENNINGS RANDOLPH,
GEORGE J. MITCHELL,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6133) to extend the authorization for appropriations for the Endangered Species Act of 1973, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The Senate amendment to the text of the bill struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The House also recedes from its disagreement to the title of the bill. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SECTION-BY-SECTION ANALYSIS

Section 1. Title

The short title of this bill is the "Endangered Species Act Amendments of 1982."

Section 2. Listing of species

Section 2 of the Conference substitute amends section 4 of the Act in several ways. The principal purpose of these amendments is to ensure that decisions in every phase of the process pertaining to the listing or delisting of species are based solely upon biological criteria and to prevent non-biological considerations from affecting such decisions. These amendments are intended to expedite the decisionmaking process and to ensure prompt action in determining the status of the many species which may require the protections of the Act.

Section 2(a)(1) adopts provisions which amend section 4(a) of the Act and which appear in both the House bill and the Senate amendment. Section 4(a) is first amended by substituting the word "recreational" for the word "sporting" in the summary of factors that are to be considered by the Secretary when determining whether a species is endangered or threatened. Section 4(a) is further amended by changing the requirement that the Secretary, to the maximum extent prudent, must designate critical habitat at the time a species is listed. New section 4(a)(3) will require such designation only to the maximum extent prudent and determinable.

Section 2(a)(2) adopts provisions appearing in both the House bill and the Senate amendment. This provision amends Section 4(b) of the Act and sets forth the standards and procedures that must be used by the Secretary when determining whether a species is an endangered or threatened species and when designating critical habitat.

The Committee of Conference (hereinafter the Committee) adopted the House language which requires the Secretary to base determinations regarding the listing or delisting of species "solely" on the basis of the best scientific and commercial data available to him. As noted in the House Report, economic considerations have no relevance to determinations regarding the status of species and the economic analysis requirements of Executive Order 12291, and such statutes as the Regulatory Flexibility Act and the Paperwork Reduction Act, will not apply to any phase of the listing process. The standards in the Act relating to the designation of critical habitat remain unchanged. The requirement that the Secretary consider for listing those species that states or foreign nations have designated or identified as in need of protection also remains unchanged.

The Committee adopted, with modifications, the Senate amendments which combined and rewrote sections 4(b) and (f) of the Act to streamline the listing process by reducing the time periods for rulemaking, consolidating public meeting and hearing requirements and establishing virtually identical procedures for the listing and delisting of species and for the designation of critical habitat.

Section 4(b)(1), as amended, sets forth the standard that shall be used to determine whether any species is an endangered species or a threatened species. Section 4(b)(2), as amended, sets forth the standard that shall be used to designate critical habitat.

The petition process (currently found in section 4(c)(2) of the Act) is amended by merging the House bill and the Senate amendment and by redesignating the section 4(b)(3). Section 4(b)(3), as amended, alters the evidentiary standard petitioners must satisfy to warrant a status review of the species proposed for listing or delisting. The Act previously required the Secretary to determine whether a petitioner had presented substantial evidence justifying a status review. The amendment clarifies that petitioners are not required to present economic information relevant to the proposed listing or delisting of species. Petitioners are required to present only scientific or commercial information that is, biological information or trade data. The amendments do not change the amount of information needed to warrant a status review of the species. As under the existing law, the petitioners need only present information sufficient to indicate that addition to, or removal from, the list may be warranted and, thus, that a status review of the species should be conducted.

In several ways, these amendments will replace the Secretary's discretion with mandatory, nondiscretionary duties. For example, under current law, if a petition presents substantial evidence warranting a review of the status of a species, the Secretary is to undertake such a review. However, the statute imposes no deadlines within which such review is to be completed. In practice, such status reviews have often continued indefinitely, sometimes for many years. The amendments will force action on listing and delisting proposals by requiring that the Secretary, to the maximum extent practicable, within 90 days after receiving a petition, publish a finding whether the petition presents substantial scientific or commercial information indicating that the petitioned action may be warranted. The Secretary must begin a status review when he publishes a finding that a petition to list or delist a species presents such substantial information.

The phrase "to the maximum extent practicable" addresses the concern that a large influx of petitions coupled with an absolute requirement to act within 90 days would force the devotion of staff resources to petitions and deprive the Secretary of the use of those resources to list a species that might be in greater need of protection. The phrase is not intended to allow the Secretary to

delay commencing the rulemaking process for any reason other than that the existence of pending or imminent proposals to list species subject to a greater degree of threat would make allocation of resources to such a petition unwise. The listing agencies should utilize a scientifically based priority system to list and delist species, subspecies and populations based on the degree of threat, and proceed in an efficient and timely manner. Distinctions based on whether the species is a higher or lower life form are not to be considered.

If a petition presents substantial information indicating that the petitioned listing or delisting may be warranted, the Secretary must, within 12 months after receiving the petition, make one of three findings and, depending upon which finding is made, promptly publish in the Federal Register certain items. Specifically, the Secretary must find:

(a) That the petitioned action is not warranted; or

(b) That the petitioned action is warranted; or

(c) That the petitioned action is warranted but that ongoing work on other listing and delisting actions precludes the proposal of a regulation to implement the petitioned action at that time.

The Secretary is required to publish notice of all such findings in the Federal Register. If he finds that a listing is warranted, the Secretary must also publish the text of the proposed regulation to implement the action or a description and evaluation of the reasons why he is precluded from proceeding with the proposal.

If the Secretary determines (a) that a petition does not present substantial information indicating that the petitioned action may be warranted, or (b) that the petitioned action is not warranted, such negative determinations shall be subject to judicial review. The object of such review is to determine whether the Secretary's action was arbitary or capricious in light of the scientific and commercial information available concerning the petitioned action.

If, within 12 months of receiving a petition that warrants the publication of a proposed regulation, the Secretary determines that he is unable to propose such action at that time or, if able to propose the action, unable to make a final determination within the statutorily specified and judicially enforceable time frame, he will be excused temporarily from publishing a proposed regulation at that time provided he satisfies several, limited conditions.

First, the Secretary must be actively working on other listings and delistings and must determine and publish a finding that such other work has resulted in pending proposals which actually preclude his proposing the petitioned action at that time. Second, the Secretary must determine and present evidence that he is, in fact making expeditious progress in the process of listing and delisting other species. These determinations are subject to judicial review under the same standard dicussed above. In cases challenging the Secretary's claim of inability to propose an otherwise warranted petitioned action, the court will, in essence, be called on to separate justifications grounded in the purposes of the Act from the foot-dragging efforts of a delinquent agency.

If the Secretary s excused from publishing a proposed regulation to implement a petitioned action within 12 months after receiving the petition, the Secretary must continue to consider the petition and shall publish the proposed regulation as soon as possible. For the purposes of the 12-month deadline referred to above, a petition for which implementing action is delayed shall be deemed to have been resubmitted and received on the date that notice of such delay is published. It will not be necessary for the Secretary to make and publish another finding whether the petition presents substantial information. The Secretary must, within twelve months, make one of the findings required to be made pursuant to section 4(b)(3), as amended, at the end of the initial twelve month period. Specifically, he must (a) publish a proposed regulation to implement the petitioned action, or (b) make a finding that the petitioned action is not warranted, or (c) make a new finding that he is unable to propose such action at that time or to make a final determination within the statutorily specified time frame and evidence that he is continuing to make progress in the process of listing and delisting other species.

Petitions to revise critical habitat designations may be treated differently. As with petitions to revise the lists of endangered and threatened species, the Secretary shall, to the maximum extent practicable, within 90 days after receiving the petition, make, and promptly publish, a finding whether the petition presents substantial information indicating that the petitioned action may be warranted. Petitioners are not required to present economic information relevant to the proposed revision. If such substantial information is found to be present, the Secretary shall, within 12 months after receiving the petition, determine, and promptly publish a notice indicating, how he intends to proceed with respect to the petitioned action.

New section 4(b)(5) sets forth the procedures that shall be used to promulgate regulations concerning determinations of any species' status as endangered or threatened and designations or revisions of critical habitat. The Secretary is required to allow the public a minimum 60-day comment period on a proposed regulation and an opportunity to request, within 45 days after the date of the general notice of proposed rulemaking, a public hearing on the action. If one or more requests are made in a timely manner, the Secretary must promptly conduct a public hearing on the proposed action. A single hearing may satisfy multiple requests although the Secretary is not precluded from having more than one hearing if, in his judgment, circumstances so require.

The requirement that a summary of the proposed regulation be published in at least one newspaper of general circulation in each area in which the species is believed to occur is limited to areas and newspapers within the United States.

As part of the public comment process, the Secretary is required to provide to the state agency responsible for the conservation of fish or wildlife or plants in each state in which the species is believed to occur, and to the chief officer of each county or equivalent jurisidiction in which the species is believed to occur, actual notice of a proposed regulation concerning the listing or delisting of such species or the designation or revision of critical habitat.

To ensure that proposals, whether developed initially by the Secretary or by petition, are acted upon quickly, the Committee adopted a provision, new section 4(b)(6)(A), to shorten the allowable time for final action on section 4 proposals to list or delist a species from 2 years to one year from date of proposal. The one-year period after proposal within which the Secretary must make a final determination is also applicable to revisions of critical habitat and may, under limited circumstances, be extended to eighteen months. New section 4(b)(6)(B) provides that such extension is permissible only if the Secretary finds that there is substantial disagreement among specialists regarding the sufficiency or accuracy of the information received concerning the determination or revision. This extension shall apply only in those instances where the biological information is being questioned by scientists knowledgeable about the species. Extensions to allow additional time to conduct the economic or other analyses relating to the designation of critical habitat are not permissible.

Within such one-year period (or 18 month period, if an extension occurs), the Secretary must make a final determination with respect to proposals to list or delist a species or to revise critical habitat. He must determine, on the basis of the information then available, either that the species should be listed or delisted, or that the proposal for listing or delisting should not be promulgated as a final regulation. A similar determination must be made with respect to proposals to revise critical habitat designations.

If the Secretary determines that a final regulation is not warranted because of insufficient information to promulgate the proposed action, the proposal shall be withdrawn. A determination to withdraw a proposal shall be subject to judicial review to determine whether the Secretary's decision was arbitrary or capricious in light of the information available concerning the proposed action. If the Secretary determines that a final regulation is warranted, he must promptly publish the final regulation.

Section 4, as amended, requires that the Secretary make various findings within specified periods of time. Such mandatory findings are usually to be followed by "prompt" publication of such findings, a proposed regulation, or a final regulation. Unless explicitly qualified, the time periods set forth in section 4, as amended, must be strictly adhered to by the Secretary. The requirement that certain findings be followed by "prompt" publication in the Federal Register does not authorize the Secretary to delay decisions or actions. Use of the word "prompt" is intended to account for the fact that the exact timing of Federal Register notices are not within the control of the Secretary.

New section 4(a)(3) provides that the Secretary must, to the maximum extent prudent and determinable, designate critical habitat at the time a species is listed. If a critical habitat designation accompanies the listing, or if the Secretary determines that the designation of critical habitat would not be prudent, the listing may be made final, in accordance with new section 4(b)(5), at any time within the one-year period (or 18 month period) provided for in new section 4(b)(6). New section 4(b)(6)(c) restates the general requirement of concurrent listing and designation but authorizes the Secretary to make a listing proposal final without the concurrent designation of critical habitat in limited circumstances.

The first such circumstance is when the designation of critical habitat would not be prudent because the designation would identify the location of the species. The second is where the scientific and commercial information indicates that it is essential for the

conservation of the species that it be promptly listed but the analysis necessary to determine and designate critical habitat has not been completed. When such a situation occurs *within* the one-year period, the Secretary may make the listing proposal final without designating critical habitat. Although the Secretary must justify listing a species without designating critical habitat, findings such as those required by new section 4(b)(7) regarding emergencies posing significant risks to the well-being of species are not required.

The third circumstance addressed in new section 4(b)(6)(C), is similar to the second. If at the end of the one-year period (or 18 month period) provided for in new section 4(b)(6) the scientific and commercial information indicates that the species should be listed but the analysis necessary to determine and designate critical habitat has been completed, the Secretary must comply with the new section 4(b)(6) time requirement and promulgate the proposal to list as a final regulation.

If critical habitat is not designated at the same time that a listing is made final because the Secretary deems that such habitat is not then determinable, the Secretary may extend the one-year period provided for in new section 4(b)(6)(A) by not more than one year. At the end of that second year, however, or sooner if possible, the Secretary must designate to the maximum extent prudent, on the basis of such data as may be available at that time, critical habitat of such species. As new information becomes available, revisions of critical habitat designations may be made by regulation.

New section 4(b)(7) restates the existing emergency regulation provision with a minor modification to clarify that emergency designations of critical habitat are also authorized.

Section 2(a)(3) of the Conference substitute adopts several technical and conforming amendments.

Section 2(a)(4) of the Conference substitute adopts several technical and conforming amendments as well as provisions appearing in the House bill and the Senate amendment.

Paragraph (D) of section 2(a)(4) modifies and adopts a provision appearing in the House bill which would have required the Secretary to give priority in the preparation of recovery plans to those species that are, or may be, in conflict with construction or other development projects. This requirement is designed to ensure that such conflicts, or potential conflicts, will receive priority attention from the Secretary so as to limit the occasions upon which major problems under Section 7 of the Act may arise. The conferees modified this provision to ensure that this requirement will not divert attention from critically endangered species that benefit from recovery plans but are not threatened with conflicts with human activity.

Paragraph (E)(ii) of section 2(a)(4) amends section (4)(h) of the Act to clarify that the mandate to prepare and publish agency guidelines establishing a ranking system for identifying species that should receive priority review, applies for listings and delistings.

Paragraph (F) of section 2(a)(4) modifies and adopts a provision appearing in the Senate amendment. As modified, written justification for the Secretary's failure to adopt regulations consistent with a state agency's comments or petitions must be submitted to the state agency. The term "state agency" is defined in section 3(18) of the Act.

Section 2(b) of the Conference substitute contains provisions regarding the transitional effect of the amendments made by section 2 of the Conference substitute to section 4 of the Act.

Paragraph (1) of section 2(b) provides that all pending petitions and proposals to revise either of the lists published under section 4(c) of the Act or to designate or revise designations of critical habitat shall be treated as having been filed or proposed on the date of enactment of the Conference substitute. The procedural requirements that are set forth in Section 4(b) as amended by the Conference substitute shall be deemed to be complied with to the extent that similiar requirements set forth in section 4 of the Act were complied with before the date of enactment of the Conference substitute. All such petitions and proposals shall be subject to the standards and the mandatory, judicially enforceable time periods contained in the Conference substitute.

Section 3. Cooperation with the States

This section follows the analogous provisions of both the House bill and the Senate amendment to increase the maximum share of grants to States from 66⅔ percent to 75 percent for single state projects and from 75 percent to 90 percent for multi-state projects.

Section 4. Interagency cooperation and the exemption process

Section 4 of the Conference substitute makes several amendments to the consultation and exemption provisions of Section 7 of the Act.

Section 4(a)(1) of the Conference substitute adopts the House amendment to Section 7(a) of the Act to authorize the Secretary to consult on any project requiring a permit prior to the applicant filing for such permit. However, where the House bill provided for direct consultation between the Secretary and the permit applicant, the Committee agreed to an amendment requiring that the consultation be between the Secretary and the Federal agency that issues the permit. This consultation will be initiated at the request of the permit applicant and it is the clear intention of the Committee that the applicant should be involved in every aspect of the consultation process. Restricting the actual consultation to the Secretary and the Federal agencies involved is appropriate in light of the fact that it is the Federal agency which issues the permit and which, under the provisions of section 7(a)(2) of the Act, must ensure that the issuance of the permit does not jeopardize the continued existence of an endangered or a threatened species or adversely modify its critical habitat. This early consultation is, however, subject to such guidelines as the Secretary may establish. In these guidelines, the Secretary should define the types of activities eligible for early consultation. The Secretary should exclude from such early consultation those actions which are remote or speculative in nature and include only those actions which the applicant can demonstrate are likely to occur. The guidelines should require the prospective applicant to provide sufficient information describing the project, its location, and the scope of activities associated with it to enable the Secretary and the Federal agency to carry out a meaningful consultation.

New section 7(b)(3)(B) provides that a biological opinion issued by the Secretary following an early consultation undertaken pursuant to section 7(a)(3), as amended, is to be treated as an opinion issued pursuant to section 7(a)(2), as amended, if the Secretary reviews the action before the permit is issued and finds that there have been no significant changes with respect to both the activity planned and the information used during the initial consultation.

Section 7(b) of the Act is also amended to provide that promptly after the conclusion of consultation, whether it is a consultation provided for under section 7(a)(2), as amended, with a Federal agency or an early consultation provided for in section (7)(3), as amended, the Secretary shall provide the Federal agency and the applicant, if any, a written statement detailing whether the proposed action will jeopardize the continued existence of the endangered or threatened species involved or result in the destruction or adverse modification of the species' critical habitat.

Both the House bill and the Senate amendment amend section 7(b)(1) of the Act to limit the period for which section 7(a)(2) consultation involving Federally permitted actions can be extended. The Committee adopted the Senate timetable, which authorizes the Secretary and the Federal agency to agree to one extension of up to 60 days without the agreement of the permit applicant. The only condition for such an extension is that the Secretary, before the close of the original 90 day period, must submit to the applicant a written statement that specifies the reasons why a longer period is needed, what additional information is needed to complete consultation and the estimated date on which the biological opinion will be rendered. Extensions of the consultation period for longer than 60 days beyond the original 90 day period require the consent of the permit applicant. If the initial extension will be for more than 60 days, the Secretary must obtain the applicant's consent before the close of the original 90 days. If, during an initial extension, it becomes clear that a second extension is needed, the Secretary must obtain the applicant's consent before the close of the initial extension period.

These limitations on the consultation period will only apply to consultations undertaken pursuant to section 7(a)(2), as amended. Consultations initiated at the instigation of a prospective permit applicant pursuant to section 7(a)(3), as amended, are to be concluded within such period as is mutually agreeable to the Secretary, the Federal agency and the applicant concerned.

Under the existing provisions of the Act, Federal agencies that receive favorable biological opinions which conclude that the agency action would not violate section 7(a)(2) remain subject to the section 9 prohibition against taking individual specimens of endangered or threatened species of fish or wildlife. Should a taking occur, therefore, the offending party may be subjected to citizen suits or civil or criminal penalties for violating section 9 of the Act. The House bill and the Senate amendment contained similar language to address this problem. New section 7(b)(4) and section 7(o), as amended, adopt the House provisions.

Section 4(a)(3) of the Conference substitute adopts the House amendment to section 7(c) of the Act which provides that the 180-day period allowed for biological assessments may not be extended unless the Secretary provides the permit or license applicant, if any, with a written statement of the

reason for the extension and the length of the extension.

Section 4(a)(4) of the Conference substitute adopts the Senate amendment to section 7(e)(10) to delete the requirement that representatives of members of the Endangered Species Committee be Presidential appointees subject to Senate confirmation.

Both the House bill and the Senate amendment streamline the exemption process. Sections 4(a)(5) and (6) of the Conference substitute reflect this basic consensus and contain a series of provisions to resolve the areas where inconsistencies existed.

Whereas the House bill allowed permit applicants access to the exemption process when the permitting agency informed them they were likely to be denied a permit for reasons related to endangered species, the Senate amendment required final action on the permit before an application for an exemption would be ripe for review. The Committee resolved this issue by authorizing permit applicants to enter the exemption process only after being denied a permit. However, the permit applicant need not exhaust his administrative remedies prior to applying for an exemption, but is eligible to seek an exemption after receipt of a permit denial that is subject to administrative review, whether or not it is subject to judicial review. If the project concerned requires several Federal permits, the denial of one permit primarily because of the application of section 7(a) of the Act qualifies the applicant to enter into the exemption process. Projects which are not denied permits primarily because of the application of section 7(a) of the Act may not be considered for an exemption. Persons denied permits may seek administrative review of the denial prior to applying for an exemption if they so choose. However, an applicant denied a permit may not seek administrative review and begin the exemption process simultaneously.

Sections 4(a)(5) and (6) of the Conference substitute provide that the Secretarial report to the Endangered Species Committee will be prepared by the Secretary that issued the biological opinion. The Secretarial report is to be prepared in consultation with the members of the Endangered Species Committee. However, to ensure that the reports will be nonbiased and that proponents and opponents of the exemption have the opportunity to present their views, new section 7(a)(6) requires that a formal adjudicatory hearing be held. It should be noted that this hearing must be conducted by an administrative law judge within the time frame allocated for preparation of the report. This requirement in no way alters the responsibilities of the Secretary in preparing the report. The formal hearing, presided over by an administrative law judge, will provide the record on which the report is to be based. It is not intended to interject the administrative law judge into the report writing process. Endangered Species Committee decisions shall be based on the report of the Secretary, the record of the hearing, and such other testimony or evidence as the Endangered Species Committee may receive.

Sections 4(a)(5) and (6) of the Conference substitute adopt a compromise time frame which provides that the initial findings set forth in section 7(g)(3), as amended, are to be made by the appropriate Secretary within 20 days of receiving the application; the report completed within 140 days after the Secretary makes the initial findings or within such time as is mutually agreeable to the Secretary and the exemption applicant; and the final decision made within 30 days after receipt of the Secretarial report.

The Conference substitute adopts provisions of the Senate amendment which deleted the requirement that the Secretary make a threshold finding that an irresolvable conflict exists before proceeding through the exemption process. This requirement was deleted because all conflicts are "resolvable" whether by accommodation, exemption or otherwise. The other threshold requirements of good faith consultation, completion of the biological assessment and no irretrievable or irreversible commitment of resources by the applicant would continue to apply. However, because of the often complex nature of the finding regarding the commitment of resources and the short time frame allocated to making the initial findings, the Committee agreed to language requiring the Secretary to make this finding only if it is determinable in the time period provided for making the decision. In the event it is not so determinable, the issue of commitment of resources shall be included in the Secretarial report and the Endangered Species Committee must determine, prior to granting an exemption, whether there has been any such commitment of resources.

Section 5. Convention implementation

Section 5 of the Conference substitute adopts provisions of the House bill amending Section 8A of the Act. Section 5 adds a new paragraph to Section 8A of the Act to overrule the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *Defenders of Wildlife, Inc.* v. *Endangered Species Scientific Authority*, 659 F. 2d 168 (D.C. Cir. 1981); amends Section 8A(d) of the Act to abolish the International Convention Advisory Commission; provides that if the United States votes against including any species in Appendix I or Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flura, and if the United States elects not to enter a reservation pursuant to Article XV of the Convention with respect to that species, the Secretary shall, within 90 days after the last day on which the reservation could be entered, submit to the Congress a written report specifying the reasons why a reservation was not entered; and amends Section 8A(e) of the Act to implement the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

With respect to new Section 8A(c)(2), if population estimates are available for a particular species, such information shall be considered with other data in making export decisions.

Section 6. Experimental populations and other exemptions

Section 6 of the Conference substitute amends section 10 of the Act. Sections 6(1) and (2) give the Secretary more flexibility in regulating the incidental taking of endangered species. Sections 6(2) and (4) adopt provisions of the House bill to continue, subject to certain important qualifications, the exemption from trade restrictions for certain finished scrimshaw products; to refine the definition of "scrimshaw product" found in section 10(f)(1)(B) of the Act; and to amend the antique articles exemption contained in section 10(h) of the Act. Section 6(5) adopts a provision of the Senate amendment concerning noncommercial transshipments of fish or wildlife. Section 6(6) adopts provisions appearing in both the House bill and the Senate amendment to give greater flexibility to the Secretary in the treatment of experimental populations.

Sections 6(1) and (2) adopt, with amendments, a provision appearing in the House bill to give the Secretary more flexibility in regulating the incidental taking of endangered and threatened species. This provision establishes a procedure whereby those persons whose actions may affect endangered or threatened species may receive permits for the incidental taking of such species, provided the action will not jeopardize the continued existence of the species. This provision addresses the concerns of private landowners who are faced with having otherwise lawful actions not requiring Federal permits prevented by section 9 prohibitions against taking.

As amended, section 10(a) of the Act will authorize the Secretary to permit any taking otherwise prohibited by section 9(a)(1)(B) of the Act if the taking is incidental to, and not the purpose of, an otherwise lawful activity. An applicant for such a permit must submit to the Secretary a conservation plan that specifies the impacts which will likely result from such taking, what steps the applicant will take to minimize and mitigate those impacts, what other alternatives that would not result in the takings were analyzed, and why those alternatives were not adopted. The Secretary will base his determination as to whether or not to grant the permit, in part, by using the same standard as found in section 7(a)(2) of the Act, as defined by Interior Department regulations, that is, whether the taking will appreciably reduce the likelihood of the survival and recovery of the species in the wild. Use of the regulatory language adopted by the Secretary of the Interior to implement section 7(a)(2) rather than the language of the provision itself eliminates the implication that other permits issued under section 10 do not require consultation and biological opinions issued pursuant to section 7. To issue the permit, the Secretary would also have to find that the taking would be incidental, that the applicant will minimize and mitigate the impacts of the taking, and that the applicant will ensure that there will be adequate funding for the conservation plan.

As with all section 10 permits, the legislation provides that the Secretary shall prescribe terms and conditions to ensure that appropriate measures are taken by the applicant and shall revoke the permit if the permittee is not complying with those terms and conditions. Because this provision contains its own exlicit and detailed standards for the issuance of permits, it is exempted from the general permit conditions specified in section 10(d) of the Act.

Although the conservation plan is keyed to the permit provisions of the Act which only apply to listed species, the Committee intends that conservation plans may address both listed and unlisted species.

In enacting the Endangered Species Act, Congress recognized that individual species should not be viewed in isolation, but must be viewed in terms of their relationship to the ecosystem of which they form a constitutent element. Although the regulatory mechanisms of the Act focus on species that are formally listed as endangered or threatened, the purposes and policies of the Act are far broader than simply providing for the conservation of individual species or individual members of listed species. This is consistent with the purposes of several other fish and wildlife statutes (e.g. Fish

and Wildlife Act of 1956, Fish and Wildlife Coordination Act) which are intended to authorize the Secretary to cooperate with the states and private entities on matters regarding conservation of all fish and wildlife resources of this nation. The conservation plan will implement the broader purposes of all of those statutes and allow unlisted species to be addressed in the plan.

The Committee intends that the Secretary may utilize this provision to approve conservation plans which provide long-term commitments regarding the conservation of listed as well as unlisted species and long-term assurances to the proponent of the conservation plan that the terms of the plan will be adhered to and that further mitigation requirements will only be imposed in accordance with the terms of the plan. In the event that an unlisted species addressed in an approved conservation plan is subsequently listed pursuant to the Act, no further mitigation requirements should be imposed if the conservation plan addressed the conservation of the species and its habitat as if the species were listed pursuant to the Act.

To the maximum extent possible, the Secretary should utilize this authority under this provision to encourage creative partnerships between the public and private sectors and among governmental agencies in the interest of species and habitat conservation.

A comprehesive conservation plan prepared pursuant to section 10(a) would be developed jointly between the appropriate Federal wildlife agency and the private sector or local or state governmental agencies. This provision is modeled after a habitat conservation plan that has been developed by three Northern California cities, the County of San Mateo, and private landowners and developers to provide for the conservation of the habitat of three endangered species and other unlisted species of concern within the San Bruno Mountain area of San Mateo County.

This provision will measurably reduce conflicts under the Act and will provide the institutional framework to permit cooperation between the public and private sectors in the interest of endangered species and habitat conservation.

The terms of this provision require a unique partnership between the public and private sectors in the interest of species and habitat conservation. However, it is recognized that significant development projects often take many years to complete and permit applicants may need long-term permits. In this situation, and in order to provide sufficient incentives for the private sector to participate in the development of such long-term conservation plans, plans which may involve the expenditure of hundreds of thousands if not millions of dollars, adequate assurances must be made to the financial and development communities that a section 10(a) permit can be made available for the life of the project. Thus, the Secretary should have the descretion to issue section 10(a) permits that run for periods significantly longer than are commonly provided for under current administration practices. In this regard the Committee notes that the existing permit regulations of the Department of the Interior contained in 50 CFR, Parts 13 and 17, do not establish a limit on the acceptable duration of section 10(a) permits. No particular time limit should be implied.

The Secretary is vested with broad discretion in carrying out the conservation plan provision to determine the appropriate length of any section 10(a) permit issued pursuant to this provision in light of all of the facts and circumstances of each individual case. Permits of 30 or more years duration may be appropriate in order to provide adequate assurances to the private sector to commit to long-term funding for conservation activities or long-term commitments to restrictions on the use of land. It is recognized that in issuing such permits, the Secretary will, by necessity, consider the possible positive and negative effects associated with permits of such duration.

The Secretary, in determining whether to issue a long-term permit to carry out a conservation plan should consider the extent to which the conservation plan is likely to enhance the habitat of the listed species or increase the long-term survivability of the species or its ecosystem.

It is also recognized that circumstances and information may change over time and that the original plan might need to be revised. To address this situation the Committee expects that any plan approved for a long-term permit will contain a procedure by which the parties will deal with unforseen circumstances.

Because the San Bruno Mountain plan is the model for this long term permit and because the adequacy of similar conservation plans should be measured against the San Bruno plan, the Committee believes that the elements of this plan should be clearly understood. Large portions of the habitat on San Bruno Mountain are privately owned. Prior to the discovery of two species of endangered butterflies, the landowner planned to develop much of its land. The butterflies face threats to their existence, however, even in the absence of any development. The primary threats to the species consist of insufficient regulation of recreational activities and encroachment on the species' habitat by brush and exotic species.

Prior to developing the conservation plan, the County of San Mateo conducted an independent exhaustive biological study which determined the location of the butterflies, and the location of their food plants. The biological study also developed substantial information regarding the habit and life cycles of the butterflies and other species of concern. The biological study was conducted over a two year period and at one point involved 50 field personnel.

The San Bruno Mountain Conservation Plan is based on this extensive biological study. The basic elements of the plan are the following:

1. The Conservation Plan addresses the habitat throughout the area and preserves sufficient habitat to allow for enhancement of the survival of the species. The plan protects in perpetuity at least 87 percent of the habitat of the listed butterflies;

2. The establishment of a funding program which will provide permanent ongoing funding for important habitat management and enhancement activities. Funding is to be provided through direct interim payments from landowners and developers and through permanent assessments on development units within the area;

3. The establishment of a permanent institutional structure to insure uniform protection and conservation of the habitat throughout the area despite the division of the habitat by the overlapping jurisdiction of various governmental agencies and the complex pattern of private and public ownership of the habitat; and

4. A formal agreement between the parties to the plan which ensures that all elements of the plan will be implemented.

Section 6(5) adopts a provision of the Senate amendment concerning noncommercial transshipments of fish or wildlife. Section 11 of the Act authorizes the seizure and forfeiture of any fish or wildlife or plant that has been imported in violation of the law. As noted in a Fish and Wildlife Service Law Enforcement Memorandum dated April 30, 1982, however, discretion must be applied to avoid unnecessarily harsh forfeiture actions in certain noncommercial importation violations. Seizure for the purpose of seeking forfeiture will not always be appropriate where the conduct providing the grounds for seizure and forfeiture involves a noncommercial importation violation which is also non-culpable, that is, where there is no indication of fraud, negligence, or intent to violate the law.

Game trophies in transit through the United States were specifically addressed in the above-referenced memorandum. It was properly noted that noncommercial shipments of endangered species in transit through the United States should not be seized where such shipments were lawfully exported from the country of origin and of re-export, may be lawfully imported into the country of destination, and the exporter (or owner) gave explicit instructions not to ship through the United States or did all that could have reasonably been done to prevent transshipment and the circumstances leading to the property's transshipment were beyond the exporter's (or owner's) control. This exception, however, does not authorize the importation for the purpose of processing wildlife products or mounting of trophies in the United States and subsequent exportation without proper permits.

Section 6(5) codifies the above-stated policy. Civil and criminal penalties as well as forfeiture will be affected. However, the burden of proof will be on the person claiming the applicability of this exception. The Government will not have to offer proof that the numerous elements of this affirmative defense have not been satisfied.

Because it is impossible to differentiate commercial from noncommercial shipments without inspection, the amendment will maintain the ability of the Fish and Wildlife, National Marine Fisheries, and Customs Services to inspect all shipments of fish or wildlife. The exception created by this amendment is a narrow one. Among the conditions that must be satisfied is a requirement that the importation be accidental. The United States must not become a free port for endangered species. The amendment does not authorize the shipment of wildlife into the United States for storage in a warehouse under customs control until a foreign recipient can be located and reexport can occur.

Section 6(6) adopts provisions appearing in both the House bill and the Senate amendment. This section gives greater flexibility to the Secretary in the treatment of populations of endangered or threatened species that are introduced into areas outside their current range.

Section 6(6) adds a new subsection (j) to section 10 of the Act. Paragraph (1) of new section 10(j) defines the term "experimental population." To qualify for the special treatment afforded experimental populations, a population must have been authorized by the Secretary for release outside the current range of the species. Populations resulting from releases not authorized by the Secretary are not considered "experimental

populations" entitled to the special provisions of this subsection.

To protect natural populations and to avoid potentially complicated problems of law enforcement, the definition is limited to those introduced populations that are wholly separate geographically from nonexperimental populations of the same species. If an introduced population overlaps with natural populations of the same species during a portion of the year, but is wholly separate at other times, the introduced population is to be treated as an experimental population at such times as it is wholly separate. Such a population shall be treated as experimental only when the times of geographic separation are reasonably predictable and not when total separation occurs as a result of random and unpredictable events.

Under paragraph (2) of new section 10(j) the Secretary may authorize the release of populations of endangered or threatened species outside their current range if he determines by regulation that doing so will further the conservation of the species. Before authorizing the release of an experimental population, the Secretary must also determine by regulation whether the population is essential to the continued existence of an endangered or threatened species. In making the determination, the Secretary shall consider whether the loss of the experimental population would be likely to appreciably reduce the likelihood of survival of that species in the wild. If the Secretary determines that it would, the population will be considered essential to the continued existence of the species. The level of reduction necessary to constitute "essentiality" is expected to vary among listed species and, in most cases, experimental populations will not be essential.

The purpose of requiring the Secretary to proceed by regulation, apart from ensuring that he will receive the benefit of public comment on such determinations, is to provide a vehicle for the development of special regulations for each experimental population that will address the particular needs of that population. Among the regulations that must be promulgated are regulations to provide for the identification of experimental populations. Such regulations may identify a population on the basis of location, migration pattern, or any other criteria that would provide notice as to which populations of endangered or threatened species are experimental.

The Secretary, acting through the Fish and Wildlife Service of the National Marine Fisheries Service, as appropriate, may avoid the need for step-by-step review and promulgation of specific regulations concerning Federal actions by entering into written agreements or memoranda of understanding with other Federal land managing agencies to develop long-term programs for the conservation of experimental populations.

Paragraph (3) of new section 10(j) clarifies that any population now in existence which may meet the definition of an experimental population shall be treated as such only when determined by regulation. Thus, until such time as the Secretary makes an affirmative determination that a particular population is an experimental population, it shall remain subject to the same protections as any other population of the same species.

All experimental populations, once determined to be such, are to be treated as though they have already been separately listed as threatened species. This provision obliges the Secretary to issue such regulations as he deems necessary and advisable to provide for the conservation of the experimental populations, just as he now does under section 4(d) of the Act for any threatened species.

The Conference substitute restricts the application of section 7 of the Act as it pertains to experimental populations. As noted above, whenever the Secretary determines that a particular population, whether it is already established or proposed to be established, is an experimental population, he is also to determine, as part of the same rulemaking, whether the population is essential to the continued existence of the species. If he determines that it is, then the experimental population remains subject to the full protection of section 7 of the Act. If he determines that it is not, then solely for the purposes of section 7 of the Act the population is subject only to those protections of section 7(a)(1) of the Act and those of section 7 of the Act that apply to species proposed to be listed as an endangered or threatened species. Critical habitat may not be designated for such nonessential populations. However, any experimental population that is found on any unit of the National Wildlife Refuge System or the National Park System remains subject to the full protection of Section 7 of the Act.

Section 7. Enforcement

Section 7 of the Conference substitute adopts provisions of the Senate amendment amending Section 11 of the Act. Section 7 explicitly provides to the Attorney General the authority to seek injunctive relief. Section 7 also amends the citizen suit provision of the Act to authorize actions against the Secretary for failure to perform the acts and duties that are imposed by Section 4, as amended.

Section 8. Authorization

Section 8 of the Conference substitute adopts provisions appearing in both the House bill and the Senate amendment. Section 8 adopts the authorization levels and duration recommended by both the House and the Senate. A separate authorization for implementation of the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere is also adopted. The authorization provisions appearing in Sections 6, 7 and 15 of the Act are consolidated and will now appear in Section 15, as amended.

Section 9. Miscellaneous

Section 9 of the Conference substitute adopts provisions of the Senate amendment. Section 9 adds a new paragraph to subsection 2(c) of the Act, the statement of Congressional policy; amends Section 9 of the Act by adding a provision to prohibit the removal and reduction to possession of any endangered plant that is on Federal land; resolves a conflict between two Federal circuit court opinions regarding the applicability of the prohibitions of Section 9 of the Act to pre-Act wildlife held in the course of a commercial activity after December 28, 1973; and clarifies the scope of the Section 9(b)(2) exception to the prohibition contained in Section 9 of the Act.

WALTER B. JONES,
JOHN BREAUX,
GERRY E. STUDDS,
DAVID R. BOWEN,
GENE SNYDER,
EDWIN B. FORSYTHE,
DAVE EMERY,

Solely for consideration of section 4 of the House bill and modification committed to conference:

DON BONKER,
JIM LEACH,
Managers on the Part of the House.

ROBERT T. STAFFORD,
JOHN H. CHAFEE,
SLADE GORTON,
JENNINGS RANDOLPH,
GEORGE J. MITCHELL,
Managers on the Part of the Senate.

SENATE—*Monday, September 20, 1982*

(Legislative day of Wednesday, September 8, 1982)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Give unto the Lord, O ye mighty, give unto the Lord glory and strength. Give unto the Lord the glory due unto His name; worship the Lord in the beauty of holiness.—Psalm 29: 1, 2.

Holy Lord God, Thy word declares that "* * * there is no power but of God: the powers that be are ordained of God." (Romans 13: 1) May it be understood by the rulers of the world that they hold authority by divine appointment. Help the leaders of our Nation to understand that they rule by the good pleasure of God. Help them to realize that they are accountable to Thee as well as to the people—that they will someday stand before Thee to give an account of their stewardship.

Grant to them the grace O Lord, to take their stewardship seriously as servants of the Living God, to seek to know Thy will in their deliberations, and to do it. Let Thy will be done in this place as it is in Heaven. In the name of the Sovereign Lord of history. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE DEATH OF JOHN GARDNER

Mr. BAKER. Mr. President, last week, John Gardner was killed at the age of 49 near his home in Pennsylvania. His is a tragic loss, which will be mourned by those inside and outside the literary world.

I ask unanimous consent that a poetic portion from his work "Jason and Media" be printed at this point in the RECORD, and following it, the text of an appreciation which appeared in the Washington Post.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM JASON AND MEDIA

The true artist, who speaks with justice, who rules words in the fear of God, is like morning light at sunrise filling a cloudless sky, making the grass of the earth sparkle after rain.

But false artists are like desert thorns whose fruit no man gathers with his hand; no man touches them unless it's with iron or the shaft of a spear, and then they are burnt in the fire.

" 'For men, not earth, the time has run out. Though oceans die, meadows and fields, green hills, they hold no grudge against their murderer. They drift through time in their long slumber, secretly waiting, like beasts asleep in caves. Deep space bombards the poisoned seas with bits of life, and the seas grow whole again, renew themselves like a heart awakening. Algae forms along shores. Great, dark, ungainly beasts dream from the deeps toward land, and out of the slime of blood and bone—witless, charged with sorrow like a dying horse—mind comes groping, tentative, fearful, sly as a snake and as quick to love or strike. So spring moves in again, as usual, and flowers are invented, and wheels and clocks, and tragedies, and eventually, as the mind grows old, familiar with its quirky ways, even comedy is born again—fat clowns strutting, alone and rediculous, shaking their fists at mirrors and fleeing in alarm, to teach that the joke on them is them. So autumn comes again, as usual: Splendid triumph of color, when every tree turns philosophical and the seas, dying, past all repair, provide mankind with jokes. (All consciousness is optimistic, even a frog's. Otherwise who would evolve the handsome prince?) So plankton dies, and the whales turn belly up, become one world-wide stench of decaying symphonies; the grass withers. Starvation; plague. A silent planet again, for a time; drifting boulder pocked with old cities till space sends life. And once more goggle-eyed creatures gaze amazed at the brave new world with goggle-eyed creatures in it, as usual. And all that past minds dreamed or wrote, feared, predicted with terrible insight—all mind loved and mocked—is vanished like snow, cool archaeology. Cheer up, sailors! The wind of time was always dark with ghosts; pacing, angrily muttering to be born.'

"The death-ship vanished, and a moment later, the music; finally the smell. We talked, held councils; but obviously we could make no sense of senselessness, and so, in the end, pushed on. And had adventures, each more lunatic than the last.

[From the Washington Post, Sept. 15, 1982]

JOHN GARDNER'S DRIVEN LIFE: "YOU BELIEVE IN SOMETHING AND YOU PUSH IT"

(By Curt Suplee)

He lived with a frantic and desperate intensity, and he died horribly and in character.

John Gardner, who was killed yesterday in a motorcycle accident near his home in Susquehanna County, Pa., had driven his talent as hard as any writer in American letters. He was 49, and had already written more than two dozen novels and plays, as well as numerous stories, poems, librettos, works of criticism and an epic poem. He had taught for nearly 30 years at nine universities, establishing a reputation for tireless generosity to students. He had founded and edited the literary magazine MSS. And he had become a bohemian legend in the literary world with his nonstop martinis, leather jerkins, shoulder-length shock of silver hair and the brutally powerful Harley-Davidsons he had been riding since his teens.

Yet his art was as scrupulous and earnest as his image was wild. Fiction should be a "vivid and continuous dream," he believed, and said in an interview last July that "in all my work, I'm trying to break down the distinction between reality and fiction, to make the world fiction, to get back to the real real world, where all the myths are true." His philosophical narratives often took the form of ethical dialetics enacted in mythic or magical settings, evoked in vibrantly keen physical description and enhanced by a profusion of metaphor.

His superbly haunting and poetic reconstruction of the Beowulf story, "Grendel," (1971) was cited by Time and Newsweek as one of the best novels of the year. The New York Times called him "a major contemporary writer," a distinction he confirmed with "The Sunlight Dialogues" (1972), an ambitious examination of the anarchic moral forces loose in the '60s. It became a best seller, followed by the brooding comedy "October Light" (1976), which won the National Book Critics Circle Award. In his landmark critical study, "On Moral Fiction" (1978), he said, "I agree with Tolstoy that the highest purpose of art is to make people good by choice." His demand that fiction provide "life-affirming, just and compassionate behavior" provoked a heated national debate about the state of the novel. When he died, his new novel, a philosophical, supernatural thriller, "Mickelsson's Ghosts," was still in the stores. And Gardner was at work on two more, hopeful of an esthetic breakthrough: "I've tried to tear everything that I've done apart," he said in that July interview, "and do something different."

But if he was pushing his genius relentlessly, he was pushing himself even harder. He drank heavily, chain-smoking pipes and cigarettes, many times carousing until dawn. Whether at the Bread Loaf Writer's Conference or at the State University of New York at Binghamton, where he headed the creative writing program, he worked and played at a fierce pitch that even his friends

feared was self-destructive. Mickelsson, the boozy professor of his last novel, is "a man who's destroying his career," Gardner said this summer. "He wants to start over. And so on a sort of unconscious level he does everything in his power to wreck himself. It's mad . . . but it's sort of heroic." And autobiographical? "I am Mickelsson in a sense."

Within a space of two or three hours, Gardner could display a bewildering spectrum of moods. He would be a mesmerizingly charming raconteur, eager to lavish praise on fellow writers, swinging his fuming pipe in a flourish of barroom gregariousness. He would be by turns defensive—"I'm absolutely *loved* in the Midwest and West"—and humble about his own work: "I grew up and began to understand Bellow," he'd say, or "Yeah, I'm coming around to Updike. You know, I'm slow." Then at times his face would suddenly darken and his voice go bleak with woe, as if recalling—after two failed marriages, thoughts of suicide, awesome debts owed for back taxes, surgery for colon cancer, and the terrible enmity of many writers he castigated in "On Moral Fiction"—a life too surfeited with sorrow and the long legacy of guilt.

As a boy, he was driving a tractor on his parents' farm near Batavia, N.Y., when his younger brother was crushed under his machine. He would "watch it happen in his mind," Gardner wrote in a short story about the event, "with nearly undiminished intensity and clarity, all his life." He blamed himself for the death. "I was terrific at guilt, and I did everything in my power to get guiltier," including racing motorcycles as a teenager. "I'm still a motorcycle kid" at heart, he said, recalling how he used to run "flat out," how "when you get near the finish line, you'd just put your hands down on the bars like this"—plopping on the table, elbows splayed—"and then you'd stick your head under."

The same image occurred to him later. He had been "badly hurt" by the generally lukewarm or negative reviews of "Mickelsson's Ghosts." "These people in New York have decided that John Gardner is no good." Eyes dropping, the pipe masking his face, he said he was too depressed to write. But soon the mood began to lift. "You know, I think I'm a really great artist . . . It's the same thing as motorcycle racing. You believe in something and you push it and you just don't worry about what's going to happen."

ORDER OF BUSINESS

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order there will be two special orders of 15 minutes each in favor of the Senator from Georgia (Mr. NUNN) and the Senator from New Jersey (Mr. BRADLEY).

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the execution of the special orders that there be a brief period for the transaction of routine morning business, to extend not past the hour of 3 p.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, I take this opportunity to bring my colleagues up to date on the status of the Senate schedule for the remainder of this year.

First, it is fairly apparent, after listening to the distinguished Speaker of the House of Representatives, that the House of Representatives will be in session until October 8.

As a result, Senators should be aware of the possibility, perhaps even the probability that the Senate will also be conducting business until October 8, and they should make their plans accordingly, I suggest.

Second, subsequent to President Reagan's statement in respect to a session of Congress after the election to complete the appropriations process, it is likely then that the Senate will return, and I speculate at this moment that the return will be Monday after Thanksgiving, which would be November 29, I believe.

That date is not fixed and firm, so I caution Members who may be listening in their offices not to accept that as the last word but for the sake of planning they should know that the leadership on this side, and I believe on the other side as well, are considering a date to return for the lameduck session of November 29. Obviously, no concluding date for that session can be set.

Mr. President, the Senate will have a cloture vote today, pursuant to the provisions of rule XXII, filed against further debate on the Helms first-degree amendment dealing with school prayer.

The vote is not set for a time certain except as the rule so provides and after a live quorum, which is mandatory under the rule, is conducted and established. The vote will occur I estimate sometime shortly after 3 p.m.

Mr. President, if cloture is invoked, then, of course, we will remain on this issue for the remainder of the day. If cloture is not invoked, Members should recall that a motion has already been filed which will require a vote on cloture against the same debate on the same measure tomorrow.

If cloture is not invoked today, I will then try to negotiate a time certain for the cloture vote on Tuesday.

I yield now to the distinguished Senator from North Carolina.

JAPANESE TRADE BARRIERS

Mr. HELMS. Mr. President, I have at hand a letter from Charles Dunn, executive vice president of the North Carolina Textile Manufacturers Association, regarding Japanese trade barriers. Along with his letter Mr. Dunn sent a copy of an article that appeared in the Charlotte Observer of August 30. Incidentally, Mr. Dunn is a fine citizen of my State, and a one-time director of the State bureau of investigation.

We hear much about the flood of imports into the United States, particularly of textiles and apparel, but sometimes we forget that American businessmen are aggressively trying to export U.S. made goods to foreign countries. I have talked with countless businessmen who are frustrated because they cannot sell their products abroad. Many foreign governments have erected insurmountable trade barriers to eliminate foreign competition. This is a serious problem we need to be working to solve.

I encourage Senators to consider how we might help open foreign markets to U.S. businessmen.

Mr. President, I ask unanimous consent that Mr. Dunn's letter and accompanying article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NORTH CAROLINA TEXTILE MANUFACTURERS ASSOCIATION, INC.,
Raleigh, N.C., September 3, 1982.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: Attached for your information is a copy of an article entitled "Carolinas Firms Seeking Opening in Japan Trade" which appeared in the Charlotte Observer on Monday, August 30. While it does not focus directly on textiles, I feel it makes the point on trade practice inequities which we have been trying to make for some years now. That point is the United States and their foreign competitors play by different rules—rules which have proven to be unfair and detrimental to American business and industry.

The Japanese trade restrictions on United States products described in the article are not unique. Our manufacturers encounter them in many countries. Some other countries appear to be more concerned about and active in support of their manufacturers and farmers than does the United States. International trade is often considered a political tool in this country and an economic tool elsewhere.

I certainly appreciate the support that you have given the textile industry and hope the attached article will be of interest and benefit to you.

Sincerely,

CHARLES DUNN,
Executive Vice President.

[From the Charlotte Observer, Aug. 30, 1982]

CAROLINAS FIRMS SEEKING OPENING IN JAPAN TRADE

(By Jan Stucker)

Three years ago, Charles DuBose, president of a Roseboro-based trading company called DuBose International, decided to start doing business with Japan.

"I had clients who wanted to sell pork, poultry, furniture—all kinds of things," he

says. So DuBose went to Japan, hired a Japanese businessman experienced in the ways of trading companies, and brought the man to North Carolina for six months, where he was a guest in DuBose's home.

Despite his efforts, DuBose still hasn't peddled his first item in Japan. The powerful farmers' union in Japan lobbied hard to keep out food items that DuBose wanted to sell, and his company has been unable to break into the country's ancient distribution system—several layers of middlemen that work like an exclusive club.

"We've chased and chased and chased," DuBose sighs. "It's very easy to buy from the Japanese, but not to sell to 'em."

It's a familiar complaint from Carolinas business executives who want greater access to Japanese markets, and who claim that the Japanese aren't playing fair. The Japanese ". . . have seldom focused on the fact that trade is a two-way street," wrote Ted Sumner, chairman of Charlotte-based First Union National Bank in a recent issue of Business Perspectives, a monthly newsletter for small-to-medium businesses.

Japanese Prime Minister Zenko Suzuki says he doesn't understand all the criticism. He points to Japan's gradual cutting of tariffs since the early 1970s, removal of many quotas, and easing of controls on foreign investment. But critics say that while formal trade barriers may be coming down, a tangle of cultural barricades remain, notably a distribution system based on long-term personal relations that is unfriendly to outsiders. A host of bureaucratic regulations and other strategems, including time-consuming approval requirements, also remain.

These formal and informal trade barriers, critics say, have prevented any American product from capturing even 10 percent of the Japanese market.

The Japanese, on the other hand, according to the U.S. Department of Commerce, have 23 percent of the U.S. car market, 90 percent of motorcycles, 50 percent of recording equipment, 50 percent of radios, 30 percent of cameras, and 25 percent of televisions.

In the process, the U.S. trade deficit with Japan soared to a record $10 billion for the first six months of 1982, up from $15.8 billion for all of 1981. In 1976, America's trade deficit with Japan was just $5.4 billion.

Gary Davidson, a 48-year-old Newport Beach, Calif., lawyer, says those figures make him angry, and he's betting that he's not alone. Davidson is using Charlotte as a sort of test market to convince Congress to fight back.

Through a series of eye-catching advertisements which began in July in Charlotte newspapers (placed by his old friend, Max Muhleman, of Matthews Muhleman McLean Inc., a Charlotte-based advertising agency), readers are being urged to lend their support to a campaign "to see that emergency action is taken to correct the inequities in our foreign trade."

The ads are blunt: "If We Had Protected Our Country The Way We Protect Our Trade Rights, We'd All be Speaking Japanese Today," reads one. "It's no wonder that some say we're becoming 'an economic colony of Japan,'" says another.

So far, 112 Charlotteans have clipped the coupons accompanying the ads, demanding U.S. action. At the end of the local campaign, Davidson will weigh the Charlotte response to decide whether to start a nationwide grassroots campaign.

Critics like Davidson often single out Japanese "administrative regulations," better known as red tape. "There are so many of these regulations that it's hard to get a handle on them," says Jeffrey Arpan, a professor of international business at the University of South Carolina and a specialist on Japan.

The red tape often is couched in safety and environmental concerns, says Arpan, so it's hard to attack them directly.

Imported Japanese-made autos, for example, need only a manufacturer's label certifying that the cars meet American safety standards. But before an American car can be sold in Japan, its government requires volumes of documents on standards for each model, plus local testing of most vehicles—requirements that add as much as $500 to the retail price.

This cuts down on American car sales in Japan, a fact that has a direct effect on the Carolinas, which makes carpeting and other textile products used in autos.

Inspection processes required for many foreign products are also a problem. The University of South Carolina's Arpan remembers one case when Japan had only one inspector to authorize an American company's product. That inspector was out of the country most of the year.

Responding to increasing international criticism of such tactics, the Japanese government announced a series of "market-opening measures" in late May. Monthly talks are being held by Japanese and U.S. officials to ensure implementation, though American officials said earlier this month that more work needs to be done.

Manufacturers of three mainstay industries in the Carolinas—finished tobacco products, textiles and furniture—are watching those talks closely. None of the trio has made significant inroads into Japan's potentially huge market of 116 million people.

With the cigarette industry at least, it's not for want of trying, says Mike Morrison, director of public relations for R. J. Reynolds Tobacco International, a subsidiary of Winston-Salem-based R. J. Reynolds Industries Inc.

Reynolds and two other American cigarette manufacturers—Philip Morris and Brown & Williamson Tobacco—have banded together to plead for better access to Japan, where four in 10 people smoke, compared to three in 10 in the United States, where per capita consumption has been decreasing since 1975.

Japanese government restrictions, say American cigarette manufacturers, have limited imported brands to slightly more than 1 percent of the $10-billion-a-year retail sales. A 35 percent Japanese tariff plus other taxes mean that local brands sell for 45 cents a pack less than the $1.25 price of American cigarettes. In addition, sharp restrictions on U.S. advertising and promotion activities and having to rely on their competitor—the government tobacco monopoly, the Japan Tobacco and Salt Corp.—for distribution of their products, have made most efforts to increase American cigarette sales go up in smoke.

Carolinas textile and apparel industries haven't had much better luck. In 1981, according to the U.S. Department of Commerce, American textile exports totaling $106.8 million accounted for 1.3 percent of Japan's market; American apparel exports to Japan totaling $62 million accounted for 2 percent. By contrast, Japan exported $698 million worth of textile and apparel products to the U.S. in 1981.

Some American apparel products sell well in Japan—sportswear, for example. "Japan looks to the U.S. for casual styles, and we've been able to penetrate the Japanese market in the sports an leisure area," says Larry Brill, a spokesman for the U.S. Department of Commerce office of textiles and apparel.

But American government officials say frankly that increasing textile exports to Japan isn't a high priority. "Our problem is trying to keep foreign imports out (of the U.S.) rather than sell more abroad," Clyde Prestowitz, deputy assistant Commerce Department secretary, said in a recent interview.

Prestowitz and others say the biggest reason why the door to Japan has been barely cracked to American textile and apparel products is a distribution system that operates on long-term personal relations and is often hostile to outsiders.

"Japanese retailers have been doing business with the same (Japanese) wholesalers for 150 years," says Walter Johnson, the N.C. Department of Commerce's liaison with Japan. "It's very hard to break into that network."

The story is the same for most Carolinas furniture makers, who manufacture about 25 percent of America's furniture but who so far have made few inroads into Japan. (Drexel Heritage Furnishings Inc. Of Drexel, N.C. is an exception. See accompanying story).

Furniture-making is an ancient industry in Japan and, as with textiles, the retailers have dealt with the same wholesalers for a century and a half, says the University of South Carolina's Arpan. The fact that Japanese homes traditionally have little furniture hasn't helped.

Sales of U.S.-made wooden, household furniture in Japan were only $2 million in 1981. By comparison, sales to the United Kingdom—an entity with 60 million fewer people—were about $12 million.

But the outlook for U.S. furniture sales in Japan is upbeat, say government and industry experts, as Western-style furniture is becoming increasingly popular in Japan. The Japan Retail Furniture Association, and industry trade group, will visit the Southern Furniture Market this October in North Carolina, with an eye to increasing sales of American furniture in Japan.

Mr. HELMS. Mr. President, I thank the distinguished majority leader.

Mr. BAKER. I thank the Senator.

Mr. President, the Senator from Vermont is acting as minority leader at this point, and I yield so that he may seek recognition.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. LEAHY. Mr. President, I thank the Chair.

THE MIDDLE EAST

Mr. LEAHY. Mr. President, I shall discuss for a few moments the very tenuous situation in the Middle East and comment on the President's new initiative for reinvigorating the negotiating process.

First, let me emphasize that I wholeheartedly welcome President Reagan's proposal as a new chance to pursue a

peace settlement that will protect the legitimate security requirements of Israel, while according the Palestinian people their rights to self-determination and a homeland of their own. The great hopes engendered by the historic Camp David accords in September 1978 and the Egypt-Israel Peace Treaty of March 1979 have been sorely threatened by the unfortunate attempt of the administration to develop a nonexistent strategic consensus among Israel and the moderate Arab States against Soviet and radical influence in the Middle East.

That fruitless preoccupation diverted the attention and energy of the administration from the key issues of peace in that region: What is to be done about the Palestinian people, and what is to be the final status of the West Bank and Gaza? Until those basic questions are resolved, in my judgment there is no prospect of a comprehensive peace between Israel and the Arab States, and little chance for broader security cooperation between the United States and the moderate states of the area.

Talking about a Soviet threat is not going to distract the Middle East countries from historic animosities.

Unfortunately, the tragic assassination of Lebanese President-elect Bashir Gemayel and the ghastly mass murder of scores, perhaps hundreds, of innocent Palestinian men, women, and children in the refugee camps of West Beirut have aborted the more positive atmosphere that seemed to be emerging in that war-torn and bleeding country. Israel cannot evade its measure of responsibility for the violence that is shaking Lebanon to its foundations. The savagery of the Christian militias, who were permitted to enter the Palestinian refugee camps by Israeli forces, makes a terrible mockery of Israel's claim of preserving order for its military move into West Beirut. The real reason for ignoring the agreement worked out by Philip Habib was to root out any PLO remnants. Israel must comply with its assurances given to the United States, pull back from West Beirut at once, and cease interfering with the Lebanese Army's reassertion of its authority in the city. As soon as a suitable framework can be negotiated, Israel should withdraw completely from Lebanon. Certainly that would give a lot more credence to the statements of General Sharon that they desire not 1 inch of Lebanon's soil.

Once again Lebanon's agony is drawing attention away from the issues of the West Bank and Palestinian autonomy. The likelihood of intensified sectarian and political conflict has dramatically increased since Israel's massive intervention, and with it the difficulty in securing the withdrawal of Syrian, PLO, and Israeli forces from all of Lebanon. I am pessimistic about the effect these shocking events will have on American attempts to facilitate negotiations for the total withdrawal of all foreign forces, as well as on the hopes for President Reagan's new initiative.

The time is at hand when the United States must urgently lead the international community to assist Lebanon in preventing further violence, either through a greatly strengthened United Nations peacekeeping force or another multinational force, while the Lebanese people work out a new modus vivendi.

However, I continue to believe that it will be unwise to use American forces for such a purpose until we have a far greater level of confidence in the credibility of the countries we will be dealing with. There is too much risk for our being drawn directly into the Lebanese civil war, and American forces would be a magnet for Soviet involvement. Before American troops could be used there must be consultation with Congress and a consensus of opinion—and especially support—for their use.

That is especially important, a consensus, bipartisan opinion, for their use. No one should underestimate the danger potential in their involvement.

Mr. President, I believe there are two absolutely fundamental principles which should guide American policy in pursuit of an equitable settlement and a durable peace: First, Israel's reasonable security concerns must be satisfied. The people of Israel have the right to live free from the constant fear of artillery attacks, terrorist outrages, and the ever present spectre of an Arab war of annihilation. But, at the same time the United States must insist that Israel's security not be a cover or codeword for annexation or continued occupation of foreign territory, whether in the West Bank and Gaza, or in Lebanon. The President has rightly made clear the U.S. position that U.N. Security Council Resolution 242 requires Israel to withdraw on all fronts, including the West Bank and Gaza, in return for peace from the Arabs. This is and always has been the basic bargain in the Middle East question, and it is necessary that all parties understand America has an unequivocal position on this matter.

At present, and for the foreseeable future, Israel has complete military superiority over any feasible combination of Arab States, this, partly because of Israel's own efforts, unstinting American assistance, and the peace treaty with Egypt, fruit of the courage and statesmanship of Anwar Sadat and Menachem Begin, and the leadership of Jimmy Carter. We must not relax our essential commitment to the security of Israel. At the same time, Israel must understand that to have real peace—not just an armed truce—it must use its unchallenged military supremacy to negotiate a fair, equitable settlement that does not depend solely on the overshadowing power of the Israeli defense forces.

The second fundamental principle that should guide our efforts is that no just, lasting peace is possible without resolving the problem of the Palestinian people in a way that accords them their legitimate rights. The Camp David accords developed the basis for addressing this supremely complicated problem. It provided that there should be a 5-year transition period for the West Bank and Gaza during which the inhabitants should exercise "full autonomy" through an elected self governing authority, and should participate in negotiations on the final status of the territories together with Israel and Egypt, and Jordan if it would join.

The President has called on King Hussein to participate in negotiations on the basis of the Camp David accords. Jordan's presence is indispensable to a final resolution of the status of the West Bank and Gaza. King Hussein's response has been encouraging and I am pleased to see him finally make such a response as a beginning. Realistically, however, we cannot expect Jordan to risk joining the peace process unless it can credibly argue that negotiations offer the prospect of an outcome acceptable to the Palestinian people and Arab dignity. I applaud the President's insistence that the United States would support a definition of full autonomy giving the Palestinians real authority over themselves, the land, and its resources. This conception of full autonomy is crucial to the changes for Arab participation.

President Reagan's proposal is based on Camp David, and is one which all Americans can support. The President has made crystal clear the American commitment to Israel, while simultaneously indicating to the Arabs that a solution must give the Palestinians self government. He said that the United States would not support an independent Palestinian State, but would favor Palestinian self government in the West Bank and Gaza in association with Jordan. If I understand the President correctly, however, the final outcome is to be determined in negotiations, and the United States is not trying to prescribe the eventual result. It is essential that the United States not be perceived by the parties as seeking to impose its favored solution to such an emotion-laden and explosive question but rather is using its position to help bring about a negotiable settlement.

Of very great significance, especially in view of the administration's previous permissive attitude, is the President's call for a freeze on Israeli settlements in the West Bank and Gaza. The importance of this position for

holding open the possibility of an eventual favorable Arab response cannot be overemphasized. From the Arab point of view, the settlements are a form of "creeping annexation," all the more so in light of the Begin government's repeated declarations that Judea and Samaria, the West Bank, are by right part of the land of Israel. Unless Mr. Begin can be induced to show restraint in his settlements policy, it may prove extraordinarily difficult—if not impossible—to persuade Jordan and moderate Palestinians to join any negotiating process.

Mr. President, there has also been another peace initiative in recent days: The so-called "Fez Charter" produced by the assembled Arab leaders in Fez, Morocco, on September 9. All elements of that plan—in particular the call for recognition of the PLO and for an independent Palestinian State on the West Bank and Gaza with East Jerusalem as its capital—are unacceptable to Israel. However, as Secretary of State George Shultz has noted, it may be that the plan's call for the U.N. Security Council to guarantee "peace among all states of the region including the independent Palestinian State" could imply recognition of the right of Israel to live in peace. If so, it would mark a major step forward in Arab thinking, possibly a long-awaited opening to start moving the Arab States along the road taken by Egypt in 1979. Eventually, for there to be real peace there must be open, unreserved, and complete recognition of the legitimacy of Israel. But it is unrealistic to expect the Arab world to reach that stage without long, hard bargaining for Israel's withdrawal from the occupied territories and an acceptable arrangement for Palestinian self-determination.

The initial reaction of most of the parties, especially that of Israel, to the President's initiative has been disappointing, although not surprising. The only sensible reaction for the United States is to regard the Israeli rejection and the Fez Charter as opening moves in a reactivated diplomatic arena. The President needs strong bipartisan support from Congress and the American people as the political and negotiating situation evolves.

Certainly, each one of us in the U.S. Senate should pledge ourselves to work with President Reagan in bringing about a bipartisan consensus. The U.S. ability to negotiate in this part of the world is hopelessly crippled if any one of the Middle East countries thinks that the President deals with a sharply divided Senate behind him.

Certainly the chances of a Middle East peace are badly damaged if any group, any country feels that they can come and get Members of the U.S. Senate to make efforts to shoot down the President's proposals before they even have a chance to get off the ground. After all, the President's proposal is only the beginning in a long, difficult road. It will doubtless undergo modification as the positions of the sides become clearer and as actual negotiations draw nearer. That is all the more reason for it to be a bipartisan effort.

I am pleased the Reagan administration has chosen to pursue the most vital American interest in the Middle East: a negotiated settlement to the Palestinian question which could open the way to a comprehensive peace between Israel and all the Arabs.

I urge President Reagan to remain steady on his course in the face of harsh criticism from all sides and the demonstrated unpredictable events in that tumultuous area. Certainly I will do everything I can to work with him in bringing that about. I urge my colleagues in the Senate to do likewise.

(Mr. MATTINGLY assumed the chair.)

The PRESIDING OFFICER. The Senator's time has expired.

RECOGNITION OF SENATOR NUNN

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia (Mr. NUNN) is recognized for not to exceed 15 minutes.

THE CRIME CONTROL ACT OF 1982, TITLE IV—HABEAS CORPUS REFORM

Mr. NUNN. Mr. President, Senator CHILES and I continue to daily address this Congress on the problem of habeas corpus abuse by career criminals. Example after example clearly indicate that corrective legislation is needed to relieve our criminal justice system of this needless and burdensome litigation. The problem is so severe that members of the legal community at every level—local, State, Federal—have been sending strong signals to this Congress for action to eliminate habeas corpus abuse. The cases themselves are perhaps the strongest and clearest proof of the need for reform in habeas corpus proceedings.

Typically, violent criminals successfully utilize the writ of habeas corpus to prolong finality of judgment. The "great writ of liberty" is too often distorted into an easy means by which convicted criminals avoid their deserving punishment. Take, for example, the case of William Howard Cross of Marietta, Ga.

Cross had been arrested several times for felony gambling charges and convicted of gambling as well as bribery of a police officer. Despite a substantial criminal record, Cross was still not serving his 5-year jail sentence some 6 years after his conviction and 8 years after the crime itself. Termed a "legal legend" by the press, Cross had successfully used both habeas corpus and appeal proceedings to delay and delay again the imposition of sentence.

Cross had begun by appealing his original conviction through the State system. The conviction and sentence was affirmed not only by the Georgia Court of Appeals, but also by the Georgia Supreme Court, the U.S. district court, and the U.S. Court of Appeals for the Fifth Circuit. Finally the U.S. Supreme Court refused Cross' request to review the case.

With his appeal litigation temporarily exhausted, Cross was required to begin serving his sentence after the Supreme Court's refusal to hear the case.

After a mere 2 months in jail, Cross was released when a State court judge granted his newly filed motion for a new trial. When the Georgia Supreme Court later reversed that ruling, Cross was ordered incarcerated, but first granted an additional 30 days to put his affairs in order.

Cross wasted little time in using those 30 days to prepare a petition for habeas corpus relief which he then filed in U.S. district court. In that petition he again attacked the very same conviction which court after court after court had already upheld as valid. Despite his past record of unsuccessful and repetitive litigation, a U.S. magistrate again delayed an order to incarcerate Cross, pending the outcome of the habeas corpus litigation. A justifiably disappointed police official commented on the absurdity of the Cross litigation: "This is just a classic case. It goes on forever."

It is time that this Congress decides that criminal cases cannot and should not be allowed to go on forever. S. 2543, the Crime Control Act of 1982 which Senator CHILES and I have introduced, provides an effective legislative remedy for criminal opportunists like Cross. The bill includes a 3-year statute of limitations for the filing of habeas corpus petitions and assigns greater weight to previous State court determinations of factual issues. With provisions like these enacted into law, convicted criminals like Cross would no longer be able to endlessly delay their punishments. I again call for the prompt consideration and adoption of S. 2543 and its proposals for habeas corpus reform.

Mr. President, I might add that I am hopeful that we will be able to bring up the overall legislative package by Senator THURMOND and Senator BIDEN on which we entered into a time agreement before the August recess but on which no action has been taken. I am hopeful that that legislation can be brought up on its own right, but I wish to alert my colleagues that unless we are able to reach some agreement on bringing it up this session, I will cer-

tainly make every effort to work with others in the body to attach that legislation to some pending bill.

Mr. President, I yield back the remainder of my time.

RECOGNITION OF SENATOR BRADLEY

The PRESIDING OFFICER. Under the previous order, the Senator from New Jersey (Mr. BRADLEY) is recognized for not to exceed 15 minutes.

LENDING RISKS IN THE DEVELOPING WORLD

Mr. BRADLEY. Mr. President, nearly a month ago, I addressed my colleagues twice about the potential risk to our international banking system. Today, unfortunately, the contingency of instability in financial markets has come closer to reality. Soon we may not need just precaution but a cure.

Mexico's currency crisis over the last month is more ominous than the Polish debt crisis—especially for our economy. Mexico is a friend, a neighbor, a strategic ally, and a much bigger debtor to U.S. banks and the Western banking community as a whole. Further, Mexico's plight compounds the troubles raised for the world banking system by Poland. And it springs from economic problems which in varying degrees are shared by many other borrowers in the developing world. Mexico is a dramatic symptom of a serious malady, not an isolated case.

Just over a month ago, Mexico's money troubles flashed to the front pages of our newspapers. Mexico then devalued the peso for the second time in 6 months and established a dual exchange rate, one floating and one preferential, to conserve Mexico's depleting pool of dollars.

These currency measures only triggered fears of capital controls and accelerated the flight of capital abroad.

One week later, the Mexican Finance Ministry reconfirmed those fears by converting all withdrawals from foreign currency accounts to pesos at the below-market exchange rate of 69.5 pesos to the dollar, and barred the transfer abroad of these foreign currency accounts. The next day the Ministry closed the foreign exchange markets, and the black market drove the dollar up to 150 pesos per dollar.

Business transactions came to a halt as companies found themselves unable to meet their dollar obligations and the businesses to whom they owed dollars refused pesos. Also, the dollar-denomination debts of Mexican businesses became unsupportable. Consequently, many Mexican businesses found themselves on the brink of bankruptcy and many Mexican banks came close to insolvency. Worse, the country of Mexico was in danger of becoming unwelcome in international business and banking circles.

But the Western nations have too much at stake, economically and politically, to be indifferent to Mexico's problems. That is why an international rescue operation for Mexico was launched on August 19. This operation will mobilize about $5 billion by the end of the year through bridge loans and new money from Western central banks, the International Monetary Fund, the U.S. Government and commercial banks.

These measures probably will spare Mexico, but not without pain and difficulty. The rescue operation will carry, as it should, conditions requiring Mexico to adopt measures to reduce inflation, government spending and its growing current account deficits. Labor, leftist, and nationalist groups are likely to oppose both the outside interference and the austerity of the necessary policies. Partly to assuage such opposition, President Portillo nationalized Mexican banks on September 1. But the nationalization, joined to complete exchange controls, was also an effort to head off a feared collapse of Mexico's banking system.

The events in Mexico have made for dramatic reading over the last month, but they were not sudden or unanticipated. Mexico, with a $80 billion foreign debt, tumbling oil revenues, a gaping budget deficit and galloping inflation had been veering toward financial crisis for some time.

Falling oil prices probably have raised Mexico to the rank of the world No. 1 debtor, ahead of Brazil. Last year, sluggish oil markets reduced Mexico's anticipated earnings by $7 billion, while other export earnings were off about $3 billion.

If oil prices continue to fall, say to $25 a barrel, Mexico could lose another $14 to $15 billion over the next 3 years. This will be added to the billions Mexico borrowed in the late 1970's to finance the oil expansion which is not paying off as anticipated. It will also be added to this year's new and rescheduled debt which Mexico will have to service at higher interest rates.

With about 50 percent of Mexico's bank debt falling due this year, it has been estimated that, including refinancings, Mexico would need to borrow about $25 to $28 billion this year to stay afloat. Before the recent currency crisis, Mexico had borrowed some $6.5 billion with the promise to pay higher interest rates than before.

The international rescue package will help narrow the financing gap, but it is still unclear how Mexico will bridge it.

It is worrisome that the world financial community has been forced to try to cope with Mexico's crisis with an ad hoc operation. Warnings from Mexico and elsewhere have been sounding for some time. Those warnings should have precipitated a financial contingency plan, preparing the financial system to cope immediately with emergencies and perhaps averting more intense pressures that would arise if the public loses confidence in an exposed bank, or in the security of the whole banking system. Talks of Mexico's troubles stirred a movement of capital in the United States from commerical paper and certificates of deposit into Treasury bills. It also forced a number of U.S. banks with known Mexican exposures to pay a premium over the going rate in order to be able to sell their CD's. Reports suggest that worldwide—a tiering of banks is occurring, with some paying more for money than others.

Mr. President, the banking system's problems could worsen because the economic ills of Mexico—and Poland—are not unique. Their ills were progressive and events combined to create a crisis. But other countries may face the same problem. Without new safeguards, coping with new crises, on top of the existing troubles, could prove too much for the international financial system.

Despite the high levels of growth achieved by some developing countries during the 1970's, for nearly a decade the nonoil developing countries of the world have faced adverse external environments. They have known recurring recession or slow growth in their industrialized world markets, declining terms of trade, high nominal and real interest rates and rapidly rising energy costs. For those countries who nonetheless sought to maintain industrialization and economic development, it was necessary to borrow abroad. Many of them did—on an unprecedented scale—which left many of the nonoil developing world borrowers with an enormous debt. As the global recession continues, some of the loans may be at risk, and some of the borrowers may be pushed to the brink of default.

Much of today's sovereign debt is different than in the past. In the past, balance of payments financing was needed to manage cyclical liquidity problems. Today, to a growing degree, balance of payments financing problems are built in. They arise from spiralling import costs, especially oil import costs, declining terms of trade, Government deficit spending, price controls, subsidies and exchange rate policies and perhaps worse, a self-perpetuating debt cycle, in which borrowing is done largely to service outstanding loans.

Consequently, many debtor countries face periods of basic structural adjustment. To escape the cycle of debt, these countries will have to implement austere adjustment programs. For some, the road to adjustment will

be hazardous, with the political risks even more grave than the economic ones. Because Western banks are highly exposed in several adjusting countries, some of them may become the reluctant partners of these countries in their high-risk adjustment ventures.

The task of adjustment for many developing countries is made harder by the continuing recession, and the contraction of world trade. It is a sign of our troubled times that last year, for the first time since the end of World War II, the physical volume of world trade declined. The exports of the nonoil developing world, which had grown an average of 9 percent yearly during 1976 to 1979, fell to 4 percent. Their combined real output dropped from 6½ percent in 1978 to 2½ percent last year. For the first time in recent history, recession in the industrialized world fostered a slump in the developing world. The further contraction of trade and credit is likely to exacerbate the problems of slow growth in both the developed and developing worlds.

The debt problems of the developing countries have placed international bankers in a double bind. Reducing credit to strapped debtors could impair their ability to service old debt, but maintaining or raising levels of credit to them could leave the banks with too risky exposure in a single country. So by moving their level of lending to major borrowers either up or down, many banks could endanger their assets.

This dilemma haunts more than a few banks. Eighty percent of the largest U.S. banks are exposed in at least one developing country in an amount that is greater than 30 percent of their capital. The aggregate exposure of the nine largest U.S. banks in developing countries rose from 1½ times total capital in 1977 to more than double total capital in 1980.

Total outstanding loans to nonoil developing countries from $97 billion in 1973 to $505 billion in 1982. Loans by private creditors alone rose from about $49 billion to $306 billion over the same period. Of course, American bankers are not alone in this dilemma. As I said, foreign lending is becoming a big business for the banks of all industrialized countries. For the OECD banking system as a whole, the ratio of foreign assets and liabilities to total assets and liabilities nearly doubled during the 1970's rising from 12 percent to 20 percent.

If we count the Mexico rescue as a success, to date, the enormous growth in foreign lending has produced no major disasters for the international banking system. Nonetheless, the Group of 30's international bank study group found that most bankers believe that the risks to the entire system have increased and will increase more rapidly in the future.

In recent years, lenders have had to work harder to try to keep their foreign assets to working order. The record on official debt rescheduling reflects the growing workload for bankers. Since 1956, there have been 56 official reschedulings; 22 of them—involving 13 countries—have occurred since 1975. Since 1975, more funds have been involved than for all the rescheduling in the past 30 years before.

The amounts involved in recent rescheduling have varied. For example, in 1978, Peru rescheduled $518 million. In 1979, Sudan rescheduled $421 million, and Zaire rescheduled $1.3 billion; $580 million was rescheduled for Nicaragua in 1980, and $3 billion was rescheduled for a nearly insolvent Turkey. Mexico, of course, will reschedule several billion this year alone.

The number of countries in arrears—countries who are not making payments of interest and therefore creating nonworking assets for their creditors, also has grown. One recent study found that while, in 1974, there were only 3 countries in arrears for a total of about $500 million, by 1981 more than 25 countries were in arrears, and the total amount involved was at least $6.5 billion.

However, looking at the aggregate debt picture may cloud the view of risk to the international banking system. From one perspective, an aggregate view overstates the risk because the bulk of lending has gone to a few countries whose repayment capabilities are viewed as good because of their potential oil or general export revenues. From another perspective, the concentration of lending has enhanced the risk to the system. Trouble for any one or two major borrowers could ripple through the whole banking system.

Let us take a closer look at some of the major borrowers. Brazil and Mexico are the system's superborrowers. Each alone accounts for 40 percent of the bank capital of the nine largest U.S. banks, and for 25 to 30 percent of the bank capital of all major banks in the world. Unhappily for bankers who have them both as major customers, what would most help improve Mexico's current account deficit—rising oil prices—would most hurt Brazil's. By the same token, the softened oil markets, which have given Brazil some relief in the last year or so, have helped create an unanticipated currency crisis for Mexico.

Mexico's woes have been Brazil's good fortune and the world's longtime biggest borrower has used the opportunity to restore its current account position. Using painful austerity measures and vigorous export promotion techniques, Brazil last year was able to turn its widening deficits since 1977 into a $1.2 billion surplus. A 16 percent rise in exports generated $23 billion, which help bring Brazil's reserves back above the $7 billion mark.

Nonetheless, the $1.2 billion surplus will still leave Brazil about $17 billion short of what it will need to service its existing debt, a heavy debt which it built up during the 1970's to maintain economic growth in the face of the oil shocks. Even with last year's strong export performance, debt service alone will eat up over 70 percent of Brazil's export earnings.

Moveover, Brazil has paid a heavy price for even this success. Last year, for the first time in 30 years, Brazil's economy failed to grow. Industrial production fell by 9.3 percent and more than 1 million jobs were lost. Interest rates on overseas borrowing proved 5 percent higher than the worst case anticipated by Brazil's financial managers when they first embarked on their adjustment program. Finally, the low prices in world markets commodities still responsible for a third of Brazil's exports added to the difficulties.

Brazil's external position remains precarious. The world market may become even more sluggish, and some of the markets which supported Brazil consumer exports last year, such as Chile and Uruguay, may now be saturated. Further, Brazil holds $1.5 billion of Poland's shaky debt. This debt was made to finance Brazilian exports at interest rates of 5 to 7 percent when Brazil was borrowing abroad at three times that rate. Like other Polish creditors, Brazilian banks are sensitive to the potential loss of Polish assets. But for Brazil, this may compound reservations which international bankers must have about lending to the banks of a country that still carries a debt of near $80 billion dollars, much of it at historically high real rates of interest. Despite its progress, Brazil remains a large off-balance domino in the international banking system.

Errors of economic policy compounded by a devastating error of foreign policy have turned Argentina into the financial sick man of Latin America. Argentina's problems make Mexico's pale by comparison. Massive borrowing in 1979–80 to sustain an excessively overvalued Argentine peso set the conditions for growing deficits and debt. Argentina's invasion of the Falkland Islands then sent its economy and its bank creditors into a panic, making the chances for near-term financial recovery remote. The August 24 resignation of Argentina's economic minister after only 7 weeks in office has worsened the bankers' fears.

With the debts of war, Argentina has run up its external debt of about $40 billion, thereby quadrupling its debt since 1976 and raising it to about one-third its GDP: $14 billion is due this year, an amount equal to 150 percent of Argentina's export earnings.

Since early July, the Argentine peso has plunged from 15,000 to the dollar to 40,000 to the dollar.

The truth is Argentina simply cannot pay its hard currency debt. But its lenders have no interest in declaring a default. Default would rob Argentina's bank creditors of book assets. U.S. banks hold $9.2 billion of these assets. Along with their European—including British—colleagues, they will be trying to work Argentina and themselves out of the financial mess made by the pointless Falkland Islands war. Putting back together the pieces of Argentina's finances should prove one of the toughest challenges faced by international bankers. One comfort they can take is that they are not faced with the magnitude of debt held by Brazil or Mexico.

Latin America, of course, is not the only area with financial problems, though there is some evidence that the Falkland crisis has cooled bankers' interest in the region as a whole. Latin America gets a lot of attention in the United States because it is the region in which American banks are most exposed. But financial pipelines link the stability of the international banking system—and U.S. banks through it—to the fates of many countries around the world. Eastern European debts, owed largely to Western Europe, recently has earned the worried attention of many bankers. I plan to devote another statement to the subject of Eastern European debt. But economic troubles in other countries have many small holes which could undermine the ability of the international banking system to sustain the pressure of default by a single large debtor.

Friendly countries like Turkey, Zaire, and Egypt have had serious balance of payments struggles in recent years. Turkey and Zaire have had long, tortuous sessions with creditors unhappy about having to reschedule their sizable debt. Egypt's debt-to-export ratio has risen so high that a major drop in external assistance—which comes largely from the United States—could precipitate a debt crisis there.

Another country important to the United States with unnerving financial troubles is Nigeria. The oil slump is putting downward pressure on the oil revenues Nigeria depends on to keep its economy afloat. Its foreign currency reserves have fallen to under $3 billion, which barely covers its imports for 6 weeks. These imports have been running $600 million a month above Nigeria's oil income.

Consequently, Nigeria will have to borrow more than the $3.1 billion it planned for 1982. At the same time, its central bank has suspended letters of credit and import registrations indefinitely, hoping to chill imports. Nigeria is now looking to Saudi Arabia and other Persian Gulf lenders for generous credit terms.

Given the projected world economic trends, generous credit terms are certain to be scarce for any country—even an OPEC ally. The terms of credit are turning against borrowers throughout the developing world.

To the extent that adverse borrowing conditions forces highly leveraged countries to adjust their economies and national credit to its most productive use, the effects may be positive over the long term. But financially strapped countries make unreliable borrowers, which is bad news for the banks who already hold their debt on their books. They also make poor trading partners for an industrialized world whose growth is increasingly interdependent with theirs. And finally, they make poor friends and allies to democracies who hope for their political stability and for the liberalization of their societies.

The rising debt of the developing world cannot be written off as a bankers' problem. The economic and strategic interests of all Western people involves us all in this problem. The world economy requires sufficient liquidity to sustain productive investments, permit heavy debtors to adjust their way back from the brink of insolvency, and sustain confidence in the international banking system. It is a big job. No single proposal will maximize all the objectives. Nonetheless, new measures should be carefully drafted to avoid encouraging banks and countries to continue risky lending and spending practices in the future, that is to avoid what is known in bankers' parlance as the moral hazard problem.

I believe that, first, we must firm up the 1975 central bankers' agreement concerning who has lender of last resort responsibilities for each type of banking operation. This entails defining what is considered a bank for such purposes, so as to avoid the uncertainty that worsened the Banco Ambrosiano fiasco. Uncertainty about responsibilities can create unnecessary alarm about the safety of international deposits. However, such an agreement must assure that imprudent banking is disciplined through the repayment and restructuring terms demanded by the lender of last resort.

Second, the International Monetary Fund or the Bank for International Settlement should create a means for quickly intermediating currencies for the central bank who assumes lender of last resort responsibilities. This would assure that there were available sufficient amounts of the currency required to cover a vulnerable bank's liabilities.

Third, in view of the current and potential financial crisis of many large borrowers in the developing world, we should authorize participation in an emergency fund to be administered under strict conditions by the IMF. To avoid the potentially dangerous ramifications of insolvency on the part of a debtor country, loans which the commercial market would not bear must be made by official agencies or with official guarantees. But they must be made on condition that their recipients correct economic practices which produced or could exacerbate their financial problems.

Finally, I believe an increase in the quotas of participants in the IMF is warranted. The fund will need resources to help manage the financial problems of so many developed countries and stave off the serious global recessionary impact which a shortage of funds could produce. Again, we must assure that fund credit is made available on terms aimed at restoring the current accounts of debtors to balance and creating the domestic basis for sustained production.

The time is ripe for action. Too much is at stake to succumb to wishful thinking or shortsighted indifference.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

THE CLOTURE VOTE—A FATEFUL CHOICE

Mr. MOYNIHAN. Mr. President, I thank the Chair for allowing me to rise on this occasion to speak in the minutes remaining before the live quorum at 3 p.m., when the Senate will make the fateful choice whether we shall maintain the constitutional separation of powers and the independence of the Supreme Court and the rule of law as basic to our Nation, or whether we shall move away from that constitutional regime which has served us for just on two centuries and which was thought to be as secure an arrangement as any in the world. That is the choice we shall make at 3 o'clock, and it may be the world is not much watching what we do, but if we fail in our duty, I doubt the world will ever forget what we did. This is one of those moments when history is made by persons not sufficiently aware of what they are doing.

To those who might be listening in their offices, may I offer the thought—I cannot assert I make the point because that is for any to judge and others can judge equally with me, but I offer the thought and plead the case that the issue is not school prayer; the issue is the constitutional nature of American Government. If we vote to invoke cloture this day, we shall change the constitutional nature of American Government.

On the last occasion that I spoke to this matter, I observed that what defined American Government was not majority rule as such. Majority rule is, in fact, not an unusual phenomenon, not unknown in the world. It is majority rule with minority rights that is singular, that defines a democracy and produces the stability that our democracy, almost alone in the world of nations in the world, can claim. There is a claim that Iceland might make, and I, for one, should be willing and happy to concede it. But as a large Nation, as a continental Nation, as a world power, no country on Earth has lived under a written constitution so long as we have done. None is close to having done so.

I have, on more than one occasion, risen on this floor to recount an afternoon in the United Nations General Assembly—during my time as our Ambassador there—when I was whiling away the hours and thinking of odd things to occupy my mind apart from the addresses of the occasion. I started looking down the list of names of members of the United Nations. I asked myself how many of these nations both existed in 1914 and had not had their form of government changed by force since then. The answer, Mr. President, was seven. Seven nations that can claim to have existed in 1914 and not to have had their form of government changed by force in that interval.

What a precious thing is the stability of the American Republic. How rare, apart from being precious. It would be precious if it were common. It is not only precious, but it is almost singular. And we have seen the Attorney General of the United States tell us that the proposal before us is unconstitutional.

The Attorney General, William French Smith, wrote on March 6, 1982:

> Congress may not, however, consistent with the Constitution, make exceptions to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.

This bill would do that. There is none in the visitors' gallery who should not know that their right to assemble is threatened, their right to be in that gallery threatened. There is none in the press gallery who should not know that if we can strip the Supreme Court of its jurisdiction in some matters, we can strip the free press from the first amendment also. There is no limit to the legislative tyranny that can follow—no restraint, no institution, no rule.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MOYNIHAN. Mr. President, I sincerely hope we will not do this. I assure the President that history will record it, if we do that, in a way that will disgrace us all.

I see that my distinguished friend from Montana is on the floor. My time having expired, I look forward to having his further views upon this fundamental approach.

Mr. BAUCUS addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I congratulate and pay my due respects to the senior Senator from New York who has eloquently and fundamentally defined the issue before us. The Senator from New York has many times taken the floor and has many times spoken before committees of this body passionately defending the constitutional rights of Americans. I wish that more Americans knew the degree to which the Senator from New York has passionately stood for and defended their constitutional rights; that he has exercised his utmost abilities to try to dissuade Members of the body and various committees from adopting measures which in the short term may seem easy, which in the short term may satisfy the whimsical desires of various individuals but at the same time would fundamentally alter, to say the least, and, more than that, undermine our constitutional form of Government.

It is a difficult point to make in these times in America but he has, I think, stated the argument very well. I thank the Senator from New York.

Mr. MOYNIHAN. The Senator is most gracious.

COURT STRIPPING

Mr. BAUCUS. Mr. President, I rise in support of the pending amendment and in opposition to the underlying Helms amendment.

I sincerely hope that we are making some progress in explaining to our colleagues, to American citizens, and to the press what the real issue is before us. The press accounts continue to describe the ongoing dialog and today's procedural vote as involving "school prayer."

Mr. President, the ongoing debate is about court stripping. Today's procedural vote is about court stripping. I am here today because I am concerned about court stripping.

The American Bar Association opposes this pending amendment because it is court stripping. The Attorney General of the United States has not endorsed the Helms amendment because it is court stripping. The President of the United States has not endorsed the Helms amendment because it is court stripping.

All of us involved in this ongoing dialog are trying to explain to the American people and to the press that we are not talking about school prayer. We are not talking about religion in our schools. We are talking about court stripping.

This precise point was made most cogently in an editorial which appeared in the New York Times this morning. The title of the editorial is most appropriate. It is: "The Issue Is Court-Stripping."

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE ISSUE IS COURT STRIPPING

Last week a weary Senate finally tabled an anti-abortion rider to the vital debt ceiling bill. Today it decides whether to cut off debate on another legislative parasite on the same bill, a school prayer rider. This time the issue is far more than a politically sensitive "social issue." It is the structure of constitutional government. If a filibuster by a number of committed Senators is the only way to make that point clear to their colleagues, then the filibuster should continue.

Senator Jesse Helms, who sponsored the rider, believes the Supreme Court was wrong two decades ago in ruling that officially sponsored prayer violates the First Amendment. But his rider would strip all the Federal courts, including the Supreme Court, of the power to rule at all in prayer controversies.

Passage of such a measure would provoke a constitutional crisis. It would challenge the role of the Federal judiciary as interpreter of the Constitution—indeed, as a co-equal branch of the Government.

The proper way to overcome a Supreme Court constitutional ruling is by amending the Constitution. That is the basis of Attorney General Smith's objection to legislative shortcuts. President Reagan showed similar awareness when he called for a vote this year on the school prayer constitutional amendment he has proposed.

For good reason, amending the Constitution is far more deliberate than passing a law. It requires a two-thirds vote of Congress and ratification by three fourths of the states. The success of Mr. Helms's measure would mean that a simple majority in Congress could render the Constitution unenforceable in Federal courts—and subject to varying interpretations in state courts.

Let the debate continue until the entire Senate understands, and knows that the voters understand, that the issue is not prayer but court-stripping.

Mr. BAUCUS. Someone may well ask: "Senator BAUCUS, fine, the issue is court stripping. What difference does that make? Why does this issue deserve any more discussion than a tax bill or an appropriations bill or any other matter before the Senate?"

Mr. President, my response is quite simple. What is being proposed on the Senate floor by Mr. HELMS is a totally radical departure from the way we have protected constitutional rights for nearly 200 years in this country. It may seem on its face like a simple, substantive vote on an issue that concerns some of our constituents. But, in fact, if the proposal before us is enacted, and withstands court challenges, from that moment on the Su-

preme Court will only be able to protect those constitutional rights that Congress permits it to protect.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. BAUCUS. Gladly.

Mr. MOYNIHAN. The Senator says if it is enacted and survives the court challenge. Would it not be safe to say, if this is enacted and the court should declare it unconstitutional, that we would have a full-blown constitutional crisis?

Mr. BAUCUS. The Senator is absolutely correct because this body would then feel that it has the right to so limit Supreme Court jurisdiction. The Supreme Court says Congress does not have that right. There is an absolute impasse; a constitutional crisis of the most dramatic proportion. The Senator is absolutely correct.

Let me state the same underlying point again. If the proposal before us is enacted and does withstand court challenges, from that moment on the Supreme Court would only be able to protect those constitutional rights that Congress permits it to protect.

Mr. President, I hope my fellow Senators fully appreciate what that means. I hope my fellow Americans fully appreciate what that means. I hope the press covering this debate fully appreciates what that means.

Mr. MOYNIHAN. Will the Senator yield for one question? Could he perhaps describe to me what is the nature of the legal system in the Soviet Union with respect to the political authorities? Do Soviet courts decide what they will pass upon or do the political authorities decide?

Mr. BAUCUS. As the Senator is implying in his question, quite obviously in the Soviet Union there is no court which protects fundamental constitutional rights. For example, the Bill of Rights, there is no document which protects citizens of that country from governmental onslaught.

Mr. MOYNIHAN. If Dr. Sakharov wished to appeal to the courts from his present arrest and exile, would he have likely any success? Would there be any independent standard against which he might appeal?

Mr. BAUCUS. As the Senator knows, to ask the question is to answer it. Obviously, he would not have those rights.

Mr. MOYNIHAN. Right.

Mr. BAUCUS. Mr. President, what this bill would mean to Americans if it passes and is upheld by the courts, it would mean that Congress would be free to deny citizens any right it cares to. Congress would be free to take away personal property from individual citizens without due process of law. Congress would be free to authorize searches of individuals' homes without a search warrant. Congress would be free to close down the Nation's pressrooms. Congress would be free to establish a national religion. These were the very abuses of government that those who founded our country were running away from. These were the abuses they were trying to prevent government from engaging in when our framers came to this country and framed our Constitution. They established a judicial branch and a Supreme Court to assure that the constitutional protections that they placed in the Constitution would be honored by the other branches of government.

This principle, as the Senator from New York has pointed out, was well understood 200 years ago in our history.

I am afraid that today we are taking this principle for granted. I am afraid that we in this country have been so fortunate to have avoided the tyrannies of government for so long that we are no longer sensitive to the basic principles of our Government that have kept those tyrannies from occurring.

Mr. President, I fully appreciate the need to protect American citizens from those tyrannies. I also believe that President Reagan and William French Smith fully appreciate the need to protect American citizens from those tyrannies. I believe the American people fully appreciate the need to keep themselves protected from those tyrannies.

We should keep in mind that this administration has been unwilling to endorse the pending Helms amendment. The President wants to restore voluntary prayer to the schools—he said so in his radio address to the Nation on Saturday. But he is not advocating that we strip the Supreme Court of its jurisdiction to hear school prayer cases. He wants us to vote on his proposed constitutional amendment, not only because he supports it, but also because he knows that it is the constitutional amendment process that is the correct way for us to address constitutional decision of the Supreme Court.

The PRESIDING OFFICER (Mr. GRASSLEY). The period for morning business has now expired.

Pursuant to rule XXII, 1 hour having passed since the Senate convened, the clerk will report the cloture motion.

Mr. BAUCUS. Mr. President, I ask unanimous consent that my full statement appear in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the Senator be allowed to finish his train of thought, for 5 minutes.

Mr. JOHNSTON. I object.

The PRESIDING OFFICER. Objection is heard.

(The remainder of Mr. BAUCUS' remarks is as follows:)

Mr. BAUCUS. I challenge the President to speak out and help get the Senate off the track we are now headed down. I will join with him to have us address the school prayer issue in the context of a constitutional amendment, but I urge him to join with me in rejecting the course of attempting to strip the Supreme Court of its jurisdiction over school prayer cases.

Last week, I began to read a very lengthy letter written by Attorney General William French Smith to Senate Judiciary Committee Chairman STROM THURMOND. In that letter, the Attorney General presents an excellent analysis of why the court stripping bills in general and the underlying Helms court stripping bill in particular are dangerous. Later today I plan to continue reading from that letter.

THE CLOTURE VOTE ON AMENDMENT NO. 2031, AS MODIFIED

● Mr. DOLE. Mr. President, it is my intention to vote in favor of cloture; but at the same time, wish to express my strong reservations about the proposed school prayer amendment. I have been a consistent supporter of voluntary prayer in public schools and a consistent critic of those court decisions which, in my opinion, have placed ridiculous limitations on the right of schoolchildren to the freedom of religious expression. But as has been repeatedly pointed out during the debate, this amendment involves far more than the underlying moral and social issue of voluntary prayer in public schools. Because this amendment would strip not only the lower Federal courts, but also the Supreme Court, of jurisdiction to decide voluntary school prayer cases, it raises fundamental constitutional and policy issues concerning the role of the Supreme Court in our system of checks and balances and the power of the Congress to define and circumscribe that role.

For this reason, I have strong reservations about the amendment, and in particular, share the concerns expressed by Attorney General Smith in his May 6 letter to the chairman of the Senate Judiciary Committee. In that letter, the Attorney General raised significant questions concerning the constitutionality of this proposal, pointing out that the Supreme Court, as an independent and equal branch of Government, has certain core functions into which the Congress may not intrude under the guise of the "exceptions clause". He also lodged strong public policy objections to withdrawing an entire class of cases from Supreme Court review. Noting that history counsels against taking such an action, he concluded that the integrity

of our system of Federal law itself depends upon the Supreme Court having the final say on the resolution of Federal questions.

Thus, while I will vote to invoke cloture, it is not because I have decided to support the amendment, but rather because I believe ample time has been allowed to debate the merits and it is now time to bring the debate to a close. I would prefer that the Senate give consideration to the President's proposed constitutional amendment, Senate Joint Resolution 199, and hope that we will be able to comply with the President's request to bring Senate Joint Resolution 199 to a floor vote. I am troubled by certain aspects of Senate Joint Resolution 199, particularly with regard to a State's involvement in prescribing the content of prayer in public schools. But, I do believe that the vast majority of Americans want us to restore voluntary prayer in public schools, and that the President's constitutional amendment provides the most appropriate mechanism for giving the American people what they want.

I urge the sponsors of the amendment now being debated to give careful consideration to the views I have expressed today. If a vote on this amendment is the only opportunity we in the Senate have to record our position on this issue in this Congress, I will reluctantly vote in favor of it, However, I will do so with the belief that the President's approach represents the wiser course and that it will be the actual vehicle for final resolution of this issue.●

CLOTURE MOTION

The PRESIDING OFFICER. Pursuant to rule XXII, 1 hour having passed since the Senate convened, the clerk will report the cloture motion.

The legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031 as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Jake Garn, Harry F. Byrd, Jr., Steven Symms, S. I. Hayakawa, Don Nickles, James A. McClure, Strom Thurmond, Charles E. Grassley, Malcolm Wallop.

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll, to ascertain the presence of a quorum.

The legislative clerk called the role, and the following Senators answered to their names:

[Quorum No. 45 Leg.]

Abdnor	Baker	Baucus
Byrd, Harry F., Jr.	Grassley	Mattingly
Byrd, Robert C.	Helms	Moynihan
Garn	Johnston	Weicker
	Leahy	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of the absent Senators.

The legislative clerk resumed the call of the roll, and the following Senators entered the Chamber and answered to their names:

Andrews	Hart	Nunn
Armstrong	Hatch	Packwood
Bentsen	Hatfield	Pell
Biden	Hawkins	Percy
Boren	Hayakawa	Pressler
Boschwitz	Heflin	Proxmire
Bradley	Heinz	Pryor
Cannon	Hollings	Quayle
Chafee	Huddleston	Randolph
Chiles	Humphrey	Riegle
Cochran	Inouye	Roth
Cohen	Jackson	Rudman
Cranston	Jepsen	Sarbanes
D'Amato	Kassebaum	Sasser
Denton	Kasten	Schmitt
Dixon	Kennedy	Simpson
Dodd	Laxalt	Specter
Dole	Levin	Stevens
Domenici	Long	Symms
Eagleton	Lugar	Thurmond
East	Mathias	Tower
Exon	Matsunaga	Wallop
Ford	Metzenbaum	Warner
Glenn	Mitchell	Zorinsky
Goldwater	Murkowski	
Gorton	Nickles	

The PRESIDING OFFICER. A quorum is present.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the Helms amendment No. 2031, as modified, shall be brought to a close?

The yeas and nays are mandatory under the rule. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. BRADY), the Senator from Missouri (Mr. DANFORTH), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Idaho (Mr. MCCLURE), the Senator from Vermont (Mr. STAFFORD), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from Arizona (Mr. DECONCINI), the Senator from Montana (Mr. MELCHER), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that, if present and voting, the Senator from North Dakota (Mr. BURDICK) and the Senator from Arkansas (Mr. BUMPERS), would vote "nay."

The PRESIDING OFFICER (Mr. ABDNOR). Are there other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 50, nays 39, as follows:

[Rollcall Vote No. 345 Leg.]

YEAS—50

Abdnor	Baker	Boren
Armstrong	Bentsen	Byrd, Harry F., Jr.
Cannon	Heflin	Pell
Cochran	Helms	Pressler
D'Amato	Huddleston	Proxmire
Denton	Humphrey	Quayle
Dole	Jepsen	Randolph
Domenici	Johnston	Roth
East	Kassebaum	Sasser
Exon	Kasten	Schmitt
Ford	Laxalt	Simpson
Garn	Long	Stevens
Gorton	Lugar	Symms
Grassley	Mattingly	Thurmond
Hatch	Murkowski	Tower
Hawkins	Nickles	Warner
	Nunn	Zorinsky

NAYS—39

Andrews	Glenn	Matsunaga
Baucus	Goldwater	Metzenbaum
Biden	Hart	Mitchell
Boschwitz	Hatfield	Moynihan
Bradley	Hayakawa	Packwood
Byrd, Robert C.	Heinz	Percy
Chafee	Hollings	Pryor
Chiles	Inouye	Riegle
Cohen	Jackson	Rudman
Cranston	Kennedy	Sarbanes
Dixon	Leahy	Specter
Dodd	Levin	Tsongas
Eagleton	Mathias	Weicker

NOT VOTING—11

Brady	DeConcini	Stafford
Bumpers	Durenberger	Stennis
Burdick	McClure	Wallop
Danforth	Melcher	

The PRESIDING OFFICER. On this vote there are 50 yeas and 39 nays. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the cloture motion is rejected.

ORDER OF PROCEDURE

Mr. BAKER and Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I thank the Senator from New York for permitting me to make an announcement or an observation.

First, Mr. President, I would remind Senators there is another cloture motion pending which will produce a vote tomorrow under rule XXII.

Mr. President, it is my hope that shortly we will be able to enter into a unanimous-consent agreement for tomorrow to waive the quorum required by rule XXII and to vote on cloture at 12 o'clock noon. That has not yet been cleared. Senators should be on notice that that request will be made shortly.

Mr. President, since cloture was not invoked today, I would not expect the Senate to be in late today, but, Mr. President, I would expect the Senate to be in late tomorrow. Senators should be on notice that tomorrow may be a late day, perhaps a very late day. I observe the Senator from Arizona making appropriate remarks, but fortunately they are not audible to me.

Mr. President, I now yield the floor, once again saying that I hope we can clear this agreement.

TEMPORARY INCREASE IN THE PUBLIC DEBT LIMIT

BAUCUS AMENDMENT NO. 2040 TO WEICKER AMENDMENT NO. 2039

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I rise to congratulate the Senate. We have once again affirmed our commitment to constitutional liberties in the United States on both sides of the aisle, and, second, an emphatic statement that we will not see the constitutional arrangements of 195 years debauched on the floor of this body.

We have lived 2 centuries with an indpendent judiciary and it is clear we mean to go on with an independent judiciary. The principle we have been voting on today has nothing to do with the nominal subject of the amendment. The issue has to do with the independence of the Supreme Court.

The senior Senator from Arizona, who I think would accept the thought that he is not only one of the more venerable but one of the more conservative Members of this body, voted to conserve the Constitution.

The senior Senator from Massachusetts, who would accept the thought that he is one of the most liberal men in this body, voted the tradition of political liberalism embodied in that Constitution.

The Constitution won, and the American people have won. Let us hope they continue to do so.

I thank the Chair for its indulgence.

The PRESIDING OFFICER. The Senate will please be in order. The galleries will be quiet.

The Senator from North Carolina.

Mr. HELMS. Mr. President, I appreciate the comments of the Senator from New York. He is his usual spirit of consistency. He protected the Constitution, I suppose, when he voted to limit the jurisdiction of the courts in the matter of the Voting Rights Act. So what it is, Mr. President, is a matter of whose ox is being gored.

We will get cloture, I predict, and the Constitution will be protected, but Senators who vote to limit the jurisdiction of the courts sometime and then piously say, "Oh, no, we must not do anything to the courts," do not earn a badge of constistency.

Mr. KENNEDY. Will the Senator yield?

Will the Senator from North Carolina indicate how we voted to limit the jurisdiction of the Supreme Court on the Voting Rights Act?

Mr. HELMS. I will answer by asking the Senator if he really does not know.

Mr. KENNEDY. As the Senator is aware, I was one of the managers of the Voting Rights Act on the Senate floor, and I am familiar with the act and with the entire debate. As the record made clear, the Senate did not change the jurisdiction of the Court on the Voting Rights Act in any respect. The Senator from North Carolina opposed the Voting Rights Act at every stage of the debate. His allegation that the Senate in some way modified the jurisdiction of the Supreme Court in the Voting Rights Act should not go unchallenged. That allegation is basically and fundamentally wrong. If the Senator has any proof of his allegation, I believe he has an obligation to submit it.

Mr. HELMS. What the Senator did when he voted for the Voting Rights Act was to limit the jurisdiction of the courts and he knows it.

Mr. KENNEDY. The Senator is completely incorrect in that statement, and the record will bear me out.

Mr. MOYNIHAN. Will the Senator from Massachusetts yield for a question?

Mr. KENNEDY. I yield.

Mr. MOYNIHAN. Is he aware of any legal body or any judicial body that has suggested anything of the kind, that has suggested, in effect, that the Voting Rights Act did anything more than confirm the right of American citizens to go to the courts in pursuit of their constitutional right and have the court decide?

Mr. KENNEDY. The Senator is quite correct. In fact, the Supreme Court has ruled many times on constitutional issues under the Voting Rights Act. The Supreme Court's jurisdiction has never been limited in any way by the act. We had lengthy debates in the Judiciary Committee and on the Senate floor on all aspects of the Voting Rights Act. I am surprised that the Senator from North Carolina would make such an unfounded statement. I see now that he is not prepared to back it up.

Mr. MOYNIHAN. Mr. President, I would remind the Senators present that the president of the American Bar Association has declared the matter before us today and this last week to involve the gravest constitutional crisis since the Civil War. This is not the judgment of an individual; it is the judgment of the bar. Speaking for the American Bar, he has said to us, "Do not do this," and we so far have not done it.

History would not forgive this body of such an act. It would be recorded in history as the moment the Americans began to back away from their fundamental belief in law, equal justice under law, majority rule, and minority rights.

If you can strip from the Supreme Court the right to hear one question, you can strip from it the right to hear any question. There is no right in the Constitution that would not be placed in jeopardy.

The great fear of the Founding Fathers was that we should have a tyranny of the majority. They spoke over and over again of a tyranny of the majority and they devised the Court as the institution in which minority rights would be protected.

Those rights are embodied in the Constitution and the right of the Supreme Court in the end to say, as Justice Marshall said, it is emphatically the province of the Court to declare what the law is. It is not for us to do. We may have our views, we make the laws, but we make them in the context of a higher law, the Constitution, and the Court compares.

This very moment, this very day, Mr. President, the New York Times ran an editorial, which I shall read to the Chamber.

"The issue is court stripping," said the New York Times this morning:

> Last week a weary Senate finally tabled an anti-abortion rider to the vital debt ceiling bill. Today it decides whether to cut off debate on another legislative parasite on the same bill, a school prayer rider. This time the issue is far more than a politically sensitive "social issue."

If I may interject, men and women of this body with the utmost conviction of the rightness of school prayer might and do oppose the effort to bring it about by stripping the Court of its right to hear a case involving first amendment free exercise rights.

The Times continues:

> It is the structure of constitutional government. If a filibuster by a number of committed Senators is the only way to make that point clear to their colleagues, then the filibuster should continue.
>
> Senator Jesse Helms, who sponsored the rider, believes the Supreme Court was wrong two decades ago in ruling that officially sponsored prayer violates the First Amendment. But his rider would strip all the Federal courts, including the Supreme Court, of the power to rule at all in prayer controversies.
>
> Passage of such a measure would provoke a constitutional crisis.

If I may interject again, Mr. President, you may recall the exchange I had with the distinguished Senator from Montana, who suggested that, if this bill were to pass, it would either be in effect or it would go to the Court and the Court would strike it down. Then I asked, if the Court struck it down, would we not then be in a constitutional crisis? He said most assuredly, we would:

> It would challenge the role of the Federal judiciary as interpreter of the Constitution—indeed, as a coequal branch of the Government.
>
> The proper way to overcome a Supreme Court constitutional ruling is by amending the Constitution.

I, for my part, would have no objection in the least to bringing to this floor a proposed amendment to the Constitution. That is the way we have worked. It is the way the Constitution provides for us to work. That is the proper way. The New York Times continues:

> That is the basis of Attorney General Smith's objection to legislative shortcuts.

President Reagan showed similar awareness when he called for a vote this year on the school prayer constitutional amendment he has proposed.

For good reason, amending the Constitution is far more deliberate than passing a law. It requires a two-thirds vote of Congress and ratification by three fourths of the states.

The difference between what the Constitution provides as an amending process and what we have here, a plebiscitary process, is that here a plain majority in either House and an acquiescent President would purport to change the Constitution.

Look at any nation not having such an arrangement and find how permanent are their laws, how stable are their institutions. You do not found and maintain a republic for 195 years without knowing something of the nature of men and their governors.

We have chosen to be spare in the changes we make in our Constitution. We have chosen to do so by a deliberative process. We have chosen to conserve the values of the Republic and not open them to the passions of a majority of one at a given moment. Above all, we have chosen not to bring the equal branches of Government into unresolvable collision and conflict. That, more than any other thing, is what we are here in the body to preserve and surely, we will not, out of anxiety about a particular issue, not an ultimate issue—if there were something in our land that forbade prayer, that would be an ultimate issue—but a ruling that a particular prayer in an educational institution constitutes the establishment of a religion.

Arguably, Mr. President, it does. We sometimes think of churches as physical structures or bureaucratic organizations. No church, no synagogue, no temple is anything more than the physical manifestation of a belief in God that is embodied in prayer. To choose one over another is unavoidably to prefer one to another. It is not in the nature of men to be able to find an agreed-upon common ground here. So the court, understanding the Constitution, ruled as it ought to have done.

It might change its mind. The court changes its mind frequently, over time. Our obligation to the court is not to agree with it. Our obligation to the court is merely to obey it and to respect the constitutional arrangements that have given rise to its role.

Mr. President, it is not for me to monopolize discussion at this point, or debate. The distinguished senior Senator from North Carolina is on the floor. He is studiously involved, I fear, in reading a court decision. If he wishes to speak, I shall be more than happy to listen and I hope I shall do so with the courtesy he invariably shows those who cannot agree with him always.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the Senator from New York. There has never been a moment when we disagreed when either of us was disagreeable.

Mr. MOYNIHAN. I thank the Senator for his kindness.

Mr. HELMS. I admire the Senator, and he knows that. I disagree with his position. I disagree with the basis for his position. History is replete with pronouncements by the Court itself about this business of limiting jurisdiction of the Federal courts. I was in conversation with a distinguished former Member of this body, Senator Sam Ervin, not long ago. He said he counted, as I recall, 57 times when Congress had voted to limit the jurisdiction of the court's.

Congress limited the jurisdiction of the Federal courts in the Voting Rights Act by granting exclusive jurisdiction in voting rights cases to the District Court for the District of Columbia, thereby denying such jurisdiction to all other district courts. There is no question about that.

I have an article, which I shall shortly ask unanimous consent to have printed in the RECORD written by a distingushed constitutional scholar, Dr. Charles E. Rice, who is professor of law at Notre Dame Law School.

Also, Mr. President, I call attention to the fact that Raul Berger of Harvard once wrote a book, in the year 1969, as I recall, disagreeing with the approach that I am now attempting. Professor Berger is not a conservative. I believe he has said that he seldom agrees with the Senator from North Carolina but, in this case, the Senator from North Carolina is correct, and he made a 180-degree turn in his position on this business of limiting the jurisdiction of the courts.

It is quite all right with me for Senators to oppose prayer in school, but let them not pretend that there is any nefarious scheme afoot in trying to limit a runaway judiciary. I thought that is what we were elected to do.

I will say to my friend from New York that judicial tyranny is just as bad as any kind of tyranny. If you do not believe it, ask the mothers and fathers of schoolchildren who have been hauled across cities and counties just to satisfy the whim and caprice of some Federal judge. If anything, this Congress has been remiss in not putting the brakes on a runaway judiciary. I, for one, will not stand silently by and fail to do everything I can to correct the injustices perpetrated by a runaway court.

This is, after all, a tripartite Government. It is a three-legged stool. If Congress is going to kick its leg out and say, "Oh, well, we are subservient to the court; we are not going to try to represent the people," that is up to each Senator to judge. But let no one try to pretend that there is any novelty about this business of limiting the jurisdiction of the courts.

The article by Professor Rice has several interesting quotes. For example, one from Chief Justice Harlan F. Stone, who said:

All Federal courts, other than the Supreme Court, derive their jurisdiction wholly from the exercise of the authority to "ordain and establish" inferior courts, conferred on Congress by Article III, section 1, of the Constitution.

I ask unanimous consent that the remainder of that quote be printed in the RECORD.

There being no objection, the quote was order to be printed in the RECORD, as follows:

All federal courts, other than the Supreme Court, derive their jurisdiction wholly from the exercise of the authority to "ordain and establish" inferior courts, conferred on Congress by Article III, § 1, of the Constitution. Article III left Congress free to establish inferior courts or not as it thought appropriate. It could have declined to create any such courts, leaving suitors to the remedies afforded by state courts, with such appellate review by this Court as Congress might prescribe. The Congressional power to ordain and establish inferior courts includes the power of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in the exact degrees and character which to Congress may seem proper for the public good.

Mr. HELMS. He goes on to quote Hamilton. He quotes John Marshall. He has quote after quote from Supreme Court decisions. But Senators can read for themselves this excellent paper written by Professor Rice.

I rise to say that I have no quarrel with any Senator who does not want to restore the right of voluntary prayer to our schools. All I ask is that the Senate take a vote on it and let each Senator take a position.

But to filibuster a perfectly reasonable constitutional proposal with self-serving declarations that those who are proposing to limit the jurisdiction of the Court are somehow bringing down the pillars of justice is a little more than I wish to countenance. I say that with all due respect and admiration for my friends who disagree with me. They can list their constitutional scholars. I can list mine. But you get down to the bottom line: Are we going to do anything about this Court decision, this most unfortunate, tragic Court decision which banned prayer from the schools, which in its latest version says that children cannot even meet outside of classes on school property for Bible reading and prayer?

Mr. President, I think this Congress is obliged to act, and I have no apology for my proposal to limit the jurisdiction of the courts because article III,

sections 1 and 2 clearly bestow upon us that authority and that duty.

Mr. President, I hope we can get to a vote one of these days on this proposal. I have been waiting around this place for the better part of 5 or 6 weeks while my friends have conducted a filibuster. I have been amazed that they did not move to table the abortion amendment earlier because, as I repeatedly said to the news media, I did not know how many Senators would come down on the side which I am trying to represent. They can save themselves a lot of time, and if they feel so confident on the prayer amendment, let them move to table that.

One thing we have done throughout these past 4 or 6 weeks or more, however, is to unmask a lot of things going on in the Senate. I have not had any predisposition to spare Senators their obligation to take a position on this and other matters.

Now, the New York Times may not like what I am doing. The New York Times does not like very much of anything that I do. And the New York Times is seldom accurate in its basis for criticism, not only of me but other conservatives. The last time I checked the New York Times had no member of its staff on the Supreme Court. So to read an editorial from the New York Times in the RECORD reminds me of a fellow named Lum Garrison down in North Carolina who, when asked about a talkative member of his community, said, "Well, he doesn't know anything and he's got that tangled up." So that is the way the Washington Post and the New York Times and a lot of other liberal newspapers help form the opinion of various citizens on certain matters.

I do not think that Senators should read too many editorials. They better follow the advice of some constitutional scholars, one of whom I am not. I do not pretend to be. I am not even a lawyer. But when constitutional authorities representing a philosophical spectrum from liberal to conservative such as Roul Berger and Charles E. Rice say that we not only have a right but a duty to limit the jurisdiction of the Court, I am inclined to rest my case.

Mr. President, I yield the floor.

(Mr. MOYNIHAN addressed the Chair.)

The PRESIDING OFFICER (Mr. HAYAKAWA). The Senator from New York.

Mr. HELMS. If the Senator will yield, let me ask unanimous consent to insert this article in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESS AND THE SUPREME COURT'S JURISDICTION

(By Charles E. Rice) †

I. INTRODUCTION

When a ruling of the Supreme Court meets with Congressional disfavor there are several remedies available to Congress. If the decision is not on a constitutional level, a later statutory enactment will suffice to reverse or modify the ruling. If, however, the Court's decision is an interpretation of a constitutional mandate, such as the requirement of the fourteenth amendment that legislative districts be apportioned according to population,[1] then a statute could not reverse the decision because the statute itself would be subject to that constitutional mandate as defined by the Court.

The obvious method of reversing a Supreme Court interpretation of the Constitution is by constitutional amendment. But amending the Constitution is a long and problematic process.[2] Furthermore, the Constitution should be as compact a document as possible. If constitutional amendments became the common respone to objectionable rulings by the Supreme Court, the Constitution would soon resemble a code of legislation in its length and complexity.

The disadvantages of the amendment process, however, may be avoided by the exercise of Congress' power to withdraw a particular subject from the appellate jurisdiction of the Supreme Court and from the original as well as appellate jurisdiction of the lower federal courts. This technique, which has been sparingly used and is not widely understood, offers a chance to restrain excesses of judicial power on the part of the Supreme Court without altering the basic charter of our government.

Congress' power to control lower federal court jurisdiction stems from article III of the United States Constitution, which provides: "The judicial power of the United States, shall be vested in one Suprme Court, and in such inferior courts as the Congress may from time to time ordain and establish." [3]

Congress' power to make exceptions to Supreme Court jurisdiction also comes from article III, which in pertinent part states: "[T]he Supreme Court shall have appellate jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make."[4]

II. JURISDICTION OF THE LOWER FEDERAL COURTS

There is no question but that Congress has the power to define or even entirely eliminate the jurisdiction of the lower federal courts.[5] Indeed, as Chief Justice Harlan F. Stone stated:

"All federal courts, other than the Supreme Court, derive their jurisdiction wholly from the exercise of the authority to 'ordain and establish' inferior courts, conferred on Congress by Article III, § 1, of the Constitution. Article III left Congress free to establish inferior courts or not as it thought appropriate. It could have declined to create any such courts, leaving suitors to the remedies afforded by state courts, with such appellate review by this Court as Congress might prescribe. The Congressional power to ordain and establish inferior courts includes the power of investing them with jurisdiction either limited, concurrent, or exclusive, and of withholding jurisdiction from them in the exact degrees and character which to Congress may seem proper for the public good." [6]

The Supreme Court has often acquiesced in Congress' use of its power to withdraw particular subjects from the jurisdiction of the lower federal courts. For example, in Lauf v. E.G. Shinner & Co.[7] the Court affirmed the congressional divestiture of lower federal court jurisdiction to issue injunctions in labor disputes.[8] In Lockerty v. Phillips [9] the court allowed the lower federal courts to be divested of jurisdiction to hear civil actions arising under the Emergency Price Control Act of 1942.[10]

It must be emphasized that the withdrawal of lower federal court jurisdiction does not deprive a litigant of the right to bring his federal claim. State courts are available and adequate forums for vindication of rights created by federal law in the event of a divestitute of lower federal court jurisdiction. State courts are bound to apply federal law by the supremacy clause,[11] and thus there is no danger that federal rights will be diluted. Indeed, for almost the first century of the Republic, the only courts with general jurisdiction over all actions arising under the state or federal law were the state courts. Even with the creation by Congress of federal question jurisdiction in 1875,[12] the lower federal courts had concurrent jurisdiction with the state courts. Such is the situation today.

III. APPELLATE JURISDICTION OF THE SUPREME COURT

Beyond a doubt, therefore, Congress may withdraw particular subjects from the jurisdiction of the lower federal courts.[13] The more interesting issue, however, is the power of Congress to make exceptions to the appellate jurisdiction of the Supreme Court. This remedy has been urged from time to time with respect to various issues, such as legislative apportionment,[14] obscenity,[15] and others.[16] Currently, there is before Congress legislation which would remove the Court's appellate jurisdiction in cases involving prayer in public schools [17] and abortion.[18] However, none of these attempts at removing Supreme Court jurisdiction from any of these controversial issues has become law. Whatever the merits of the existing Supreme Court rulings in any of these areas, this discussion is concerned only with the existence and extent of Congress' power to withdraw the Court's appellate jurisdiction over particular subjects.

A. The intent of the exceptions clause

The exceptions clause of article III, section 2, provides that "the Supreme Court shall have appellate jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make." [19] The clause was intended, according to Alexander Hamilton, to give "the national legislature . . . ample authority to make such *exceptions*, and to prescribe such regulations as will be calculated to obviate or remove" the "inconveniences" which might arise from the powers given in the Constitution to the federal judiciary.[20] Much of the debate surrounding the adoption of the clause centered upon the Framers' concern that a supreme court would exercise appellate powers to reverse jury verdicts on issues of fact.[21] Although this possibility was the most troubling to the Framers, the congressional power conferred by the clause is clearly much broader. This is evident in the language of article III, section 2, which gives the Supreme Court "appellate jurisdiction, both as to Law and Fact." [22] As Hamilton observed:

Footnotes at end of article.

"The amount of the observations hitherto made on the authority of the judicial department is this: that it has been carefully restricted to those causes which are manifestly proper for the cognizance of the national judicature; that in the partition of this authority a very small portion of original jurisdiction has been preserved to the Supreme Court, and the rest consigned to the subordinate tribunals; that the Supreme Court will possess an appellate jurisdiction, both as to law and fact, in all cases referred to them, but subject to any exceptions and regulations which may be thought advisable; that this appelate jurisdiction does, in no case, abolish the trial by jury; and that an ordinary degree of prudence and integrity in the national councils will insure us solid advantages from the establishment of the proposed judiciary, without exposing us to any of the inconveniences which have been predicted from that source." [23]

Thus, in purposefully restricting the original jurisdiction of the Court to very narrow issues, and providing for congressional exceptions to the Court's appellate jurisdiction, the Framers intended Congress to have a broad check over potential "inconveniences" caused by an abuse of the Court's power.

B. The "Negative Pregnant" Doctrine: The Supreme Court will exercise only appellate jurisdiction explicitly "granted" by Congress

The power of Congress contained in article III, section 2, was broadly interpreted by the Supreme Court, so that a specific grant of appellate jurisdiction by Congress was construed to imply that such jurisdiction was excluded in all other cases. This "negative pregnant" doctrine was enunciated by Chief Justice Marshall in *United States v. More,*[24] where the Court held that it had no criminal appellate jurisdiction because none had been expressly granted by Congress. The claimant in *More* sought review by the Supreme Court of his criminal conviction, noting that article III granted the Court appellate jurisdiction over law and equity. Reasoning that because Supreme Court appellate jurisdiction over criminal cases was neither specifically excluded by the Constitution nor specifically regulated by Congress, More argued that the Court had jurisdiction over his case. The Court, however, rejected this argument, concluding that the Constitution was not totally controlling in matters of Supreme Court jurisdiction. Although the Court's appellate jurisdiction may have been prescribed in the Constitution, the Court held that Congress' power to regulate jurisdiction must be understood to prohibit the exercise of jurisidiction unless Congress had explicitly granted it to the Court. Speaking for the *More* Court, Chief Justice Marshall stated that "as the jurisdiction of the Court has been described [in the Constitution], it has been regulated by Congress and an affirmative description of its powers must be understood as a regulation, under the Constitution, prohibiting the exercise of other powers than those described." [25]

Marshall further explained that the exceptions clause did not merely give Congress the power to make exceptions to the Supreme Court's jurisdiction, but it also implicitly mandated that the Surpreme Court possessed only that jurisdiction specifically granted by Congress. Marshall stated:

"When the Constitution has given Congress power to limit the exercise of our jurisdiction, and to make regulations respecting its exercise; and Congress, under that power, has proceeded to erect inferior courts, and has said in what cases a writ of error or appeal shall lie, an exception of all other cases is implied. And this court is as much bound by an implied as an express exception." [26]

It is interesting to note that criminal cases were not appealable to the Supreme Court until 1891. This was simply because until then Congress had not specified that they could be so appealed. With regard to its power to review criminal cases, the Supreme Court noted: "The appellate jurisdiction of this court rests wholly on the acts of Congress." [27]

This broad interpretation of Congressional control over Supreme Court jurisdiction was first advanced in 1796 by Chief Justice Ellsworth, who had been a member of the Constitutional Convention's Committee on Detail which drafted the exceptions clause.[28] In *Wiscart v. D'Auchy,*[29] Ellsworth said:

"The constitution, distributing the judicial power of the U.S., vests in the Supreme Court, an original as well as appellate jurisdiction. . . . Here, then, is the ground, and the only ground, on which we can sustain an appeal. If Congress has provided no rule to regulate our proceedings, we cannot exercise our appellate jurisdiction; and if the rule is provided, we cannot depart from it. The question, therefore, on the constitutional point of appellate jurisdiction, is simply, whether Congress has established any rules for regulating its exercise." [30]

In 1810, in *Durousseau v. United States,*[31] Chief Justice Marshall again emphasized that the Court is bound by implied exceptions to its appellate jurisdiction, so that, in effect, it can exercise jurisdiction only where expressly granted by Congress:

"The appellate powers of this Court are not given by the judicial act. They are given by the constitution. But they are limited and regulated by the judicial act, and by such other acts as have been passed on the subject. When the first legislature of the Union proceeded to carry the third article of the constitution into effect, they must be understood as intending to execute the power they possessed of making exceptions to the appellate jurisdiction of the Supreme Court. They have not, indeed, made these exceptions in express terms. They have not declared, that the appellate power of the Court shall not extend to certain cases; but they have described affirmatively its jurisdiction, and this affirmative description has been understood to imply a negative on the exercise of such appellate power as is not comprehended within it.

"The spirit as well as the letter of a statute must be respected, and where the whole context of the law demonstrates a particular intent in the legislature to effect a certain object, some degree of implication may be called in to aid that intent. It is upon this principle, that the court implies a legislative exception from its constitutional appellate power, in the legislative affirmative description of those powers." [32]

Similarly, when Chief Justice Taney spoke to the issue in *Barry v. Mercein,*[33] he said: "By the constitution of the United States, the Supreme Court possesses no appellate power in any case, unless conferred upon it by act of Congress; nor can it when conferred be exercised in any other form, or by any other mode of proceeding than that which the law prescribes." [34]

C. The McCardle Case

Prior to *Ex Parte McCardle* [35] in 1868, the Supreme Court was never called upon to decide the validity of an act of Congress which made a specific exception to its appellate jurisdiction. McCardle, a Mississippi editor, was imprisoned by the federal reconstruction authorities on account of seditious statements he had made. Seeking a writ of habeas corpus, McCardle asked the federal circuit court to rule that his detention was invalid. When his petition was denied he appealed to the Supreme Court under a statute which specifically permitted such appeals.[36] After the Supreme Court heard argument on the case and while the Court was deliberating, Congress, fearing an unfavorable decision, enacted a statute repealing that part of the prior statute which had given the Supreme Court jurisdiction to hear such appeals from the circuit court.[37] The Court, in confronting for the first time the issue of a positive congressional exception to its appellate jurisdiction, dismissed the appeal for want of jurisdiction, even though the case had already been argued and was before the Court.

The Court first discussed and reaffirmed Marshall's "negative pregnant" doctrine.[38] The Court noted, however, that the exceptions clause provides not only for implicit divestiture of Supreme Court appellate jurisdiction, but also for the more specific and direct explicit exceptions to jurisdiction. The Court stated:

"The exception to appellate jurisdiction in the case before us, however, is not an inference from the affirmation of other appellate jurisdiction. It is made in terms. The provision of the act of 1867, affirming the appellate jurisdiction of this court in cases of *habeas corpus* is expressly repealed. It is hardly possible to imagine a plainer instance of positive exception.

"We are not at liberty to inquire into the motives of the legislature. We can only examine into its power under the Constitution; and the power to make exceptions to the appellate jurisdiction of this court is given by express words. . . . Without jurisdiction the court cannot proceed at all in any case. Jurisdiction is power to declare the law, and when it ceases to exist, the only function remaining to the court is that of announcing the fact and dismissing the case. And this is not less clear upon authority than upon principle." [39]

It is true that the statute upheld in *McCardle* did not bar the Supreme Court from reviewing all habeas corpus cases. Rather, it only barred review sought under the 1867 statute which had provided one avenue of review of such cases from the circuit court. The Supreme Court retained the habeas corpus review power which had been given it by the Judiciary Act of 1789 and which Congress had chosen not to withdraw. Chief Justice Chase observed for the Court in *McCardle:*

"It is quite clear, therefore, that this court cannot proceed to pronounce judgment in this case, for it has no longer jurisdiction of the appeal; and judicial duty is not less fitly performed by declining ungranted jurisdiction than in exercising firmly that which the Constitution and the laws confer.

"Counsel seems to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of *habeas corpus,* is denied. But this is in error. The act of 1868 does not affect the jurisdiction which was previously exercised." [40]

Later in that same year, the Court made this distinction in *Ex parte Yerger.*[41] On facts very similar to *McCardle,* Yerger re-

quested the Supreme Court to issue its own writ of habeas corpus to the circuit court, as authorized by the Judiciary Act of 1789. The Supreme Court, in an opinion written by Chief Justice Chase, the author of the *McCardle* opinion, held that the 1868 statute had left untouched the Supreme Court's power to issue a writ of habeas corpus to a lower court as provided in the Judiciary Act of 1789.[42] However, there was no indication in *Yerger* that the Court would not have upheld an act withdrawing appellate jurisdiction in all habeas corpus cases from the Court. Although the Court in *Yerger* indicated that such a result would not lightly be presumed and that such a statute would be narrowly construed,[43] the Court acknowledged that it was within Congress' power. When discussing the power of Congress to limit jurisdiction, as evidenced by the Repealer Act of 1868, the *Yerger* Court noted:

"The effect of the act was to oust the court of its jurisdiction of the particular case then before it on appeal, and it is not to be doubted that such was the effect intended. Nor will it be questioned that legislation of this character is unusual and hardly to be justified except upon some imperious public exigency.

"It was, doubtless, within the constitutional discretion of Congress to determine whether such an exigency existed; but it is not to be presumed that an act, passed under such circumstances, was intended to have any further effect than that plainly apparent from its terms." [44]

D. The Klein Case

Four years later, in *United States v. Klein*,[45] the Court had occasion to spell out an important limitation to Congress' power under the exceptions clause. *Klein* is the only Supreme Court decision ever to strike down a statute enacted under the exceptions clause. The claimant in *Klein*, who had been a Confederate, sued in the Court of Claims to recover the proceeds from the sale of his property seized and sold by the Union forces. Because he had received a full presidential pardon for his Confederate activities, the Court of Claims ruled in his favor. If he had not received a pardon, the governing statute would have prevented his recovery. While the appeal of his case was pending before the Supreme Court, Congress enacted a statute which provided that whenever it appeared that a judgment of the Court of Claims had been founded on a presidential pardon, without other proof of loyalty, the Supreme Court should have no further jurisdiction of the case. The statute further declared that every pardon granted to a suitor in the Court of Claims which recited that he has been guilty of any act of rebellion or disloyalty, shall, if accepted by him in writing without disclaimer of those recitals, be taken as conclusive evidence of such act of rebellion or disloyalty and his suit shall be dismissed.[46] While declaring the statute unconstitutional, the Supreme Court expressly reiterated that Congress does have the power to deny appellate jurisdiction "in a particular class of cases":

"Undoubtedly the legislature has complete control over the organization and existence of that [Supreme] court and may confer or withhold the right of appeal from its decisions. And if this act did nothing more, it would be our duty to give it effect. If it simply denied the right of appeal in a particular class of cases, there could be no doubt that it must be regarded as an exercise of the power of Congress to make "such exceptions from the appellate jurisdiction" as should seem to it expedient.

"But the language of the proviso shows plainly that it does not intend to withhold appellate jurisdiction except as a means to an end. Its great and controlling purpose is to deny to pardons granted by the President the effect which this court had adjudged them to have. The proviso declares that pardons shall not be considered by this court on appeal. We have already decided that it was our duty to consider them and give them effect, in cases like the present, as equivalent to proof of loyalty. It provides that whenever it shall appear that any judgment of the Court of Claims shall have been founded on such pardons, without other proof of loyalty, the Supreme Court shall have no further jurisdiction of the case and shall dismiss the same for want of jurisdiction. The proviso further declares that every pardon granted to any suitor in the Court of Claims and reciting that the person pardoned has been guilty of any act of rebellion or disloyalty, shall, if accepted in writing without disclaimer of the fact recited, be taken as conclusive evidence in that court and on appeal, of the act recited; and on proof of pardon or acceptance, summarily made on motion or otherwise, the jurisdiction of the court shall cease and the suit shall be forthwith dismissed.

"It is evident from this statement that the denial of jurisdiction to this court, as well as to the Court of Claims, if founded solely on the application of a rule of decision, in causes pending, prescribed by Congress. The court has jurisdiction of the cause to a given point; but when it ascertains that a certain state of things exists, its jurisdiction is to cease and it is required to dismiss the cause for want of jurisdiction.

"It seems to us that this is not an exercise of the acknowledged power of Congress to make exceptions and prescribe regulations to the appellate power.

"The court is required to ascertain the existence of certain facts and thereupon to declare that its jurisdiction on appeal has ceased, by dismissing the bill. What is this but to prescribe a rule for the decision of a cause in a particular way?" [47]

The statute in *Klein* attempted to dictate the outcome of a particular class of cases, under the guise of limiting the Court's jurisdiction. The Court lost jurisdiction only when the Court of Claims judgment was founded on a particular type of evidence, that is, a pardon. The statute further prescribed that the effect of the pardon would be such that the recitals in the pardon of acts of rebellion and disloyalty would be conclusive proof of those acts. This was an intrusion upon the judicial process and an effort to dictate the rules to be used in deciding cases.[48] Moreover, the statute in *Klein* intruded upon the President's pardoning power by attempting "to deny to pardons granted by the President the effect which this court had adjudged them to have." [49] In these major respects the statute involved in *Klein* was wholly different from a statute simply withdrawing appellate jurisdiction over a certain class of cases. As the Court said in the *Klein* case itself: "There could be no doubt that a denial of the right of appeal in a particular class of cases" would be within Congress' power under the exceptions clause.[50]

E. Supreme Court Statements Since 1872

Since *Klein*, the Supreme Court has not had occasion to further define the limits of the exceptions clause. In *The Francis Wright* case,[51] the Court upheld a statute under which the appellate jurisdiction of the Supreme Court in admiralty cases was limited to determination of questions of law rather than of issues of fact. Chief Justice Waite in his opinion for the Court said that:

"What the 'appellate powers' of the Supreme Court 'shall be,' and to what extent they shall be exercised, are, and always have been, proper subjects of legislative control. Authority to limit the jurisdiction necessarily carries with it authority to limit the use of the jurisdiction. Not only may whole classes of cases be kept out of the jurisdiction altogether, but particular classes of questions may be subjected to re-examination and review, while others are not. To our minds it is no more unconstitutional to provide that issues of fact shall not be retried in any case, than that neither issues or law nor fact shall be retried in cases where the value of the matter in dispute is less than $5,000. The general power to regulate implies power to regulate in all things. The whole of a civil law appeal may be given, or a part. The constitutional requirements are all satisfied if one opportunity is had for the trial of all parts of a case. Everything beyond that is matter of legislative discretion, not of constitutional right.[52]

In his opinion Chief Justice Waite referred to "the rule, which has always been acted on since, that while the appellate power of this court under this Constitution extends to all cases within the judicial power of the United States, *actual jurisdiction under the power is confined within such limits as Congress sees fit to prescribe.*" [53] Statements of several individual justices in the intervening years reinforce this conclusion. Justice Frankfurter, in his dissenting opinion in *National Insurance Co. v. Tidewater Co.*,[54] noted that:

"Congress need not establish inferior courts; Congress need not grant the full scope of jurisdiction which it is empowered to vest in them; Congress need not give this Court any appellate power; it may withdraw appellate jurisdiction once conferred and it may do so even while a case is *sub judice.*" [55]

In *Glidden v. Zdanok*,[56] While discussing the power of Congress over Supreme Court appellate jurisdiction, Justice Harlan stated:

"Congress has on occasion withdrawn jurisdiction from the Court of Claims to proceed with the disposition of cases pending therein, and has been upheld in so doing by this Court . . . . But that is not incompatible with the possession of Article III judicial power of the tribunal affected. Congress has consistently with that article withdrawn the jurisdiction of this Court to proceed with a case then *sub judice, Ex parte McCardle* . . .; its power can be no less when dealing with an inferior federal court. . . . For as Hamilton assured those of his contemporaries who were concerned about the reach of power that might be vested in a federal judiciary, "it ought to be recollected that the national legislature will have ample authority to make such exceptions, and to prescribe such regulations as will be calculated to obviate or remove [any] . . . inconveniences." [57]

Justice William O. Douglas, in his dissent in *Glidden*, expressed some doubt about the continuing vitality of *Ex parte McCardle*. Referring to Justice Harlan's opinion in *Glidden*, Justice Douglas said:

"First, that opinion cites with approval *Ex parte McCardle, . . . in which Congress withdrew jurisdiction of this Court to review a habeas corpus* case that was *sub judice*, and then apparently draws a distinction between that case and *United States v. Klein*, . . . where such withdrawal was not permitted in a property claim. There is a se-

rious question whether the *McCardle* case could command a majority view today. Certainly the distinction between liberty and property (which emanates from this portion of my Brother Harlan's opinion) has no vitality even in terms of the Due Process Clause." [58]

In his concurring opinion in *Flast v. Cohen*,[59] in 1968, however, Justice Douglas appeared to have resolved his doubts in favor of the continued vitality of *McCardle:* "As respects our appellate jurisdiction, Congress may largely fashion it as Congress desires by reason of the express provisions of Section 2, Article III." [60]

F. The meaning of the exceptions clause

In summary, the exceptions clause is clear, unambiguous, and unqualified. The decisions of the Supreme Court and the statements of its justices have expressly recognized the plain meaning of the clause as conferring upon Congress' broad powers to limit the Court's jurisdiction. Indeed, this power has been so expansively interpreted by the Court that an exception will be implied in cases where Congress has not specifically "granted" appellate jurisdiction to the Court.

III. OBJECTIONS TO THE EXERCISE OF POWER UNDER THE EXCEPTIONS CLAUSE: THE "ESSENTIAL ROLE" ARGUMENT

The text of article III, section 2, explicitly and unmistakably gives to Congress the power to withdraw certain subjects from the Supreme Court's appellate jurisdiction. The obvious reading of the entire text of article III is that this power was given to Congress, not capriciously, but as an integral part of a system of checks and balances. Through the exceptions clause, Congress was given the power, in Hamilton's words "to obviate or remove" the inconveniences" arising from the judicial power.[61] It has been argued, however, that the power of Congress under the exceptions clause is limited by the very nature of the constitutional system and of the judicial power. It has been urged by Professor Henry Hart that the exceptions "must not be such as to destroy the essential role of the Supreme Court in the constitutional plan."[62]

Professor Hart's test creates the difficulty of determining what is the Supreme Court's "essential role." [63] In addition, that test would make the Court itself the final arbiter of the extent of its powers. Despite the clear grant of power to Congress in the exceptions clause, no statute could deprive the Court of its "essential role"; but that role would be whatever the Court said it was. It is hardly in keeping with the spirit of checks and balances, however, to imply such virtually unlimited power into the Constitution. If the Framers intended to permit the Supreme Court to define its own jurisdiction even against the will of Congress, it is fair to say that they would have made that intention explicit.

Furthermore, the "essential role" test was advanced by Professor Hart in response to the suggestion that Congress could satisfy the exceptions clause by removing all but a "residuum of jurisdiction," for example, by withdrawing appellate jurisdiction in "everything but patent cases." [64] Whatever the cogency of Professor Hart's "essential role" test would be to a wholesale withdrawal of jurisdiction, if it were ever attempted by Congress, his test cannot properly be applied to narrowly drawn withdrawals of jurisdiction over particular types of cases.[65]

If Congress were to make such wholesale "exceptions" to the Court's appellate jurisdiction, so that there was little or nothing left of that jurisdiction, it could be plausibly argued that such a wholesale withdrawal of jurisdiction was not the making of "exceptions" at all and therefore was not authorized under the exceptions clause.[66] The decision in such a case would have to be made by the Supreme Court, and a constitutional crisis could result if the Court and Congress were to persist in opposed positions on this point. Significantly, however, the persistent support by the Supreme Court for John Marshall's "negative pregnant" theory indicates that even such a wholesale withdrawal of appellate jurisdiction could be constitutional since that theory led to the Court's acceptance of the idea that the Court should exercise appellate jurisdiction only in those cases in which Congress has specifically granted it.

Even if a wholesale withdrawal of appellate jurisdiction from the Supreme Court were to be unconstitutional as an interference with the Court's "essential role," the same could hardly be said of a pin-pointed withdrawal of appellate jurisdiction over a narrowly defined class of cases, such as those involving school prayer or abortion. It could hardly be argued that the "essential role" of the Supreme Court depends on its exercising appellate jurisdiction in every type of case involving constitutional rights. Such a contention would be contrary to the clear language of the exceptions clause and to the consistent indications given by the Supreme Court itself.

A. The need for uniformity and supremacy of Federal law arguments

Professor Hart's theory that the jurisdiction of the Supreme Court could not be limited beyond its "essential role" was later expanded and given definition by Professor Ratner.[67] The essential role of the Court was defined by Ratner as providing for uniformity of federal statutory and constitutional law and the supremacy of federal law over state law.[68] Under the supremacy clause of the Constitution, the Constitution and the laws of the United States "made in Pursuance thereof" are "the supreme Law of the Land."[69] Ratner argued that if the Constitution and federal laws are not uniformly interpreted by one ultimate arbiter—the Supreme Court—the supremacy principle will be reduced to a nullity because the Constitution and the federal law will be at the mercy of local courts. Constitutional rights will mean one thing in one state and something else in another. The result, it is claimed, would be a fragmentation of the Union. As Justice Oliver Wendell Holmes put it: "I do not think the United States would come to an end if we [the Supreme Court] lost our power to declare an act of Congress void. I do think the Union would be imperiled if we could not make that declaration as to the laws of the several states." [70]

Alexander Hamilton expressed a similar concern:

"If there are such things as political axioms, the propriety of the judicial power of a government being coextensive with its legislative, may be ranked among the number. The mere necessity of uniformity in the interpretation of the national laws, decides the question. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government from which nothing but contradiction and confusion can proceed." [71]

It should be remembered, however, that is was Hamilton who argued in the same number of The Federalist that Congress' power under the exceptions clause was a salutary means "to obviate and remove" the inconveniences "resulting from the exercise of the federal judicial power." [72]

The argument that fundamental rights should not be allowed to vary from state to state begs the question of whether there is a fundamental right to uniformity of interpretation by the Supreme Court on every issue involving fundamental rights. The supremacy clause provides that the Constitution and the laws of the United States are the supreme law of the land. The purpose of the clause is to bind the states and their courts to follow the Constitution and federal law. But there is no basis for reading the supremacy clause to require uniformity of interpretation among the states on every issue involving constitutional rights. The exception clause is itself part of the supreme law of the land. Judging from what the Supreme Court has said about it over the years, the Court accepts the plain meaning of the exceptions clause. The Court evidently regards the clause not only as an important element of the system of checks and balances but also as granting wide discretion to Congress in exercising power under it. There is, in short, a constitutional right to have the system of checks and balances maintained in working order. Without that system, the more dramatic personal rights, such as speech, privacy and free exercise of religion, could quickly be reduced to nullities. This right to a preservation of the system of checks and balances is itself one of the most important constitutional rights.

If it be contended that the exceptions clause cannot be used to deprive the Supreme Court of appellate jurisdiction in cases involving fundamental constitutional rights, it must be replied that such a limitation can be found neither in the language of the clause nor in its explications by the Supreme Court. Indeed, the Supreme Court's conclusion, prior to 1891, that there was no general right of appeal to the Court in criminal cases, surely involved the denial of the right to appeal in cases involving fundamental constitutional rights.[73] For what constitutional right is more fundamental than the fifth amendment right not to be deprived of life or liberty without due process of law?

When it is argued that Congress cannot take away the Court's jurisdiction to hear appeals involving fundamental rights, it must be remembered that the various rights protected by the Bill of Rights against federal encroachment have been made fully applicable against the state and local governments only through fairly recent constructions by the Supreme Court itself.[74] Until the adoption of the fourteenth amendment in 1868, it was clear that the protections of the Bill of Rights bound only the federal government.[75]

For nearly a century, the Supreme Court correctly interpreted the fourteenth amendment so as to restrict the state only to a limited extent.[76] As Justice John Marshall Harlan described this rule:

"[O]ur function in reviewing state judgments under the Fourteenth Amendment is a narrow one. We do not decide whether the policy of the State is wise, or whether it is based on assumptions scientifically substantiated. We can inquire only whether the state action so subverts the fundamental liberties implicit in the Due Process Clause that it cannot be sustained as a rational exercise of power. The States' power to make printed words criminal is, of course, con-

fined by the Fourteenth Amendment, but only insofar as such power is inconsistent with our concepts of 'ordered liberty.' [77] "

Only in fairly recent years has the Supreme Court held that the states are uniformly bound by all the protections of the Bill of Rights as those protections are interpreted by the Supreme Court.[78] In the process, the Court has implied and defined new constitutional rights in various areas, such as abortion and school prayer. These rights are innovative creations of the Supreme Court itself.[79]

The argument that the Supreme Court cannot be deprived of jurisdiction to hear appeals when they involve rights which the Court has itself created, is an exercise in bootstrap jurisprudence. It would make the Supreme Court not only supreme, but also absolutist in some of the most sensitive areas of our lives. Clearly, the exceptions clause was designed to empower Congress to prevent such a result.[80]

There are those who believe that it would be unwise for Congress to exercise its exceptions clause power even with respect to a single, narrowly drawn class of cases. But doubts as to the wisdom of the exercise of a power cannot be translated into a denial of the existence of the power. The members of Congress are entitled to form their own judgments as to the wisdom of exercising the exceptions clause power in specific instances. The views of those who doubt the wisdom of that exercise are to be seriously considered. However, Congress' power to limit Supreme Court jurisdiction is clearly affirmed in the Constitution itself. Those who are convinced that is is prudent and necessary to withdrawn appellate jurisdiction from the Supreme Court in specified matters ought not to be intimidated by those who wrongly contend that Congress does not even possess that power.

It should be noted, however, that Congress, in its exercise of the exceptions clause power, is not liberated from other constitutional prohibitions which restrict all its actions. It would seem clear that Congress could not withdraw from the lower federal courts or from the appellate jurisdiction of the Supreme Court, jurisdiction, for example, "in any case where a Baptist shall be" a plaintiff or an appellant. This would be unconstitutional, not because the exceptions clause power is limited in itself, but because of a specific prohibition, elsewhere in the Constitution, which restricts the exceptions power, the commerce power and every other power of Congress. The religion of the appellant has nothing to do with the nature of the case. Congress is forbidden by the first amendment to prohibit appeals by Baptists or Jews—or to prohibit their engaging in interstate commerce, or to in any other way infringe the free exercise of religion. This does not mean, however, that there is any restriction on Congress' power to exclude classes of cases, as determined by the nature of the case, from the jurisdiction of the lower federal courts and the appellate jurisdiction of the Supreme Court.

It might be argued that the withdrawal of lower federal court and Supreme Court appellate jurisdiction in, for example, abortion cases would be an unconstitutional denial of a remedy for violations of the right of reproductive privacy which the Supreme Court has declared to be a fundamental right in relation to abortion.[81] But this argument is without merit because the withdrawal of jurisdiction would leave untouched the right of recourse to the state courts. These courts are no less obligated to enforce constitutional rights than are the federal courts.[82]

Nor could it be soundly argued that the withdrawal of jurisdiction in abortion cases would amount to a denial to a class—pregnant women who desire to have abortions—of the equal protection of the laws which is implicitly guaranteed by the fifth amendment.[83] The equal protection guarantee; whether the explicit one in the fourteenth amendment or the implicit one in the fifth, forbids only "purposeful discrimination." [84] Such purposeful discrimination could only readily be found in a withdrawal of jurisdiction in cases where discrete and well-defined groups were precluded from access to the Court. For instance, a statute which withdrew jurisdiction only in those cases where "Baptists or blacks" were parties could be found to be purposefully discriminatory. It is true, however, that proof of purposeful discrimination can be shown by evidence of the disproportionate impact of the law on the suspect class in question.[85] The withdrawal of lower federal court and Supreme Court appellate jurisdiction would diminish—but not abolish—the legal remedies available to pregnant women who seek abortions. It could hardly be contended, however, that discrimination against that class of women would be the purpose of such a withdrawal in the way that discrimination against Baptists would be the purpose of a withdrawal of jurisdiction in cases brought by Baptists. The withdrawal of jurisdiction in abortion cases would be prompted instead by other purposes: First, to restore legal remedies to unborn children who have been decreed to be non-persons by the Supreme Court [86] and, second, to curtail the Supreme Court's continual excursion beyond its proper role in abortion cases. The purposes of such legislation then, would be to vindicate the rights of a minority who are wholly deprived of rights by their definition as nonpersons, and to vindicate the separation of powers and the system of checks and balances.

Those who would deny to Congress the power to make exceptions to the appellate jurisdiction of the Supreme Court would be well advised to follow the course of Justice Owen J. Roberts. In 1949, as a retired Supreme Court Justice, he proposed a constitutional amendment to protect the Court against Congressional tampering with its appellate jurisdiction. His position was straight-forward. He did not pretend that the power so clearly conferred by the exceptions clause was somehow not there. Rather, he proposed to remove that power by constitutional amendment.[87] His analysis and reasons are instructive:

"Why did they [the Framers] then leave it to Congress to regulate the appellate jurisdiction of the Court? I think they did not envisage any such large federal judiciary as we have today. The federal judiciary was rather in the background—that is, the lower judiciary. The theory was that constitutional questions would arise in state courts and then an appeal would come to the Supreme Court from a decision of a state court on a constitutional question.

"There came into play state pride, the states' rights feeling, and another feeling that since Anglo-Saxons prize the jury system, giving the Supreme Court appellate jurisdiction as to matters of law and fact would give it the opportunity to overturn jury verdicts, [and] jury decisions. . . . The best compromise that could be made in the situation was to leave to Congress the right to define the appellate jurisdiction of the Supreme Court.

"You know what the result of that has been. The appellate jurisdiction of the Supreme Court depends upon the judiciary acts—the original Judiciary Act passed in the first session of Congress and the amendments that have been adopted to it since—and Congress has set forth in what cases the Supreme Court can entertain an appeal.

"Very early the Court was faced with the question whether it has a general appellate jurisdiction, modified by what Congress had said on the subject. Chief Justice Marshall, in two decisions, said that was not the way to read the Constitution. He said that the Congress and the judiciary acts, having set forth in which cases the Supreme Court might have jurisdiction on appeal, impliedly provided that it should not take jurisdiction in any other class of cases.

"That is the settled law and I think it is right. It remains, therefore, so far as we can see, that Congress could affect the Court's powers, just as President Roosevelt could have in his way, unless there was a popular uprising that would frighten them out of doing what they threatened to do." [88]

IV. EFFECT OF A WITHDRAWAL OF SUPREME COURT APPELLATE JURISDICTION

Unlike a constitutional amendment, withdrawal of the Supreme Court's appellate jurisdiction over a particular matter would not actually reverse the Court's rulings on the subject.[89] If Congress were to withdraw the Supreme Court's appellate jurisdiction in school prayer cases, for example, that action would leave undisturbed the existing Supreme Court cases in that area. Lower federal courts—if Congress had not removed their jurisdiction over the issue as well—and state courts could regard themselves as bound by those decisions as the last authoritative expression of the meaning of the first amendment, even though the Supreme Court could no longer rule on the subject. The withdrawal of jurisdiction would thus be a limited response to an erroneous Supreme Court decision, and would have no permanent impact on the Constitution. If experience showed the withdrawal to be unwise, it could be readily repealed by a statute. Furthermore, an exercise of the exceptions clause power is foreseeable only in matters in which the Supreme Court's interpretations are so at variance with the sense of Congress and the nation as to be regarded as usurpations. The school prayer decisions, whatever else one may think of them, are a classic example of judge-made law through which the Supreme Court, by its own decree, has virtually amended the Constitution.

Most proposals to withdraw Supreme Court jurisdiction in school prayer and abortion cases would also withdraw those cases from the jurisdiction of lower federal courts. If, for a time, state courts were allowed to make their own decisions in cases involving school prayer, no great hardship would result. Presumably, at least some of those courts would hold themselves bound by the Supreme Court's decisions even though that Court could no longer rule on the subject. Even so, there would at least be no opportunity for the Court to further extend its errors. For example, in cases where supporters of the school prayer decisions sought to extend them to outlaw evangelization efforts by individual students outside of class time, those state courts would be apt to show a greater measure of prudence than the Supreme Court has sometimes shown on the subject.

Finally, it may be expected that some state courts would openly disregard the Supreme Court precedents and would decide in favor of allowing school prayer once the prospect of reversal by the Supreme Court had been removed. That result would not be such a terrible thing. It must be remembered that we are talking about Supreme Court decisions which, in the judgment of the elected representatives of the people and the President—or of two-thirds of the Congress overriding his veto—are gravely erroneous and urgently in need of correction. One healthy method of correcting those decisions would be for the people to trust in the state courts for a time and thereby be protected against further excesses in that area on the part of the Supreme Court. In the process, the Court might learn a salutary lesson so that future excursions beyond the Court's proper bounds could be avoided. Finally, because the correction is statutory, rather than by constitutional amendment, the Court's jurisdiction could readily be restored should the need for it become apparent.

The withdrawal of jurisdiction on school prayer has been used as an example in this discussion to illustrate the effects of a withdrawal of jurisdiction. Similar conclusions are appropriate with respect to the withdrawal of jurisdiction in the school busing and abortion cases. In the abortion area, urgency is lent to the issue by the fact that at least 1,500,000 lives are taken by legalized abortion each year in this country.[90] This is equivalent to more than the combined populations of Kansas City, Minneapolis and Miami. While school prayer is a largely symbolic issue, abortion is a life-and-death issue of enormous proportions. In view of its involving of the very right to live, it is a more important issue than school prayer or "busing."

Roe v. Wade held that, whether or not the unborn child is a human being, he is not a "person" for purposes of the fourteenth amendment.[91] The holding is thus the same, in effect, as a pronouncement that an acknowledged human being is a non-person. The case is thus a reincarnation, in a different context, of the principle enunciated in the *Dred Scott* case.[92] One would expect the legal profession to be favorably disposed toward any attempt, of at least arguable validity, to remedy such a ruling and the consequences of it. *Roe v. Wade*, however, has been accepted with equanimity by the organized bar.[93] In addition, the general reaction of the organized bar to the proposals to curb the Supreme Court's appellate jurisdiction over abortion cases as well as on other issues has been strongly negative.[94] However, notwithstanding the bar's general disfavor toward legislation limiting jurisdiction, the life and death urgency of the abortion issue mandates the use of whatever means available to focus attention on, and perhaps bring changes to, the current law on abortion.

V. CONCLUSION

In the eyes of some critics, the proposed Congressional exercise of power expressly given to Congress by the Constitution is viewed as a threat to the Constitution itself.[95] Whatever its outcome, however, the jurisdiction controversy will serve a useful purpose if it illuminates several uncritical assumptions which appear to underly the claim that the jurisdiction limiting proposals are unconstitutional. The most important of the arguments against the use of the exceptions clause power is based on an assumption of judicial exclusivity and supremacy in the interpretation of the Constitution. Implicit in this assumption is a belief that Supreme Court holdings and opinions on constitutional issues have a status equivalent to the language of the Constitution itself and that they can be corrected only by a constitutional amendment.[96] What seems to be overlooked is the fact that the Supreme Court can render an unconstitutional decision. In *Erie Railroad Co. v. Tompkins*,[97] for example, Justice Brandeis described *Swift v. Tyson*[98] as "an unconstitutional assumption of powers by courts of the United States which no lapse of time or respectable array of opinion would make us hesitate to correct." It would be most extraordinary if the Supreme Court, alone among the three branches of government, were incapable of acting unconstitutionally. If the Supreme Court has rendered an unconstitutional decision, why should it be necessary to change the Constitution to rectify the error? In his first inaugural address, Abraham Lincoln stated: "[i]f the policy of the Government upon vital questions affecting the whole people is to be irrevocably fixed by decisions of the Supreme Court, . . . the people will have ceased to be their own rulers, having to that extent practically resigned the government into the hands of that eminent tribunal."[99] Fortunately, the exceptions clause was intended to provide, among other things, a remedy for this problem.

† Professor of Law, Notre Dame Law School. A.B., College of the Holy Cross, 1953; L.L.B., Boston College, 1956; L.L.M. 1959, J.S.D. 1962, New York University.

[1] *See* Reynolds v. Sims, 377 U.S. 533 (1964).

[2] *See* U.S. CONST. art. V. A constitutional amendment may be proposed by either a two-thirds majority of both houses of Congress or a resolution adopted by the legislatures of two-thirds of the states. *Id.* The amendment, to become effective, must then be ratified by the legislatures of three-fourths of the states. *Id.*

The most recent amendment to the Constitution, the twenty-sixth amendment, which lowered the voting age to 18, was ratified in 1971, three months after it was submitted to the states. In contrast, the proposed equal rights amendment, submitted to the states on March 22, 1972, has failed after over ten years to be ratified by the required number of states.

[3] *Id.* art, III, § 1. Article III, in pertinent part, reads as follows:

"Section 1. The judicial Power of the United States, shall be vested in one Supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish.

"Section 2. The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority. . . .

"In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the Supreme Court shall have original jurisdiction. In all other Cases before mentioned, the Supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make." *Id.* art. III.

[4] *Id.* art III, § 2. For the text of this section, see note 3 *supra*.

[5] *See* Sheldon v. Sill, 49 U.S. (8 How.) 440 (1850). In *Sheldon*, the assignee of a mortgage bond brought an action in federal court to recover on the bond. *Id.* at 442. Diversity of citizenship existed between the assignee and the mortgagor, but not between the assignor-mortgagee and the mortgagor. *Id.* at 440–41. *See generally* 28 U.S.C. § 1332 (1976). Although recognizing that article III could allow such an action in a federal court, the Court concluded that "courts created by statute can have no jurisdiction but such as the statute confers." 49 U.S. (8 How.) at 448. The Court noted that the result might have been different had the lower courts been created by the Constitution itself, but since there was no such constitutional basis for jurisdiction, the federal courts are bound by the jurisdictional limits set by Congress. *Id.*

[23] THE FEDERALIST No. 81, at 571 (A. Hamilton) (H. Dawson ed. 1863).

[24] 7 U.S. (3 Cranch) 159 (1805).

[25] *Id.* at 172. Marshall compared Congress's ability to control Supreme Court jurisdiction with its power to determine the "amount in controversy" requirement, stating:

"Thus, the appellate jurisdiction of this court, from the judgments of the circuit courts, is described affirmatively; no restrictive words are used. Yet, it has never been supposed, that a decision of a circuit court could be reviewed, unless the matter in dispute should exceed the value of $2,000. There are no words in the act, restraining the Supreme Court from taking cognizance of causes under that sum; their jurisdiction is only limited by the legislative declaration, that they may re-examine the decisions of the circuit court, where the matter in dispute exceeds the value of $2,000. This court, therefore, will only review those judgments of the circuit court of Columbia, a power to re-examine which, is expressly given by law." *Id. See generally* 28 U.S.C. §§ 1331, 1332 (1976).

[26] 7 U.S. (3 Cranch) at 170. *See also Ex Parte* Vallandigham, 68 U.S. (1 Wall.) 243 (1863). The *Vallandigham* Court applied the "negative pregnant" doctrine stating: "[A]ffirmative words in the Constitution, declaring in what cases the Supreme Court shall have jurisdiction must be construed negatively as to all other cases." *Id.* at 252.

[27] United States v. Sanges, 144 U.S. 310, 319 (1892). *See also* United States v. Cross, 145 U.S. 571 (1892); *Ex Parte* Bigelow, 113 U.S. 328 (1885).

[28] The Convention's Committee on Detail also included John Rutledge, Edmund Randolph, Nathaniel Gorham, and James Wilson. *See* Merry, *Scope of the Supreme Court's Appelate Jurisdiction: The Historical Basis*, 47 MINN. L. REV. 53, 57 (1962).

[29] 3 U.S. (3 Dall.) 321 (1796). It is interesting to note that of the six judges on the *Wiscart* Court, two of them—James Wilson and Oliver Ellsworth—were members of the 1787 Committee on Detail which drafted the exceptions clause. *See* note 28 *supra*. Ellsworth and William Patterson, another member of the *Wiscart* Court, drafted the Judiciary Act of 1789. *See* Brant, *supra* note 21, at 13.

[30] 30. U.S. (3 Dall.) at 327. *Wiscart* involved the Supreme Court's competency to review findings of fact of a trial court sitting without a jury. *Id.* at 321-22. Justice Wilson's dissent argued that the Court's constitutional jurisdiction provided for a limited form of factual review. *Id.* at 325 (Wilson J. dissenting). The majority concluded, however, that all appellate powers by Congress. *Id.* at 325.

[31] 10 U.S. (6 Cranch) 307 (1810).

[32] *Id.* at 313-14. Marshall's views, after *More* and *Durousseau*, appeared to be that:

"(1) Congress has a wide discretion in legislating exceptions to the constitutional jurisdiction of the Court; (2) if Congress does not exercise that discretion the Court retains its full consitutional jurisdiction; [and] (3) if Congress exercies the discretion by specifying the cases to which the jurisdiction extends, those cases not designated are impliedly excepted" Ratner, *Congressional Power Over the Appelate Jurisdiction of the Supreme Court*, 109 U. PA. L. REV. 157, 177 (1960).

[33] 46 U.S. (5 How.) 103 (1847). *Barry* involved Supreme Court review of a lower court's denial of a writ of habeas corpus in a child custody case. *Id.* at 118-19. The appelant's estranged wife lived with the couple's daughter in New York, while the appellant, a British citizen, lived in Canada. *Id.* at 104, 119. The lower court, reasoning that the value of custody of the child was not quantifiable in monetary terms, determined that it had no jurisdiction over the case since the requisite $2,000 amount in controversy was not present. *Id.* at 119. The Supreme Court affirmed, concluding that since its jurisdiction could only be based upon review of a lower court decision, it had no jurisdiction to issue the writ. *Id.* at 119-20.

[34] *Id.* at 119. *See also* St. Louis, I.M. & S. R.R. v. Taylor, 210 U.S. 281 (1908); United States v. Bitty, 208 U.S. 393 (1908); Colorado Cent. Consol. Mining Co. v. Turck, 150 U.S. 138 (1893); United States v. Cross, 145 U.S. 571 (1892); National Exch. Bank v. Peters, 144 U.S. 571 (1892); United States v. Sanges, 144 U.S. 310 (1892); United States v. Bigelow, 113 U.S. 328 (1885); United States v. Young, 94 U.S. 258 (1876); Daniels v. Railroad Co., 70 U.S. (2 Wall.) 250 (1865); *Ex Parte* Vallandigham 68 U.S. (1 Wall.) 243 (1863); Forsyth v. United States, 50 U.S. (9 How.) 570 (1850).

[35] 74 U.S. (7 Wall.) at 506 (1868). *See generally* Van Alstyne, *A Critical Guide to ex Parte McCardle*, 15 ARIZ. L. REV. 229 (1973).

[36] 74 U.S. (7 Wall.) at 507. The United States Constitution provides: "The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it." U.S. CONST. art. I, § 9, cl. 2. For an historical account of the development of the writ, see Van Alstyne, *supra* note 35, at 233-36.

[37] 74 U.S. (7 Wall.) at 508. The repealed state, designed to assure quick release of Union sympathizers held in southern jails after the Civil War, provided that federal courts were empowered to grant writs of habeas corpus "in all cases where any person may be restrained of his or her liberty in violation of the Constitution, or of any treaty or law of the United States." *Id.* at 507. The statute provided for appeals to the federal circuit courts and to the Supreme Court. *Id.*

[38] *Id.* at 513. Although the negative pregnant doctrine was inapplicable to the facts of the case, the Court reaffirmed its validity, stating:

"It is unnecessary to consider whether, if Congress had made no exceptions and no regulations, this court might not have exercised general appellate jurisdiction under rules prescribed by itself. For among the earliest acts of the first Congress, at its first session, was the act of September 24th, 1789, to establish the judicial courts of the United States. That act provided for the organization of this court, and prescribed regulations for the exercise of its jurisdiction.

"The source of that jurisdiction, and the limitations of it by the Constitution and by statute, have been on several occasions subjects of consideration here. In the case of *Durousseau v. The United States*, particularly, the whole matter was carefully examined, and the court held, that while 'the appellate powers of this court are not given by the Constitution,' they are, nevertheless, 'limited and regulated by that act, and by such other acts as have been passed on the subject.' . . .

"'They [the Congress] have described our jurisdiction affirmatively,' . . . and this affirmative description has been understood to imply a negation of the exercise of such appellate power as is not comprehended within it.'

"The principle that the affirmation of appellate jurisdiction implies the negation of all such jurisdiction not affirmed having been thus established, it was an almost necessary consequence that acts of Congress, providing for the exercise of jurisdiction, should come to be spoken of as acts granting jurisdiction, and not as acts making exceptions to the constitutional grant of it." *Id.* at 513-14. For further discussion of the negative pregnant doctrine, see notes 24-34 and accompanying text *supra*.

[39] 74 U.S. (7 Wall.) at 514. One commentator has stated: "Though more than a century old, *McCardle* still stands as the leading case regarding the extent to which Congress may use the exceptions clause to oust the Court of its appellate power even as to the substantive constitutionality of acts of Congress." Van Alstyne, *supra* note 35, at 232.

[40] 74 U.S. (7 Wall.) at 515. Professor Van Alstyne argued that the alternative basis in the Judiciary Act of 1789 for the issuance of a writ of habeas corpus supports a narrow reading of McCardle. *See* Van Alstyne, *supra* note 35, at 258. The limited reading of McCardle advocated by Professor Van Alstyne is that the decision was based not upon Congress' exceptions clause power, but rather upon Congress' power to enact and repeal jurisdictional statutes. *Id.* at 249-50. Thus, as Professor Van Alstyne interpreted *McCardle*, the Repealer Act only eliminated a right of access conferred upon a special class of litigants rather than effect a general withdrawal of Supreme Court jurisdiction. *Id.* at 250. Consequently, neither the constitutional right to habeas corpus nor the statutory provisions of the Judiciary Act of 1789 were involved. *Id.* at 251-54. Professor Van Alstyne concedes, acknowledging the powers of Congress to withdraw jurisdiction through the acknowledging the powers of Congress to withdraw jurisdiction through the exceptions clause. *Id* at 255.

[41] 75 U.S. (8 Wall.) 85 (1868).

[42] *Id.* at 105. The Court stated that the 1868 repealer statutes "do not purport to touch the appellate jurisdiction conferred by the Constitution, or to except from it any cases not excepted by the Act of 1789. They reach no act except the act of 1867." *Id.*

[43] *Id.* at 103. The Court cautioned that to except all habeas corpus jurisdiction would "greatly weaken the efficacy of the writ, deprive the citizen in many cases of its benefits, and seriously hinder the establishment of that uniformity in deciding upon questions of personal rights which can only be attained through appellate jurisdiction." *Id.*

[44] *Id.* at 104.

[45] 80 U.S. (13 Wall.) 128 (1872).

[46] *Id.* at 143-44.

[47] *Id.* at 145-46 (emphasis added).

[48] *Id.* at 145-46. That *Klein* was an assertion by the Court of the independence of the judiciary has been recognized by the commentators. *See e.g.*, Ratner, *supra* note 32 at 181; Note, *The Nixon Busing Bills and Congressional Power*, 81 Yale L. J. 1542, 1557 (1972).

[49] 80 U.S. (13 Wall.) at 145. The Court wrote: "Congress has inadvertently passed the limit which separates the legislative from the judicial power." *Id.* at 147.

[50] *Id.* at 145.

[51] 105 U.S. 381 (1881).

[52] *Id.* at 386. The Court again analogized Congress' power to control Supreme Court appellate jurisdiction with Congress' ability to establish a minimum amount in controversy as a prerequisite to federal court jurisdiction. *Id. See* note 25 *supra*. The Court noted that there was no right to appellate review by the Supreme Court, since it is "a matter of legislative discretion, not of constitutional right." 105 U.S. at 386. *See also* Luckenback S.S. Co. v. United States, 272 U.S. 533, 536-37 (1926).

[53] 105 U.S. at 385 (emphasis added).

[54] 337 U.S. 582 (1949).

[55] *Id.* at 655 (Frankfurter, J., dissenting) (citations omitted). *See also* Luckenback, S.S. Co. v. United States, 272 U.S. 533, 536 (1926). *See generally* Brant, *supra* note 21, at 28; Merry, *supra* note 28, at 53.

[56] 370 U.S. 530 (1962).

[57] *Id.* at 567-68 (citations omitted). Justice Harlan did note that Congress' authority to limit Supreme Court jurisdiction was not boundless, stating:

"The authority is not, of course, unlimited. In 1870, Congress purported to withdraw jurisdiction from the Court of Claims and from this Court on appeal over cases seeking indemnification for property captured during the Civil War, so far as eligibility therefor might be predicated upon an amnesty awarded by the President, as both courts had previously held that it might. Despite *Ex parte McCardle*, the Court refused to apply the statute to a case in which the claimant had already been adjudged entitled to recover by the Court of Claims, calling it an unconstitutional attempt to invade the judicial province by prescribing a rule of decision in a pending case." *Id.* at 570, *citing* United States v. Klein, 80 U.S. (13 Wall.) 128 (1872).

[58] 370 U.S. at 605 n.11 (Douglas, J., dissenting) (citations omitted).

[59] 392 U.S. 83 (1968).

[60] *Id.* at 109 (Douglas, J., concurring), *citing* Ex parte McCardle, 74 U.S. (7 Wall.) 506 (1868).

[61] The Federalist No. 80 (A. Hamilton).

[62] *See* Hart, *The Power to Limit the Jurisdiction of the Federal Courts: An Exercise in Dialectic*, 66 Harv. L. Rev. 1362, 1365 (1953). *See also* Ratner, *supra* note 32, at 200-01.

[63] *See* Merry, *supra* note 28, at 54-57; Redish, *Congressional Power to Regulate Supreme Court Appellate Jurisdiction Under the Exceptions Clause: An Internal and External Examination*, 27 Vill L. Rev. 900, 906 (1982).

[64] *See* Hart, *supra* note 62, at 1364.

[65] Professor Hart acknowledges that his "essential role" theory has never been addressed by the Supreme Court, but only because Congress has never attempted a jurisdictional withdrawal audacious enough to justify its application. *See id.* at 1365.

[66] Ratner, *supra* note 32, at 169. Professor Ratner argues that Congress' power under the exceptions clause could never be so great as to permit it to divest the Supreme Court of all appellate jurisdiction since, by definition, an exception cannot nullify the general rule that the court "*shall* have appellate Jurisdiction." *Id.* at 169, 171. *See* U.S. Const. art III, § 2, cl. 2 (emphasis added).

Mr. MOYNIHAN. Mr. President, I ask similar consent if I might place in the RECORD at this time the memorandum of law, which it basically is, of the U.S. Attorney General addressed to Hon. STROM THURMOND, chairman of the Committee on the Judiciary, on May 6, 1982, in which he argues that the Congress may not impede into the core functions of the Court.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., May 6, 1982.

Hon. STROM THURMOND,
Chairman, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is written to you as Chairman of the Committee on the Judiciary. It is written in response to a number of earlier inquiries from members of your Committee concerning S. 1742, a proposal which would withdraw jurisdiction from the Supreme Court to consider "any case arising out of any State statute, ordinance, rule, [or] regulation . . . which relates to voluntary prayers in public schools and public buildings." A second provision of the bill would withdraw the jurisdiction of the district courts over any case in which the Supreme Court has been deprived of jurisdiction. This bill raises fundamental and difficult questions regarding the role of the Supreme Court in our constitutional system, as well as the power of Congress to define and circumscribe that role. The issues involved have been the subject of intense scholarly debate and prominent constitutional scholars have differed as to the extent of congressional power to limit Supreme Court jurisdiction.

This is perhaps to be expected since the question of congressional power over the appellate jurisdiction of the Supreme Court implicates in a basic way the relations between Congress and the Supreme Court, two co-equal branches of government. Relations between the different branches in our tripartite system are generally governed by the doctrine of separation of powers. Neither the Constitution nor the decisions of the Supreme Court have attempted to define the precise contours of this doctrine. As two astute students of our constitutional system have noted:

"The accommodations among the three branches of government are not automatic. They are undefined, and in the very nature of things could not have been defined, by the Constitution. To speak of *lines* of demarcation is to use an inapt figure. There are vast stretches of ambiguous territory. Frankfurter & Landis, *Power of Congress Over Procedure in Criminal Contempts in "Inferior" Federal Courts*, 37 Harv. L. Rev. 1010, 1016 (1924) (emphasis in original).

The doctrine of separation of powers touches fundamentally on how the Nation is governed, and, as the Supreme Court noted last Term in a separation of powers case, "it is doubtless both futile and perhaps dangerous to find any epigrammatical explanation of how this country has been governed." *Dames & Moore* v. *Regan*, 101 S. Ct. 2972, 2977 (1981). In this area more than any other we must heed Justice Holmes' wise admonition that "[t]he great ordinances of the Constitution do not establish and divide fields of black and white." *Springer* v. *Philippine Islands*, 277 U.S. 189, 209 (1928) (dissenting opinion).

There is no doubt that Congress possesses some power to regulate the appellate jurisdiction of the Supreme Court. The language of the Constitution authorizes Supreme Court appellate jurisdiction over enumerated types of cases "with such Exceptions, and under such Regulations as the Congress shall make." The Supreme Court has upheld the congressional exercise of power under this clause, even beyond widely accepted "housekeeping" matters such as time limits on the filing of appeals and minimum jurisdictional amounts in controversy. See *Ex parte McCardle*, 74 U.S. (7 Wall.) 506 (1869).

Congress may not, however, consistent with the Constitution, make "exceptions" to Supreme Court jurisdiction which would intrude upon the core functions of the Supreme Court as an independent and equal branch in our system of separation of powers.

In determining whether a given exception would intrude upon the core functions of the Supreme Court, it is necessary to consider a number of factors, such as whether the exception covers constitutional or nonconstitutional questions, the extent to which the subject is one which by its nature requires uniformity or permits diversity among the different states and different parts of the country, the extent to which Supreme Court review is necessary to ensure the supremacy of federal law, and whether other forums or remedies have been left in place so that the intrusion can properly be characterized as an exception.

Concluding that Congress may not intrude upon the core functions of the Supreme Court is not to suggest that the Supreme Court and the inferior federal courts have not occasionally exceeded the properly restrained judicial role envisaged by the Framers of our Constitution. Nor does such a conclusion imply am endorsement of the soundness of some of the judicial decisions which have given rise to various of the legislative proposals now before Congress. The Department of Justice will continue, through its litigating efforts, to urge the courts not to intrude into areas that properly belong to the State legislators and to Congress. The remedy for judicial overreaching, however, is not to restrict the Supreme Court's jurisdiction over those cases which are central to the core functions of the Court in our system of government. This remedy would in many ways create problems equally or more severe than those which the measure seeks to rectify.[1]

With respect to other pending legislation, the Department of Justice has concluded that Congress may, within constraints imposed by provisions of the Constitution other than Article III, limit the jurisdiction or remedial authority of the inferior federal courts. See letter from the Attorney General to Chairman Rodino concerning S. 951. The question of congressional power over lower federal courts is quite different from the question of congressional power over Supreme Court jurisdiction, and the two issues should not be confused.

I.

Proponents of congressional constitutional authority to limit the Supreme Court's entire appellate jurisdiction have contended that such authority exists under the "Exceptions Clause" of Article III of the Construction. Article III provides, in pertinent part:

"SECTION 1. The judicial Power of the United States, shall be vested in one supreme Court, and in such inferor courts as the Congress may from time to time ordain and establish. . . .

"SECTION 2. The judicial Power shall extend to all Cases, in Law and Equity, arising under this Construction, the Laws of the United States, and Treaties made, or which shall be made, under their Authority; to all Cases affecting Ambassadors, other public Ministers and Consuls; to all cases of admiralty and maritime Jurisdiction; to Controversies to which the United States shall be a

[1] The Department of Justice, in previous Administrations, has consistently opposed proposals to restrict Supreme Court jurisdiction. *See Hearings Before the Subcomm. To Investigate the Administration of the Internal Security Act and Other Internal Security Laws of the Sen. Comm. on the Judiciary*, 85th Cong., 2d Sess. 573-74 (1958) (statement of Attorney General Rogers) ("full and unimpaired appellate jurisdiction of the Supreme Court is fundamental under our system of government"); Memorandum for the Attorney General from Assistant Attorney General Malcolm R. Wilkey, Office of Legal Counsel (February 25, 1958) (bills to limit Supreme Court jurisdiction are constitutional but bad policy); Memorandum for the Deputy Attorney General from Assistant Attorney General Tompkins, Internal Security Division (February 14, 1958) (unconstitutional); Letter to Sen. James O. Eastland, Chairman, Senate Comm. on the Judiciary, from Deputy Attorney General Richard Kleindienst (September 4, 1969) (not clearly distinguishing constitutional and policy objections); Memorandum for the Attorney General from Assistant Attorney General William H. Rehnquist (September 16, 1969) (not clearly distinguishing constitutional and policy objections); letter from Assistant Attorney General Alan Parker to Rep. Peter Rodino, Chairman, House Comm. on the Judiciary (June 19, 1980) (unconstitutional); *Prayer in Public Schools and Buildings, Hearings Before the Subcomm. on Courts, Civil Liberties, and the Administration of Justice of the House Comm. on the Judiciary*, 96th Cong., 2d Sess. 11 (1980) (testimony of John M. Harmon, Assistant Attorney General, Office of Legal Counsel) (unconstitutional).

Party; to Controversies between two or more States: between Citizens of different States; between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

"In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, *with such exceptions, and under such Regulations as the Congress shall make.*" (Emphasis added.)

The language of the Exceptions Clause, underscored above, does not support the conclusion that Congress possesses plenary authority to remove the Supreme Court's appellate jurisdiction over all cases within that jurisdiction. The concept of an "exception" was understood by the Framers, as it is defined today, as meaning an exclusion from a general rule or law. An "exception" cannot, as a matter of plain language, be read so broadly as to swallow the general rule in terms of which it is defined.

The Constitution, unlike a statute, is not drafted with specific situations in mind. Designed as the fundamental charter of our political system, its most important provisions are phrased in broad and general terms. As eloquently expressed by Justice Holmes in *Missouri* v. *Holland*, 252 U.S. 416, 433 (1920):

"[W]hen we are dealing with words that also are a constitutent act, like the Constitution of the United States, we must realize that they have called into life a being the development of which could not have been foreseen completely by the most gifted of its begetters. It was enough for them to realize or to hope that they had created an organism; it has taken a century and has cost their successors much sweat and blood to prove that they created a nation. The case before us must be considered in light of our whole experience and not merely in that of what was said a hundred years ago."

For example, a literal interpretation of Article III as a whole would seem to mandate that Congress vest the full judicial power of the United States either in the Supreme Court or in an inferior federal court. Under such an interpretation, Congress could make "exceptions" to the Supreme Court's appellate jurisdiction only if it vested the jurisdiction at issue either in an inferior federal court or in the Supreme Court's original jurisdiction. This interpretation, which would require the conclusion that any measure which entirely ousted the federal courts from exercising any portion of the judicial power of the United States and vested that authority in state courts would be unconstitutional, is rejected by all authorities today.[2]

The Constitution contains a number of other pronouncements which, although seemingly unambigous and absolute, have necessarily been interpreted as limited in their applicability. *See, e.g., Home Building & Loan Ass'n.* v. *Blaisdell, 290 U.S. 398 (1934) (Contract Clause); Everson* v. *Board of Education, 330 U.S. 1 (1947) (Establishment Clause); Reynolds* v. *United States*, 98 U.S. 145 (1878) (Free Exercise Clause); *Brandenburg* v. *Ohio*, 395 U.S. 444 (1969) (*per curiam*) (Free Speech Clause). The Supreme Court has also recognized that even when a statute is otherwise within a power granted to Congress by the Constitution, extrinsic limitations on congressional power contained in the Bill of Rights or elsewhere may nevertheless render the statute unconstitutional. *See, e.g., National League of Cities* v. *Usery*, 426 U.S. 833 (1976) (limitations on Commerce Clause); *McCulloch* v. *Maryland*, 17 U.S. (4 Wheat.) 316, 421 (1819) (limitations on Necessary and Proper Clause).

In light of these principles of constitutional interpretation, the Exceptions Clause may not be analyzed in a vaccum but must be understood in terms of Article III as a whole, as evidenced by the history of its framing and ratification, its place in the system of separation of powers embodied in the structure of the Constitution, and its consistency with external limitations on congressional power implicit in the Constitution and contained in the Bill of Rights. The construction of the Exceptions Clause that is most consistent both with the plain language of the Clause and with other evidence of its meaning is that Congress can limit the Supreme Court's appellate jurisdiction only up to the point where it impairs the Court's core functions in the constitutional scheme.

II.

The events at the Constitutional Conventin support a construction of the Exceptions Clause that would preclude Congress from interfering with the Supreme Court's core functions. The Framers agreed without dissent on the necessity of a Supreme Court to secure national rights and the uniformity of judgments. The Resolves which were agreed to by the Convention and given to the Committee of Detail provided, simply, that "the jurisdiction [of the Supreme Court] shall extend to all cases arising under the Natl. laws: And to such other questions as may involve the Natl. peace & harmony." No mention was made of any congressional power to make exceptions to the Court's jurisdiction. The Committee of Detail, charged with drafting a provision to implement these Resolves, proposed the language of the Exceptions Clause. It seems unlikely that that the Committee of Detail could have deviated so dramatically from the Convention's Resolves as to have given Congress the authority to interfere with the Supreme Court's core functions without considerably more attention to the subject at the Convention.

This inference is strengthened by the events surrounding the adoption of the Judicial Article by the full Convention. In determining the scope of the Court's jurisdiction, the Convention agreed to provisions expressly confirming that the jurisdiction included cases arising under the Constitution and treaties; but it rejected, by a 6–2 vote, a resolution providing that, except in the narrow class of cases under the Court's original jurisdiction, "the judicial power shall be exercised in such manner as the Legislature shall direct."[3] The Convention thus rejected a clear statement of plenary congressional power over the Court's appellate jurisdiction. Nevertheless, on the same day—without any recorded debate or explanation—the Framers adopted the Exceptions and Regulations language now contained in Article III. In light of the value placed on the Supreme Court's appellate jurisdiction, as evidenced by the other actions of the Convention, it seems highly unlikely that the Framers would have agreed, without the slightest hint of controversy, to a provision that would authorize Congress to interfere with the Court's core constitutional functions.

There are additional reasons why the lack of controversy surrounding the adoption of the Exceptions Clause supports the inference that no power to intrude on the Court's core functions was intended. First, the historical materials show the great importance which the Framers attached to these functions. They envisaged that the Supreme Court was a necessary part of the constitutional scheme and believed that the Court would review state and federal laws for consistency with the Constitution.[4] These sentiments were echoed by the authors of the *Federalist Papers*, a work which is justly regarded as an important guide to the meaning of the Constitution.[5] In light of this explicit recognition by the Founding Fathers of the Court's vital role in the constitutional scheme, it seems unlikely that they would have adopted, without controversy, a provision which would effectively authorize Congress to eliminiate the Court's core functions.

A second reason for inferring a more limited construction of the Exceptions Clause from the lack of discussion at the Convention concerns the compromise agreed to by the Framers regarding the establishment of inferior federal courts. While the necessity of a Supreme Court was accepted without significant dissent among the Framers, there was vigorous disagreement over whether inferior federal courts should be provided. The Convention first approved a provision calling for mandatory inferior federal courts, then struck this provision by a divided vote, and finally determined to leave to Congress the question whether to establish inferior federal courts. The Supreme Court was viewed as a necessary part of the constitutional strucutre and was established by the Constitution itself; Congress was given no control over whether the Court would be created. The inferior federal courts, however, were viewed as an optional part of the Government and were authorized but not established by the Constitution. The decision whether to create them was given to Congress. This distinction and the role explicitly assigned to Congress with respect to the inferior federal courts, implies that the powers of Congress were to be quite different with respect to the Supreme Court and the inferior federal courts.

If the Exceptions Clause authorized Congress to eliminate the Supreme Court's appellate jurisdiction, thus limiting it to the exercise of original jurisdiction, the power of Congress over the Supreme Court would be virtually indistinguishable from its power over inferior federal courts. Just as Congress could decline to create inferior federal

[2] *Marbury* v. *Madison*, 5 U.S. (1 Cranch) 137 (1803), established that Congress has no authority to enlarge the Supreme Court's original jurisdiction by creating "exceptions" to its appellate jurisdiction. In *Martin* v. *Hunter's Lessee*, 14 U.S. (1 Wheat.) 304, 330–31 (1816), Justice Story argued that, if Congress creates any inferior federal courts, it must confer on them the full federal jurisdiction. This view, however, has never since been accepted by a majority of the Supreme Court.

[3] 2 M. Farrand, *The Records of the Federal Convention of 1787* 46 (1911).

[4] *See, e.g.*, 1 *id.* at 124; 2 *id.* at 589 (Madison).

[5] *See, e.g., Federalist* No. 39 (Madison) (Supreme Court is clearly essential to prevent an appeal to the sword and a dissolution of the compact") *id.* No. 80 (Hamiltion); *id.* N. 82 (Hamilton).

courts, it could, in the guise of creating "exceptions" to the Supreme Court's appellate jurisdictiom deny the Supreme Court the vast majority of the judicial powers which the Framers insisted "shall be vested" in the federal judiciary. Congress could not eliminate the Supreme Court, but it could reduce it to a position of virtual impotence with only its limited original jurisdiction remaining. Such an interpretation cannot be squared with the stark difference in treatment which the Framers accorded to the Supreme Court and the inferior federal courts. Given the intensity of the debate regarding inferior federal courts, and the compromise arrived at by the Framers, it seems highly unlikely that the Convention would have adopted without comment a provision which, for most practical puposes, would place the Supreme Court and the inferior federal courts in the same position vis-a-vis Congress.

A third reason to infer a limited construction of the Exceptions Clause from the lack of debate accompanying its adoption is found in the theory of separation of powers which formed the conceptual foundation for the system of goverment adopted by the Convention. The Framers intended that each of the three branches of Government would operate largely independently of the others and would check and balance the other Branches. The purpose of this approach was to ensure that governmental power did not become concentrated in the hands of any one individual or group, and thereby to avoid the danger of tyranny which the Framers believed inevitably accompanied unchecked governmental power. Indeed, it is not an exaggeration to say that the single greatest fear of the Founding Fathers was tyranny, and that concentration of power was, in their minds, "the very definition of tyranny." [6]

Essential to the principle of separation of powers was the proposition that no one Branch of Government should have the power to eliminate the fundamental constitutional role of either of the other Branches. As Madison stated in *Federalist* No. 51:

"[T]he great security against a gradual concentration of the several powers in the same department consists in giving to those who administer each department the necessary constitutional means and personal motives to resist encroachments of the others. The provision for defense must in this, as in all other cases, be made commensurate to the danger of attack."

This basic principle of the Constitution—that each branch must be given the necessary means to defend itself against the encroachments of the two other branches—has special relevance in the context of *legislative* attempts to restrict *judicial* authority. The Framers "applaud[ed] the wisdom of those states who have committeed the judicial power, in the last resort, not to a part of the legislature, but to distinct and independent bodies of men." *Federalist* No. 81 (Hamilton). They believed that, by the inherent nature of their power, the legislature would tend to be the strongest and the judiciary the weakest of the Branches. This insight is reflected in the very structure of the Constitution: the provisions governing the legislature are placed first, in article I; those establishing and governing the Judicial Branch are in the third position, in Article III. Madison recognized the great inherent power of the Legislative Branch in *Federalist* No. 48. Drawing extensively from Jefferson's *Notes on the State of Virginia*, Madison concluded that in a representative republic "[t]he legislative department is everywhere extending the sphere of its activity and drawing all power into its impetuous vortex." *See also Federalist* No. 51 (Madison).

It was in no sense a derogation on the concept of governance responsive to popular will that the Founding Fathers desired checks on the power of the Legislature they were creating. The Act of Parliament as well as those of the King formed the litany of grievances which produced the Revolution. The Founding Fathers believed in the voice of the people and their elected representatives and placed substantial power in the Legislature. At the same time, however, they were acutely sensitive to the rights of individuals and minorities. Most of them had first-hand experience with persecution. The idea of a written Constitution was precisely to place a check on the popular will and, in large part, to restrain the most powerful Branch. They crafted a representative republic with restraints on the legislature. "[A]n elective *despotism* was not the government we fought for . . . . "*Federalist* No. 48 (Madison), quoting Jefferson's *Notes on the State of Virginia* (emphasis in original).

The Supreme Court was viewed as a part of this restraint, but, nonetheless, inherently as the least dangerous Branch. Hamilton, in a famous passage from Federalist No. 78, eloquently testified to the inherent weakness of the Judicial Branch:

"Whoever attentively considers the different departments of power must perceive that, in a government in which they are separated from each other, the judiciary, from the nature of its functions, will always be the least dangerous to the political rights of the Constitution; because it will be least in a capacity to annoy or injure them. The executive not only dispenses the honors but holds the sword of the community. The legislature not only commands the purse but prescribes the rules by which the duties and rights or every citizen are to be regulated. The Judiciary, on the contrary, has no influence over either the sword or the purse; no direction either of the strength or of the wealth of the society, and can take no active resolution whatever. It may truly be said to have neither FORCE nor WILL but merely judgment; and must ultimately depend upon the aid of the executive arm even for the efficacy of its judgments."

As a consequence of this view, Hamilton believed that it was necessary for the judiciary to remain "truly distinct from the Legislature and the Executive. For I agree that 'there is no liberty, if the power of judging be not separated from the legislative and executive powers.' " Id., quoting Montesquieu's Spirit of Laws. Thus, he concluded: "The complete independence of the courts of justice is peculiarly essential in a limited Constitution." Id.

It was in recognition of the inherent weakness of the judiciary, particularly as contrasted with the inherent power of the legislature, that the Framers determined to give special protections to the judiciary not enjoyed by officials of the other Branches. Federal judges were given lifetime positions during good behavior, and were protected against diminution of salary while in office. The purpose of these provisions was largely to provide the judiciary, as the weakest Branch, with the necessary tools for self-protection against the encroachments of the other Branches.

The notion that the Exceptions Clause grants Congress plenary authority over the Supreme Court's appellate jurisdiction cannot easily be reconciled with these principles of separation of powers. If Congress had such authority, it could reduce the Supreme Court to a position of impotence in the tripartite constitutional scheme. The Court could be deprived of its ability to protect its core constitutional functions against the power of Congress. The salary and tenure protections so carefully crafted in Article III could be rendered virtually meaningless in light of the power of the Congress simply to eliminate appellate juridiction altogether, or in those areas where the Court's decisions displeasued the legislature. It is significant that while the Framers did not focus on the Exceptions Clause, they did point to the impeachment power as "a complete security" against risks of "a series of deliberate usurpations on the authority of the legislature." *Federalist* No. 81.

In light of these basic considerations, it seems unlikely that the Framers intended the Exceptions Clause to empower Congress to impair the Supreme Court's core functions in the constitutional scheme. Even if some of the Framers could have intended this, it is improbable that the Exceptions Clause could have been approved by the Convention without debate or controversy, or indeed without any explicit statement by anyone associated with the framing or ratification of the Constitution that such a deviation from the carefully crafted separation of powers mechanisms provided elsewhere in the Constitution was intended. Nor does it seem likely that the Convention would have developed the Exceptions Clause as a check on the Supreme Court in such a manner that an exercise of power under the Clause to remove Supreme court appellate jurisdiction would not return authority to Congress, but vest it in the state courts instead. Hamilton regarded even the possibility of multiple courts of final jurisdiction as unacceptable.

"The mere necessity of uniformity in the interpretation of the national laws, decides the question. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government, from which nothing but contradiction and confusion can proceed. *Federalist* No. 80."

Thus, unless there is sound and compelling evidence of a contrary interpretation in the decisions of the Supreme Court, or in the long-accepted historical, practices regarding congressional control of Supreme Court jurisdiction, it must be concluded that the Exceptions Clause does not authorize Congress to interfere with the Court's core functions in our constitutional system.

III.

An examination of the Supreme Court's cases does not require any different interpretation. The Supreme Court has provided only inconclusive guidance on the meaning of the Exceptions Clause. In *Martin* v. *Hunter's Lessee*, 14 U.S. (1 Wheat.) 304 (1816), the Court noted "the importance, and even the necessity of uniformity of decisions throughout the whole United States upon all subjects within the purview of the constitution." In the absence of the Supreme Court, Justice Story observed, "the laws, the treaties and the Constitution of the United States would be different, in different states . . . . The public mischiefs that would attend such a state of things would be truly deplorable; for it cannot be be-

[6] *Federalist* No. 47 (Madison).

lieved, that they could have escaped the enlightened convention which formed the Constitution . . . . [T]he appellate jurisdiction must continue to be the only adequate remedy for such evils." Similar statements are found in the opinions of Chief Justice Marshall, *Cohens* v. *Virginia*, 19 U.S. (6 Wheat.) 264, 415 (1821), and Chief Justice Taney, *Ableman* v. *Booth*, 62 U.S. (21 How.) 506, 517-18 (1858).[8] Although these cases do not squarely address the question whether Congress could constitutionally deprive the Court of its core functions, the Court's language seems strong enough to cast considerable doubt, at least by implication, on the power of Congress to eliminate Supreme Court jurisdiction over cases in which a final, uniform and supreme voice is necessary in the guise of creating "exceptions" to that jurisdiction. In the words of Chief Justice Taney, the exercise of such a power would withdraw authority which is "essential . . . to [the] very existence [of the Federal] government [and] essential to secure the independence and supremacy of [that] Government." *Id.*

The Supreme Court has, in a number of early cases, referred to the power of Congress over its appellate jurisdiction as being quite broad. For example, in *Barry* v. *Mercein*, 46 U.S. (5 How.) 103 (1847), the Court stated that "[i]f Congress has provided no rule to regulate our proceedings, we cannot exercise our appellate jurisdiction, and if the rule is provided, we cannot depart from it." *See also The "Francis Wright,"* 105 U.S. 381, 386 (1881); *Daniels* v. *Railroad Co.*, 70 U.S. (3 Wall.) 250, 254 (1865); *Durousseau* v. *United States*, 10 U.S. (6 Cranch) 307, 313-14 (1810); *United States* v. *More*, 7 U.S. (3 Cranch) 159 (1805); *Wiscart* v. *Dauchy*, 3 U.S. (3 Dall.) 321, 327 (1796). However, every one of these statements is *dicta;* the Court has never held that Congress has the power entirely to preclude the Court from exercising its core functions. It may also be doubted whether these broad statements are intended to cover cases in which such an extraordinary congressional power was exercised. They may instead be designed to recognize a broad power which, like the Commerce Clause, is limited by other provisions of the Constitution and by the structure of the document as a whole.

Proponents of the "plenty power" thesis rely most heavily on the only Supreme Court decision which could be characterized as upholding a power of Congress to divest the court of jurisdiction over a class of constitutional cases: *Ex parte McCardle*, 74 U.S. (7 Wall.) 506 (1869). At issue in that case was the constitutionality of an 1868 statute repealing a provision enacted the previous year which had authorized appeals to the Supreme Court from denials of habeas corpus relief by a circuit court. In a brief opinion which did not discuss the scope or implications of the Exceptions Clause, the Court upheld Congress' withdrawal in 1868 of jurisdiction under the 1867 law, stating that "the power to make exceptions to the appellate jurisdiction of this court is given by express words." *Id.* at 514. Despite this broad language, the Court suggested that the withdrawal of jurisdiction provided by the 1867 law did not deprive the Court of jurisdiction over habeas corpus cases that had been conferred by § 14 of the Judiciary Act of 1789. "Counsel seem to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of habeas corpus, is denied. But this is an error." *Id.* at 515.

The Court's *Dictum* regarding alternative procedures for Supreme Court review of habeas corpus cases was converted into a holding several months later in *Ex Parte Yerger*, 75 U.S. (8 Wall.) 85 (1869). The petitioner in that case had invoked the Court's jurisdiction under the Judiciary Act of 1789. In holding that it had jurisdiction, the Court in *Yerger* made it clear that the 1868 legislation considered in *McCardle* was limited to appeals taken under the 1867 act and upheld the petitioner's right to Supreme Court review under the proper jurisdictional statute. The Court noted that the 1868 act did "not purport to touch the appellate jurisdiction conferred by the Constitution. . . ." *Id.* at 105. In doing so, the Court observed that any total restriction on the power to hear habeas corpus cases would "seriously hinder the establishment of that uniformity in deciding upon questions of personal rights which can only be attained through appellate jurisdiction. . . ." *Id.* at 103. Thus, within months of the *McCardle* decision, the Court made it clear that *McCardle* did not decide the question of Congress' Power to deprive it of all authority to hear constitutional claims in habeas corpus cases. For this reason, while the *Yerger* Court acknowledged that the Court's jurisdiction as given by the Constitution "is subject to exception and regulation by Congress," *id.* at 102, neither *McCardle*, nor *Yerger*, nor any other case, constitutes an authoritative statement that Congress could deprive the Court of its core functions.

IV.

Finally, the historical record regarding the authority actually asserted by Congress to control the Court's appellate jurisdiction supports, on balance, the construction that the Exceptions Clause does not authorize Congress to interfere with the Court's core functions. It is indeed true that Congress did not, in the First Judiciary Act explicitly authorize the Supreme Court to exercise the full range of appellate jurisdiction established by Article III. Perhaps the most prominent category of cases in which the Court was not granted statutory jurisdiction were federal criminal cases, which were not explicitly brought within the Court's appellate jurisdiction until 1889. Although Supreme Court review over these cases may have been available in special circumstances, it is probably true that most federal criminal cases were not reviewable by the Supreme Court during this period under the terms of the applicable legislation. The Judiciary Act also failed to grant the Supreme Court appellate jurisdiction over state court decisions striking down state laws as being inconsistent with the federal Constitution, or upholding federal statutes against constitutional attack.

The failure of Congress in the First Judiciary Act to provide the Court with the full appellate jurisdiction authorized under Article III does not undermine the conclusion that Congress cannot interfere with the Supreme Court's core functions, for several reasons. First, while Congress did omit certain specific categories of cases from the appellate jurisdiction provisions of the First Judiciary Act, it is noteworthy that the first Congress, containing among its members many delegates to the Constitutional Convention, recognized the Court's appellate jurisdiction over an extremely broad range of constitutional cases. Most significantly, the Court was given authority under § 25 of the Judiciary Act to review decisions of state courts striking down federal statutes or upholding state statutes against constitutional attack. That authority was conferred despite the intense controversy which it sparked among the states—controversy which resulted in state resistance to Supreme Court judgments and in attempts in Congress, foreshadowing the current attempts to limit the Court's jurisdiction, to repeal § 25 of the Judiciary Act. The fact that the Judiciary Act did not explicitly recognize jurisdiction over state court decisions upholding the validity of federal laws or striking down state laws, or over federal criminal cases, does not undercut the position that the Court cannot be divested of its ability to fulfill its essential responsibility under the Constitution. The supremacy of federal law, guaranteed by the Supreme Court, would not be seriously threatened by state court decisions upholding federal laws or striking down state laws on federal constitutional grounds.

Second, the history of Supreme Court appellate review has confirmed the importance of its core functions. To the extent that any inferences can be drawn from the failure of the First Judiciary Act explicitly to recognize the full range of the Supreme Court's appellate jurisdiction over constitutional cases, those inferences are subject to refutation by later events. The Supreme Court now has appellate jurisdiction over all federal cases. Each of the areas of incomplete jurisdiction has long since been fulfilled. The vast majority of constitutional decisions which are on the books today, and which affect our national life in many and important ways, have been rendered by the Court under a statutory regime which included such broad appellate jurisdiction. As Justice Frankfurter said in another context, "the content of the three authorities of government is not to be derived from an abstract analysis . . . . It is an inadmissibly narrow conception of American constitutional law to confine it to the words of the Constitution and to disregard the gloss which life has written upon them." *Youngstown Sheet & Tube Co.* v. *Sawyer*, 343 U.S. 579, 610 (1952) (concurring opinion). The gloss which life has written on the Supreme Court's jurisdiction is one which protects the essential role of the Court in the constitutional plan.

As noted at the outset, Congress has substantial authority over the jurisdiction and power of the inferior federal courts. It also is given the power under Article III to regulate the Supreme Court's appellate jurisdiction in circumstances which do not threaten the core functions of the Court as an independent branch in our system of separation of powers. Congress may, for example, specify procedures for obtaining Supreme Court review and impose other restraints on the Court. But the question of the limits of Congress' authority under the Exceptions Clause is an extraordinarily difficult one. Thoughtful and respected authorities have come to conclusions which differ.

The legislative process itself is often important in assessing not only the meaning but also the constitutionality of Congressional enactments. The Court has stated that it must have "due regard to the fact that this Court is not exercising a primary judgment but is sitting in judgment upon those who also have taken the oath to observe the Constitution and who have the re-

[8] *Cf.* the famous statement of Justice Holmes: "I do not think the United States would come to an end if we lost our power to declare an Act of Congress void. I do think the Union would be imperiled if we could not make that determination as to the laws of the several states." O.W. Homes, *Collected Legal Papers* 295 (1920).

sponsibility for carrying on government." *Rostker* v. *Goldberg*, 453 U.S. 57, 64 (1981).

If Congress considers the subject matter of S. 1742 it may wish to do so in light of the principles enunciated above and carefully weigh whether whatever action is taken would intrude upon the essential functions of the Supreme Court as an independent branch of government in our system of separation of powers. As the Court has stated, "The customary deference accorded the judgments of Congress is certainly appropriate when . . . . Congress specifically considered the question of the Act's constitutionality." *Id.* at 64.

Ultimately, it is for Congress to determine what laws to enact and for the Executive Branch to "take care that the Laws be faithfully excuted." It is settled practice that the Department of Justice must and will defend Acts of Congress except in the rare case when the statute either infringes on the constitutional power of the Executive or when prior precedent overwhelmingly indicates that the statute is invalid. Accordingly, should the Department be called upon to defend the constitutionality of this bill before the courts, it responsibly could and would do so.

It is appropriate to note, however, that even if it were concluded that legislation in this area could be enacted consistent with the Constitution, the Department would have concerns as a policy matter about the withdrawal of a class of cases from the appellate jurisdiction of the Supreme Court. History counsels against depriving that Court of its general appellate jurisdiction over federal questions. Proposals of this kind have been advanced periodically, but have not been adopted since the Civil War. There are sound reasons that explain why Congress has exercised restraint in this area and not tested the limits of constitutional authority under the Exceptions Clause.

The integrity of our system of federal law depends upon a single court of last resort having a final say on the resolution of federal questions. The ultimate result of depriving the Supreme Court of jurisdiction over a class of cases would be that federal law would vary in its impact among the inferior courts. State courts could reach disparate conclusions on identical questions of federal law, and the Supreme Court would not be able to resolve the inevitable conflicts. There would also exist no guarantee through Supreme Court review that state courts accord appropriate supremacy to federal law when it conflicts with state enactments.

Sincerely,

WILLIAM FRENCH SMITH,
Attorney General.

Mr. MOYNIHAN. Mr. President, having made the constitutional legal argument, the Attorney General turns in his concluding paragraphs to the question of the prudence and wisdom of what is involved. The Attorney General writes:

It is appropriate to note, however, that even if it were concluded that legislation in this area could be enacted consistent with the Consitution, the Department would have concerns as a policy matter about the withdrawal of a class of cases from the appellate jurisdiction of the Supreme Court. History counsels against depriving that Court of its general appellate jurisdiction over federal questions. Proposals of this kind have been advanced periodically, but have not been adopted since the Civil War. There are sound reasons that explain why Congress has exercised restraint in this area and not tested the limits of constitutional authority under the Exceptions Clause.

Mr. President, I conclude my remarks this afternoon by saying that that is a statement written in May by the Attorney General. Let me read a statement written in September of 1796 by the first President of the United States, or spoken by him, and, in the judgment of some, written by Hamilton.

We have the fine custom of reading Washington's Farewell Address in this Chamber on his birthday. In it is this passage—his counsel, his legacy, to us. He said:

It is important . . . that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments ancient and modern: some of them in our country and under our own eyes.—To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates. But let there be no change by usurpation; for though this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil, any partial or transient benefit which the use can at any time yield.

It seems to me that if we will not attend to the judgment of our Attorney General, let us at least hear the views of the first President of the United States in his farewell address.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from today's New York Times.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 20, 1982]

THE ISSUE IS COURT-STRIPPING

Last week a weary Senate finally tabled an anti-abortion rider to the vital debt ceiling bill. Today it decides whether to cut off debate on another legislative parasite on the same bill, a school prayer rider. This time the issue is far more than a politically sensitive "social issue." It is the structure of constitutional government. If a filibuster by a number of committed Senators is the only way to make that point clear to their colleagues, then the filibuster should continue.

Senator Jesse Helms, who sponsored the rider, believes the Supreme Court was wrong two decades ago in ruling that officially sponsored prayer violates the First Amendment. But his rider would strip all the Federal courts, including the Supreme Court, of the power to rule at all in prayer controversies.

Passage of such a measure would provoke a constitutional crisis. It would challenge the role of the Federal judiciary as interpreter of the Constitution—indeed, as a coequal branch of the Government.

The proper way to overcome a Supreme Court constitutional ruling is by amending the Constitution. That is the basis of Attorney General Smith's objection to legislative shortcuts. President Reagan showed similar awareness when he called for a vote this year on the school prayer constitutional amendment he has proposed.

For good reason, amending the Constitution is far more deliberate than passing a law. It requires a two-thirds vote of Congress and ratification by three-fourths of the states. The success of Mr. Helms' measure would mean that a simple majority in Congress could render the Constitution unenforceable in Federal courts—and subject to varying interpretations in state courts.

Let the debate continue until the entire Senate understands, and knows that the voters understand, that the issue is not prayer but court-stripping.

Mr. BAUCUS. Mr. President, I thank the senior Senator from New York for his continuing efforts to speak out on behalf of the Constitution. That may sound like an idle statement, but it surprises me that there are quite a number of Senators who, so far, are not going to protect the Constitution. It is necessary for some, including the Senator from New York—in his eloquent fashion—to state the importance of the Constitution—not only the importance of the Constitution but also the necessity of maintaining a strong Constitution if we are going to retain our present form of government.

Mr. President, last week I was referring to excerpts of a letter from the Attorney General of the United States, William French Smith, which he sent to the chairman of the Senate Judiciary Committee, the Senator from South Carolina (Mr. THURMOND), in May of this year. In that letter, the Attorney General, very cogently, very succintly, and very clearly explains why it would be a very serious strain to the Constitution if the U.S. Congress were to attempt to inhibit Supreme Court jurisdiction by statute.

I will now continue with a portion of that letter. When I last referred to that letter, the Attorney General was referring to portions of the Federalist Papers which point out the inherent weakness of the judiciary compared with the legislative and executive branches of Government. In making that point, the Attorney General argued that because of that inherent weakness, our Founding Fathers intentionally tried to shore up some protection of the Federal judiciary

against potential encroachments by the legislative or executive branches in order to maintain in our form of government three coequal branches of government—the judiciary, the legislative, and the executive.

I will now continue reading from that letter. This is a letter written by the Attorney General to the chairman of the Senate Judiciary Committee, Senator STROM THURMOND. I might add that the Attorney General is here referring to the Constitutional Convention.

Nor does it seem likely that the Convention would have developed the Exceptions Clause as a check on the Supreme Court in such a manner that an exercise of power under the Clause to remove Supreme Court appellate jurisdiction would not return authority to Congress, but vest it in the state courts instead. Hamilton regarded even the possibility of multiple courts of final jurisdiction as unacceptable.

"The mere necessity of uniformity in the interpretation of the national laws, decides the question. Thirteen independent courts of final jurisdiction over the same causes, arising upon the same laws, is a hydra in government, from which nothing but contradiction and confusion can proceed." *Federalist* No. 80.

Mr. President, the point is that the Attorney General was pointing out that Alexander Hamilton and other Founding Fathers, in the Federalist Papers, point out the necessity of uniformity in interpretation of national laws and certainly uniformity of interpretation of Federal constitutional issues—free speech, freedom of assembly, the right against self-incrimination, and so forth—because we are one Nation, one Government; and when it comes to interpreting the Federal Constitution, as opposed to State constitutions, we do need uniformity in judgment, and the U.S. Supreme Court is the tribunal set up to maintain that uniformity of Government.

I add here, also, Mr. President, as I have stated many times before, if the Helms amendment is adopted, we would no longer have uniformity of interpretation of Federal constitutional issues. Rather, because the Supreme Court would not have jurisdiction, we would have 50 separate interpretations. Each in the various 50 States courts would then decide Federal constitutional questions, free speech, right against self-incrimination, right to bear arms, whatever. For any of the provisions of the U.S. Constitution there could be 50 separate decisions from 50 separate courts, It would be contradictory, confusing, and certainly our country would begin to disintegrate if that were the case.

Continuing now with the letter from Attorney General Smith.

Thus, unless there is sound and compelling evidence of a contrary interpretation in the decisions of the Supreme Court, or in the long-accepted historical practices regarding congressional control of Supreme Court jurisdiction, it must be concluded that the Exceptions Clause does not authorize Congress to interfere with the Court's core functions in our constitutional system.

III

An examination of the Supreme Court's cases does not require any different interpretation. The Supreme Court has provided only inconclusive guidance on the meaning of the Exceptions Clause. In *Martin* v. *Hunter's Lessee*, 14 U.S. (1 Wheat.) 304 (1816), the Court noted "the importance, and even the necessity of uniformity of decisions throughout the whole United States upon all subjects within the purview of the constitution." In the absence of the Supreme Court, Justice Story observed, "the laws, the treaties and the Constitution of the United States would be different, in different states. . . . The public mischiefs that would attend such a state of things would be truly deplorable; for it cannot be believed, that they could have escaped the enlightened convention which formed the Constitution . . . [T]he appellate jurisdiction must continue to be the only adequate remedy for such evils." Similar statements are found in the opinions of Chief Justice Marshall, *Cohens* v. *Virginia*, 19 U.S. (6 Wheat.) 264, 415 (1821), and Chief Justice Taney, *Ableman* v. *Booth*, 62 U.S. (21 How.) 506, 517-18 (1858). Although these cases do not squarely address the question whether Congress could constitutionally deprive the Court of its core functions, the Court's language seems strong enough to cast considerable doubt, at least by implication, on the power of Congress to eliminate Supreme Court jurisdiction over cases in which a final, uniform and supreme voice is necessary in the guise of creating "exceptions" to that jurisdiction. In the words of Chief Justice Taney, the exercise of such a power would withdraw authority which is "essential . . . to [the] very existence [of the Federal] government [and] essential to secure the independence and supremacy of [that] Government."

The Supreme Court has, in a number of early cases, referred to the power of Congress over its appellate jurisdiction as being quite broad. For example, in *Barry* v. *Mercein*, 46 U.S. (5 How.) 103 (1847), the Court stated that "[i]f Congress has provided no rule to regulate our proceedings, we cannot exercise our appellate jurisdiction, and if the rule is provided, we cannot depart from it." See also The *"Francis Wright,"* 105 U.S. 381, 386 (1881); *Daniels* v. *Railroad Co.*, 70 U.S. (3 Wall.) 250, 254 (1865); *Durousseau* v. *United States*, 10 U.S. (6 Cranch) 307, 313-14 (1810); *United States* v. *More*, 7 U.S. (3 Cranch) 159 (1805); *Wiscart* v. *Dauchy*, 3 U.S. (3 Dall.) 321, 327 (1796). However, every one of these statements is dicta; the Court has never held that Congress has the power entirely to preclude the Court from exercising its core functions. It may also be doubted whether these broad statements are intended to cover cases in which such an extraordinary congressional power was exercised. They may instead be designed to recognize a broad power which, like the Commerce Clause, is limited by other provisions of the Constitution and by the structure of the document as a whole.

If I might paraphrase that paragraph, Mr. President, the Attorney General is pointing out that the Supreme Court has never ever directly held that Congress can limit Supreme Court jurisdiction in this matter. There are some vague statements that it can limit some jurisidictions, but it is clear by reading of the Supreme Court cases, in addition to the interpretation of the Constitution itself, in addition to the record of the Constitutional Convention, that never was there any intention to give Congress the power to limit the core functions, that is, the essential nature of the Supreme Court, and to limit Supreme Court jurisdiction is certainly limiting the core function of the Court.

Continuing now with the letter of the Attorney General:

Proponents of the "plenary power" thesis rely most heavily on the only Supreme Court decision which could be characterized as upholding a power of Congress to divest the Court of jurisdiction over a class of constitutional cases: *Ex parte McCardle*, 74 U.S. (7 Wall.) 506 (1869). At issue in that case was the constitutionality of an 1868 statute repealing a provision enacted the previous year which had authorized appeals to the Supreme Court from denials of habeas corpus relief by a circuit court. In a brief opinion which did not discuss the scope or implications of the Exceptions Clause, the Court upheld Congress' withdrawal in 1868 of jurisdiction under the 1867 law, stating that "the power to make exceptions to the appellate jurisdiction of this court is given by express words." Despite this broad language, the Court suggested that the withdrawal of jurisdiction provided by the 1867 law did not deprive the Court of jurisdiction over habeas corpus cases that had been conferred by § 14 of the Judiciary Act of 1789. "Counsel seem to have supposed, if effect be given to the repealing act in question, that the whole appellate power of the court, in cases of habeas corpus, is denied. But this is an error."

The Court's dictum regarding alternative procedures for Supreme Court review of habeas corpus cases was converted into a holding several months later in *Ex parte Yerger*, 75 U.S. (8 Wall.) 85 (1869). The petitioner in that case had invoked the Court's jurisdiction under the Judiciary Act of 1789. In holding that it had jurisdiction, the Court in *Yerger* made it clear that the 1868 legislation considered in *McCardle* was limited to appeals taken under the 1867 act and upheld the petitioner's right to Supreme Court review under the proper jurisdictional statute. The Court noted that the 1868 act did "not purport to touch the appellate jurisdiction conferred by the Constitution. . . ." In doing so, the Court observed that any total restriction on the power to hear habeas corpus cases would "seriously hinder the establishment of that uniformity in deciding upon questions of personal rights which can only be attained through appellate jurisdiction. . . ." Thus, within months of the *McCardle* decision, the Court made it clear that *McCardle* did not decide the question of Congress' power to deprive it of all authority to hear constitutional claims in habeas corpus cases. For this reason, while the *Yerger* Court acknowledged that the Court's jurisdiction as given by the Constitution "is subject to exception and regulation by Congress," neither *McCardle*, nor *Yerger*, nor any other case, constitutes an authoritative statement that Congress could deprive the Court of its core functions.

Finally, the historical record regarding the authority actually asserted by Congress to control the Court's appellate jurisdiction supports, on balance, the construction that

the Exceptions Clause does not authorize Congress to interfere with the Court's core functions. It is indeed true that Congress did not, in the First Judiciary Act explicitly authorize the Supreme Court to exercise the full range of appellate jurisdiction established by Article III. Perhaps the most prominent category of cases in which the Court was not granted statutory jurisdiction were federal criminal cases, which were not explicitly brought within the Court's appellate jurisdiction until 1889. Although Supreme Court review over these cases may have been available in special circumstances, it is probably true that most federal criminal cases were not reviewable by the Supreme Court during this period under the terms of the applicable legislation. The Judiciary Act also failed to grant the Supreme Court appellate jurisdiction over state court decisions striking down state laws as being inconsistent with the federal Constitution, or upholding federal statutes against constitutional attack.

The failure of Congress in the First Judiciary Act to provide the Court with the full appellate jurisdiction authorized under Article III does not undermine the conclusion that Congress cannot interfere with the Supreme Court's core functions, for several reasons. First, while Congress did omit certain specific categories of cases from the appellate jurisdiction provisions of the First Judiciary Act, it is noteworthy that the first Congress, containing among its members many delegates to the Constitutional Convention, recognized the Court's appellate jurisdiction over an extremely broad range of constitutional cases. Most significantly, the Court was given authority under § 25 of the Judiciary Act to review decisions of state courts striking down federal statutes or upholding state statutes against constitutional attack. That authority was conferred despite the intense controversy which it sparked among the states—controversy which resulted in state resistance to Supreme Court judgments and in attempts in Congress, foreshadowing the current attempts to limit the Court's jurisdiction, to repeal § 25 of the Judiciary Act. The fact that the Judiciary Act did not explicitly recognize jurisdiction over state court decisions upholding the validity of federal laws or striking down state laws, or over federal criminal cases, does not undercut the position that the Court cannot be divested of its ability to fulfill its essential responsibility under the Constitution. The supremacy of federal law, guaranteed by the Supreme Court, would not be seriously threatened by state court decisions upholding federal laws or striking down state laws on federal constitutional grounds.

Second, the history of Supreme Court appellate review has confirmed the importance of its core functions. To the extent that any inferences can be drawn from the failure of the First Judiciary Act explicitly to recognize the full range of the Supreme Court's appellate jurisdiction over constitutional cases, those inferences are subject to refutation by later events. The Supreme Court now has appellate jurisdiction over all federal cases. Each of the areas of incomplete jurisdiction has long since been fulfilled. The vast majority of constitutional decisions which are on the books today, and which affect our national life in many and important ways, have been rendered by the Court under a statutory regime which included such broad appellate jurisdiction. As Justice Frankfurter said in another context, "the content of the three authorities of government is not to be derived from an abstract analysis . . . It is an inadmissibly narrow conception of American constitutional law to confine it to the words of the Constitution and to disregard the gloss which life has written upon them." *Youngstown Sheet & Tube Co.* v. *Sawyer*, 343 U.S. 579, 610 (1952) (concurring opinion). The gloss which life has written on the Supreme Court's jurisdiction is one which protests the essential role of the Court in the constitutional plan.

V.

As noted at the outset, Congress has substantial authority over the jurisdiction and power of the inferior federal courts. It also is given the power under Article III to regulate the Supreme Court's appellate jurisdiction in circumstances which do not threaten the core functions of the Court as an independent branch in our system of separation of powers. Congress may, for example, specify procedures for obtaining Supreme Court review and impose other restraints on the Court. But the question of the limits of Congress' authority under the Exceptions Clause is an extraordinarily difficult one. Thoughtful and respected authorities have come to conclusions which differ.

The legislative process itself is often important in assessing not only the meaning but also the constitutionality of Congressional enactments. The Court has stated that it must have "due regard to the fact that this court is not exercising a primary judgment but is sitting in judgement upon those who also have taken the oath to observe the Constitution and who have the responsibility for carrying on government." *Rostker* v. *Goldberg*, 453 U.S. 57, 64 (1981).

If Congress considers the subject matter of S. 1742 it may wish to do so in light of the principles enunciated above and carefully weigh whether whatever action is taken would intrude upon the essential functions of the Supreme Court as an independent branch of government in our system of separation of powers. As the Court has stated, "The customary deference accorded the judgments of Congress is certainly appropriate when . . . . Congress specifically considered the question of the Act's constitutionality." Id. at 64.

Ultimately, it is for Congress to determine what laws to enact and for the Executive Branch to "take care that the Laws be faithfully executed." It is settled practice that the Department of Justice must and will defend Acts of Congress except in the rare case when the statute either infringes on the constitutional power of the Executive or when prior precedent overwhelmingly indicates that the statute is invalid. Accordingly, should the Department be called upon to defend the constitutionality of this bill before the courts, it responsibly could and would do so.

It is appropriate to note, however, that even if it were concluded that legislation in this area could be enacted consistent with the Constitution, the Department would have concerns as a policy matter about the withdrawal of a class of cases from the appellate jurisdiction of the Supreme Court. History counsels against depriving that Court of its general appellate jurisdiction over federal questions. Proposal of this kind have been advanced periodically, but have not been adopted since the Civil War. There are sound reasons that explain why Congress has exercised restraint in this area and not tested the limits of constitutional authority under the Exceptions Clause.

The integrity of our system of federal law depends upon a single court of last resort having a final say on the resolution of federal questions. The ultimate result of depriving the Supreme Court of jurisdiction over a class of cases would be that federal law would vary in its impact among the inferior courts. State courts could reach disparate conclusions on identical questions of federal law, and the Supreme Court would not be able to resolve the inevitable conflicts. There would also exist no guarantee through Supreme Court review that state courts accord appropriate supremacy to federal law when it conflicts with state enactments.

Sincerely,

WILLIAM FRENCH SMITH,
Attorney General.

(Mr. ABDNOR assumed the chair.)

Mr. BAUCUS. Mr. President, in the last several days I have referred to that letter, the letter from William French Smith, the Attorney General, to the chairman of the Judiciary Committee, STROM THURMOND, and I referred to that letter for two basic reasons: First of all, it is a letter from the Attorney General, the chief law enforcement officer of the United States. He is a person to whom we should listen. He is charged with upholding the Constitution of the United States.

The second reason is that in that letter the Attorney General points out very succinctly, very cogently, and very eloquently, the need to maintain the strong third branch of government, a strong Federal judiciary, and the inadvisability, that is, the lack of wisdom, of limiting in any significant way the core function, the basic function, the essential function of the U.S. Supreme Court.

That letter goes on to point out that the pending underlying amendment, the Helms amendment, which limits Supreme Court jurisdiction, would be such an effort, such an attempt, which would begin to limit the underlying core essential functions of the Supreme Court and, therefore, seriously undermine and jeopardize not only the Supreme Court, but all of the various provisions of our Constitution which give Americans and confer upon Americans basic individual rights such as freedom of the press, freedom of assembly, freedom of religion, and free speech, to say nothing of all the other provisions in the Bill of Rights and other portions of the Constitution.

I commend that letter, the letter of our Attorney General, William French Smith, to each Member of the Senate and to the press because that letter, I think, is probably one of the best statements that points out some of the deepest concerns that this underlying amendment would cause in our form of government if it is enacted.

Mr. President, let me just briefly recap where we are. I am speaking now in support of the pending amendment but actually, Mr. President, the main point of my taking the floor is to

speak in opposition to the underlying Helms amendment.

I sincerely hope we are here today making some progress in explaining to our colleagues and to American citizens and to the press what the real issue is before us.

The national press tends to continue to describe the ongoing dialog in today's procedural vote as involving school prayer. But, Mr. President, this ongoing debate is about court stripping. Today's procedural vote, the last vote we took on cloture, I think is about court stripping and I am here today because I am concerned about court stripping.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator from Montana may yield to me without losing his right to the floor and without an interruption showing and not counting as a second speech for this day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, under those provisions, I gladly yield to the majority leader.

CLOTURE MOTION

(The following proceedings occurred during Mr. BAUCUS' remarks and are printed at this point by unanimous consent:)

Mr. BAKER. Mr. President, I send a cloture motion to the desk and ask that it be reported.

The PRESIDING OFFICER. (Mr. HAYAKAWA). The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 2031, as modified, to the committee substitute to House Joint Resolution 520, a joint resolution to provide for a temporary increase in the public debt limit.

Jesse Helms, John P. East, Roger W. Jepsen, Jeremiah Denton, Paul Laxalt, Paula Hawkins, Orrin G. Hatch, Bob Kasten, Harry F. Byrd, Jr., Steve Symms, S. I. Hayakawa, Don Nickles, Strom Thurmond, Charles E. Grassley, Jake Garn, Malcolm Wallop, and Howard Baker.

ORDER FOR CLOTURE VOTE AT 2:30 P.M. TOMORROW

Mr. BAKER. Mr. President, I understand that we have cleared a mutually satisfactory time on both sides of the aisle for the cloture vote to occur tomorrow. If the minority leader is agreeable, I will put that request at this time.

Mr. President, I ask unanimous consent, notwithstanding the provisions of rule XXII, at 2:30 p.m. tomorrow, without the intervention of the mandatory quorum required by the rule, that the Senate proceed to vote on cloture pursuant to the motion filed.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I am prepared to ask the Senate to go into a period for the transaction of routine morning business, unless the Senator from Montana wishes to defer that for the moment.

Mr. BAUCUS. Mr. President, I am sure the majority leader has important business to transact and probably more important to many, particularly the majority leader, than the pending business. I gladly yield to the majority leader.

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 5 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, will the majority leader yield?

Mr. BAKER. Yes.

REQUEST FOR RECOGNITION TOMORROW

Mr. BAUCUS. Mr. President, would it be appropriate for the majority leader to again request, as he has in days past, for the Senator from Montana to have the first right to be recognized when we return to the debt limit bill?

Mr. BAKER. Mr. President, let me try to do that tomorrow, if I may. I have not cleared that. I will ask my cloakroom to try to do that while we are proceeding in morning business with some other routine matters.

Mr. BAUCUS. I thank the majority leader.

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, it is my understanding that tomorrow the House of Representatives will hold a hearing on proposed legislation dealing with the railroad strike to begin at 9:30 a.m. It is also my information that there will be a separate Senate hearing on that subject at 10 a.m.

Mr. President, I think it is unlikely that we will be asked to turn to the consideration of a message from the House on this subject or a bill from our own committee on this subject during the morning hours. But, just to make provisions for it in case we do, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR CHILES TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, the distinguished Senator from Florida (Mr. CHILES) be recognized on a special order of not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANNOUNCEMENT OF PROBABLE RECESS TOMORROW FROM 12 NOON UNTIL 2 P.M.

Mr. BAKER. Mr. President, there will probably be a period for the transaction of routine morning business tomorrow. I will not make that request at this time, but I anticipate such request may be made after the Senate convenes on Tuesday.

Mr. President, since it is Tuesday and since caucuses will be conducted on both sides of the aisle during the hours of 12 noon and 2 p.m., I expect that the Senate will recess during that time but, once again, I will forbear to make that request this evening so that the Senate may have an ample opportunity to deal with any legislation that may come before it dealing with the railroad strike situation. But Senators should be on notice that, absent such a requirement, the Senate will be asked to stand in recess from 12 noon until 2 p.m. tomorrow.

Mr. President, I have three matters that appear to be cleared for action by unanimous consent at this time. I ask the minority leader if he is in a position to consider first H.R. 5288 for action.

Mr. ROBERT C. BYRD. Mr. President, the bill, H.R. 5288, has been cleared on this side.

Mr. BAKER. I thank the Senator.

COMPACT BETWEEN THE STATES OF NEW HAMPSHIRE AND VERMONT CONCERNING SOLID WASTE

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 5288.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5288) granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which was read a second time by title.

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. STAFFORD. Mr. President, on August 19, H.R. 5288 was ordered held at the desk. I would like to ask unanimous consent that the bill be called up and acted on by the Senate at this time.

H.R. 5288 grants congressional consent to the States of Vermont and New Hampshire to enter into cooperative agreements to construct and operate facilities for processing solid waste.

On December 4, 1981, I introduced S. 1915 for myself and Senators LEAHY, HUMPHREY, and RUDMAN. That bill, which is the Senate companion to H.R. 5288, was referred to the Judiciary Committee. I have consulted with the chairman and ranking member of that committee and have received assurances that they have no objection to the Senate's taking up H.R. 5288.

The Environmental Protection Agency, which under the terms of the Resource Conservation and Recovery Act must review and approve proposed interstate compacts, supports congressional approval of the bill.

Mr. President, I urge my colleagues to pass H.R. 5288.●

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I am prepared to consider H.R. 4441 if the minority leader is in a position to do so.

Mr. ROBERT C. BYRD. Mr. President, I am prepared to consider H.R. 4441.

Mr. BAKER. I thank the minority leader.

FEES OF THE COPYRIGHT OFFICE

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4441.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 4441) entitled "An Act to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. BAKER. Mr. President, I move that the Senate agree to the request from the House requesting a conference and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer (Mr. ABDNOR) appointed Mr. THURMOND, Mr. MATHIAS, Mr. LAXALT, Mr. DECONCINI, and Mr. ZORINSKY.

Mr. BAKER. Mr. President, I would now inquire of the minority leader if he is in a position to consider a conference report on H.R. 6133 to the Endangered Species Act.

Mr. ROBERT C. BYRD. Mr. President, this side of the aisle is ready to proceed.

Mr. BAKER. I thank the Senator.

ENDANGERED SPECIES ACT AMENDMENTS — CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 6133 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6133) to amend the Endangered Species Act of 1973, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report was printed in the House proceedings of the RECORD of September 17, on pages 24148 to 24158.)

Mr. CHAFEE. Mr. President, I am pleased to report that the conferees on the bill (H.R. 6133) to amend the Endangered Species Act and to extend the authorization of appropriations for the act have completed their work and agreed on a substitute.

The House and Senate positions and bills (H.R. 6122, S. 2309) have been very close from the start. Information, goals, and philosophy were shared by the two authorizing committees throughout this year's reauthorization process. The House and Senate addressed virtually identical issues in their respective bills and the treatment of those issues differed more in style than in substance.

On June 8, the House unanimously approved H.R. 6133. On June 9, the Senate unanimously approved S. 2309. Today, we have the opportunity to reaffirm our steadfast commitment to this important environmental program and I urge my colleagues to join me in a vote to approve the conference report.

For informational purposes, I will review the various provisions contained in the Senate bill (S. 2309) and state which provisions of the conference substitute address the same issues:

Short title—Sec. 1 of S. 2309 and conference substitute;

Experimental populations—Sec. 2 of S. 2309 and Sec. 6 of conference substitute;

Cooperation with the states—Sec. 3 of S. 2309 and conference substitute;

Listing process—Sec. 4 of S. 2309 and Sec. 2 of conference substitute;

Exemption process—Sec. 5 of S. 2309 and Sec. 4 of conference substitute;

Consultation process—Sec. 6 of S. 2309 and Sec. 4 of conference substitute;

Relationship of Sec. 7 and 9 of Act—Sec. 7 of S. 2309 and Sec. 4 of conference substitute;

Convention implementation—Sec. 8 of S. 2309 and Sec. 5 of conference substitute;

Enforcement—Sec. 9 of S. 2309 and Sec. 7 of conference substitute;

Miscellaneous—Sec. 10 of S. 2309 and Sec. 9 of conference substitute;

Removal of plants—Sec. 11 of S. 2309 and Sec. 9 of conference substitute; and

Authorization of appropriations—Sec. 12 of S. 2309 and Sec. 8 of conference substitute.

Mr. President, on June 9, 1982, I submitted for the record an excerpt from an article by David Quammen entitled, "Jeremy Bentham, the Pieta, and a Precious Few Grayling." That article notes the limitations of a utilitarian approach to legislation such as the Endangered Species Act and suggests a compelling, alternative argument. I urge all who are interested in this issue to read that article and to seriously consider the arguments presented by Mr. Quammen.

At this time, Mr. President, I want to thank my colleagues in the Senate for their support of this legislation and my fellow conferees, Senators STAFFORD, RANDOLPH, GORTON, and MITCHELL for their assistance throughout this year's reauthorization process. The dedication and hard work of Congressmen BREAUX, FORSYTHE, and JONES should also be noted and I wish to thank them for their efforts. It has been a pleasure working with them on this bill.

(By request of Mr. BAKER the following statement was ordered to be printed in the RECORD:)

● Mr. STAFFORD. Mr. President, the Endangered Species Act is one of our most important environmental laws. It has set the example for State laws, and for those of other nations as well. We can well be proud of the program it created, and of our national leadership in the field of wildlife conservation.

Today the Senate will take up the conference report on H.R. 6133, the final version of our bill to reauthorize appropriations for the Endangered Species Act program. It is my pleasure

to support the bill reported by the conference committee.

This bill combines the House and Senate bills, retaining the best features of each. It strengthens several provisions of the act, makes modifications to improve its administration, and extends for 3 years the authorization of appropriations for the endangered species program.

Not since 1973 has the Endangered Species Act been examined so carefully and thoughtfully. Throughout this year's reauthorization process, the discussion has been factual and specific. At the conclusion of the process, I am not surprised that the decision of both the House and the Senate has been that only minor changes in the act were needed.

Mr. President, the principal authors of the Senate bill, Senators CHAFEE, MITCHELL, and GORTON, deserve special credit for the success of this legislation. They have worked long and effectively to consider the issues raised fairly and rationally. I am glad to join in their expression that the tools needed to make the endangered species program work smoothly and efficiently were either in the act before, or have been added by these amendments. It will now be the responsibility of the administration and the public to use these tools wisely for the benefit of us all.

I urge my colleagues to unanimously approve the conference report, just as they unanimously approved the Senate bill, S. 2309, on June 9, 1982.●

Mr. GORTON. Mr. President, I am proud today to stand up for the endangered species conference report, and to urge that my colleagues join me in enthusiastically supporting it.

The Endangered Species Act is a landmark piece of environmental legislation. Its passage established the United States as a world leader in the international effort to rescue hundreds of invaluable forms of plant and animal life from the threat of extinction. In the 10 years since passage of the act, the protections it provides have become even more urgently needed, for as many as one to three species a day are becoming extinct, and the Council on Environmental Quality has suggested that as many as a million additional species—15 to 20 percent of all species on earth—may become extinct by the year 2000. The measurement of such a loss would be impossible. Some have suggested that we should not permit the disappearance of other species on moral and aesthetic grounds. Although my own State, Washington, would sorely miss the beauty of the peregrine falcon and the awesome spectacle of the black bear, there are other reasons as well for which we should strive to preserve genetic diversity.

Scientists tell us that the potential use of genetic material is virtually unlimited. Today, nearly 40 percent of the world's medicines contain as their chief ingredients compounds derived from plants. The preservation of species also means the preservation of the potential for gene transfer, with important implications for agricultural application.

We cannot afford to close these opportunities to ourselves or to future generations. It is our responsibility to see that the hope which genetic diversity offers in the fields of medicine and agriculture, as well as the aesthetic beauty and enrichment of the world which the many species that inhabit it offer us, are preserved for the future.

Mr. President, I believe that the endangered species conference report is a sound bill, which will enhance the workability and predictability of the Endangered Species Act, while at the same time demonstrating to the Nation and to the world that this Congress is committed to one of our most farsighted environmental laws. I am pleased and proud to have been a part of this effort since the reauthorization bill was first introduced, and to have had an opportunity to join my colleagues Senator CHAFEE and Senator MITCHELL, as well as all the other cosponsors of the reauthorization bill, in this historic effort.

Mr. RANDOLPH. Mr. President, the Senate is considering the conference report for S. 2309, to reauthorize appropriations for one of this countries landmark conservation laws, the Endangered Species Act. I am a cosponsor of this legislation and strongly support its approval by the Senate.

The State of West Virginia is blessed with an abundance of natural resources. Our lakes and streams, forests, and wildlife, are loved and enjoyed not only by West Virginians, but by many visitors to the State who are drawn to its great beauty. West Virginians understand the importance of the conservation and sound stewardship of our State's natural resources. They have let me know that the Endangered Species Act reflects their commitment to protecting and preserving wildlife and plants for the benefit and enjoyment of future generations.

The conference report we are considering maintains this commitment. It would reauthorize appropriations for the act at current levels for 3 years. It incorporates the thoughtful suggestions received during hearings on the act for making it stronger and more workable. It retains those provisions in the measure which was unanimously adopted by the Senate. It once again deserves the strong support of the Senate.

In closing, I would recognize and thank Senator STAFFORD, chairman of the Committee on Environment and Public Works, and Senator CHAFEE, chairman of the Subcommittee on Environmental Pollution, for their leadership in reauthorizing a strong and workable act. The hard work of Senator MITCHELL and Senator GORTON should also be recognized as instrumental in retaining the integrity of the act.

Mr. MITCHELL. Mr. President, the Senate is presently considering the conference report to H.R. 6133, legislation to reauthorize appropriations for the Endangered Species Act. I am a cosponsor of this bill in the Senate (S. 2309) which, with minor revisions, is reflected in the conference report. Both the bill and the conference report maintain the integrity and strength of the Endangered Species Act, and I urge my colleagues to give the measure their favorable consideration.

The Endangered Species Act, as revised and strengthened in 1973, is one of the world's strongest laws for protecting and conserving plants and wildlife. It has made this Nation a leader in the preservation of endangered and threatened species. The Endangered Species Act Amendments of 1982 continue to recognize, nearly 10 years later, the importance of insuring that no species becomes lost forever. The conference report that is before us should not, and I believe does not, detract from this commitment to help save wildlife that is on the brink of extinction.

During consideration of this measure the Committee on Environment and Public Works received constructive proposals from a variety of environmental and scientific organizations, as well as representatives from State and Federal agencies and industry. Many of these thoughful suggestions have been adopted in the amendments presently before us and will enhance the strength of the act by making it more workable. These amendments will encourage the listing of species that are endangered or threatened, and the establishment of new or experimental populations of endangered species. They will streamline the section 7 exemption process and eliminate the statutory conflict between sections 7 and 9 of the act. They will also provide additional protection for plants on Federal lands. Unfair references to sporting activities as a cause of endangered species will be eliminated. I am satisfied that all of these provisions make the act more sensible and workable in its application while continuing its primary purpose, strong protection for endangered species. I urge the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNITION OF SENATOR BAUCUS TOMORROW

Mr. BAKER. Mr. President, I have been advised that the request of the Senator from Montana does not meet with any objection on this side. If there is no objection from the minority leader, I now ask unanimous consent that when the Senate resumes consideration of the debt limit bill, the Senator from Montana be first recognized to continue.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. I thank the majority leader.

RECORD OPEN UNTIL 5:30 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that the RECORD remain open today until the hour of 5:30 p.m. for the introduction of bills, resolutions, and so forth, and for the insertion of statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, there is one item on today's Executive Calendar together with nominations placed on the Secretary's desk which have been cleared on this side. Can I inquire of the minority leader if he has cleared those items on his side of the aisle?

Mr. ROBERT C. BYRD. They have been cleared, Mr. President.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nomination appearing under the Communications Satellite Corporation, item No. 944, through nominations placed on the Secretary's desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMUNICATIONS SATELLITE CORPORATION

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of Justin Dart, of California, to be a member of the Board of Directors of the Communications Satellite Corporation.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The assistant legislative clerk proceeded to read sundry nominations in the Coast Guard.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations placed on the Secretary's desk in the Coast Guard be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

Coast Guard nominations beginning Timothy P. Powers, and ending William A. Henrickson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of August 4, 1982.

Coast Guard nominations beginning Robert B. Jordan, and ending Stephen W. Price, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of August 4, 1982.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominees were confirmed.

Mr. ROBERT C. Byrd. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER, Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DESPICABLE MASSACRE AT SHATILA AND SABRA CAMPS IN BEIRUT

Mr. LEVIN. Mr. President, all Americans are hoping that the perpetrators of the despicable massacre at Shatila and Sabra camps in Beirut will be brought to justice. While it does not appear that Israeli soldiers participated in the slaughter, if they were aware of the nature of the murderous acts intended, and permitted them to take place or if they did not act promptly to stop those acts once their character became known, then those soldiers must be held accountable for their actions or inactions also.

The tragic events of this weekend demonstrate again the need for the Lebanese central Government and Army to control their own capital and country. All foreign forces should promptly leave Lebanon.

FATHER EDICIO DE LA TORRE

Mr. LEVIN. Mr. President, Friday, the Senate Foreign Relations Committee hosted a reception for President Marcos of the Philippines who is currently in the United States on a 5-day state visit.

At the reception, I raised the case of Father Edicio de la Torre, a personal acquaintance, who is currently being held in jail in the Philippines. I asked President Marcos if Father de la Torre would receive a speedy civilian trial and he responded with an unqualified, "Yes."

Father de la Torre was arrested on April 22, 1982, on charges of subversion. He received a hearing on his habeus corpus petition, but no decision has been reached by the court on it. Meanwhile, he remains in jail with no prospect of a trial anytime in the near future.

Many of my colleagues share my concern for Father de la Torre's welfare, and hope he will receive a civilian trial expeditiously. I, along with many others, will continue to follow his case closely.

THE CURRENT 5-YEAR DEFENSE PROGRAM

Mr. LEVIN. Mr. President, on Wednesday, September 15, I had the opportunity to participate in a congressional briefing conference sponsored by the Office of Personnel Management for approximately 40 senior civil service executives from the Army's Material Development and Readiness Command. My remarks to the group concerned the level of defense spending proposed in the current 5-year defense program, and the potentially negative effects on our combat readiness that will result from the current 5-year defense program if the Congress does not reorder the priorities within the administration's defense budget, beginning this year.

As the Congress gets ready to turn its attention to the fiscal year 1983 defense appropriations bill, I would like to share with my colleagues my thoughts on this subject.

I ask unanimous consent that the full text of my remarks at the recent congressional conference be printed at the appropriate place in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR CARL LEVIN BEFORE SENIOR EXECUTIVES OF THE ARMY'S MATERIEL DEVELOPMENT AND READINESS COMMAND (DARCOM),

As I was gathering material for my remarks this afternoon, I was looking over a summary of what exactly DARCOM does, and I was impressed by how broad your mission is. You are involved in research and development, in procurement and production, in training for new systems, in logistics management, and in depot maintenance—in fact, in almost every aspect of materiel development and combat readiness. Since your mission is so broad, I think you are in a unique position to appreciate the changes that are being proposed in this country's defense spending.

These changes will have a significant impact in each of the areas of DARCOM's mission. I am concerned that many of them could be negative, with the end result that we will be weaker, not stronger, at the end of the proposed five year defense program.

OVERALL LEVEL OF DEFENSE SPENDING

The first concern a growing number of us in Congress have with President Reagan's defense program is the level of defense spending that he has proposed for the next five years.

There is a consensus in this country that we need to improve our national defense through prudent, sustained increases in defense spending, but this consensus is breaking down as a result of the defense proposals of the administration. In the face of enormous, staggering deficits facing the economy—$109 billion in fiscal year 1982 and over $150 billion in fiscal year 1983—this administration continues to press for unprecedented increases in defense spending.

The fiscal year 1983 defense budget request represented 13 percent real growth in defense budget authority over fiscal year 1982. This level of defense spending is higher in real terms than in any year since fiscal year 1952—the height of the Korean war. At the same time we are being asked to support record levels of defense spending, we are drastically reducing expenditures for domestic programs.

We need to reduce government spending, but we need to do it in a balanced manner. The drastic reductions in domestic programs make the defense budget a logical target for people's frustrations. We are already seeing a growing backlash against defense spending and an evaporation of the consensus to improve our national defense.

Murray Weidenbaum, who resigned last month as Chairman of the President's Council of Economic Advisers, pointed out in an interview after his resignation that President Reagan's insistence on record levels of defense spending have defeated his efforts to control government spending and have contributed to the "horrendous deficits" now facing the country.

Budget Office officials estimate Congress has cut about $46 billion in non-defense spending in fiscal year 1982 and 1983 combined. During the same period, the administration is predicting defense spending to rise by nearly $45 billion. As Murray Weidenbaum pointed out: "We have shifted priorities * * * We have cut non-defense spending substantially but for the first two years have we on balance cut the budget? No, it is a wash."

OVEREMPHASIS ON BIG-TICKET PROCUREMENT PROGRAMS WILL UNDERMINE READINESS

The second thing that concerns me about the administration's defense program is the commitment we are being asked to make this year to big-ticket procurement programs—the MX, the B-1, two nuclear carriers—of enormous cost and very dubious value. If Congress approves these programs this year as requested by the administration, the ultimate loser, and it is going to be sooner rather than later, will be our soldier's combat readiness. To illustrate this point, I brought along two charts this afternoon that I have been using this year. To simplify matters, I am using the procurement accounts as an indicator of our modernization efforts and the O&M accounts as an indicator of our readiness efforts in these charts.

The first chart compares the relative percentage of procurement and O&M funding within the total defense budget for fiscal year 1974 through fiscal year 1986.

You can see that from fiscal year 1974 to fiscal year 1982, O&M represented a larger percentage of the defense budget than did the procurement accounts. Beginning in fiscal year 1983, however, procurement passes O&M as a percentage of the defense budget and the gap continues to widen in favor of procurement through fiscal year 1986.

CHART NO. 1.—PROCUREMENT AND OPERATIONS AND MAINTENANCE (O&M) FUNDING IN CONSTANT FISCAL YEAR 1983

[Dollars in billions and as percent of annual Defense budget (TOA)]

	Fiscal years—												
	1974	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985	1986
O&M	$51.2	$51.5	$52.3	$53.6	$53.9	$54.4	$57.6	$61.5	$66.3	$70.4	$71.6	$77.5	$82.8
Percent total DOD budget	30.2	31.1	30.5	29.8	30.1	30.5	31.6	30.4	29.1	27.3	26.5	26.0	26.4
Procurement	$36.3	$33.5	$38.0	$44.9	$45.2	$42.8	$44.1	$54.8	$69.8	$89.6	$95.8	$111.2	$119.5
Percent total DOD budget	21.4	20.2	22.1	25.0	25.2	24.0	24.2	27.1	30.6	34.7	35.5	37.4	38.0

You are probably saying to yourself that this trend doesn't necessarily mean that O&M and readiness are getting shortchanged. It just shows that the defense budget is getting bigger, and within the defense budget procurement is getting a lot bigger. O&M could still be adequately funded.

But the fact is that the Preparedness Subcommittee of the Armed Services Subcommittee received testimony that even in fiscal year 1983 the O&M accounts are beginning to lose out to the procurement accounts in the internal battles for resources. General Welch, the Army's Director of Supply, Maintenance and Transportation, testified before the Prepardness Subcommittee earlier this year that the Army's maintenance support activities in fiscal year 1983 were short 2,500 civilian personnel and were underfunded by $251 million. My amendment in the Senate added $62 million to the fiscal year 1983 O&M authorization request in this area, but the final conference agreement added only $40 million. We are also seeing reports that the Navy is having to cancel all but the most critical steaming time for its ships because of the shortage of operating funds. And the much-publicized elimination of depot maintenance backlogs that was supposed to come about with the fiscal year 1983 budget is certainly not going to take place in fiscal year 1983, and unless we change our priorities, it is not likely to take place in the next five years. Senator Stennis, who was chairman of the Senate Armed Services Committee for 12 years, summed up perfectly the situation we are facing in one of our hearings on the Army's fiscal year 1983 O&M authorization when he said "Procurement is robbing the cost of our daily operations."

But let me turn to the second chart to make another point. This second chart compares the composition of defense outlays from current and prior-year appropriations in each fiscal year from 1981 through 1987. The top line of the chart shows the percentage of defense outlays from current year appropriations, and the bottom line shows the percentage from prior year appropriations. The trend is rather dramatic. In fiscal year 1981, 72 percent of defense outlays were from current-year appropriations, while 28 percent were from prior-year appropriations. By fiscal year 1987, 59 percent of defense outlays will be from current-year appropriations and 41 percent will be from prior-year appropriations.

This chart tells us three things. First, the composition of the administration's defense program with its heavy emphasis on big-ticket procurement items will result in a significant reduction in the percentage of defense outlays that are controllable in the year of appropriation.

Second, from fiscal year 1981 to fiscal year 1987, the percentage of outlays resulting from prior-year appropriations, that is, the outlays that are essentially uncontrollable in the year of appropriation, will have increased by almost 50 percent.

COMPARISON OF THE PERCENTAGE OF DEFENSE OUTLAYS FROM CURRENT AND PRIOR YEAR APPROPRIATIONS FISCAL YEARS 1981–87

Fiscal year	Percent of total defense outlays from—	
	Current year appropriations	Prior year appropriations
1981	72	28
1982	70	30
1983	68	32
1984	65	35
1985	63	37
1986	61	39
1987	59	41

But the most important point is that this shift in outlay patterns is going to require that any future restraint in the level of defense expenditures is going to be even more directed against readiness and sustainability programs funded in the O&M accounts

than have previous defense budget cuts because neither the Defense Department nor the Congress is likely to terminate the B-1 program or the two nuclear carriers once these programs are started.

This last point really brings me to the main point I want to leave you with. Defense spending in fiscal year 1983 and beyond is going to have to be restrained below what the President has asked for. We in the Congress and you in the executive branch need to make sure that the reductions in the increases in defense spending proposed by the administration aren't made by short-changing O&M and readiness.

We can do this by eliminating from the five-year plan some of the big-ticket procurement items that consume scarce defense dollars far out of proportion to any contribution they make to our military capabilities.

We need to modernize the air-breathing leg of the Triad, but we don't need to develop two new airplanes to do it. We should scrap the B-1 and focus on the Stealth bomber. Through fiscal year 1987, the administration plans to spend over $27 billion on the B-1 program. That's a lot of money to fill a short gap from the IOC of the B-1 to the IOC of the Stealth bomber.

There is no justification for spending one dime on procurement of the MX missile before we decide how and where we are going to base it.

For the last several years, we heard that the Navy needed 13 carrier platforms to carry us into the next century. Now, suddenly we are not only told that number is 15 but that if we buy two nuclear carriers this year we can save $754 million. Especially when their support ships are factored into the equation, nuclear carriers remain an unsound investment in terms of improving the overall combat effectiveness of the entire Navy.

WHAT WE SHOULD DO INSTEAD

I want to emphasize that many of us, Republicans and Democrats, who are criticizing the administration's defense program are not seeking to cut the defense budget in real terms. Instead, we are trying to do two things.

First, we are trying to restrain the growth in defense spending to a more reasonable, sustainable level. There is no question that the Soviet threat has been growing and that it must be faced by improving the military capabilities of the United States and our allies. However, excessive focus on this threat obscures a second threat that is also facing us—the economic threat posed by a stagnant, deficit-starved economy in the throes of the worst recession since 1929.

Some of you may have been to the tank-automotive command in Warren, Michigan recently. I don't have to tell you what this recession has done to the economy and people of the State I represent.

We can have growth in our military strength and in the defense budget while at the same time letting defense make its fair contribution toward lowering the staggering deficits we are facing. Permitting 3 percent real growth in the defense budget in fiscal year 1983 is certainly a respectable figure during our current economic problems. This level not only would keep our commitments to our NATO allies (although many of them are failing to keep theirs) but it would also reduce the fiscal year 1983 defense budget by almost $25 billion in budget authority and $7-$8 billion in outlays.

The second thing we should try to do is to reorder the priorities within the administration's current defense program to better address our true military needs. These needs are much greater, for example, in our conventional forces arena, especially in the Rapid Deployment Force, than in the strategic nuclear sphere. If we don't eliminate from this year's budget the big-ticket, gold-plated procurement items that we don't really need and we can't afford, then when the inevitable crunch to reduce defense spending comes, either next year or the year after, it is the readiness of our troops that is going to suffer.

U.S. News & World Report said in an article last week that "among many Pentagon professionals the fear is that as the scramble for defense dollars heats up what will be hit hardest will be funds for beans, bullets, training, and other items that are unglamorous but vital in wartime—in short, combat readiness."

Maybe some of you are the anonymous "Pentagon professionals" quoted in this article. I hope so. If you weren't, I hope my remarks this afternoon will help you support these arguments when you get back to your offices later this week.

CONCLUSION

Modernization is one of the keys to maintaining our military capability. Of all the services, I think the need for modernization is greatest in the Army, because it has been delayed the longest.

But we all learned—at least I thought we all learned—in the late 1970's the problems we create by underfunding the O&M and readiness accounts. Only a year or two after beginning to fix that problem we are threatening to do the same thing all over again by creating massive procurement entitlement programs which will increase their percentage of the defense budget over the coming years and leave less and less room in the defense budget for O&M and readiness funds.

We must strike a proper balance between modernization and readiness, the fiscal year 1983 defense budget, and the five year defense plan, do not strike this balance. If we don't change this course we will be denying our soldiers and sailors and pilots the bullets, the spare parts, the fuel, and the training they are going to need to be ready to fight a war all of us hope we'll never have to fight, but which all of us know we have to be ready to fight.

A USEFUL FORM OF PREPAREDNESS FOR NUCLEAR WARFARE

Mr. PROXMIRE. Mr. President, I am sure that every Member of the U.S. Senate has spent some time considering the probability of the use of a nuclear weapon in an act of aggression. I am equally certain that each Senator, regardless of his or her political leanings, party affiliation, or points of view on the wide variety of issues we debate in these Chambers, has come to the realization that the potential for such a dreaded nuclear event is higher—much higher—now than ever before in the history of the world. The extent to which this threat can grow before our worst fears are realized is unknown. I am worried that it is already too great.

Mr. President, the efforts of some Members of Congress to enact measures which would greatly restrict the probability of nuclear proliferation have been only partially successful. The prospect of less stable nations gaining access to nuclear weapons capability is more threatening every day. The increased proliferation has also the similarity frightening effect of diminishing the power of the United States to step in and stop or at least retard this horrifying spread. So much is now beyond our control because of our failure to take steps to prevent any proliferation.

I have cited many examples of the relaxation of American control in recent weeks. The Government of India has been the most recent beneficiary of our easing of controls. Perhaps "beneficiary" is the wrong word to describe any nation subject to less control of its nuclear resources. If this or any other easing of restrictions should in any way enable an eventual offensive use of nuclear weapons, there will be no beneficiaries, only losers. There will be losers in every land on this planet.

We have allowed ourselves to fall into a state of peril for ourselves and the entire world. However, we must continue to do whatever is possible to retard the furthering of this proliferation. It is more urgent than ever before that we take some steps to minimize the impact of the first use of a nuclear weapon in attack by whatever nation, radical group or madman should resort to such a deplorable action.

It would be foolish for the United States to ignore the threat of an offensive use of nuclear weapons and have no civil defense preparedness. However, I believe that it would be even more foolhardy if we embarked on an enormous civil defense program in which billions of dollars of this Nation's precious resources were poured into projects to shield our people from the destruction of the enormously powerful weapons that exist today. We might as well pour the money down a hole dug for an MX missile and cover it over for all the good it would do us should full scale nuclear warfare ever break out between superpower nations. There are just too many weapons with too much power to be shielded against.

There are, however, some forms of preparation which can and should be wisely employed. The sorts of preparations to which I refer are also not going to send the Federal deficit into the stratosphere.

In all probability, the first use of an offensive nuclear weapon will be made by someone or some organization other than a superpower nation. Radicals, zealots, or governments led by unstable tyrants are the most likely first perpetrators of nuclear attack.

There are several U.S. Government departments and agencies with significant responsibilities in studying and

preparing for a nuclear attack. Over the past few months, I have asked a number of questions of these organizations in the executive branch which have these duties. I directed this series of questions to the Departments of Defense, State, and Energy as well as the Federal Emergency Management Agency. These agencies were also able to provide me with some information on the steps taken by some of our allies to deal with these problems.

My premise in these questions was that if a single nuclear explosion were to take place, what would be the mechanisms to determine the perpetrator—or cause, should it be the other form of horror—a nuclear accident. What mechanisms would render assistance to the victims and which would coordinate these efforts with other nations.

I have found the responses to be interesting, although somewhat alarming in they illustrate some large holes in our planning and, even more so, that of our allies. The answers also make evident the fact that there are some areas in which the various departments and agencies have some differences of opinion of responsibilities of other governmental functions.

Mr. President, I ask unanimous consent that the responses to my questions be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF DEFENSE,
Washington, D.C., June 25, 1982.

Hon. William Proxmire,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: This is in reply to your recent letter to Russell Rourke concerning our ability to deal with the consequences of an unanticipated nuclear explosion at home or abroad.

As you are aware, the Department of Defense maintains an extensive disaster preparedness capability in each of the services, including a capability to deal with nuclear disasters. The questions posed in your letter, however, went beyond purely military concerns. Our views on the specific issues raised are enclosed, together with copies of current memoranda of agreement governing interdepartmental cooperation in nuclear disaster matters.

We recognize that the worldwide spread of nuclear technology increases the likelihood that eventually a nuclear disaster will occur somewhere in the world. Concern for our ability to cope with such a disaster within the United States is one of the reasons behind the Administration's commitment to expand the U.S. civil defense program. That program contains radiological defense capabilities applicable to man-made as well as natural disasters.

International nuclear disaster assistance is a more complex problem, since perspectives in this area are inevitably colored by the ebb and flow of global tensions and suspicions. Bilateral intergovernmental mechanisms do exist for extending aid to victims of a nuclear disaster after the fact. Multilateral mechanisms for cooperative nuclear disaster preparedness planning, however, are more tenuous, acknowledging—as they must—sovereign prerogatives, differences among foreign national priorities, and disparities among nations in the volume of resources internally available for meeting them. For this reason, we are not sanguine about the prospects for significantly improving matters by commissioning new studies or new international organizations to deal with the problem.

Sincerely,

FRED C. IKLE.

QUESTIONS FROM SENATOR PROXMIRE

1. What is the status of planning by the United States and any other major Western Nation for providing assistance to an area after a nuclear attack?

Answer. In the United States, nuclear attack preparedness planning is part of the civil defense effort. The Administration plans major improvements in this program beginning in FY 1983. If funded as requested, the improvements will provide an enhanced capability for dealing with nuclear disasters in the United States, and give added emphasis to attack recovery planning. In the NATO arena, the United States participates in ongoing civil emergency preparedness planning through membership on the Civil Defense Committee. There is no evidence, however, that such planning includes formal cooperative nuclear attack assistance measures. Disaster preparedness and civil defense are considered largely self-help efforts for all nations involved.

2. What plans have been made in this regard by any Western international organizations or alliance based organization? Is it your perception that an organization needs to be created to meet this need?

Answer. International organizational mechanisms already exist that could, in principle, plan for cooperative measures and expedite international assistance. The NATO Civil Defense Committee, International Atomic Energy Agency, and the Office of the United Nations Disaster Relief Coordinator are examples. Given the broad political character of such organizations, however, it is not clear that the products of cooperative planning would produce results superior to those promised by existing bilateral arrangements. At present, nuclear disaster preparedness is considered a national responsibility and prerogative.

3. What resources (such as decontamination services, medical supplies and treatment, airlift, food, economic assistance, etc.), could be supplied by nations today? What nations are likely to do so?

Answer. Within the United States, federal assistance is available through the Federal Emergency Management Agency to state and local governments. Cooperative agreements exist between the Department of Defense, the Federal Emergency Management Agency, the Department of Energy, and the Federal Bureau of Investigation for providing federal assistance to locales affected by actual or potential nuclear disasters. Assistance could include any or all of the supplies and services cited in the question. Internationally, a similar arrangement exists between the Department of Defense and the Department of State for providing natural disaster assistance to foreign countries through the Defense Security Assistance Agency and the Agency for International Development. Normally, such assistance would follow from ad hoc intergovernmental agreements. In principle, it could include nuclear disaster assistance. The Department of Defense is not in a position to identify nations with similar capabilities.

4. What could the United States be doing to urge other nations to do this type of planning, either jointly with the U.S. or other Western nations or independently?

Answer. A year ago, within the International Atomic Energy Agency, the U.S. proposed a Nuclear Safety Convention that would define the extent of worldwide U.S. assistance in civil nuclear disasters. If adopted, this convention would define in advance what the U.S. would—or would not—be able to do, and the limits of U.S. liability. Action on the proposal is pending. There are major international political risks attached to U.S. proponency of improved nuclear disaster preparedness on an international scale because of it obvious similarity to wartime nuclear damage limiting preparations. Such efforts would provide least opportunity for anti-U.S. propaganda and most opportunity for success if pursued in a low key manner bilaterally or within the context of existing international arrangements. In either case, the extent of U.S. willingness to fund cooperative efforts would have to be addressed.

5. What is your considered opinion of the potential for such planning or preparations making a nuclear event more or less "thinkable" or likely?

Answer. In the Department's view, planning or preparations to prevent nuclear disaster or to cope with their consequences in no way make such events more likely. Because such events are already "thinkable," prudence dictates that we develop effective measures for dealing with them. If such measures have a low profile, they are less likely to have undesirable international political side effects.

6. What preparations have been taken, or should be taken, to determine if a nuclear event is accidental or, if deliberate, to identify the perpetrator such that the threat of succeeding attacks can be considered in the assistance efforts?

Answer. Techniques for discriminating between nuclear events within the United States that are accidental and those that are deliberate are within the purview of the Department of Energy and the Federal Bureau of Investigation. Obviously, appropriate intelligence agencies would also be consulted if foreign imvolvement were suspected or confirmed. The Memorandum of Agreement between DOE, DOD and the FBI details specific signatory responsibilities. (TAB C).

7. Is it possible to identify which geographic areas have greater likelihood of falling victim to an isolated explosion? Have studies like these been done for the United States or other Western Nations?

Answer. Within the United States, nuclear facilities and densely populated areas are the most obvious candidates. The Defense Nuclear Agency and other research organizations have addressed hypothetical enemy targeting scenarios in the contest of U.S. strategic vulnerability analyses. Their findings might provide an indirect measure of relative vulnerability. Identification and differentiation of vulnerable locales abroad, however, becomes a matter of judgment. Because predictive accuracy is, in part, a function of extant safeguards, and because sufficiently detailed information on foreign locales is not always available, it may not be possible to predict vulnerable areas with precision. Absence of information itself suggests that a listing of vulnerable geographic areas could be sizable. Rank orderings of vulnerability also could shift with changes

in the international political climate. Therefore, the practical utility of such a list is questionable.

8. Is it possible to examine probable conditions in an area of an isolated nuclear explosion as they are affected by such things as topology, prevailing climates, population density, economic infrastructure, etc.? Would it not make sense to study three "different" cases to explore the range of possibilities?

Answer. It is possible. Such examinations have been conducted for the United States in the context of nuclear attack vulnerability. Without more specific definition of what new studies would address, however, it is impossible to determine whether three more generic studies would add significantly to what is already known. Any further study effort should begin with a survey of research that has already been done in and out of government.

9. To what extent could any of the studies suggested above be affected by precedents for massive international relief such as have followed major natural disasters such as earthquakes, droughts, volcanos, conventional wars, etc.?

Answer. The effect could be both quantitative and qualitative, if the intent of the studies is to forecast differential vulnerability or differences in the volume and type assistance that might be required. Prior experience in coping with natural disasters clearly affects the quality of extant safeguards at any locale. The impact on vulnerability, therefore, is indirect. In marshalling indigenous disaster mitigation capability, however, some areas have been able to draw upon more resources than others. Some have been able to cope without outside help. Others have not. Awareness of this lies at the heart of FEMA's civil defense disaster preparedness arrangements with state and local governments, and at the heart of the DoD/DoS foreign disaster assistance arrangement. Similarly, awarness that the kinds of assistance required for volcanic eruptions in Pacific islands may differ from the kinds of assistance required for similar eruptions in Oregon, for example, coupled with awarness of the differences in assistance required as a function of differences in types of disaster, point to the need for localized planning. Apart from that, only the most general "all-purpose" planning seems useful.

DEPARTMENT OF STATE,
Washington, D.C., July 23, 1982.

Hon. WILLIAM PROXMIRE,
U.S. Senate.

DEAR SENATOR PROXMIRE: I am replying to your thoughtful letter of May 12 concerning our nuclear arms control efforts and United States and international measures to cope with the consequences of nuclear explosions.

We understand that you have also been in touch with the Department of Defense and the Federal Emergency Management Agency on the same subject and that they have provided detailed answers to your questions. We have little to add to their comments, except to emphasize that this Administration shares your concern over the risk of nuclear war and the proliferation of nuclear arms. As the President has stated, it is our fundamental objective to reduce the likelihood of nuclear war and to seek negotiations with the Soviet Union to reduce the number of nuclear weapons on both sides, thus enhancing stability. The President has also expressed our commitment to seeking measures to reduce the risk of war by accident or miscalculation, including improvement of the emergency communications links between the U.S. and the USSR, and other military confidence-building measures. We will continue to seek ways to enhance the stability of the nuclear balance and preserve the peace.

Although our primary effort is directed toward averting war, we must be prepared in case our policy of deterrence fails. That is why the President has proposed a long-term effort to enhance our civil defense capabilities. This program has two major objectives: To save lives in the event of a nuclear attack or other national emergency, and to enhance deterrence and reduce the risk of war.

This program will complement our primary reliance on strategic deterrent forces, and is part of our overall plan to improve the national security of the United States. As Mr. Louis O. Giuffrida, Director of the Federal Emergency Management Agency, said in his March testimony before the Subcommittee on Military Installations of the House Armed Services Committee, the civil defense program "is designed to make nuclear war less likely by improving our ability to deter the Soviet Union from an attack on the United States. In conjuction with our strategic forces, civil defense will help contribute to a strong deterrent posture. It also reduces the ability of the Soviets to coerce the United States with nuclear blackmail."

As Mr. Giuffrida explained, the President's program is a moderate, orderly, and responsible way to provide some measure of protection for the civilian population should war break out. However, we believe it important to note, in answer to your fifth question, that our civil defense planning and preparations to save lives in case of nuclear attack by no means make the prospect of nuclear conflict any more thinkable or tolerable. We have no illusions: war—especially nuclear war—would be a catastrophe for all mankind no matter what defensive measures might be taken. We also believe that the extensive civil defense program in place in the Soviet Union does not make Soviet leaders any less conscious of the terrible destruction that a nuclear conflict would bring for their people.

I hope this will contribute to your formulation of views on this subject. Should you have any further questions, please do not hesitate to let us know.

With cordial regards,

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Congressional Relations.

THE SECRETARY OF ENERGY,
Washington, D.C., July 26, 1982.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: This is in response to your letter of June 21, 1982, concerning preparations for nuclear explosion emergencies. The Department of Energy (DOE) has a major role to play in planning for continuity of government, operational safety and internal security in the event of such emergencies and works closely with other government bodies in this regard. In addition, DOE would be prepared to provide radiological technical assistance in the event of such emergencies.

The responsibility for the specific areas covered by your questions lies with the Federal Emergency Management Agency (FEMA). We have been in contact with Mr. Kingsley of your staff who informed us that a similar letter was sent to that agency. We trust that the response to your letter from FEMA will meet your needs.

Sincerely,

JAMES B. EDWARDS.

FEDERAL EMERGENCY MANAGEMENT AGENCY,
Washington, D.C., August 9, 1982.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PROXMIRE: This is in response to your letter of May 12, 1982, requesting our Agency's views and opinions on nine specific questions dealing with responses to an accidental or purposeful nuclear explosion.

Answers to the nine questions posed are enclosed. We trust that they are responsive to your need.

Sincerely,

LEE M. THOMAS,
Associated Director, State and Local Programs and Support.

RESPONSES TO QUESTIONS POSED BY SENATOR PROXMIRE

Question 1. What is the status of planning by the United States and any other major Western nation for providing assistance to an area after a nuclear attack?

Answer. Nuclear attack preparedness planning is considered to be a national effort to be undertaken by individual nations usually as part of a civil defense program. In the United States, such planning is currently being accomplished by State and local governments with funding support from the Federal Government. At the Federal level, planning to prepare for nuclear attack and other national emergencies is carried out by many agencies in accordance with Executive Order No. 11490. Generally speaking, the capability of our governments at all levels to respond in case of a nuclear explosion or other large-scale disaster is not satisfactory. The seven year program proposed by the Reagan Administration to revitalize the nation's civil defense would go a long way toward correcting deficiencies in this area.

Under a Department of State Memorandum of October 22, 1979, the Federal Emergency Management Agency (FEMA) was assigned the responsibility for planning, developing and implementing United States involvement in NATO civil emergency coordinating planning programs, by providing United States participation in meetings of the NATO Senior Civil Emergency Planning Committee, and coordinating participation in its eight subordinate Planning Boards and Committees. Working in close cooperation with other Federal Departments and Agencies having primary interests (Commerce, Transportation, Agriculture, Energy, and National Communications System), plans have been developed for NATO-wide cooperation in crisis or wartime, in the areas of civil aviation, communications, civil defense, and shipping and supply (petroleum, industrial and food and agriculture). NATO civil emergency planning also includes plans for post-attack recovery. Exercises are conducted annually to test the response capabilities of the NATO Civil Wartime Agencies.

Question 2. What plans have been made in this regard by any Western international organizations or alliance-based organiza-

tions? Is it your perception that an organization needs to be created to meet this need?

Answer. NATO civil emergency planning includes provision for members to share all materials and services in time of war.

A bilateral wartime agreement exists between the United States and Canada for a wide range of civil emergency joint planning activities. In addition, the Red Cross Societies, the Salvation Army and other international volunteer organizations would play an important role in the field of civil defense.

It is the United States view that NATO, having been in existence for over 30 years, provides the most appropriate and advantageous forum for such cooperation between its fifteen member nations.

Question 3. What resources (such as decontamination services, medical supplies and treatment, airlift, food, economic assistance, etc.) could be supplied by nations today? What nations are likely to do so?

Answer. Resources required would depend on specific scenarios and whether or not a nuclear detonation had actually taken place. We cannot speak for other countries, but the United States can and frequently does provide medical, transportation, economic and other assistance to foreign nations struck by major disasters.

FEMA has limited personnel resources at its Headquarters and Regional Offices where some 10–15 radiological specialists experienced in measuring gamma radiation are utilized in developing radiological plans as part of the Agency's nuclear attack preparedness effort. In addition, FEMA and its predecessor agencies have procured about four million radiation detection instruments, the bulk of which have been granted to State emergency preparedness offices. It is conceivable that arrangements could be made to transfer some of these instruments to the country requesting the aid. Trained personnel to operate the instruments would still remain a problem. Only about 50–75 persons are trained and currently available at the State-level. To accomplish action on an expedited basis in response to a request for aid would necessitate considerable advance planning to obtain the desired instruments and trained people to operate them. Also coordination would be necessary with the Department of State.

The Office of the United States Foreign Disaster Assistance, Agency for International Development has been contacted by us to provide you with additional information concerning the points noted in your Questions 3 and 4. They have been asked to respond directly to your office.

Question 4. What could the United States be doing to urge other nations to do this type of planning, either jointly with the United States or other western nations or independently?

Answer. The United States, through its participation in NATO, both militarily and through cooperation, and its alliances with other countries, plays a leading role in promoting adequate civil emergency preparedness planning and development. In addition, FEMA as the Federal Agency responsible for nuclear attack preparedness also promotes the exchange of preparedness information with other friendly governments, organizations and individuals, through literature and a visitor program.

Question 5. What is your considered opinion of the potential for such planning or preparations making a nuclear event more or less "thinkable" or likely?

Answer. FEMA does not subscribe to the theory that planning to mitigate the effects of a nuclear war, accidental weapon release, or terrorist incident will make such a nuclear event more likely. To the contrary, planning, such as improved civil defense, will enhance deterrence and that will help make nuclear war less likely.

The purposes of such planning is to save lives and to mitigate the effects of a nuclear detonation or war. Such planning should be accomplished for its humanitarian aspects. It is government's responsibility to provide protection for its citizens through development of contingency plans. Being prepared to respond to such contingencies does not mean that it will make the event more likely to happen.

Question 6. What preparations have been taken, or should be taken, to determine if a nuclear event is accidental or, if deliberate, to identify the perpetrator such that the threat of succeeding attacks can be considered in the assistance efforts?

Answer. It is difficult for FEMA to respond to this question since it extends beyond the Agency's responsibilities. Under existing legislation and Executive Orders, FEMA is responsible for preparedness and response actions for a wide variety of disasters, emergencies, and catastrophic events including nuclear attack. FEMA is not responsible for determining the perpetrator of the threat or event. FEMA is a user of the intelligence data and not a generator of it.

Question 7. Is it possible to identify which geographic areas have greater likelihood of falling victim to an isolated explosion? Have studies like these been done for the United States or other western nations?

Answer. FEMA does not believe that it is possible to predict which geographic areas have a greater likelihood of falling victim to an isolated explosion. There are too many variables and possible scenarios involved to make such projections meaningful. We are not aware of any studies that have been done to identify geographical areas likely to be the victim of isolated explosions.

Question 8. Is it possible to examine probable conditions in an area of an isolated nuclear explosion as they are affected by such things as topology, prevailing climates, population density, economic infrastructure, etc.? Would it not make sense to study three "different" cases to explore the range of possibilities?

Answer. It is certainly possible to conduct studies such as those proposed. Several years ago, FEMA sponsored a research project which included a preliminary examination of the effects of 1 kiloton nuclear weapon detonated in a city by terrorists. Other studies dealing with the impact of a low yield nuclear weapon detonation in an urbanized area have also been made by the Defense Nuclear Agency. Your staff may wish to review the research already completed prior to making a determination on the need for additional studies.

Question 9. To what extent could any of the studies suggested above be affected by precedents for massive international relief such as have followed major natural disasters such as earthquakes, droughts, volcanoes, conventional wars, etc.?

Answer. There are too many variables involved to expect that the suggested studies may be affected by precedents for massive relief efforts that have followed major natural disasters. One can expect that jurisdictions that have experienced certain types of natural disasters will have taken some action to mitigate the effects of future disasters (especially if these are of a recurring nature). Thus, the jurisdiction should be better prepared to respond to future disasters because of its past experiences and may not require much in the way of outside assistance. Other jurisdictions may not have had such experience and because of limited resources, may require massive outside assistance for recovery. Furthermore, the type of outside assistance needed may vary considerably from community to community depending on the nature of the disaster, extent and type of damage, casualties, and available resources (e.g., special equipment, medical care, supplies, shelters, etc.). To make studies meaningful, one has to prescribe a set of study assumptions dealing with the situation likely to be encountered. It would be surprising if the situation for an actual disaster matched the study assumption. For this reason, FEMA advocates that jurisdictions develop emergency operations plans which provide for flexibility in responding to any and all types of disasters that the jurisdiction may encounter. Being prepared to respond to a broad spectrum of emergencies is a desired goal.

THE REAPPEARANCE OF THE TOOLS OF GENOCIDE

Mr. PROXMIRE. Mr. President, many of us in this body can still recall vividly our shock and disbelief when the first pictures of the German concentration camps were published and when the numbers of gassed victims were tallied by the liberating armies of Europe. Before that horrible event, genocide was an abstraction; an alien concept for many of us. However, the Nazis' brutality soon ridded each of us that early naivete and brought us face to face with the most depraved and demented part of man's character. The fresh memories of cremetoriums and gas chambers spurred the world to action and in 1984, largely due to this Nation's influence, the General Assembly adopted the Genocide Convention.

Humanity was appalled and outraged by what they found within the camps. The combination of German efficiency and procedural rigidity gave places like Dachau an unnatural aura like some enormous machine with human attendants but no human controls or feelings. The Germans continually improved the machine's capabilities; extending its capacities for human slaughter further and further until every ounce of human compassion or unnecessary comfort had been squeezed out of the system. When bullets were determined to be too costly they switched to ovens and when oven construction proved prohibitive they employed gas. Day in and day out they tinkered and adjusted their killing machine and when they had finished they presented the world with the 20th century's first streamlined, high performance genocidal factories.

Today those scenes and stories seem like they happened 1,000 years ago. Dachau and Auchwitz are now muse-

ums and their creators but faint caricatures in our memories. The emotion and determination that initially pushed the Genocide Convention through the General Assembly has now largely dissipated and, as if the confiscation of the Nazis' ovens meant immunity from future holocausts, the world has once again left genocide in the abstract.

I wish I could stand before you today and say that the Genocide Convention and its ugly subject could be safely put away and that genocide was a past phenomenon without contemporary meaning but that would be untrue and self-deluding. Throughout the world a new generation of genocidal weapons are being utilized by major world powers and the successors of the German crematoriums are as, if not more, deporable as their predecessors. It is the saddest and most depressing of ironies that one of the allied powers that helped liberate the concentration camps and bring the Nazis leadership to justice is now responsible for the proliferation of these new weapons. In Kampuchea (Cambodia), Laos, and Afghanistan lethal chemical weapons are being used and supplied by the Soviet Union for the indiscriminate killing of inhabitants of certain rebel-held territories. The use of these toxic weapons have been well documented and over 980 deaths in Kampuchea 3,000 deaths in Afghanistan, and 6,300 deaths in Laos are being attributed to these mycotoxins. The toxic chemicals can be used in various forms such as poisoned bullets and flechetts—steel darts—aerial dusting, artillery explosions, liquid spray, and gas bursts. The toxins can take seconds or days to kill their victims. In Afghanistan rebel fighters have been found still laying in firing positions; fingers still on the triggers of their weapons.

While there is no proof that these weapons are actually being employed in genocidal campaigns, their potential for large scale extermination increases the possibility of genocide by giving individuals greater ability to order it. The new tools of holacosts would not require trains or camps but instead would allow mass executions to take place wherever a pocket of undesirables might be found. Now all that will be required is the desire to match the capability. I hope that the increased destructive potential of these weapons will inspire greater interest in the ratification of the Genocide Convention. Genocide has become too easy of a crime and the world too uncertain of a place.

NATIONAL GUARD AND RESERVES BEST BUY FOR THE DOLLAR

Mr. PROXMIRE. Mr. President, it cannot be said loud enough or long enough that the best buy for the defense dollar rests with the National Guard and Reserves. The Active Force advocates do not really want to talk about it. Pentagon officials like to give lip service to the notion—but little or no funding and Congress usually is left with the responsibility of finding ways of supporting the Guard and Reserves.

But the saying is true. A full-time active duty individual costs the Pentagon budget over $20,000 annually including support costs. That same individual in the Guard and Reserve will cost $3,000 annually.

And man for man, woman for woman, these members of the Guard and Reserve are at least as well qualified and in many cases more so than their active duty brethren.

We cannot fight a conventional war without a highly trained, effective Guard and Reserve Force. That is just a matter of mathematics. A conventional war will require a full mobilization and that means only the Guard and Reserves will be available in the near term for combat duties.

At the present time there are plans to use Reserve and Guard personnel to fill out units in the war theater. Frankly, I think that is a mistake although I can see the reasoning behind it. The Guard and Reserve units would be put to better use if they could perform their duties as a unit—rather than as fillers. They are trained as a unit, they exercise as a unit, they know their roles as a unit. And that is how they should be utilized in our war plans.

Mr. President, I ask unanimous consent that an article in the St. Louis Globe-Democrat on our Guard and Reserves by Maj. Gen. Henry Mohr (retired) be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the St. Louis Globe-Democrat, Aug. 14-15, 1982]

NATIONAL GUARD AND RESERVE ARE REAL DEFENSE BARGAINS

(By Maj. Gen. Henry Mohr)

Not only are National Guard and Reserve forces far less expensive to maintain, they have proven themselves capable of taking on wartime missions requiring deployment in remarkably short times.

The cost of maintaining a full-time person on active duty with pay, clothing and food is estimated at about $20,000 a year. In comparison, the average peacetime cost for a guardsman or reservist is estimated near $3,000 a year. Quite a difference.

The big question is whether Reserve and Guard units can be sufficiently trained and ready if a crisis comes. The answer is that they can be. This has been proven by performance. In fact, the National Guard and Reserve can do almost any job in the military services, if they are provided with the modern equipment called for by the mission, if adequate manpower is assigned and if they have enough money for training.

This capability has been recognized, and progressively, Guard and Reserve units are being assigned to more meaningful missions. Some have even been assigned to the Rapid Deployment Joint Task Force. Reserve personnel in those units have their bags packed and are ready to move out at a moment's notice. The military services naturally favor giving priority to their full-time, active-duty units but are recognizing the need for equitable treatment of their reserves. Competition for modern equipment between the reserve and active components is being replaced with policies supporting priorities that match the missions, regardless of the type of unit.

A special characteristic of the Reserve forces is their home station role. They are part of their communities and frequently help the home folks with their military skills.

Some examples:

On the Fourth of July, millions of people crowded the St. Louis riverfront in blistering summer heat and humidity. Hundreds of people became heat casualties. On the spot was the 25th Combat Support Hospital—a St. Louis unit of the U.S. Army Reserve, treating the injured.

The National Guard routinely each year responds to hundreds of emergencies—floods, tornadoes and other situations—to protect life and property.

When Mount St. Helens exploded violently, helicopters from Army National Guard and Army Reserve units in the states of Washington and Oregon flew dangerous and urgent rescue missions night and day.

Somewhere in Germany, reservists serving their annual two-week period of active duty for training pitch in with skilled hands to assist with a huge maintenance load on NATO military equipment, working side-by-side with their active Army counterparts. Their skill and efficiency are praised by active service commanders.

Combat realism is stressed as National Guard and Reserve forces train with active force elements in NATO exercises.

Military cargo planes transporting essential supplies to overseas destinations often are manned entirely by Air Force Reserve pilots and crews.

Coast Guard vessels patrolling the U.S. coastline, carrying out rescue and other missions, frequently are manned by Reservists.

Near Houston, Texas, a violent explosion shatters a refinery. Flames and debris are hurled wildly; people are seriously injured. Within minutes, Army Reserve helicopters arrive and quickly carry the injured to hospitals. Lives have been saved.

These incidents and many more like them are real. But they show only a fraction of the importance of the Reserve forces to this country.

The fact is that the United States cannot fight a war without mobilizing the Guard and Reserve. Never, since the Revolutionary War, has such a heavy weight of responsibility been placed on our civilian soldiers, sailors, airmen and women. In the Army, the Reserve forces have more than half the Army's total combat power and two-thirds of its support units. Overall, Reserve forces make up about a third of our nation's armed forces. Readiness for mobilization and, if necessary, battle, is the name of the game.

Across the country, our Reserves, their civilian employers and families are rising to meet the challenge. Sacrifices are being made by all on behalf of the defense of America.

These are bright spots of uncommon dedication and patriotism. But the Guard and Reserve are not without problems. Perhaps the greatest need today is for equipment that will match the importance of their missions. Then, too, there are opportunities for greater use of the economical capabilities of our Reserve forces in the national defense. We will discuss these things another day.

But for the moment, we feel there should be an increased awareness of the service to our country being provided by the civilian components—the Guard and Reserve, by their employers and families. If you are searching for patriotism in America, you can find it there.

ARMSTRONG WILLIAMS, WINNER OF THE CONGRESSIONAL BLACK CAUCUS YOUTH AWARD

Mr. THURMOND, Mr. President, I rise today to pay tribute to an outstanding young man from my home State of South Carolina, Armstrong Williams.

Last Friday evening, I had the pleasure of attending a ceremony at which he received the Congressional Black Caucus Youth Award, and I can think of no one more deserving of that high honor than he.

Mr. President, this is a young man who has distinguished himself as a person dedicated to public service. At 22, he has the honor of being the youngest appointee of the Reagan administration. He has received numerous awards throughout his high school and college careers and is a native son of whom South Carolina can be proud.

The son of James and Thelma Williams of Marion, S.C., Armstrong is a graduate of that city's Rains-Centenary High School. He received his bachelor's degree in political science from South Carolina State College in Orangeburg in 1981. Throughout his high school and college years, he has demonstrated those qualities associated with leadership.

Armstrong served as student council president during his high school years and earned many accolades as an active 4-H Club member and public speaker. These early achievements were prolog to an impressive college career.

At South Carolina State College, he was the first student to serve two consecutive years as Student Government Association president. I am proud to say that he ran as a Republican. His activities in academic, ROTC, and student government affairs brought him many coveted awards, including a listing in Who's Who in American Colleges and Universities.

The year following his graduation, Armstrong received the South Carolina State College Student Outstanding Service Award, which is given to graduates who have made outstanding contributions toward the well-being of the student body and the institution. I am certain that he will continue to make his alma mater proud.

This young man's interest in the governmental process led to his becoming an intern in several congressional offices during his college years. He has been an intern in the offices of my fellow South Carolina Members of Congress, Representatives FLOYD SPENCE, (Republican, South Carolina), and CARROLL CAMPBELL, (Republican, South Carolina), and in my own, where he learned about the making of our Nation's laws and how our Government operates on the Federal level.

Immediately following his graduation from college, Armstrong was named by President Ronald Reagan to be Legislative Analyst for the Animal and Plant Inspection Service of the Department of Agriculture, thereby becoming this administration's youngest appointee.

I ask you to join me in congratulating Armstrong Williams on his achievements, and I add my best wishes to his fine parents, who have reared an outstanding son.

Mr. President, I ask unanimous consent that two newspaper articles, which appeared in the Orangeburg (S.C.) Times & Democrat and the Summerville (S.C.) Journal-Scene, be printed in the CONGRESSIONAL RECORD.

There being no objection, the articles were orderd to be printed in the RECORD, as follows:

[From the Orangeburg Times & Democrat]

A FUTURE LEADER

21-year-old Armstrong Williams, a 1981 graduate of South Carolina State College, is working in Washington as a confidential special assistant to the director of congressional relations.

He serves as the liaison between Congress and the United States Department of Agriculture. Williams was appointed to that position by President Ronald Reagan through the efforts of Sen. Strom Thurmont, R-S.C.

He's the youngest presidential appointee in history.

Williams was graduated cum laude from S.C. State with a degree in political science on May 10 and went to work in Washington on May 11. He was back in Orangeburg a couple of weeks ago at State's homecoming.

He says he's the only representative from the Southeast in this sort of role, and the first black from this area to handle such a job. "We are the voices for the secretary (John Block) on the Hill," Williams says.

The position of authority he has attained in such a short time may amaze some persons. But it doesn't surprise Williams himself, because he's always believed he could do whatever he wanted to do.

Williams is from Marion County. He is the middle child in a family of 10 persons, brought up by James and Thelma Williams on a farm.

He was student body president of his high school class of 27 persons, class of '77. He held that same position during his junior and senior years at S.C. State.

Williams knows that being black and being a Republican isn't common. The combination wouldn't have made him very popular in many circles, either, if he wasn't the type of person who says he can get almost anything accomplished.

Ever since he was a child, Williams has been absolutely determined to be the best at whatever he decided to do. "I always like to prove what people say can't be done."

His candidacy for the role of student body president during his junior year was considered by some a hopeless cause. He was conservative and he had openly supported Thurmond, which didn't always win him friends in powerful circles on campus.

And he said what he thought. But he won the election by 69 votes, and he was re-elected the following year by a landslide.

Why? Because Williams produced, as he says. He brought a number of cultural events to the campus, including concerts, movies and speakers, and the students loved it.

He says he was successful in campus politics because, in his words, "I talk common sense. And that's politics."

Lee Martin of Summerville worked on Williams' campaign last year and is on the entertainment committee at S.C. State. He hopes to follow Williams' footsteps into the presidency of the school's student body before he graduates in three years.

To help him, Williams is teaching Martin about politics.

Politics is being able to deal with persons, to the point of predicting what they're thinking and how and when to say what they want to hear, Williams says. He knows how to do that.

He met Thurmond when he was a high school student. He wanted to find out for himself what sort of a man Thurmond was.

He was impressed by what he found. And he sincerely believes in most of the issues that the Republican Party supports.

No race should segregate itself into one party, though the blacks have done just that with the Democrats, Williams said. If a race or any group does that, there are no leaders who support its policies when the "other" party is in power.

"That's our problem. We let others think for us," Williams says. He's not just including blacks in that statement—he says he's speaking of most persons.

"They let their heart get in the way of their mind," he says. That's something Williams proudly says that he never does.

One of his biggest thrills since going to work in Washington has been the two times he's been invited to eat lunch with Reagan.

When he's asked who he sees himself as—such as, perhaps, a young Julian Bond, Andrew Young or perhaps as a young Strom Thurmond—he says frankly that he only sees himself as Armstrong Williams. He's not a copy of anyone else, he's not molding his life after that of anyone else, he's not grasping hold of the thoughts of anyone else to portray as his own.

"You see, I have a mind of my own. And it functions."

And he's got some advice for others.

"Know from whence you cometh," Williams quotes from the Bible. Then you can take it from there, as far as you want to go.

[From the Summerville Journal-Scene]

WILLIAMS URGES BLACK ACHIEVEMENT

"Blacks must understand that the economic and social problems we suffer are not entirely the fault of government, or directly related to racism.

"I don't believe racism is the problem it used to be. In proportion, there are as many black racists as there are white racists."

Armstrong Williams, the youngest presidential appointee in the history of the country, made these remarks during the interview while on a holiday visit with his closest friend, Lee Martin of Summerville.

Williams, a 21-year-old political science graduate of South Carolina State University, went to work as a confidential special assistant to the Secretary of Agriculture the day after his May 10, 1981 graduation.

Still addressing the problem of unemployment and economic difficulties, blacks in general are suffering, Williams said, "Blacks still want everything given to them. They are impatient, and want everything right now, without having to spend the time needed to gain these advantages through personal achievement. This doesn't work for anything.

"If anyone wants to really improve his lot in life, he has to get out there and work for it, and start young. A man can achieve a great deal in his own productive lifetime, and his offspring can start where he left off and go at least that much further. You usually have to start with smaller achievements, but as you go along, each step becomes a bigger, more important step. If you're satisfied with inches, you'll never make that quantum jump."

Williams, wants the young black generation to stop complaining, find motivation and get moving, or put the steam to the wheels instead of the whistle.

"If this generation of young blacks will get the lead out and achieve everything their potential will allow, the next generation will have very little to complain about," he said.

Williams feels it's important for those young people who have achieved some measure of success to visit home often.

"I think it's important to come back and show achievement. This can encourage and motivate others to do the same thing," he said.

The young Republican said he feels the goals of high achievement among blacks can be more quickly realized by supporting a two-party system.

"There are very few black Republicans, for historic reasons. The Republican vs Democratic philosophy has been a primary reason, but as more blacks move up in the economic structure, there will be more black Republicans.

"You see, it's not the party that makes the man, it's the man who makes the party. You need a strong two-party system, with two adversary political philosophies to keep the democratic system viable. If everyone agrees, there will be no change, no progress."

Williams was elected Student Government President at S.C. State twice, running as a Republican, and there is no Republican party at the S.C. State campus.

"You see, it doesn't really matter what party you represent any more. What matters is your own motivation and your own achievement. The uncommitted vote has almost formed a third party in this country, and I feel this is a result of general apathy because all politicians seem to be saying the same thing. Both parties are trying to hold the middle of the road, so as not to alienate anyone. The only thing that seems to matter any more is personalities. If the guy is likable, and expounds on popular causes, he's probably going to get elected.

Then, when he doesn't deliver, his party is blamed.

"If blacks want to improve the status quo, each individual is going to have to accomplish something, and more blacks are going to have to get involved in politics. The reason no one has been able to beat the system is because it's a good system. It was invented to operate at its best with adversary relationships active within, not attacking it from without."

Williams, at 21, is far from an obscure individual. He has been interviewed by Ebony, Jet, Newsweek, Sepia, Dollars and Sense, Business Week, the Washington Post, Black Enterprise and the Black Collegian. He has also appeared on many radio talk shows and CBS's Tony Brown's Journal.

His personal message to blacks in South Carolina is, "That is what I have done, and I'm not done yet. Watch me go—and you can do it too!"

He is a native of Marion, S.C., where he was raised on a farm. He doesn't feel his a "rags to riches" story, but one of personal achievement.

"Sure, I'm proud of myself. But don't I have a right to be?"

HOUSE WARMING

Mr. MATHIAS, Mr. President, a unique feature of the inaugural concert of the Baltimore Symphony in its new home, Meyerhoff Hall, was the performance of a specially commissioned work by Morton Gould, appropriately entitled "House Warming." The commission was the latest of many contributions to the Baltimore Symphony by Mr. and Mrs. Robert H. Levi. In her continuing work in support of the symphony, Mrs. Levi was also cochairman of the inaugural planning committee.

The program for the premiere gala concert which was held on September 16, 1982, under the direction of Sergiu Comissiona, describes the new Morton Gould composition as follows:

The title describes the intention of the piece. It is in three short movements, which can be done together or separately. The first, "Tunings," starts with the oboe sounding the traditional "A" and from this the various sections of the orchestra engage in figurations. These figurations are over a hymn-like pattern, evoking the feeling of a benediction.

The second section, "Fanfarades," is a bright and sparkling overture on fanfare motifs and uses the orchestra in virtuoso fashion. The third, "Acclamations," starts with a spiritual-like theme that changes to a rhythmic and pulsating statement. This movement has, along with the orchestra percussion, optional hand-clapping by the audience, which can serve the purpose of both acclaiming the hall and tuning it at the same time. (Handclaps are a common device for testing a hall.) However, with or without audience participation, this movement is in a jubilant and affirmative mood.

It was my great privilege to be present for the inaugural concert of the Baltimore Symphony and I want to express with confidence of unanimous agreement the appreciation of the people of Maryland to Sergiu Comissiona, to Morton Gould and to Mr. and Mrs. Levi for a special and unique portion of a distinguished performance.

The gift by Mr. and Mrs. Levi which has resulted in this important addition to the American repertoire may also generate some discussion about the support of the arts in the United States. Although I am an ardent advocate of an appropriate public contribution to the support of the arts, I am reminded by "House Warming" that the support of private patrons is also important today as it was in Mozart's Salzburg or Hayden's Vienna. I am glad that Mr. and Mrs. Levi have been willing to fill this role and hope that others will follow their example.

LEADERSHIP CONFERENCE ON CIVIL RIGHTS

Mr. KENNEDY. Mr. President, on the afternoon of June 18, 1982, the Senate took an historic step. We extended the Voting Rights Act of 1965 in a way that preserved its vital safeguards and insured continued protection of minority access to the political process. The most important modern civil rights law still stands. The Congress of the United States has kept faith with its commitment 17 years ago that no American would be denied the right to vote.

The August 16 issue of the New Republic magazine contained an excellent story by Barton Gellman on the crucial role that the Leadership Conference on Civil Rights played in that great moment.

The final Senate vote was overwhelming, and the House of Representatives vote was equally impressive, but those rollcalls cannot convey our long and difficult struggle to renew the act without crippling amendments.

For almost a year, the administration could not make up its mind whether or not it would support an extension of the crucial preclearance provisions. When the administration did decide, it sought several crippling changes in the legislation already approved by the House and sponsored by a bipartisan majority of the Senate. Indeed, while the Justice Department has tried subsequently to take credit for the Dole-Kennedy version of the bill which became law, the fact is that Assistant Attorney General Brad Reynolds was trying to scuttle that consensus version until the last minute before it was favorably reported by the Senate Judiciary Committee.

Faced with overwhelming support for the legislation, the administration finally endorsed it. And, however, belated, we welcomed that conversion. Even then supporters of the Voting Rights Act faced a filibuster and more crippling amendments on the Senate floor, both of which had to be defeated.

The victory was a happy one to those of us who fought the battle for voting rights in 1965, again in 1970,

and then again in 1975. Millions of black, Hispanic, and Indian voters are now assured of the right to vote and to have their vote fairly counted.

The road to that victory was long and hard. There were many obstacles and a constant drumbeat of lobbying by opponents of the Voting Rights Act, who tried to derail it with scare tactics and delays.

We overcame that opposition with the help and dedicated hard work of many people. The Congressional Black Caucus, and other Members of the House and the Senate, civil rights groups, and other sympathetic organizations devoted countless hours to the task. But the single most important factor was the broad-based grassroots support of thousands of individual citizens—Americans of every race and creed who joined hands once again to protect the most fundamental right in a democracy, the right to vote.

The Leadership Conference on Civil Rights played a key role in forging that grassroots coalition. As it has so many times in the past, the conference provided the leadership, the information and the logistic coordination which enable individual citizens to express their convictions in the informed and timely manner that proved so effective.

For decades, the conference has played a crucial part in the march to equal opportunity for minorities. It has always been in the forefront of that fight.

Congress looks to the leadership conference for thoughtful, well-documented analyses and proposals on civil rights legislation and oversight of enforcement by the executive branch. And we are never disappointed. The credibility and effectiveness of the conference has made it a rallying point for all Americans concerned with human rights and social justice.

Mr. Gelman's article recalls the formidable efforts by the conference in this Congress on behalf of the voting rights extension and describes their plans for further important efforts in the future. I commend this article on the leadership conference to my colleagues, and to the conference I say: "Well Done."

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New Republic]

THE NEW OLD MOVEMENT

(By Barton Gellman)

(NOTE.—Why civil rights is making a comeback, sort of.)

Early in June of 1981, a tense civil rights delegation filed into a fifth-floor conference room at the Justice Department to talk about the Voting Rights Act. Form preceded content. Elaine Jones of the NAACP Legal Defense and Education Fund turned to William French Smith and, gesturing toward a Hispanic leader at her side, began the meeting like this: "Antonia Hernandez was not invited to this meeting, Mr. Attorney General, but she has agreed to come anyway—and if she leaves, we all do." Smith was shocked. He had demanded, despite objections from the civil rights community, that black and Hispanic leaders meet with him separately. Now they were calling his bluff. "We were insistent," says Ralph Neas, who attended the meeting, "that we were not going to let them play divide and conquer."

That scene could not have taken place ten years ago, or even five. As late as 1975 blacks and Hispanics were so deeply divided over key civil rights measures that they feuded bitterly in public. Generally, in fact, civil rights groups have often been diverted by intramural battles over priorities and tactics. But in the recent eighteen-month effort to extend and improve the Voting Rights Act, a broad coalition called the Leadership Conference on Civil Rights displayed a new maturity, an unprecedented unity, and an impressive political clout. Civil rights leaders are now beginning to wonder how and when they can apply it again.

They've done a good deal already. It's probably too soon to judge the impact on civil rights of the most conservative Congress and White House since the seminal legislation of the 1950s and 1960s. But the early indications are unexpectedly—if still tentatively—hopeful. The Reagan Administration, though it has conspicuously ignored the existing civil rights enforcement apparatus, has not been able to dismantle it. Meanwhile, the 97th Congress is soon to expire, and organizers paced by the Leadership Conference have not only helped stall every legislative attack on civil rights but also, against all odds, contrived the passage of the strongest and most bipartisan Voting Rights Act ever. The story of the voting rights battle, which went little noticed beyond the floor debate, says a great deal about the future of civil rights under Reagan.

As coalitions go, the Leadership Conference on Civil Rights is a strange and unwieldy creature. It has no membership to speak of. Its constituents are themselves civil rights organizations, or organizations interested in civil rights, which is by no means the same thing. Some Leadership Conference members come as no suprise: the NAACP, the National Urban League, the Mexican-American Legal Defense and Education Fund, the Anti-Defamation League of B'nai B'rith, the AFL-CIO and many of its constituent unions, now, the League of Women Voters, the ACLU, and religious groups from the Catholic Conference to the Presbyterian Church. But the members also include Actors Equity, the Improve Benevolent & Protective Order of Elks, the YMCA and YWCA, and business groups, albeit predominately black ones, like the National Association of Real Estate Brokers, the National Beauty Culturists' League, the National Business League, the National Dental Association, and the National Funeral Directors and Morticians Association.

When the Leadership Conference was founded in 1950, thirty groups signed on as members. Today there are more than five times as many. This sounds like good news, but there's a catch. The Leadership Conference operates by consensus, not majority rule. That means it can take no position unless it has unanimous support. The coalition's full-scale exertions—though crucial to every major civil rights effort since 1957—are therefore few and far between. "You don't do it every day, you don't do it every month," says David Brody of B'nai B'rith, who sits on the executive committee. "But you build on victory. You win a marathon today, you look ahead to next year's marathon." When it does gear up, says John Shattuck of the ACLU, "the coalition is infinitely more effective than any individual group or organization can be."

On voting rights, this lumbering, 160-headed beast turned its full attention to a single law and gave a show of what it can accomplish when aroused. The result was formidable. "The notion of working on issues in coalition has been around as long as I've been in this town—since the 1960s," says Jane O'Grady of the AFL-CIO. "It just hasn't always worked so well. On the Voting Rights Act we had almost everything come together." Top civil rights litigators—Frank Parker and Barbara Phillips from Mississippi, Armand Derfner from South Carolina, Laughlin McDonald from Georgia, Lani Guinier from New York—came to Washington to help draft the legislation and give substantive advice. Experienced Washington lobbyists coordinated strategy in twelve- and fourteen-hour meetings around a brown felt-top table at the Leadership Conference's Embassy Row townhouse. And hundreds of thousands of people took part in a minutely planned grass-roots campaign that spanned fifty states and 435 Congressional districts. "We just overwhelmed them," says Representative Don Edwards, a California Democrat who chairs the Judiciary subcommittee on civil and constitutional rights.

No one was more surprised at this turn of events than the Leadership Conference. A year ago, Edwards was hosting gloomy strategy sessions in his Rayburn Building office, as coalition leaders pondered whether they could possibly slip the bill past the House, still less the Senate, without crippling amendments. The fact that Ronald Reagan, no great friend of the Voting Rights Act, was at the peak of his power in Congress did little to cheer the dissussions. "See," Edwards burst out in one such meeting late last July, pointing as the vote on Reagan's tax package flashed across his video screen, "that's what Ronald Reagan can do" Not on voting rights. Reagan's pet amendments all failed, and not for lack of lobbying by the Justice Department. Joseph L. Rauh Jr., who has been with the Leadership Conference since the early days, still cannot conceal his amazement at the eventual 20-to-1 and 10-to-1 victories in the House and Senate. "Our fondest hopes of 1981 were exceeded," he says.

All the strategists in Washington could not have put that victory together without the likes of Mona Martin, the president of the Iowa League of Women Voters. Charles Grassley, an Iowa Republican who sits on a key Senate subcommittee, was wavering on an important vote last March. The Leadership Conference in Washington sent Martin a list of local organizers from unions, church groups, black and Hispanic groups, farm and education groups, and Common Cause. Martin then applied the heat where it counted. The Church Forum—representing denominations from Catholic to Episcopal and Baptist to Presbyterian—sent out "minister advisories" suggesting sermon ideas on voting rights. A "media committee" held press conferences, distributed slick p.r. packages, wrote Op-Ed pieces, and took out a quarter-page ad in the *Des Moines Register*. Borrowing a WATS line phone bank from a local business, Martin organized "telephone trees," which work like chain

letters, Grassley got five hundred calls from constituents in one day alone. "We were just letting him know that we expected him to do the right thing," Martin says. He did.

Variations on this theme played in nearly every state, with the organizing work shared in a classical division of labor. the Mexican-American group ran the Southwest grass-roots efforts, as did the Urban League and NAACP in the South, the AFL-CIO in the industrial Northeast, and so on. "Each group was there to provide the things that that group uniquely could do," says Althea Simmons, Washington director of the NAACP. All the coalition lacked was, well, the two main ingredients of most modern lobbying campaigns: a lot of money and a room full of computers. The usual pre-addressed, pre-printed, pre-paid postcards played no part in the Leadership Conference campaign. There was no voting rights PAC to dispense $45,000 in contributions to friendly Representatives and Senators. Yet the Leadership Conference managed as impressive a showing of legislative savoir faire as anything done by the big-time agriculture, defense, or business lobbies.

In all this, the Leadership Conference followed time-honored methods. The coalition remains in many ways what it has always been, only more so. What began as an alliance of blacks, labor unions, and religious activists now includes organizations—of Hispanics, Asian Americans, women, gays, the elderly, and the handicapped—that had not even formed in the 1950s. There were coalition efforts as effective as this year's in the early days, but none were nearly so broad-based or so complicated. What the coalition has gained in breadth, on the other hand, it has lost in passion. Elks Lodges, fraternities, sororities, lawyers, farmers, and real estate brokers do not ground staging sit-ins and rallies. The coalition has become cautious, moderate, middle of the road. No one today refers to the Leadership Conference, in Representative James A. Haley's immortal words of 1964, as "those vultures in the gallery." As David Brody says, "The whole movement was much more visible in the 1960s. Today it might almost be called a nuts and bolts operation." But according to William Taylor, a former staff director of the U.S. Commission on Civil Rights, the nuts and bolts aspect has "enormous potential": "We've learned more about how to use community and grass-roots efforts. We now have more professionally skilled advocates for civil rights. You have had an expansion of civil rights law to encompass groups other than blacks. And the Reagan Administration has helped bring people together and see their basic common interests."

Well, yes and no. Basic common interests are more readily discerned in the abstract than in the details of legislation. Even on voting rights ("the purest brand of motherhood," one Senate staffer calls it) the Leadership Conference was hard pressed to keep its disagreements private. The coalition held, but only just. "It's very much like a collective bargaining situation," says O'Grady of the AFL-CIO. "Hot flames fly, and sometimes you just have to clear the room and cool off."

It got so hot in the coalition in the last two days of July 1981 that, by the time the differences were reconciled, a splinter group on the Conference's voting rights steering committee had already prepared an angry press release and begun planning how to fight its former allies. Much of the steering committee, fearing hostile amendments on the House floor, wanted to make concessions while the voting rights bill was still in Judiciary Committee markup. They favored striking a deal with Illinois Republican Henry Hyde that would have diluted crucial enforcement provisions in exchange for his support. Four dissenters said the deal was outrageous. "There was a whole lot of screaming and name-calling," says Antonia Hernandez. "It was a terrible time." Frank Parker, a red-bearded veteran of death threats and voting rights lawsuits in the South, was the purest of the purists. "Their judgment was totally and completely wrong," says Parker, who chain-smoke cigars and likes his adverbs in pairs. "We would have publicly and openly opposed the bill, and in fact we were developing a strategy to do that. It threatened to break up the coalition." The deal with Hyde finally fell apart, and the coalition decided—consensus renewed—to stop negotiating with him. There ensued an incident of extraordinary rarity in Congress: the four principal members of Edwards's subcommittee staff, incensed at the risks of abandoning Hyde, staged an angry walkout and refused to take part in redrafting the disputed section of the bill. "Everybody was yelling at everybody," recalls one of the aides. "At that point they decided to rewrite the whole thing. At that point I went home."

This was the worst of many disputes, and it raises doubts about whether the Leadership Conference will be able to hold its unity—its most potent weapon—on future issues. The man charged with maintaining that unity is Ralph Graham Neas, a 36-year-old dynamo who is the first full-time director of the Leadership Conference. Neas has perpetually tousled hair, a five o'clock shadow that arrives before noon, and the slightly red-faced look of overexertion. He has an uncommon pedigree for his job. "I'm white, male, Republican, and Catholic," he admits ruefully, "which is 0-for-4." Neas, a graduate of Notre Dame and Chicago Law School, spent eight years as the Senate's senior staffer on civil rights. He smiles well. He does his homework. He is a good coalition-builder. He is secretly pleased that Glamour magazine recently rated him among the top four male feminists in Washington. He says, "It's not often that you're going to bring together 160 organizations. But when you do, then you've got a dynamite situation. What I'd like to be able to do is to tap in repeatedly to those groups and those resources." He is an optimist.

Chances are that the Leadership Conference will not soon duplicate the scale of the voting rights effort. "You can't do it often," says a Congressional aide who has worked closely with the coalition. "It's physically, emotionally, psychically impossible." To say nothing of financially. For mailing and photocopying alone, many groups went through their whole annual budgets during the voting rights fight. Besides, there is the matter of finding another issue to prompt consensus. Many of the traditional civil rights causes won't do. Abortion, school prayer, and tuition tax credits split religious groups from libertarians. Immigration laws pit Hispanic groups against labor and the NAACP. Affirmative action divides blacks from some Jewish and labor groups. "I'm appalled at our position—or lack of position—on some issues," says Rauh. "People ask me all the time, 'How can you be general counsel to an organization that doesn't favor freedom of choice of abortion?' What we did with the Voting Rights Act is the answer."

That answer doesn't answer for everyone. Some civil rights leaders privately complain that the Leadership Conference is too timid or too established or too divided to represent them well on many issues. Relations between the coalition and other leaders—including Congressional Black Caucus members and Jesse Jackson of Operation PUSH—have often been cool, and there are prominent omissions in the Leadership Conference's membership list. Arnold Torres, for instance, says his League of United Latin American Citizens, the nation's largest Hispanic group, is "just not ready" to join: "We look at them and we see how they address our concerns, and we decide it isn't enough. We don't want to feel as if we're going to be ignored."

If the coalition does gear up again any time soon, it will probably be to try to amend the Fair Housing Act of 1968. Many civil rights leaders say the act is going unenforced, and they want to put some teeth in it. But at least some members of the Leadership Conference are skeptical that the group can reach consensus at all.

In any case, the coalition can more often agree about what it does not like. Hatch alone has introduced ten bills to weaken civil rights laws, including those concerning attorney's fees for civil rights lawyers and the right to sue local government. Other bills pending would strip federal courts of jurisdiction on abortion, school prayer, and desegregation; roll back affirmative action programs; and consolidate all civil rights enforcement in the Justice Department. On these issues the Leadership Conference knows exactly what it wants: nothing of the kind.

Most of all, the Leadership Conference is no longer running scared. Back in February, the theme of its annual dinner was "Civil Rights in Crisis." Talk turned more and more to the dangers of a second Post-Reconstruction period, in which decades of civil rights gains might be wiped out by the President and Congress that took power in 1980. The Voting Rights Act has changed the picture considerably. Now, when Ralph Neas talks about the coming session of Congress, he says the victory can be repeated. He says the grass-roots supporters have been encouraged. He says he looks forward to "one hell of a fight after another." And he smiles.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Commerce, Science, and Transportation

(The nominations received today are printed at the end of the Senate proceedings.)

INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND JAPAN—MESSAGE FROM THE PRESIDENT—PM-181

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Foreign Relations, pursuant to Public Law 94-265:

To the Congress of the United States:

In accordance with the Magnuson Fishery Conservation and Management Act of 1976 (Public Law 94-265; 16 USC 1801), I transmit herewith a governing international fishery agreement between the United States and Japan signed at Washington on September 10, 1982.

This agreement is one of a series to be renegotiated in accordance with that legislation to replace existing bilateral fishery agreements which are due to expire this year. I urge that the Congress give favorable consideration to this agreement at an early date and recommend that Congress consider issuance of a joint resolution to bring this agreement into force before the agreement expires on December 31, 1982.

RONALD REAGAN.

The White House, *September 20, 1982.*

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute:

H.R. 5203. A bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act (Rept. No. 97-551).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, without amendment:

S. 1661. A bill to authorize the Secretary of the Interior to acquire certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa, and for other purposes (Rept. No. 97-552).

S. 1964. A bill to designate certain lands in the Mark Twain National Forest, Mo., which comprise about 17,562 acres, and known as the Irish Wilderness, as a component of the National Wilderness Preservation System (Rept. No. 97-553).

S. 1965. A bill to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System (Rept. No. 97-554).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

S. 1978. A bill to quiet title and possession with respect to a certain private land claim in Livingston Parish, La. (Rept. No. 97-555).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, with an amendment:

S. 2279. A bill to designate the Alben Barkley National Historic Site (Rept. No. 97-556).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute an amendment to the title:

S. 2710. A bill to establish a wilderness area in the Hoosier National Forest area, Indiana (Rept. No. 97-557).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, without amendment and with a preamble:

S.J. Res. 155. Joint resolution redesignating the Saint Croix Island National Monument in the State of Maine as the "Saint Croix Island International Historic Site" (Rept. No. 97-558).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, without amendment and with a preamble:

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial (Rept. No. 97-559).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, with an amendment:

H.R. 1281. A bill to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A-056802 without regard to the 80 rod limitation provided by existing law (Rept. No. 97-560).

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, without amendment:

H.R. 6029. A bill to authorize the Secretary of the Interior to acquire by exchange certain lands within the Indiana Dunes National Lakeshore in the State of Indiana (Rept. No. 97-561).

H.R. 6188. A bill to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resource use and development, and for other purposes (Rept. No. 97-562).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 459. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1999.

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 463. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2671.

S. Res. 464. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1701.

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 469. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5203; to the Committee on the Budget.

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, without amendment:

S. Res. 470. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2279; to the Committee on the Budget.

S. Res. 471. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6188; referred to the Committee on the Budget.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SYMMS (for himself, Mr. STAFFORD, Mr. RANDOLPH, and Mr. BENTSEN):

S. 2932. A bill to extend for 1 year the taxes authorized by law to be collected for the Highway Trust Fund established pursuant to the Highway Revenue Act of 1956, and to extend such Trust Fund for 1 year; to the Committee on Finance.

By Mr. MATSUNAGA:

S. 2933. A bill to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income; to the Committee on Finance.

By Mr. KENNEDY (for himself, Mr. HATCH, Mr. BUMPERS, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. CRANSTON, Mr. DECONCINI, Mr. DOLE, Mr. DURENBERGER, Mr. EXON, Mr. GORTON, Mrs. HAWKINS, Mr. HEINZ, Mr. INOUYE, Mr. MATHIAS, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. PELL, Mr. QUAYLE, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, Mr. STAFFORD, Mr. TSONGAS, Mr. WEICKER, and Mr. LUGAR):

S.J. RES. 249. A joint resolution to provide for the designation of the month of October 1982 as "National Spinal Cord Injury Month."; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

S. RES. 469. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5203; to the Committee on the Budget.

By Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources:

S. RES. 470. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2279; to the Committee on the Budget.

S. RES. 471. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 6188; to the Committee on the Budget.

STATEMENTS ON BILLS AND JOINT RESOLUTIONS

By Mr. MATSUNAGA:

S. 2933. A bill to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin

Islands source income; to the Committee on Finance.

WITHHOLDING TAX IN THE VIRGIN ISLANDS

Mr. MATSUNAGA. Mr. President, I am today introducing a bill at the request of Congressman RON DE LUGO, delegate from the Virgin Islands.

Federal law imposes on the Virgin Islands an income tax structure identical to the U.S. Internal Revenue Code. Tax revenues raised in the Virgin Islands under the "mirror" tax law finance the local government operations.

Under the mirror tax code, a 30-percent withholding tax is imposed on gross dividends, interest, rents, royalties, and other passive income paid to individuals outside the Virgin Islands. This tax has seriously deterred businesses from investing in the Virgin Islands.

The government of the Virgin Islands would like to reduce the tax to encourage new business investment; but it is unable to legislate a tax reduction, since the mirror tax code is required by Federal statute.

The House Ways and Means Committee on September 15, 1982, approved legislation to allow the Virgin Islands legislature a degree of self-government in this matter. The bill, in compliance with the Virgin Islanders' desire, lowers the withholding tax from 30 to 10 percent; it allows the Virgin Islands legislature to reduce the tax further, if it desires.

To hasten congressional approval of this minor change, I am introducing the House bill for Senate consideration. The measure is relatively insignificant, but it does provide a measure of self-government and fiscal responsibility to the local Virgin Islands Government. I urge expeditious Senate action on this bill in view of the favorable action taken in the House Ways and Means Committee.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2933

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

(a) IN GENERAL.—Subpart D of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to possessions) is amended by inserting after section 934 the following new section:

"SEC. 934A. REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

"(a) GENERAL RULE.—For purposes of determining the tax liability incurred by citizens and resident alien individuals of the United States, and corporations organized in the United States, to the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands—

"(1) the rate of the taxes imposed by sections 871(a)(1) and 881 shall not exceed 10 percent, and

"(2) subsection (a) of section 934 shall not apply to such taxes.

"(b) REDUCED RATES NOT TO APPLY TO PRE-EFFECTIVE DATE EARNINGS.—

"(1) IN GENERAL.—The reduction under subsection (a)(1), and any reduction under section 934 pursuant to subsection (a)(2), in a rate of tax imposed by section 871(a)(1) or 881 shall not apply to dividends paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction.

"(2) ORDERING RULE.—For purposes of paragraph (1), dividends shall be treated as first being paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction (to the extent thereof)."

(b) WITHHOLDING.—Subchapter A of chapter 3 of such Code (relating to withholding of tax on nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING ON VIRGIN ISLANDS SOURCE INCOME.

"For purposes of determining the withholding tax liability incurred to the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands by citizens and resident alien individuals of the United States, and corporations organized in the United States, the rate of withholding tax under sections 1441 and 1442 on income subject to tax under section 871(a)(1) or 881 shall not exceed the rate of tax on such income under section 871(a)(1) or 881, as the case may be."

(c) TECHNICAL AMENDMENT.—Subsection (a) of section 934 of such Code is amended by inserting before the period at the end thereof "or in section 934A".

(d) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart D of part III of subchapter N of chapter 1 of such Code is amended by inserting after the item realating to section 934 the following new item:

"Sec. 934A. Reduction in income tax rate on Virgin Islands source income."

(2) The table of sections for subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1444. Withholding on Virgin Islands source income."

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to amounts received after the date of the enactment of this Act in taxable years ending after such date.

(2) WITHHOLDING.—The amendment made by subsection (b) shall apply to payments made after the date of the enactment of this Act.

By Mr. KENNEDY (for himself, Mr. HATCH, Mr. BUMPERS, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. CRANSTON, Mr. DECONCINI, Mr. DOLE, Mr. DURENBERGER, Mr. EXON, Mr. GORTON, Mrs. HAWKINS, Mr. HEINZ, Mr. INOUYE, Mr. MATHIAS, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. PELL, Mr. QUAYLE, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, Mr. STAFFORD, Mr. TSONGAS, Mr. WEICKER, and Mr. LUGAR):

S.J. Res. 249. Joint resolution to provide for the designation of the month of October 1982, as "National Spinal Cord Injury Month"; to the Committee on the Judiciary.

NATIONAL SPINAL CORD INJURY MONTH

● Mr. KENNEDY. Mr. President, over 500,000 Americans are now paralyzed because of spinal cord injuries. Each year an additional 20,000 Americans fall victims to this devastating condition. Of these, 80 percent are young men, at the average age of 19, injured as a result of motor vehicle accidents, falls, sports and recreational activities, and violence.

Spinal cord injury represents the single most expensive medical problem in the United States today. The lifetime costs to sustain a person with spinal cord injury paralysis are between $1 and $5 million.

Nationally, the costs are proportionately staggering: The annual costs to the U.S. Government for the support and care of spinal cord injured persons, including veterans, has been estimated to be $3 billion. In addition to the Government's contribution, private dollars add another estimated $3 billion.

Despite its prevalence, the general public is virtually ignorant of the profound personal consequences and the staggering costs faced by the victims of spinal cord injury and their families. Spinal cord injured persons require the delivery of prompt, first-rate care, both acute and chronic.

However, it is believed that only 15 percent of the newly injured spinal cord victims receive appropriate, immediate, and quality medical attention. The results and prognosis for patients whose immediate care is mismanaged can be catastrophic—physically, psychologically and financially.

The rehabilitation picture, like that of acute care, is not much better. Institutions that have the sufficient information, technology, and resources to provide good care, training, and reasonable hope of independence to a victim of spinal cord injury paralysis are not numerous. Thousands of people needlessly waste away in rehabilitation halls, or return home to empty rooms, absent families, and inadequate medical attention.

However, paralysis due to spinal cord injury need not remain permanent, as was previously believed. Recent breakthroughs in spinal cord regeneration research offer unprecedented promises. Scientists around this country—and in other countries—have reached the consensus that a cure is not only feasible, but inevitable.

Transplant techniques, genetic engineering, biochemical and neurophysiological discoveries offer unprecedented promise for not only modifying, but preventing and curing the paralysis that follows a spinal cord injury. Evidence suggests that the human spinal cord is capable of regeneration and that restoration of function to paralyzed muscles is possible.

Until a cure for spinal cord paralysis can be found, it will continue to strike productive citizens in the prime of their lives. Each day, researchers seeking contributions and support will need to educate the public about the nature of spinal cord paralysis and the prospects for a cure. And each day, organizations like the National Spinal Cord Injury Association and the Paralyzed Veterans of America, committed to bringing together research and service will need resources, both economic and technical, to continue the delivery of quality health care to all spinal cord injured persons, both acute and chronic.

I propose we designate October of this year as National Spinal Cord Injury Month, to focus the attention of the public on the need to address this critical health care problem that touches the lives of millions of Americans. It can help to offer hope to the many people whose lives are drastically changed by spinal cord injuries. And it can provide the impetus to keep research going and to increase public support for programs to aid spinal cord injured victims and their families.

Four of our friends and distinguished colleagues on the House side, Congressmen WALGREN, WAXMAN, and LELAND, and Congresswoman MIKULSKI have sponsored a similar resolution, House Joint Resolution 598, in the House. Clearly, they feel that the problem of spinal cord injury paralysis is in greater need for attention and encouragement to raise our national consciousness about the needs of the spinal cord injured victim.

That is why I have introduced this resolution designating the month of October as National Spinal Cord Injury Month. It is why so many other Senators, more than 25, have agreed to be original cosponsors of this resolution.

I solicit the support of my colleagues for this resolution, and I respectfully request the President and the majority and minority leaders for their considerable assistance in granting this legislation the very earliest action.●

● Mr. WEICKER. Mr. President, I am pleased to join with my colleague, the distinguished senior Senator from Massachusetts in cosponsoring this resolution to designate October of this year as National Spinal Cord Injury Month.

The first step toward reaching a solution to any problem is recognizing that the problem indeed exists. In the case of devastating spinal cord injury, the 500,000 Americans now disabled, and the 20,000 additional victims injured each year know only too well its tragic effects. And the costs in both human and economic terms are indeed staggering.

By calling the prevalence of spinal cord injury to the attention of the American people it is my hope that the public awareness so critical to marshaling the resources necessary to identify a cure for spinal cord injuries will be heightened.

Our Nation's medical researchers can build on the regeneration research already yielding great promise for spinal cord injured persons. We have the capability to move forward in this area: All that is needed is the will and commitment to do so. This resolution is an expression of the Congress' awareness and I urge all my colleagues to support it.●

ADDITIONAL COSPONSORS

S. 2061

At the request of Mr. MOYNIHAN, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 2061, a bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public and Indian lands, and for other purposes.

S. 2204

At the request of Mr. HATFIELD, the names of the Senator from Washington (Mr. GORTON), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 2204, a bill to promote interstate commerce by prohibiting discrimination in the writing and selling of insurance contracts, and for other purposes.

S. 2805

At the request of Mr. HATFIELD, the names of the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of S. 2805, a bill to provide for the orderly termination, extension, or modification of certain contracts for the sale of Federal timber, and for other purposes.

S. 2901

At the request of Mr. DOLE, the name of the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 2901, a bill to establish a National Commission on Neurofibromatosis.

SENATE JOINT RESOLUTION 225

At the request of Mr. EAGLETON, the names of the Senator from Oregon (Mr. HATFIELD), the Senator from Arkansas (Mr. PRYOR), the Senator from Georgia (Mr. NUNN), the Senator from South Carolina (Mr. THURMOND), the Senator from New York (Mr. D'AMATO), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of Senate Joint Resolution 225, a joint resolution to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week."

SENATE JOINT RESOLUTION 245

At the request of Mr. KENNEDY, the names of the Senator from Nevada (Mr. CANNON), the Senator from Illinois (Mr. DIXON), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of Senate Joint Resolution 245, a joint resolution making an urgent supplemental appropriation for the Department of Labor for the fiscal year ending September 30, 1982.

SENATE CONCURRENT RESOLUTION 61

At the request of Mr. MATTINGLY, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of Senate Concurrent Resolution 61, a concurrent resolution to direct the Commissioner of Social Security and the Secretary of Health and Human Resources to conduct a study on steps which might be taken to correct the social security benefit disparity known as the notch problems.

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Maryland (Mr. SARBANES), and the Senator from California (Mr. CRANSTON) were added as cosponsors of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. PERCY, the name of the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of Senate Concurrent Resolution 122, a concurrent resolution relating to the processed product share of U.S. agricultural exports.

SENATE RESOLUTION 469—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 469

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 5203, an act to amend the Federal Insecticide, Fungicide, and Rodenticide Act.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to extend the Federal Insecticide, Fungicide, and Rodenticide Act which is the basic

statute regulating the use of pesticides in the United States. That Act is administered by the Environmental Protection Agency which is charged with the responsibility for ensuring that pesticides do not cause unreasonable adverse effects on the environment. The Act is primarily carried out through a complicated registration program for pesticides, which is important to ensure the availability of safe and effective pesticides in this country.

H.R. 5203 is an extremely complex piece of legislation that is intended to correct problems that have been experienced in the operation of the pesticide registration program. The delay in reporting H.R. 5203 was occasioned by the need for time to develop and refine, with the interested parties, many of the important legislative proposals to be considered.

SENATE RESOLUTION 470—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 470

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2279, a bill to designate Alben Barkley National Historic site. S. 2279, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983.

The waiver of section 402(a) of such Act is necessary to permit Congressional consideration of S. 2279. Such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

SENATE RESOLUTION 47—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. BAKER (for Mr. MCCLURE), from the Committee on Energy and Natural Resources reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 471

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 6188, a bill to authorize the Secretary of the Interior to participate with the State of Nebraska in studies of Platte River water resource use and development, and for other purposes. H.R. 6188, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983.

The waiver of section 402(a) of such Act is necessary to permit Congressional consideration of H.R. 6188. Such bill was not reported on or before May 15, 1982, required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The State of Nebraska has been actively engaged in the preparation of the comprehensive Platte River Basin study since January 1982. Contracts have been let for portions of the study and funds have been appropriated by the State Legislature. In addition, funds have been contributed at the local level as well as a grant has been made by the Platte River Whooping Crane Trust. The study and related activities have been premised on participation by the Bureau of Reclamation and Federal financial assistance. Without that participation, the study will be indefinitely delayed resulting in increased costs and possibly lost opportunities for advancement of water resource management in Nebraska.

AMENDMENTS SUBMITTED FOR PRINTING

TEMPORARY EXTENSION OF PUBLIC DEBT LIMIT

AMENDMENT NOS. 3422 THROUGH 3575

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted 154 amendments intended to be proposed by him to the joint resolution (H.J. Res. 520) to provide for a temporary extension in the public debt limit.

AMENDMENT NO. 3576

(Ordered to be printed and to lie on the table.)

Mr. HELMS submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 520), supra.

AMENDMENT NO. 3577

(Ordered to be printed and to lie on the table.)

Mr. CHILES (for himself and Mr. NUNN) submitted an amendment intended to be proposed by them to the joint resolution (H.J. Res. 520), supra.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Subcommittee on Urban and Rural Economic Development, Committee on Small Business, will hold a hearing on Tuesday, September 28, 1982, room 424 of the Russell Senate Office Building, at 9:30 a.m., on "Oversight Hearing on SBA's Section 503, Economic Development Program." Senator ALFONSE D'AMATO will chair the hearing. For further information, please contact Bob Wilson of the Small Business Committee staff at 224-2130.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, September 20, for the purpose of receiving testimony concerning S. 2784, Major League Sports Community Protection Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, September 20, to consider the nominations of J. F. Morris to be Deputy Administrator of the Agency of International Development, and Edward A. Curran to be Deputy Director of the Peace Corps.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 21, at 2:30 p.m., to consider the nominations of Theodore C. Maino to be Ambassador to the Republic of Botswania; Peter Dalton Constable to be Ambassador to the Republic of Zaire; and Robert B. Oakley to be Ambassador to the Somali Democratic Republic.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 21, at 3:30 p.m., to hold a top secret consultation on START.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ALCOHOLISM AND DRUG ABUSE

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Alcoholism and Drug Abuse, of the Committee on Labor and Human Resources, be authorized to meet during the session of the Senate on Tuesday, September 21, at 11:30 a.m., to hold a hearing on the effects of alcohol consumption during pregnancy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FOREIGN AGRICULTURE POLICY

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Foreign Agriculture Policy, of the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Tuesday, September 21, at 9:30 a.m., to hold an oversight hearing on the benefits of processed and value-added products for agriculture exports.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of

the Senate on Tuesday, September 21, at 10 a.m., to hold an oversight hearing on the Department of Energy's laboratories.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 22, at 10 a.m., to hold an oversight hearing on benefits to former Presidents.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, September 23, at 2 p.m., to hold a hearing on the nomination of K. William O'Connor to be special counsel for the Merit Systems Protection Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION ACT

● Mr. QUAYLE. Mr. President, I am pleased to cosponsor the Migrant and Seasonal Agricultural Worker Protection Act (MSPA) with Senator HATCH. This bill will replace the Farm Labor Contractor Registration Act (FLCRA) which was enacted in 1964 and amended several times thereafter. The purpose of this bill is to regulate the activities of farm labor contractors and to shield migrant and seasonal farmworkers from those crew leaders who are unscrupulous. We believe that this legislation is still needed because abuses of migrant and seasonal farmworkers continue despite unceasing efforts by the Department of Labor to enforce the provisions of the act and guarantee its protections to farmworkers. We feel it is critical that farmworkers continue despite unceasing efforts by the Department of Labor to enforce the provisions of the act and guarantee its protections to farmworkers. We feel it is critical that farmworkers be afforded all the protections of the law; at the same time we are convinced that farmers and other agricultural processors and producers who treat their employees fairly should be free from harassment and Government intervention in their businesses. The Migrant and Seasonal Agricultural Worker Protection Act is designed to accomplish just that.

This bill is the result of a compromise worked out by farmworker representatives and employer representatives. It has been the subject of negotiations for over a year. We now have before us a consensus bill which has the administration's fullest support as well as that of the AFL-CIO, the National Council of Agricultural Employers and the American Farm Bureau Federation. These groups and many others have voiced their support for this bill. I understand that agricultural employers continue to believe that imposition of many of the bill's requirements upon employers of local and seasonal workers is unnecessary, and to a degree discriminatory. At the same time, they approve and support enactment without change of the Migrant and Seasonal Agricultural Worker Protection Act as a significant and much needed improvement over the Farm Labor Contractor Registration Act.

The Migrant and Seasonal Agricultural Worker Protection Act represents a significant departure from current law. However, FLCRA has been subject to many legal challenges and much litigation has arisen over the interpretation of who must register as a farm labor contractor. In my work as chairman of the Employment and Productivity Subcommittee, which has jurisdiction over FLCRA, I have learned that those problems have been particularly difficult with regard to fixed situs employers such as farmers, whose status has been subject to continuous litigation. Endless legal issues have greatly hindered effective administration of the act and I feel that the proposed bill will help to remedy that problem.

The proposed bill makes several fundamental changes from current law. These changes are needed attempts to deal with the problems that have arisen under FLCRA and relate specifically to those difficulties. The first difference between this bill and current law is that it distinguishes between the traditional farm labor contractor and the fixed situs agricultural employer by eliminating the requirement for agricultural employers to register as farm labor contractors. This change eliminates an extremely burdensome and unnecessary requirement for agricultural employers. There is good reason why the customary agricultural employer should not be required to register under the act. Basic differences distinguish the traditional "crew pusher" from the farmer. By definition, crew leaders are usually transient and hard to find. They will often recruit a crew in Louisiana or Texas or some other State and transport their crew to work elsewhere. Traditional crew leaders are hard to find, and even harder to locate and control. Farmers and processors, on the other hand, are quite easy to find. They are permanently located and are tied to their farm, processing plant, or other property. If it appears that they are abusing migrant workers, they can easily be held accountable under the many laws that protect migrant and seasonal farmworkers. Indeed, registration requirement for fixed situs employers are redundant and unnecessary.

A second major change of the proposed bill clarifies the extent to which agricultural employers are responsible for worker protections. While the bill maintains the worker protections in FLCRA, it specifically requires agricultural employers to comply with basic vehicle safety, sanitary and housing standards, reporting and withholding requirements, and records maintenance and preservation. Agricultural employers have agreed that this is a necessary part of the new act and support this clarification.

The proposed bill makes three other changes which are significant. The bill distinguishes between true migrant workers, who travel from State to State in search of work, and seasonal farmworkers who work in the area around their home, but who are not required to be away from home overnight. This distinction is important because "day-haul" workers will be covered under the new definition of seasonal agricultural workers. "Day-hauls," like seasonal workers work the area around their home, but they may be only occasional workers, picked up at an agreed point in a city or town and returned to that same point each night. The DOL feel that coverage of these workers is essential to this bill irrespective of whether those workers are living away from home because DOL has found "day-haul" workers highly vulnerable individuals who can easily be subject to abuse.

Another important change in this bill is a specific exemption for labor unions, small businesses, and family businesses. Finally, the MSPA eliminates the vague and ambiguous language which has lead to so much litigation under FLCRA. The format of FLCRA begins by broadly describing activities in which many who are obviously not crew leaders frequently engage, then narrowing the scope by a series of exclusions until supposedly only crew leaders remain. In theory such a drafting plan can be made to work, but here the combined effect of the format, vague definitions, and vague qualifications within exclusions have provided the legalistic rationale for a subversion of Congress clear intention that farmers, and other agricultural producers as well as migrant and seasonal farmworkers be protected from unscrupulous crew leaders.

In summary, the Migrant and Seasonal Agricultural Worker Protection Act would abolish the unclear and oftimes confusing language of the Farm Labor Contractor Registration Act. It would continue to provide and even expand protections for migrant and

local seasonal farm workers. It would remove certain unnecessary and burdensome requirements upon agricultural employers and agricultural associations, and will clarify language and criminal penalties and court awards as well. Thus, this act will serve the interests of both employers and workers alike. I support this bill, and urge my colleagues to do the same.●

AMERICAN CONSERVATION CORPS—S. 2061

● Mr. MOYNIHAN. Mr. President, I would again like to bring to my colleagues' attention that the Subcommittee on Public Lands will hold a hearing this Wednesday, September 22, to discuss S. 2061, a bill Senator MATHIAS and I have introduced to create an American Conservation Corps. Seventeen members of this Chamber are cosponsoring S. 2061, and the legislation has attracted widespread editorial support. Sunday's New York Times ran a perceptive piece by the eminent columnist Tom Wicker on the need for an American Conservation Corps, and I ask that it be printed in the RECORD.

The article follows:

[From the New York Times, Sept. 19, 1982]

RECYCLING AN IDEA

(By Tom Wicker)

Near my hometown in the Sandhills of North Carolina, stands of tall pine trees line the roadsides, the gray earth beneath them richly carpeted with brown needles. The trees grow in straight rows, as if planted that way by human design.

They were. I well remember from the 1930's the young men of the Civilian Conservation Corps setting them out, in row after row of pine seedlings across the eroded old fields. That kind of thing made the C.C.C. one of the most useful and successful projects of the New Deal.

President Reagan, sometimes an admirer of Franklin Roosevelt, has a good piece of evidence close at hand. Camp David, where he spends weekends and entertains foreign visitors, was built by the C.C.C. as a low-cost resort for Federal workers.

The C.C.C. lasted for nine years, employed over three million Depression-age younsters, planted 1.3 billion trees and carried out conservation projects worth $1.5 billion. Much of this work, like those North Carolina pine forests, is still visible and still environmentally valuable nearly 50 years later.

There's no way to measure the other achievements of the C.C.C.—the hope it gave to the hopeless, the skills it taught the unskilled, the social dynamite it defused by providing alternatives to idleness and resentment, even the quasi-military field life to which it introduced a generation destined to emerge from Depression into World War II.

Senator Daniel P. Moynihan of New York and his Republican co-sponsor, Senator Mac Mathias of Maryland, now propose a rebirth of this proven program—proven not only in the old C.C.C. but in more recent examples such as California's flourishing Conservation Corps. The House already has passed its own bill setting up a National Conservation Corps; a Senate subcommittee will open hearings on the Moynihan-Mathias bill Sept. 22.

The idea is simplicity itself. About 70,000 to 100,000 unemployed young people—aged 16 to 25, men and women—would be paid the minimum wage to fill conservation-related jobs. An additional summer work force would be recruited among those 15 to 21. Preference would be given to the disadvantaged, or to those who live in areas of particularly high unemployment.

What would they do? One idea comes from the Office of Management and Budget and the Interior Department, although the Reagan Administration so far opposes the conservation corps concept. These agencies want to use revenues earmarked for new park acquisition for the rehabilitation of existing parklands—many of which badly need it. Mr. Moynihan sees this as a project that could be carried out splendidly by the proposed corps of young workers.

There's no lack of other suitable and needed tasks—reforestation, roadbuilding, bridge and dam construction, cutting fire trails and fighting forest fires, drainage and flood control projects, land reclamation, to name only a few.

The program would be paid for by earmarked Federal revenues from various leasing and permit activities on Federal lands—oil and gas leasing, for example, or timber cutting.

The House-passed bill, principally sponsored by Representative John Seiberling of Ohio, provided for $50 million in fiscal 1983 and $250 million in each of the following five years—an affordable total of $1.3 billion between now and 1989. The House bill requires the states to match 15 percent of these funds; the Senate may increase that requirement.

The Administration opposes the legislation on the grounds that two smaller conservation corps programs, now defunct, were not effective; but that's a weak case.

Mr. Moynihan says that in New York State alone, the former Young Adult Conservation Corps returned $2.83 in appraised work for every dollar spent; the costlier Youth Conservation Corps returned $1.04 per dollar invested. And those figures don't measure the job skills, character development and sense of self-worth imparted to many participants, or whatever reduction in youth crime and delinquency might have resulted.

The California Conservation Corps, functioning since 1977, costs $36 million annually and pays the minimum wage to a turnover of about 4,000 young people a year, for an average of six months each. In 1981, the corps logged three million hours of work, a third in emergency situations, the rest in home and forest improvement, conservation and historical preservation. Three million trees were planted that year.

The California C.C.'s slogan—"Hard Work, Low Pay, Miserable Conditions"—suggests that it is not a picnic or hiking trip. A Federal version could be just as demanding; and, among other things, it probably would do more to diminish street crime than any of the dubious crime-fighting proposals President Reagan recently unveiled.

Just in case he thinks he has philosophical objections, he might remember something called the Ecology Corps, a forerunner of the California Conservation Corps. You guessed it. The Ecology Corps was launched by Governor Ronald Reagan, and a good day's work, too.●

MANDATORY NATIONAL SERVICE: IDEALISM GONE WRONG

● Mr. HATFIELD. Mr. President, as expenditures for exotic weaponry and protracted nuclear conflict continue to rise, the fundamental components of Armed Forces readiness are the first to bear the brunt. We have been down this road before. Those who would have us abandon the volunteer concept in exchange for a draft are generally disinclined to protest such shifts in priorities for it constitutes the surest means of obtaining their goal. We are witnessing such a drift today.

Perhaps the most dangerous adjunct to this strategy to bring back the draft is the national service concept. It is little more than a wolf in sheep's clothing so far as the draft is concerned. Mr. Douglas Bandow, who formerly worked for the White House and is now the editor of Inquiry magazine makes an excellent case for the dismissal of the national service concept in an article he published in the Los Angeles Times. I submit it for the RECORD for the benefit of my colleagues.

The article follows:

[From the Los Angeles Times, Feb. 14, 1980]

MANDATORY NATIONAL SERVICE: IDEALISM GONE WRONG

(By Doug Bandow)

Not satisfied with the federal government's previous failures in attempting to restructure and reform American society, an odd coalition of liberals and conservatives is seeking to commit the United States to the most ambitious social-engineering scheme ever. This disparate group has been pushing for the institution of mandatory national service, which would force all American young people to turn their lives over to the government for a specified period.

The plan that has received the most attention so far is that of Rep. Paul N. (Pete) McCloskey Jr. (R-Calif.), which would require that every person register before reaching his or her 18th birthday and choose from among four different military and civilian service alternatives. University of Chicago economist Morris Janowitz advocates a longer-range compulsory program. And in a report for the Washington think tank, the Potomac Institute, the Committee for the Study of National Service offers a detailed voluntary plan.

Such proposals are not new. In 1887 Edward Bellamy proposed a truly universal plan, one that encompassed the old as well as the young. Others, from William James in 1910 to Margaret Mead in 1967, have suggested national service as a solution to many of society's ills.

National-service proponents embark on this authoritarian course for two reasons. The first is to force the inculcation of their own values in the otherwise unreceptive younger generations. Bellamy, for example, expected his plan to teach men the "habits of obedience, subordination and devotion to duty." Mead suggested that national service would provide young people with a sense of satisfaction. Contemporary proponents have called it a way to "restore civic morality," to cultivate "altrusin" and to emphasize "collective rather than individualistic goals."

The second rationale joins this hope of personal growth with the goal of solving the problems of society. The Potomac study committee's report lamented that "until the spirit of service is restored among American citizens, the most pressing human problems of society will not be solved." Thus national service is seen as a way to end youth unemployment and to fulfill society's unmet needs. Others such as economist Janowitz, see national service as necessary to meet our military needs while eliminating the obvious inequities of a selective military draft.

Though these goals are praiseworthy, the methods are untenable. Not content with relying on voluntary association in a free society, service proponents are seeking to turn every young person into a government resource to be exploited at will. Even the study committee, which recommended a voluntary program, admitted that "only by a mandatory system could we be sure that those who may need the experience the most will serve."

This is the crux of the matter. National-service supporters recognize that most American youth, whether rich or poor, privileged or not, do not want to turn their lives ever to high-minded paternalists. Thus they must be forced to do so.

There is simply no adequate justification for allowing these self-appointed guardians of the public interest to fix their personal goals for a beneficient society on the young. In a free society, it should be up to each individual to determine his or her commitment to that society, and the level of service that he or she feels obligated to provide. Even if most people believe that an obligation of some sort is imposed by merely living—a presumptious notion at best—it is still strictly a personal, moral burden, not one that should be enforced by law.

Moreover, if service is owed to the country, it is strange that only the young are liable for the debt. Virtually all national-service proponents talk as if the young are singularly selfish, wayward, insensitive and parasitic. Thus everyone else—those who are safely out of the proposed age range of service—can stand back and determine what the goals of the young should be, and how their particular moral obligations should be fulfilled.

It has been suggested that national service is an equitable alternative to a selective military draft. Though a draft is obviously unfair in that only some people must serve, it is likely that the young would prefer an equal chance of being drafted to an equal certainty of involuntary service.

Even if one accepts the premise of national service, it is difficult to see how many of the proposed programs would achieve their lofty goals. The idea of compulsery compassion is nonsensical; service ceases to be service once it is coerced. Thus, rather than "imbuing youth with the spirit of service to society," involuntary servitude will succeed only in embittering them toward an oppressive government. Rather than cultivating "altruism," such a program would merely highlight the selfishness of the rest of the population that exempted itself. And the "civic morality" that would be learned would be that of the power to force others to do one's will.

The preponents of national service have accurately identified many of the problems facing our nation—youth unemployment, unmet social needs, national defense. But their proposed solution is incompatible with a free society. This is illustrated even by the study committee's own report, which noted that two members traveled to China and "came back impressed and challenged by the extraordinary mobilization of the talent of young people possible under authoritarian, post-revolutionary conditions. They came back more determined than before to try to devise a democratic equivalent."

What these members apparently don't realize is that there can be no equivalent program in a free society. In China, the state owns every person, and can therefore allocate lives at will. In contrast, a free society must be built on the opposite premise—that each individual is entitled to run his or her own life as long as that person doesn't interfere with the rights of others. Mandatory national service—no matter how short, no matter how well-intentioned, no matter what—is inconsistent with the personal freedom of us all.

A truly free society should seek to generate the voluntary support necessary to solve its problems. A society without the moral authority to persuade people to freely come to its aid surely lacks the moral right to force those same people to support it.●

FESTIVAL OF LIGHT

● Mr. KASTEN. Mr. President, I rise today to bring to the Senate's attention an event which will take place later this month in the Fox River Valley in Wisconsin—the Fox Valley Festival of Light.

The Fox Valley Festival of Light is a 4-day celebration scheduled in Appleton, Wis., September 30 to October 3, 1982. The purpose of the festival is to celebrate the centennial of the first practical, commercial application of hydroelectric power in the United States. The first water-driven Edison electric central station was placed in successful operation at Appleton on September 30, 1882.

Over the past century, our Nation has changed dramatically. Much of the progress we have made as a Nation can be attributed to our ability to harness electrical power. The industrial revolution was made possible by our ability to constructively use electricity and, today, America is a world leader in the electricity-powered computer industry. In additon, nearly every convenience of modern-day living relies on electricity. From televisions and stereos to refrigerators and hairdryers, electricity had played a vital role in making our lives what they are today.

Mr. President, a major step in the history of electricity took place in the Fox River Valley in 1882 when a group of Appleton businessmen successfully tested a variation of Thomas Edison's incandescent lamp and brought the first hydroelectric light in America to an Appleton home and a few mills.

The progress made in the Fox Valley is representative of the progress made across the Nation with the coming of commercial electricity. Fox Valley industry left behind the era of gaslights and kerosene lamps and leaped into the future. One of the many resulting achievements was the development of Wisconsin's first hydroelectric trolley in 1886.

Mr. President, on behalf of the U.S. Senate, I commend the people of the Fox River Valley on the work they have done to put the Festival of Light together, and wish them success as they celebrate the historical event that took place in Appleton a 100 years ago.●

DISCHARGE OF SENATE RESOLUTION 447

● Mr. DOMENICI. Mr. President, S. 1606, the Electric Utility Nuclear Accident Cost Allocation Act was reported by the Committees on Energy and Natural Resources and Environment and Public Works on August 13, 1982. Senate Resolution 447 to waive section 402(a) of the Congressional Budget Act was referred to the Budget Committee on August 13, 1982.

This act would establish a national trust fund for the purpose of allocating and defraying costs of the cleanup of Three Mile Island Unit No. 2 (TMI-2). Income to the fund would be derived from an annual fee on nuclear powerplant capacity owned by nuclear utilities. Fees would be assessed during calendar years 1982 through 1987, and the receipts would be available without fiscal year limitation.

A waiver was requested because it was believed that the bill authorized appropriations. Upon reviewing the text of the bill after the final version was reported, Budget Committee staff concluded that a waiver was not required because S. 1606 did not authorize the enactment of new budget authority.

Therefore, Mr. President, the waiver request has been discharged from consideration by the Committee on the Budget, because no action on the part of our committee was necessary.●

MASSACRE IN BEIRUT

● Mr. PELL. Mr. President, I am deeply shocked and saddened by the senseless slaughter that took place at the Palestinian refugee camps in Beirut late last week. Israel claimed that its forces occupied West Beirut in an effort to avoid bloodshed following the assassination of President-elect Gemayal. Yet, according to press accounts, including one report quoting an Israeli Government source as saying that Israel knew in advance about Lebanese militia plans to enter the refugee camps, Israeli forces did nothing to prevent the militia forces from entering the camps.

By all accounts Israeli forces were not directly involved in the killings and apparently even tried to expel the militia forces once it was known what the militia was doing; nevertheless Israel must bear a share of the respon-

sibility for what happened at camps it controlled. Given the conflict and the animosity that have razed Lebanon for 7 years, Israel should have known what would happen by permitting militia forces to enter the refugee camps. More generally, what happened in Beirut is the logical consequence of an Israeli policy of arming private Lebanese militias and giving them free rein in the areas occupied by Israeli forces.

Israel should now withdraw entirely from Beirut and turn over security for the city to the Lebanese army and whatever U.N. and Western forces are willing to assist the Lebanese in protecting innocent civilians. The highest priority should also be given to negotiations to remove all Israeli, Syrian, and PLO forces from Lebanon so that the Lebanese can solve their own problems.●

AMNESTY FOR ILLEGAL ALIENS

● Mr. EAST. Mr. President, Edwin Harwood, a national fellow at the Hoover Institution, recently analyzed the immigration reform bill passed by the Senate a few weeks ago. Mr. Harwood, writing in the Wall Street Journal for September 17, 1982, notes that the amnesty provisions are an open invitation to massive fraud.

Mr. Harwood makes the point that Congress has failed to give the Immigration and Naturalization Service the resources to enforce the existing laws in the face of escalating illegal entries. Our illegal immigration crisis is a law enforcement breakdown. We cannot solve the problem without spending more money and having the courage to enforce the laws. Most of the additional funds needed for immigration law enforcement could be raised by modest user fees charged those who cross our borders. Where Congress and the administration will obtain the determination to enforce the law in the face of noisy charges of discrimination, I cannot say.

I ask that Mr. Harwood's essay be printed in the RECORD for the benefit of my colleagues.

The essay follows:

[From the Wall Street Journal, Sept. 17, 1982]

CONGRESS'S BAD IMMIGRATION BILL

(By Edwin Harwood)

Congress is considering a measure that its supporters think would effectively reduce the problem of people entering the U.S. from countries such as Mexico to work here illegally. The 1982 Immigration Reform and Control Act has passed the Senate and is in the House, its last hurdle before reaching the president.

Should this Simpson-Mazzoli bill become law, it would legalize millions of illegal aliens by granting them temporary or permanent legal-resident status, depending on their length of residence here. In exchange for a generous amnesty, the bill's supporters are counting on the bill's "employer sanctions" to deter future illegals. Facing fines of $1,000 or $2,000 per illegal alien caught working, the argument runs, employers won't want to hire them. As a result, the aliens won't want to come.

Will it work? If Congress better understood the Immigration and Naturalization Service's problems with current immigration law enforcement, the optimism might sour.

First, there's no assurance Congress will grant enough funds to step up enforcement. Even if it does, it may not be enough to overcome the many legal and logistical handicaps the immigration service will have to deal with.

For example more funds for the Border Patrol will increase apprehensions of border-crossers, but unless these people are smuggling-guides or have been caught crossing too many times, almost all will get the penalty-free "voluntary return" to Mexico, whence they are free to re-enter. The revolving door, as agents describe it, may just revolve faster.

WOULD LIBERALS APPROVE FUNDS?

If more were held for deportation hearings, that would increase the cost to illegals because most of them can't post bond and would be detained. But that requires more detention space, and congressional liberals aren't about to fund that. But even with more detention space, more immigration judges would be needed to handle the load. Because immigration courts in places like Los Angeles and El Centro (the main detention facility in California's Imperial Valley) already have as much business as they can handle, even a deportation hearing isn't much penalty. It will keep a Mexican national away from his job for a week or two while he sits in El Centro. He's still apt to be granted voluntary return in exchange for waiving his appeal to the Board of Immigration appeals, which has its own backed-up caseload, Congress has mandated these generous appeals provisions and INS resources are at the breaking point in some districts.

Federal court rulings have also weakened the ability of U.S. attorneys to prosecute immigration violations with criminal punishments that sting. Miranda, the probable-cause requirement for smuggling searches, tougher evidence standards, and the federal Ninth Circuit Mendes-Rodriques requirement that aliens picked up in a smuggling load (sometimes they can number 70 or more) be held as material witnesses have stretched INS enforcement resources to the point where federal prosecutors must plea bargain many alien smuggling felonies down to misdemeanors.

Will employer sanctions repair all this? Perhaps, if aliens *believe* that employer sanctions work. Unfortunately news of any new weaknesses in the INS legal or resource operations spreads quickly, thanks to the illegal-alien grapevine and activist lawyers who repeatedly file suits they know will hamstring the immigration service.

The bill's amnesty provision could encourage more Mexican nationals to choose deportation hearings since voluntary return might jeopardize their legalization chances. The result: more clogging of the appeals system.

The Reagan administration may be hoping that the legalization of large numbers of illegals already here will free INS resources to check employer verification of alien job-holders. But the proposed amnesty is the joker in the deck. Amnesty fraud could well eclipse marriage and all the other frauds currently perpetrated by aliens wanting immigrant status, because if an alien gets legalized through amnesty, he won't have to worry about employer verification. With the Mexican economy collapsing, many are sure to try.

If voluntary agencies do the initial amnesty screening, as the bill contemplates, will their staffs be sufficiently trained and motivated to sniff out suspect legalization documents? Though the burden of proof may initially fall on the alien to establish his continuous residence before the cut-off dates, aliens and their attorneys are sure to litigate over the documentation requirements, charging "arbitrary and unreasonable" discretion by INS officers who turn applications down because of insufficient bona fides. Standards intended to screen out amnesty fraud could weaken as the burden of proof reverts to the INS to establish that an alien hasn't been living in the U.S. as long as he claims.

It's already happened with the present law's marriage provision: Though the burden of proof of a bona fide marriage to an alien once fell on the citizen and alien, the courts have put it back on to the service by requiring the INS to prove fraud. The result: Marriage fraud is tougher to weed out now. With only 700 INS criminal investigators, is it reasonable to think they can investigate thousands of suspect amnesty applications on top of their workloads?

But if amnesty fraud isn't checked, the word will be out and the rush to the borders will be on. Document counterfeiters in Tijuana and elsewhere are apparently already gearing up production.

The employer sanctions will also create headaches. Will an employer hire an alien who lacks the required work-verification documents but says he qualifies for amnesty? Might employers who refuse to hire an amnesty litigant be taken to court by the alien? Or will the INS sue an employer who keeps the alien on?

Employers who follow the Simpson-Mazzoli verification procedure of checking drivers licenses, Social Security cards, etc. have little to fear. They've complied in good faith. They can't be expected to detect document fraud, so once again the burden shifts back to the immigration service.

A CATCH-22 RULING

If the service acts on employers' suspicions, the activists will complain that Latinos are being unfairly singled out, because if employers report their suspicions at all (the House Judiciary Committee's concern about this issue notwithstanding), they're more apt to report less sophisticated blue-collar Hispanics than, for example, white-collar Filipinos, Canadians and other nationalities.

If the INS returns to the "factory survey," which is how most apprehensions inside the U.S. are obtained, and enter businesses they receive tips on to question workers, officers face the Catch-22 ruling handed down recently by the federal Ninth Circuit in the Government Workers Union case. With Alice-in-Wonderland logic, the Ninth Circuit suggested that employer sanctions be relied upon for halting the influx of illegals, while at the same time prohibiting INS agents from conducting factory surveys in a "detentive" manner violating the Fourth Amendment rights of citizen and legal-resident workers in a plant. INS investigators in the Ninth's jurisdiction must now have reasonable suspicion that each worker they subject to detentive questioning is an alien illegally in the country. But unless workers

bolt and run, an officer can't easily know which workers are illegal until after he talks to them. Barring a Supreme Court ruling in the service's favor, INS officers are going to have trouble. If illegals can be spotted, then INS will still have to interview each suspect worker, a time-consuming chore.

There's another Catch-22. Unless the alien concedes his alien status, which he is under no obligation to do, the service will have to find out who he is in order to establish that he isn't authorized to work. His use of fraudulent documents to get work may make him theoretically liable to perjury but they do not establish that he is an alien.

With Simpson-Mazzoli, the cart has been put before the horse. Before passing a law with such radical innovations and then throwing it in the lap of the Justice Department to figure out how to enforce it, Congress ought first to examine whether the new provisions can be enforced any more effectively than the present law. Lawmakers should look first at what the wide appeals process and other due-process requirements have done to the parent Immigration and Nationality Act, how the courts have widened legal loopholes further and at the fact that the resources available to the INS are simply not up to the task of coping with today's avalanche of immigration cases.●

NATURAL GAS POLICY ACT

● Mr. GRASSLEY. Mr. President, I am pleased to be a cosponsor of S. 2892, which will clarify the definition of abuse in the Natural Gas Policy Act. I join my distinguished colleague from Iowa (Mr. JEPSEN) in supporting changes in the pricing policy of natural gas. It is imperative that Congress examine the issue of high natural gas prices, particularly in view of reports that the cost of natural gas will continue to rise dramatically this winter.

No issue is more important to consumers in my State than the prospect of rapidly rising fuel costs. I am sure my colleagues from other cold-climate States receive correspondence from their constituents relaying present difficulties in meeting their energy costs. The tragedy of high fuel bills is more disturbing when evaluated in conjunction with evidence that the United States is currently experiencing a natural gas surplus.

At the heart of the problem is the long-term contracts entered into by natural gas producers and pipelines. These long-term contracts were agreed to at a time when it appeared that natural gas would always be in short supply; therefore, pipelines entered into these contracts in an effort to guarantee their access to this valuable energy source. Natural gas production has increased, but the pipelines are still locked in to contractual agreements negotiated during a far different economic climate.

Iowans have been extremely successful in their conservation efforts, and the State has greatly utilized the low-income weatherization program. Rather then enjoying the benefits of their conservation efforts, the consumer is faced with rising natural gas bills. This experience is not restricted to Iowa.

S. 2892 will focus on specific ways to reduce the passthrough costs on natural gas. It gives the Federal Energy Regulatory Commission legislative authority to more appropriately evaluate these passthrough cost increase requests. The bill would expand the definition of abuse in the Natural Gas Policy Act to include restrictions on increases attributable to take-or-pay provisions, price escalator clauses, and most favored nation clauses. Additionally, a rebuttable presumption would be established for contracts which do not include "market-out" clauses.

These changes are vital to provide some measure of relief to consumers, and also to address specific inadequacies of the Natural Gas Policy Act which have become increasingly apparent.●

HARFORD COMMUNITY COLLEGE 25TH ANNIVERSARY

● Mr. SARBANES. Mr. President, for 25 years Harford Community College has been opening the doors of opportunity for the young people of Harford County, Md.

This is an outstanding center of higher education that has demonstrated real leadership in keeping pace with the rapidly growing requirements of the community that it serves so well. Once a small junior college with 119 students and four full-time faculty members, Harford Community College now has nearly 5,000 students enrolled in 770 classes, plus 6,500 students in 300 continuing education classes. Similarly, its curriculum has in 25 years been expanded and supplemented to include credit, transfer, and career programs in more than 50 disciplines.

In addition to its impressive academic opportunities, Harford Community College has been a dynamic center for cultural and artistic activities in its community. With strong focus and leadership as the responsible administrator of the county's excellent adult education program, the college has been very successful in all of these endeavors.

Mr. President, on September 24 Harford Community College will be having an academic convocation as the first part of a year-long celebration of its silver anniversary, and I wish to commend this outstanding school as a fine example of the potential for superior educational opportunities in our Nation.●

THE CONGRESSIONAL BUDGET OFFICE COST ESTIMATE OF S. 2879

● Mr. GARN. Mr. President, on September 3, 1982, I filed the Banking Committee's report to accompany S. 2879, the Depository Institutions Amendments of 1982. At that time, the Congressional Budget Office's cost estimate of the legislation was not completed. The total savings under the bill are estimated to be at least $1.5 billion over the next several years.

I ask that the CBO cost estimates for S. 2879 be printed in its entirety in the RECORD at this time.

The estimates are as follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., September 17, 1982.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing and Urban Affairs, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached revised cost estimate for S. 2879, the Depository Institutions Amendments of 1982.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

RAY C. SCHEPPACH
(For Alice M. Rivlin, Director).

CONGRESSIONAL BUDGET OFFICE

COST ESTIMATE

1. Bill Number: S. 2879.

2. Bill Title: Depository Institutions Amendments of 1982.

3. Bill Status: As ordered reported by the Senate Committee on Banking, Housing and Urban Affairs on August 19, 1982.

4. Bill Purpose:

S. 2879 would establish a program allowing the Federal Deposit Insurance Corporation (FDIC) and the Federal Savings and Loan Insurance Corporation (FSLIC) to issue income capital certificates (ICC's) to increase the capital of qualifying savings banks and savings and loan institutions (S&L's). It would increase the lending powers of these thrift institutions, allowing them to invest up to 15 percent of assets in commercial loans, up to 30 percent in consumer loans, up to 40 percent in non-residential real estate, and up to 100 percent in state and local government obligations.

S. 2879 would codify the powers of the FDIC and FSLIC to assist problem banks and S&L's through mergers, requiring certain priorities be considered when approving acquisitions. It would authorize the Depository Institutions Deregulation Committee (DIDC) to phase out all interest rate differentials no later than January 1, 1985, and require the DIDC to authorize a new short-term account similar to those currently available through money-market funds. Other provisions of the bill include amendments to the Financial Institutions Regulatory Act (FIRA) and to the Federal Credit Union Act.

5. Cost Estimate: The income capital certificate program will enable the FSLIC to reduce cash assistance to troubled savings and loan institutions during fiscal years 1983 through 1986, at the cost of some increased outlays in later years. The estimated outlay impact relative to the baseline projections for FSLIC underlying the First Budget Resolution are shown in the following table.

[By fiscal year, in billions of dollars]

	1983	1984	1985	1986	1987
Estimated FSLIC outlays:					
Baseline	−0.1	−0.3	−0.6	−0.6	−0.6
Under S. 2879	−.7	−.9	−.9	−.7	−.6
Estimated net cost (+) or savings (−) to FSLIC	−.6	−.6	−.3	−.1	

Notes issued by the FSLIC and outstanding at the end of fiscal year 1987 would be in excess of $1 billion, and some additional redemptions of these notes are likely to be required in subsequent years.

While it is likely that the FDIC would also issue some ICC's, it is not clear at this time the extent to which it will use this new authority rather than the kinds of assistance currently being provided. As a result, no savings have been estimated for the FDIC, although some reduction in outlays is possible.

S. 2879 would also broaden the authority of the federal financial regulators to allow interstate mergers, and would expand the lending and investing powers of the thrifts. Although it is not possible to precisely measure the extent to which outlays would be affected by these provisions, potential savings to the FDIC and the FSLIC could total several hundred million dollars by 1990 as a result of strengthened thrift institutions.

6. Basis of Estimate:

For purposes of this estimate, it was assumed that S. 2879 would be enacted on or around October 1, 1982. Based on data provided by the Federal Home Loan Bank Board (FHLBB), it was assumed that five-year interest-bearing ICC's would be issued to qualified institutions beginning in fiscal year 1983. Based on the formula established in the bill, the level of assistance provided would be inversely proportional to the net worth of the thrift, with a maximum of 100 percent of losses in the preceding period covered by the ICC's.

According to the insurance agencies, these ICC's would expand the options available for dealing with problem institutions. However, alternative forms of assistance will continue to be provided through the insurance funds, since not all thrifts will qualify under the criteria established by the bill or the current agency guidelines for handling problem institutions. Nonetheless, outlays to the insurance agencies, relative to the First Concurrent Resolution on the Budget, would be reduced by an estimated $600 million in each fiscal year 1983 and 1984, $300 in fiscal year 1985, and $100 million in 1986. By fiscal year 1987, however, the cumulative interest payment would begin to offset reductions in levels of assistance, resulting in no net budget impact. Beginning in 1988, additional outlays would be incurred by the FSLIC to redeem ICC's for S&L's still in financial difficulty. It is expected that a total of more than $1 billion in ICC's would be outstanding at that time.

The estimated outlay savings would be somewhat less when calculated relative to a recent CBO update to the FSLIC baseline projections underlying the First Concurrent Resolution. The more recent projections primarily reflect the recently adopted policy of the FSLIC to minimize cash outlays for assistance to problem institutions, and to disburse contributions over a five-year or longer period. The table below summarizes the estimated cost or savings for S. 2879 relative to the updated baseline estimates.

[By fiscal year, in billions of dollars]

	1983	1984	1985	1986	1987
Estimated FSLIC outlays:					
Updated baseline	−0.8	−0.3	−0.3	+0.5	−0.7
Under S. 2879	−1.2	−.9	−.7	−.6	−.7
Estimated net cost (+) or savings (−) to FSLIC relative to updated baseline	−.4	−.6	−.4	−.1	

7. Estimate comparison: None.

8. Previous CBO estimate:

On September 9, 1982, the Congressional Budget Office prepared a cost estimate for S. 2879, as ordered reported by the Senate Committee on Banking, Housing and Urban Affairs on August 19, 1982. That estimate referred to an Administration estimate which was preliminary and is currently being reviewed. This revised estimate eliminates that reference.

9. Estimate prepared by: Mary Maginniss (226-2860).

10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.●

DISAPPOINTMENT AT FEZ

● Mr. KENNEDY. Mr. President, I would like to bring to the attention of all my colleagues a compelling article by Thomas A. Dine which appeared in today's New York Times.

In his article, "Dashed by the Arabs," Mr. Dine notes that he and like-minded Americans "share Israel's concerns about America's latest peace proposal but found reason for hope" in President Reagan's recent initiative on the Middle East.

However, Arab leaders meeting at Fez, Morocco "have dashed these hopes" by "a regressive Arab plan that in effect rejects not only the Reagan proposals but also the Camp David accords and calls instead for a PLO-controlled Palestinian state." As Mr. Dine points out, the Arab leaders blocked a constructive negotiating role for Jordan, failed to agree to recognize—let along negotiate—with Israel, and undercut efforts for peace in Lebanon. "All of this is a victory for those who would trade away good relations with Israel in the forlorn hope of buying the Arab radicals."

Thomas Dine has been an extremely thoughtful obsever of the Middle East for many years. As a friend who has worked closely with him during his service in the Senate, the Brookings Institution, and the American Israel Public Affairs Committee, I know that his first concern is the national interest of the United States—as it is the first concern of all Americans. I commend his article to the Senate, and I request that it appear at this point in the RECORD.

The article follows:

[From the New York Times, Sept. 17, 1982]

DASHED BY THE ARABS

(By Thomas A. Dine)

WASHINGTON.—Americans like myself who share Israel's concerns about America's latest peace proposal but who found reason for hope in President Reagan's speech have now suffered crushing disappointments.

Our hopes had been nourished by Mr. Reagan's call on the Arab states to recognize and negotiate peace directly with Israel and by his clear rejection of an independent Palestinian state. His initiative was given further significance by private assurances to him that King Hussein was prepared to negotiate on the basis of the American proposals and that Arab "moderates" would work to insure that the summit meeting at Fez, Morocco, either avoided taking a position or produced a mandate for Jordanian participation in direct negotiations. It was this hope that Hussein might at last be prepared to talk peace that led so many to find promise in the Reagan plan.

The Arabs' actions at Fez have dashed these hopes. First, Hussein has not come forward; instead, he signed a regressive Arab plan that in effect rejects not only the Reagan proposals but also the Camp David accords and calls instead for a P.L.O.-controlled Palestinian state. This is already clear from Hussein's interview, aired by the British Broadcasting Corporation, in which he admits that he has no mandate and declares that he will not negotiate with Israel.

Even if Hussein were prepared to negotiate, the summit meeting has insured that he could act only as a Palestine Liberation Organization proxy. In these circumstances, Prime Minister Menachem Begin is correct in fearing that if Hussein gained the West Bank he would have to hand it to Yasir Arafat—including, if the Arabs had their way, the keys to Jerusalem.

Second, the summit participants rejected the central principle of the Camp David agreement—the five-year transition period of Palestinian autonomy—and instead called for a P.L.O. state after a brief three-month United Nations-controlled transition. This was, by implication, a rejection of the President's entire package.

Third, not a word was spoken about recognition of, nor negotiations with, Israel. The formulation that only the Security Council, with its Soviet veto, should "guarantee peace among all states of the region" is a giant step backward from even the plan offered by Crown Prince (now King) Fahd of Saudi Arabia last year that at least had the Arabs affirming "the right of all countries of the region to live in peace." That the news media could interpret this as implicit Arab recognition of Israel represents an extraordinary failure to understand that the Arab world has now moved even further away from, rather than toward, recognition of Israel.

Fourth, in repeating their earlier rejectionist efforts against Egypt, the Fez partners decided to pressure Lebanon, the second Arab state that might have made peace with Israel, not to do so. This provides yet another measure of Arab unwillingness to accept Israel. And now the agents of rejectionism have carried their position to its conclusion by assassinating the Lebanese President-elect, Bashir Gemayel, who like Anwar el-Sadat wanted peace with Israel.

Finally, the classic pattern of Arab duplicity and American Naïveté has been demonstrated once again. America seizes upon some vague hint that one or another Arab leader might be prepared to negotiate with Israel. Then the Arabs get together and rework their position in an ever more radical direction to appease the most rejectionist parties. In this way, the Syrian and P.L.O. radicals retain their veto over what any of the others might do.

Mr. Reagan banked on moderate Arab support for his proposal. Instead, Saudi Arabia and Jordan again seem to have let America down. This has brought on a confrontation with Israel and underminded Camp David for no good reason. It has forced Israel out of the autonomy negotiations without victory for those who would trade away good relations with Israel in the forlorn hope of buying the Arab radicals.

The Arabs must be told in no uncertain terms that their position is unacceptable, that there can be no negotiations on the basis of the Fez communiqué and no progress until they declare their willingness to recognize and negotiate directly with Israel. Now that the Administration's Jordanian option has foundered on the rock of Arab intransigence, and the situation in Lebanon has become even more precarious, it is urgent that attention be devoted to the stabilization of Lebanon and removal of all foreign forces. In working toward these objectives, Washington can also help reverse Arab rejectionism by supporting the negotiation of a peace treaty between Lebanon and Israel.

There were positive points in the President's initiative. His vision of Israel living in genuine peace with its neighbors behind secure and defensive borders deserves support. But the strategy behind the speech has failed to achieve its purpose. Washington should at least recognize that it cannot buy Arab cooperation by confronting Israel; its immediate task must be to rebuild Israel's confidence in America.●

KILLING IN LEBANON

● Mr. KENNEDY. Mr. President, words are not adequate to express the revulsion we all feel at the killing of men, women, and children in West Beirut. In statements in August and following President-elect Gemayel's death, I expressed the hope that all sides in Lebanon would recognize the necessity of restraint and an end to violence. This calamity is precisely the sort of tragedy which we most had to fear, and which all who respect the sanctity of human life must condemn. Continued warfare in the Middle East and repeated cycles of reprisal involving factions inside Lebanon offer no solution to the problems which plague that country or that region.

I believe that Israel, as a functioning multi-party democracy, should urgently carry out an open and public investigation as to how this tragedy occurred and how it might have been prevented, to establish accountability, and to take any appropriate action. The Lebanese Government should conduct a similar inquiry of its own.

The United States and other friends of Lebanon should take every possible step to speed restoration of an effective central government with full authority and power to restore order in all parts of Lebanon, simultaneously with the peaceful withdrawal of all foreign forces—Syrian, Israeli as well as those of the PLO.●

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 10:30 a.m. After the recognition of the two leaders under the standing order, the Senator from Florida will be recognized on a special order for not to exceed 15 minutes.

It is anticipated that after the execution of the special order, time will be provided for the transaction of routine morning business. It is also anticipated that at the hour of 12 noon the Senate will stand in recess until the hour of 2 p.m.

At 2 p.m., Mr. President, the Senate will resume consideration of the unfinished business and a vote will occur on the cloture motion previously filed against further debate on the Helms amendment at 2:30, according to the unanimous-consent order entered on today.

If cloture is invoked, the Senate will continue to debate the amendment under the provisions of rule XXII dealing with postcloture procedures. If cloture is not invoked, Senators are reminded that another cloture motion has been filed which will provide for a vote on Wednesday.

Mr. President, it is anticipated that both the House and the Senate will be asked to consider legislation dealing with the railroad strike during the day tomorrow. I hope to have a further announcement to make during the time of the opening of the Senate on tomorrow.

Mr. President, Senators once again should be reminded that every night this week is a possible late evening. As much as it pains me to say so, Senators should also be on notice of the possibility of a Saturday session this week and next Saturday as well.

Mr. President, I have no further business to transact. I inquire of the minority leader if there is any other matter he wishes to address to the Senate at this time.

Mr. ROBERT C. BYRD. Mr. President, I thank the majority leader. Will the majority leader yield for a parliamentary inquiry?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, will the Chair inform the minority leader approximately how many amendments have been filed at the desk?

The PRESIDING OFFICER. Approximately 1,500 amendments.

Mr. ROBERT C. BYRD. Approximately 1,500?

The PRESIDING OFFICER. Yes.

Mr. ROBERT C. BYRD. Mr. President, in the event cloture is invoked, would the first- and second-degree amendments to the bill automatically be ruled out of order by the Chair without a point of order being made from the floor under the precedents of the Senate in 1977 under the Natural Gas Deregulation Act when cloture was invoked thereon?

The PRESIDING OFFICER. The Baucus amendment would be ruled out of order.

Mr. ROBERT C. BYRD. Automatically by the Chair without a point of order being made?

The PRESIDING OFFICER. That is correct.

Mr. ROBERT C. BYRD. But not the first-degree amendments?

The PRESIDING OFFICER. The Weicker amendment would not fall because it is restrictive and germane.

Mr. ROBERT C. BYRD. The Weicker amendment would be considered to be germane to the bill, it being an amendment in the first degree.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. I thank the Chair.

RECESS UNTIL TOMORROW AT 10:30 A.M.

Mr. BAKER. Mr. President, I see no other Senator seeking recognition. Therefore, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10:30 a.m. tomorrow.

The motion was agreed to; and the Senate, at 4:56 p.m., recessed until Tuesday, September 21, 1982, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate September 20, 1982:

FEDERAL TRADE COMMISSION

George W. Douglas, of Texas, to be a Federal Trade Commissioner for the term of 7 years from September 26, 1982, vice Robert Pitofsky, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 20, 1982:

COMMUNICATIONS SATELLITE CORPORATION

Justin Dart, of California, to be a Member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the corporation in 1985.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE COAST GUARD

Coast Guard nominations beginning Timothy P. Powers, and ending William A. Henrickson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on August 4, 1982.

Coast Guard nominations beginning Robert B. Jordan, and ending Stephen W. Price, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on August 4, 1982.

HOUSE OF REPRESENTATIVES—*Monday, September 20, 1982*

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. BENNETT).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
September 16, 1982.

I hereby designate the Honorable CHARLES E. BENNETT to act as Speaker pro tempore on Monday, September 20, 1982.

THOMAS P. O'NEILL, JR.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Eternal God, from whom we have received all good gifts, we ask Your blessing upon people who pray for Your protection and are in need of strength. We place before You our innermost thoughts that You would direct us in the way we should go and show us the paths of peace. To the needy we pray for support and loving care, and to the lonely, we pray for comfort. May Your Spirit never leave us, but continue to be our constant hope through all the days of life. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and joint resolutions of the House of the following titles:

On August 10, 1982:

H.R. 5380. An act to recognize the organization known as American Ex-Prisoners of War; and

H.J. Res. 494. Joint resolution with regard to Presidential certifications on conditions in El Salvador.

On August 20, 1982:

H.J. Res. 516, Joint resolution to provide for the designation of April 17 to April 23, 1983, as "National Coin Week"; and

H.J. Res. 541. Joint resolution concerning the successful completion of the test flight phase of the Space Shuttle program.

On August 26, 1982:

H.R. 2160. An act to amend the Potato Research and Promotion Act;

H.R. 4647. An act to award special congressional gold medals to Fred Waring, the widow of Joe Louis, and Louis L'Amour;

H.R. 6033. An act relating to the preservation of the historic Congressional Cemetery in the District of Columbia for the inspiration and benefit of the people of the United States; and

H.R. 6530. An act to designate the Mount St. Helens National Volcanic Monument in the State of Washington, and for other purposes.

On August 27, 1982:

H.R. 6260. An act to authorize appropriations to the Patent and Trademark Office in the Department of Commerce, and for other purposes.

On September 3, 1982:

H.R. 4961. An act to provide for tax equity and fiscal responsibility, and for other purposes.

On September 8, 1982:

H.R. 1526. An act to amend the Accounting and Auditing Act of 1950 to require ongoing evaluations and reports on the adequacy of the systems of internal accounting and administrative control of each executive agency, and for other purposes;

H.R. 3126. An act to direct the Secretary of the department in which the U.S. Coast Guard is operating to cause the vessel *Sky Lark* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade, and for other purposes;

H.R. 3345. An act to make technical and conforming changes in the patent and trademark laws and in the Civil Rights of Institutionalized Persons Act;

H.R. 6350. An act to amend title 38, United States Code, to enhance recruitment and retention by the Veterans' Administration of nurses and certain other health-care personnel, to improve the Veterans' Administration health professional scholarship program and certain aspects of other Veterans' Administration health-care programs, and to extend certain expiring Veterans' Administration health-care programs, and for other purposes;

H.R. 6409. An act to provide for the participation of the United States in the 1984 Louisiana World Exposition to be held in New Orleans, La., and for other purposes;

H.R. 6732. An act to amend the International Safe Container Act; and

H.R. 6955. An act to provide for reconciliation pursuant to the first concurrent resolution on the budget for fiscal year 1983 (S. Con. Res. 92, 97th Congress).

On September 13, 1982:

H.R. 3239. An act to amend the Communications Act of 1934, and for other purposes; and

H.R. 6128. An act to revise, codify, and enact without substantive change certain general and permanent laws, related to money and finance, as title 31, United States Code, "Money and Finance."

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment concurrent resolutions of the House of the following titles:

H. Con. Res. 397. Concurrent resolution expressing the deep gratitude of the Congress to Special Envoy Philip Habib; and

H. Con. Res. 405. Concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of H.R. 3517.

The message also announced that the Senate had passed a bill and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 2852. An act to amend section 439 of the Higher Education Act of 1965 to make a technical amendment relating to priority of indebtedness, to provide for the family contribution schedule for student financial assistance for academic years 1983–84, and 1984–85, and for other purposes;

S.J. Res. 174. Joint resolution to authorize and request the President to designate October 16, 1982, as "World Food Day";

S.J. Res. 234. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1983 as "National Patriotism Week";

S.J. Res. 235. Joint resolution to proclaim March 21, 1983, as "National Agriculture Day";

S.J. Res. 238. Joint resolution to designate October 9, 1982 as "National Running and Fitness Day"; and

S.J. Res. 239. Joint resolution designating October 16, 1982, as "National Newspaper Carriers Appreciation Day."

The message also announced that the Vice President, pursuant to Public Law 84–689, appointed Mr. BENTSEN as a delegate, on the part of the Senate, to the North Atlantic Assembly meeting, to be held in London, United Kingdom, November 14–19, 1982.

CONSENT CALENDAR

The SPEAKER pro tempore. This is the day for the call of the Consent Calendar. The Clerk will call the first bill on the Consent Calendar.

AMENDING THE EMERGENCY FUND ACT

The Clerk called the Senate bill (S. 1628), to amend the Emergency Fund Act (Act of June 26, 1948, 62 Stat. 1052).

There being no objection, the Clerk read the bill, as follows:

S. 1628

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to authorize an emergency fund for the Bureau of Reclamation to assure the continuous operation of its irrigation and power systems", approved June 26, 1948, is amended by striking the words "irrigation and power systems" in the title and substituting the words "project facilities" and by changing the first sentence of section 1 of the Act to read as follows: "In order to assure continuous operation of all projects and project facilities governed by the Federal reclamation law (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto), including any project and facilities constructed with funds provided by the Small Reclamation Projects Act (Act of August 6, 1956, 70 Stat. 1044, and Acts amendatory thereof or supplementary thereto) or with funds provided by the Distribution System Loans Act (Act of May 14, 1956, 69 Stat. 244, and Acts amendatory thereof or supplementary thereto), there is hereby authorized to be appropriated from the reclamation fund an emergency fund which shall be available for defraying expenses which the Commissioner of Reclamation determines are required to be incurred because of unusual or emergency conditions.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING AND DIRECTING SECRETARY OF THE INTERIOR TO CONVEY CERTAIN REAL PROPERTY TO THE PERSHING COUNTY WATER CONSERVATION DISTRICT

The Clerk called the bill (H.R. 5652) to authorize and direct the Secretary of the Interior to convey certain real property to the Pershing County Water Conservation District.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. LUNGREN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

AUTHORIZING AND DIRECTING SECRETARY OF THE INTERIOR TO ACCEPT CERTAIN LANDS FOR THE BENEFIT OF THE SYCUAN BAND OF MISSION INDIANS

The Clerk called the bill (H.R. 5204) to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians.

There being no objection, the Clerk called the bill, as follows:

H.R. 5204

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is directed, upon the acquisition thereof and upon the request of the Sycuan Band of Mission Indians, to accept on behalf of the United States in trust for the Sycuan Band of Mission Indians the title to the following described land: lot 8, section 13, township 16 south, range 1 east, San Bernardino meridian, California.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING THAT CERTAIN LANDS SHALL BE HELD IN TRUST BY THE U.S. FOR BURNS PAIUTE INDIAN COLONY OF OREGON

The Clerk called the bill (H.R. 5007) to provide for the designation of the Burns Paiute Indian Colony of Oregon as the beneficiary of a public domain allotment and to provide that all interests in public domain allotments in Harney County, Oreg., which are held by Indian allotees who die intestate and without heirs shall escheat to the United States to be held in trust for the benefit of the Burns Paiute Indian Colony of Oregon and added to the Burns Paiute Indian Reservation.

There being no objection, the Clerk read the bill, as follows:

H.R. 5007

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the public domain allotment numbered 144-111, which is located in the northwest quarter, section 32, township 235, range 32½ east, Willamette Meridian, Harney County, Oregon, and which reverted by escheat to the United States from the estate of the late Jesse Joseph James, Burns allotee numbered 144-N1116, who died intestate and without heirs, is designated to be held in trust by the United States for the benefit of the Burns Paiute Indian Colony of Oregon, pursuant to section 2 of the Act approved November 24, 1942 (25 U.S.C. 373b), and shall be added to the Burns Paiute Indian Reservation.

SEC. 2. Any restricted allotment of land on the public domain, or interest in such an allotment, which is located in Harney County, Oregon, and held by an Indian allotee who dies intestate without heirs, and which reverts by escheat to the United States under section 2 of the Act approved November 24, 1942, shall be held in trust by the United States for the benefit of the Burns Paiute Indian Colony of Oregon and added to the Burns Paiute Indian Reservation, notwithstanding the provision of such section which provides that such land will become part of the public domain or the provision of such section which gives to the Secretary of the Interior, or reserves to the Congress, the authority to designate the Indian tribe for the benefit of which such lands will be held in trust. Any reversion by escheat of a public domain allotment to which this Act applies shall be subject to any other restriction imposed by section 2 of such Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, pursuant to section 2 of the Act of November 24, 1942 (56 Stat. 1021, 1022; 25 U.S.C. 373b), the estate of Jesse Joseph James, Burns 144-N1116, consisting of a public domain allotment, Burns Paiute public domain allotment numbered 144-111, northwest quarter, section 32, township 23 south, range 32½ east, Willamette meridian, Harney County, Oregon, is hereby declared to be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and part of the Burns Paiute Indian Reservation.

SEC. 2. Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), is amended by inserting the following immediately before the period at the end thereof: ": *Provided further,* That interests in all Burns public domain allotments located in Harney County, Oregon, belonging to Indians who die intestate without heirs shall be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and shall be part of the Burns Paiute Indian Reservation". However, no non-Indian lands in Harney County, Oregon, shall be considered Indian country as defined in 18 U.S.C. 1151.

SEC. 3. Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b) is amended by deleting "$2,000" and inserting in lieu thereof "$50,000".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate bill (S. 1468) to provide for the designation of the Burns Paiute Indian Tribe as the beneficiary of a public domain allotment, and to provide that all future similarly situated lands in Harney County, Oreg., will be held in trust by the United States for the benefit of the Burns Paiute Indian Colony, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1468

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, pursuant to section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), the estate of Jesse Joseph James, Burns 144-N1116, consisting of a public domain allotment, Burns Paiute domain allotment numbered 144-111, northwest quarter, section 32, township 23 south, range 32½ east, Willamette meridian, Harney County, Oregon, is hereby declared to be held in trust by the

United States for the Burns Paiute Indian Colony of Oregon and part of the Burns Paiute Indian Reservation.

SEC. 2. Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), is amended by inserting the following immediately before the period at the end thereof: *Provided further*, That interests in all Burns public domain allotments located in Harney County, Oregon, belonging to Indians who die intestate without heirs shall be held in trust by the United States for the Burns Paiute Indian Colony of Oregon and shall be part of the Burns Paiute Indian Reservation".

SEC. 3. Section 2 of the Act of November 24, 1942 (56 Stat. 1022; 25 U.S.C. 373b), is amended by deleting "2,000" and inserting in lieu thereof "50,000".

MOTION OFFERED BY MR. KILDEE

Mr. KILDEE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. KILDEE moves to strike out all after the enacting clause of the Senate bill (S. 1468), and to insert in lieu thereof the provisions contained in the bill, H.R. 5007, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to provide for the designation of the Burns Paiute Indian Colony of Oregon as the beneficiary of a public domain allotment and to provide that all interests in public domain allotments in Harney County, Oreg., which are held by Indian allotees who die intestate and without heirs shall escheat to the United States to be held in trust for the benefit of the Burns Paiute Indian Colony of Oregon and added to the Burns Paiute Indian Reservation."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 5007) was laid on the table.

The SPEAKER pro tempore. This concludes the call of the eligible bills on the Consent Calendar.

YES, VIRGINIA, THERE IS A SANTA CLAUS—IT IS THE GOP

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, last week the Democratic Study Group released a report documenting the record deficits of the Reagan administration and the direct relationship between Republican Presidents and high Federal deficits.

First, the report shows that the Reagan deficits break the bank in every respect: gross total, percentage of GNP, and adjusted for inflation.

Second, the DSG report also documents that Republican administrations have run up substantially higher deficits than Democratic administrations. In the post-World War II era, 1947 through 1981, the average Republican deficit was more than twice as high as the average Democratic deficit. If the proposed Reagan deficits are factored in, the average Republican deficit jumps to triple the Democratic deficit.

Third, in that same period, Republican administrations ran up 8 of the 10 highest Federal deficits.

Finally, to shatter one last myth, in every year except two from 1947 through 1981, Congress appropriated less money than requested by the President.

The DSG study is the first comprehensive documentation of post-World War II Federal spending. It ought to put to rest a lot of hoary old myths about the Democrats being the party of deficit spending.

During the post-World War II period, the Democratic and Republican parties have split control of the White House: Truman, Eisenhower, JFK/LBJ, Nixon/Ford, Carter, and Reagan. The Democrats have controlled both Houses of Congress since 1947 except for brief Republican interregnums: House, 1947–49; Senate, 1947–49, 1953–55, and 1981 to date.

THE LATE DAVID DUBINSKY

(Mr. DOWNEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY. Mr. Speaker, I rise to mourn the passing of David Dubinsky who was a giant in the field of labor. He was the father of the modern version of the ILGWU, and he had a particularly profound impact on my family. The Italian half of my family came to these shores in 1904 and worked in the garment industry for some 30 or 40 years. My great aunts and uncles would tell me often of the terrible conditions that they had to labor under prior to Mr. Dubinsky's active involvement. As a matter of fact, my great uncle witnessed personally the Triangle Shirtwaist fire that killed over 100 of the people who were working in that facility. Dubinsky brought livable wages to the people who worked in the needle trades. He made life better. He was a person who was a statesman, although he did not like that term, in the field of labor. We will miss him sorely.

AN AFFRONT TO THE CONSCIENCE OF THE HUMAN RACE

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, the senseless massacre in Beirut in cold blood of unarmed men, women, and children must be an assault on the conscience of everyone here in America and throughout the world. We cannot turn a blind eye to these incredible slayings if we have any intellectual integrity at all. We in this House bear a special onus. For all too long this House has been mute as a tomb on the ongoings in Lebanon.

Is history going to ask someday: And where were you when unarmed men, women, and children were slaughtered? Where was your voice? Where was your conscience?

I commend the President for speaking out on this affront to the conscience of the human race. We in this body, in this House of Representatives, have a special onus because we spend billions and billions of dollars for arms overseas over which we have no control. The American taxpayers and our conscience and the voice of mankind must ask us to reassess our policy.

THE HORROR OF BEIRUT

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, the horror of Beirut is still unfolding. We must all cringe under the knowledge that this dreadful massacre has occurred, and we must search our conscience for things undone that might have averted it.

But now a question of great moment is before the United States.

President Reagan is pondering whether to send U.S. troops into Beirut. My fervent hope is that no U.S. force will be sent—either alone or as part of a multinational group.

Once there, U.S. troops will likely be bogged down for months or even years. Lebanon could be another Vietnam-like quagmire, costly in lives and injuries—not to mention money.

The goal of U.S. policy must be to get Israeli troops, and all foreign troops out of Lebanon, not more foreign troops in. Instead of going in with troops, the United States can best serve its own interests and the interests of blood-stained Lebanon by suspending aid to Israel until Israeli troops are out.

The question of U.S. troops to Lebanon is so important and urgent that Members of Congress must take part. Members have a duty to speak up.

With these words I implore my colleagues to send messages to President Reagan, urging no U.S. troops be sent to Lebanon.

FEDERAL DEFICITS

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, a moment ago a Member from the other side of the aisle tried to lay deficits at the doorstep of Republican Presidents. Well, of course, I know that we all take time occasionally to read the Constitution, and we recognize that the purse strings of the Federal Government are held in this House and the U.S. Senate.

It is interesting that this attempt would be made to lay the blame for deficits on Republican Presidents when, during that entire period of time, with the exception of two brief periods, control of both Houses of Congress was in the hands of the Democratic Party.

I remember well, as President Ford attempted to bring veto after veto to bring those high deficits down, that there was a notable absence of votes from the other side of the aisle. But perhaps today is a hearkening of a new day. Perhaps today was the first trumpeting, the first sound of the fact that the people on the other side of the aisle are going to join President Reagan as he invites us to sustain his vetoes for overspending. I hope that is the case.

HONORING WORK AND ACHIEVEMENTS OF ARTIST ALLYN COX

Mr. HAWKINS. Mr. Speaker, I offer a resolution (H. Res. 593) honoring the work and achievements of the artist, Allyn Cox, and recognizing those who made possible the program of beautifying the Capitol with historical murals, and ask unanimous consent for its immediate consideration.

The SPEAKER pro tempore. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 593

Whereas Allyn Cox has contributed his talents to the beautification of the United States Capitol over the past quarter century, and in particular to the completion of the Hall of Capitols and the Great Experiment Hall;

Whereas the art program in the Capitol was carried out under the sponsorship of the United States Capitol Historical Society;

Whereas the Congress itself authorized the art program and the master plan for the Halls of the House side of the Capitol;

Whereas the Hall of Capitols by Allyn Cox was made possible through the contributions of the United States Capitol Historical Society, and more recently the Great Experiment Hall, approved by the joint resolution of October 1, 1976, was achieved through the generosity of the National Society of the Daughters of the American Revolution;

Whereas all of these adornments were made possible by the Joint Committee on the Library in cooperation with the Committee on House Administration and the Architect of the Capitol; and

Whereas the historic scenes depicted by the murals in the Hall of Capitols and the Great Experiment Hall will stand through the years as constant reminders of our early hard beginnings and our Nation's birth and development into a Republic, and into a Government of the people, by the people, and for the people: Now, therefore, be it

Resolved, That the House of Representatives hereby designates Tuesday, September 21, 1982, as a time for special tribute to the achievements of Allyn Cox, N.A., D.F.A., of New York City, and the art program sponsored by the United States Capitol Historical Society; and for this purpose special ceremonies of recognition shall be held in the National Statuary Hall at 10:30 a.m. on that date. The leadership of the two Houses of Congress shall be invited to participate in the ceremonies, and all Members of both Houses shall be encouraged to attend. As part of the ceremonies the assemblage shall be addressed by leading Members of the Congress, including those who presently serve on the executive committee of the United States Capitol Historical Society, and a special tribute shall be presented to Allyn Cox from the artistic community of the Nation.

SEC. 2. The ceremonies held and tributes presented under this resolution and otherwise shall give due recognition to the efforts of the United States Capitol Historical Society, in this the twentieth year of its existence, on behalf of the preservation and improvement of the Capitol, to the immeasurable artistic achievements of Allyn Cox, and to the generousity of the National Society of the Daughters of the American Revolution.

Mr. FRENZEL (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

The SPEAKER pro tempore. Is there objection to the present consideration of the resolution?

Mr. FRENZEL. Reserving the right to object, Mr. Speaker, I do so for the purpose of yielding to the distinguished chairman of the Committee on House Administration so that he may explain the resolution.

Mr. HAWKINS. I thank the gentleman for yielding.

Mr. Speaker, the purpose of this resolution is to provide a suitable ceremony honoring Allyn Cox, the noted muralist, who has worked tirelessly for the last several years to turn the bare walls and ceilings of the House side of the U.S. Capitol into splendid scenes depicting our national heritage. Allyn Cox also painted murals in the Capitol Rotunda which compliment the decorative art of Constantino Brumidi, whose unfinished work he completed.

The resolution before the House today designates Tuesday, September 21, 1982, as a day of recognition of Allyn Cox, to be highlighted by a ceremony in Statuary Hall. Mr. Cox's most recent murals in the Capitol were part of the art program sponsored by the U.S. Capitol Historical Society.

It is with special thanks that we pay tribute to Allyn Cox, the talented painter and muralist, who has spent the last quarter century beautifying the U.S. Capitol.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, I concur in all that the distinguished chairman has said. Allyn Cox has made a magnificent and remarkable contribution to the artistic history of this Capitol.

The minority supports the resolution and invites the attention of the body to the fact that the work was accomplished under the auspices not only of the House of Representatives, but also the Capitol Historical Society and the Daughters of the American Revolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representative:

WASHINGTON, D.C.,
September 20, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit sealed envelopes received from the White House as follows:

(1) At 9:50 a.m. on Friday, September 17, 1982 and said to contain a message from the President wherein he transmits the second annual report of the Department of Education.

(2) At 9:50 a.m. on Friday, September 17, 1982 and said to contain a message from the President wherein he transmits the second annual report on activities undertaken by the United States Synthetic Fuels Corporation and the Department of Energy to implement the development of synthetic fuels under the Defense Production Act of 1950, as amended.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

□ 1215

SECOND ANNUAL REPORT ON ACTIVITIES UNDERTAKEN BY SYNTHETIC FUELS CORPORATION AND DEPARTMENT OF ENERGY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs and the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of Friday, September 17, 1982).

SECOND ANNUAL REPORT OF THE DEPARTMENT OF EDUCATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

(For message, see proceedings of the Senate of Friday, September 17, 1982).

GOVERNING INTERNATIONAL FISHERY AGREEMENT BETWEEN THE UNITED STATES AND JAPAN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-237)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

(For message, see proceedings of the Senate of Monday, September 20, 1982).

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Wednesday, September 22, 1982.

SUBCHAPTER S REVISION ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6055), to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations), as amended.

The Clerk read as follows:

H.R. 6055

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Subchapter S Revision Act of 1982".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. AMENDMENT OF SUBCHAPTER S.

Subchapter S of chapter 1 is amended to read as follows:

"Subchapter S—Tax Treatment of S Corporations and Their Shareholders

"Part I. In general.

"Part II. Tax treatment of shareholders.

"Part III. Special rules.

"Part IV. Definitions; miscellaneous.

"PART I—IN GENERAL

"Sec. 1361. S corporation defined.

"Sec. 1362. Election; revocation; termination.

"Sec. 1363. Effect of election on corporation.

"SEC. 1361. S CORPORATION DEFINED.

"(a) S CORPORATION DEFINED.—

"(1) IN GENERAL.—For purposes of this title, the term 'S corporation' means, with respect to any taxable year, a small business corporation for which an election under section 1362(a) is in effect for such year.

"(2) C CORPORATION.—For purposes of this title, the term 'C corporation' means, with respect to any taxable year, a corporation which is not an S corporation for such year.

"(b) SMALL BUSINESS CORPORATION.—

"(1) IN GENERAL.—For purposes of this subchapter, the term 'small business corporation' means a domestic corporation which is not an ineligible corporation and which does not—

"(A) have more than 35 shareholders,

"(B) have as a shareholder a person (other than an estate and other than a trust described in subsection (c)(2)) who is not an individual,

"(C) have a nonresident alien as a shareholder, and

"(D) have more than 1 class of stock.

"(2) INELIGIBLE CORPORATION DEFINED.—For purposes of paragraph (1), the term 'ineligible corporation' means any corporation which is—

"(A) a member of an affiliated group (determined under section 1504 without regard to the exceptions contained in subsection (b) thereof),

"(B) a financial institution to which section 585 or 593 applies,

"(C) an insurance company subject to tax under subchapter L,

"(D) a corporation to which an election under section 936 applies, or

"(E) a DISC or former DISC.

"(c) SPECIAL RULES FOR APPLYING SUBSECTION (b).—

"(1) HUSBAND AND WIFE TREATED AS 1 SHAREHOLDER.—For purposes of subsection (b)(1)(A), a husband and wife (and their estates) shall be treated as 1 shareholder.

"(2) CERTAIN TRUSTS PERMITTED AS SHAREHOLDERS.—

"(A) IN GENERAL.—For purposes of subsection (b)(1)(B), the following trusts may be shareholders:

"(i) A trust all of which is treated (under subpart E of part I of subchapter J of this chapter) as owned by an individual who is a citizen or resident of the United States.

"(ii) A trust which was described in clause (i) immediately before the death of the deemed owner and which continues in existence after such death, but only for the 60-day period beginning on the day of the deemed owner's death. If a trust is described in the preceding sentence and if the entire corpus of the trust is includible in the gross estate of the deemed owner, the preceding sentence shall be applied by substituting '2-year period' for '60-day period'.

"(iii) A trust with respect to stock transferred to it pursuant to the terms of a will, but only for the 60-day period beginning on the day on which such stock is transferred to it.

"(iv) A trust created primarily to exercise the voting power of stock transferred to it.

This subparagraph shall not apply to any foreign trust.

"(B) TREATMENT AS SHAREHOLDERS.—For purposes of subsection (b)(1)—

"(i) In the case of a trust described in clause (i) of subparagraph (A), the deemed owner shall be treated as the shareholder.

"(ii) In the case of a trust described in clause (ii) of subparagraph (A), the estate of the deemed owner shall be treated as the shareholder.

"(iii) In the case of a trust described in clause (iii) of subparagraph (A), the estate of the testator shall be treated as the shareholder.

"(iv) In the case of a trust described in clause (iv) of subparagraph (A), each beneficiary of the trust shall be treated as a shareholder.

"(3) ESTATE OF INDIVIDUAL IN BANKRUPTCY MAY BE SHAREHOLDER.—For purposes of subsection (b)(1)(B), the term 'estate' includes the estate of an individual in a case under title 11 of the United States Code.

"(4) DIFFERENCES IN COMMON STOCK VOTING RIGHTS DISREGARDED.—For purposes of subsection (b)(1)(D), a corporation shall not be treated as having more than 1 class of stock solely because there are differences in voting rights among the shares of common stock.

"(5) STRAIGHT DEBT SAFE HARBOR.—

"(A) IN GENERAL.—For purposes of subsection (b)(1)(D), straight debt shall not be treated as a second class of stock.

"(B) STRAIGHT DEBT DEFINED.—For purposes of this paragraph, the term 'straight debt' means any written unconditional promise to pay on demand or on a specified date a sum certain in money if—

"(i) the interest rate (and interest payment dates) are not contingent on profits, the borrower's discretion, or similar factors,

"(ii) there is no convertibility (directly or indirectly) into stock, and

"(iii) the creditor is an individual (other than a nonresident alien), an estate, or a trust described in paragraph (2).

"(C) REGULATIONS.—The Secretary shall prescribe such regulations as may be neces-

sary or appropriate to provide for the proper treatment of straight debt under this subchapter and for the coordination of such treatment with other provisions of this title.

"(6) OWNERSHIP OF STOCK IN CERTAIN INACTIVE CORPORATIONS.—For purposes of subsection (b)(2)(A), a corporation shall not be treated as a member of an affiliated group at any time during any taxable year by reason of the ownership of stock in another corporation if such other corporation—

"(A) has not begun business at any time on or after the date of its incorporation and before the close of such taxable year, and

"(B) does not have taxable income for the period included within such taxable year.

"(d) SPECIAL RULE FOR QUALIFIED SUBCHAPTER S TRUST.—

"(1) IN GENERAL.—In the case of a qualified subchapter S trust with respect to which a beneficiary makes an election under paragraph (2)—

"(A) such trust shall be treated as a trust described in subsection (c)(2)(A)(i), and

"(B) for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the election under paragraph (2) is made.

"(2) ELECTION.—

"(A) IN GENERAL.—A beneficiary of a qualified subchapter S trust (or his legal representative) may elect to have this subsection apply.

"(B) MANNER AND TIME OF ELECTION.—An election under this paragraph shall be made—

"(i) separately with respect to each S corporation the stock of which is held by the trust,

"(ii) separately with respect to each successive income beneficiary of the trust, and

"(iii) in such manner and form, and at such time, as the Secretary may prescribe.

"(C) ELECTION IRREVOCABLE.—An election under this paragraph, once made, may be revoked only with the consent of the Secretary.

"(D) GRACE PERIOD.—An election under this paragraph shall be effective up to 60 days before the date of the election.

"(3) QUALIFIED SUBCHAPTER S TRUST.—For purposes of this subsection, the term 'qualified subchapter S trust' means a trust—

"(A) which owns stock in 1 or more S corporations,

"(B) all of the income (within the meaning of section 643(b)) of which is distributed (or required to be distributed) currently to 1 individual who is a citizen or resident of the United States, and

"(C) the terms of which require that—

"(i) at any time, there shall be only 1 income beneficiary of the trust,

"(ii) any corpus distributed during the term of the trust may be distributed only to the current income beneficiary thereof,

"(iii) each income interest in the trust shall terminate on the earlier of the death of the income beneficiary or the termination of the trust, and

"(iv) upon the termination of the trust during the life of an income beneficiary, the trust shall distribute all of its assets to such income beneficiary.

"(4) TRUST CEASING TO BE QUALIFIED.—If a qualified subchapter S trust ceases to meet any requirement under paragraph (3), the provisions of this subsection shall not apply to such trust as of the date it ceases to meet such requirements.

"SEC. 1362. ELECTION; REVOCATION; TERMINATION.

"(a) ELECTION.—

"(1) IN GENERAL.—Except as provided in subsection (g), a small business corporation may elect, in accordance with the provisions of this section, to be an S corporation.

"(2) ALL SHAREHOLDERS MUST CONSENT TO ELECTION.—An election under this subsection shall be valid only if all persons who are shareholders in such corporation on the day on which such election is made consent to such election.

"(b) WHEN MADE.—

"(1) IN GENERAL.—An election under subsection (a) may be made by a small business corporation for any taxable year—

"(A) at any time during the preceding taxable year, or

"(B) at any time during the taxable year and on or before the 15th day of the 3d month of the taxable year.

"(2) CERTAIN ELECTIONS MADE DURING 1ST 2½ MONTHS TREATED AS MADE FOR NEXT TAXABLE YEAR.—If—

"(A) an election under subsection (a) is made for any taxable year during such year and on or before the 15th day of the 3d month of such year, but

"(B) either—

"(i) on 1 or more days in such taxable year before the day on which the election was made the corporation did not meet the requirements of subsection (b) of section 1361, or

"(ii) 1 or more of the persons who held stock in the corporation during such taxable year and before the election was made did not consent to the election,

then such election shall be treated as made for the following taxable year.

"(3) ELECTION MADE AFTER 1ST 2½ MONTHS TREATED AS MADE FOR FOLLOWING TAXABLE YEAR.—If—

"(A) a small business corporation makes an election under subsection (a) for any taxable year, and

"(B) such election is made after the 15th day of the 3d month of the taxable year and on or before the last day of such taxable year,

then such election shall be treated as made for the following taxable year.

"(c) YEARS FOR WHICH EFFECTIVE.—An election under subsection (a) shall be effective for the taxable year of the corporation for which it is made and for all succeeding taxable years of the corporation, until such election is terminated under subsection (d).

"(d) TERMINATION.—

"(1) BY REVOCATION.—

"(A) IN GENERAL.—An election under subsection (a) may be terminated by revocation.

"(B) MORE THAN ONE-HALF OF SHARES MUST CONSENT TO REVOCATION.—An election may be revoked only if shareholders holding more than one-half of the shares of stock of the corporation on the day on which the revocation is made consent to the revocation.

"(C) WHEN EFFECTIVE.—Except as provided in subparagraph (D)—

"(i) a revocation made during the taxable year and on or before the 15th day of the 3d month thereof shall be effective on the 1st day of such taxable year, and

"(ii) a revocation made during the taxable year but after such 15th day shall be effective on the 1st day of the following taxable year.

"(D) REVOCATION MAY SPECIFY PROSPECTIVE DATE.—If the revocation specifies a date for revocation which is on or after the day on which the revocation is made, the revocation shall be effective on and after the date so specified.

"(2) BY CORPORATION CEASING TO BE SMALL BUSINESS CORPORATION.—

"(A) IN GENERAL.—An election under subsection (a) shall be terminated whenever (at any time on or after the 1st day of the 1st taxable year for which the corporation is an S corporation) such corporation ceases to be a small business corporation.

"(B) WHEN EFFECTIVE.—Any termination under this paragraph shall be effective on and after the date of cessation.

"(3) WHERE PASSIVE INVESTMENT INCOME EXCEEDS 20 PERCENT OF GROSS RECEIPTS AND CORPORATION HAS ACCUMULATED EARNINGS AND PROFITS.—

"(A) TERMINATION.—

"(i) IN GENERAL.—An election under subsection (a) shall be terminated whenever the corporation—

"(I) has gross receipts for any taxable year more than 20 percent of which is passive investment income, and

"(II) has subchapter C earnings and profits at the close of such taxable year.

"(ii) WHEN EFFECTIVE.—Any termination under this paragraph shall be effective on and after the first day of the taxable year referred to in clause (i).

"(B) SUBCHAPTER C EARNINGS AND PROFITS.—For purposes of subparagraph (A), the term 'subchapter C earnings and profits' means earnings and profits of any corporation for any taxable year with respect to which an election under section 1362(a) (or under section 1372 of prior law) was not in effect.

"(C) GROSS RECEIPTS FROM SALES OF CAPITAL ASSETS (OTHER THAN STOCK AND SECURITIES).—For purposes of this paragraph, in the case of dispositions of capital assets (other than stock and securities), gross receipts from such dispositions shall be taken into account only to the extent of the capital gain net income therefrom.

"(D) PASSIVE INVESTMENT INCOME DEFINED.—For purposes of this paragraph—

"(i) IN GENERAL.—Except as otherwise provided in this subparagraph, the term 'passive investment income' means gross receipts derived from royalties, rents, dividends, interest, annuities, and sales or exchanges of stock or securities (gross receipts from such sales or exchanges being taken into account for purposes of this paragraph only to the extent of gains therefrom).

"(ii) EXCEPTION FOR INTEREST ON NOTES FROM SALES OF INVENTORY.—The term 'passive investment income' shall not include interest on any obligation acquired in the ordinary course of the corporation's trade or business from its sale of property described in section 1221(1).

"(iii) TREATMENT OF CERTAIN LENDING OR FINANCE COMPANIES.—If the S corporation meets the requirements of section 542(c)(6) for the taxable year, the term 'passive investment income' shall not include gross receipts for the taxable year which are derived directly from the active and regular conduct of a lending or finance business (as defined in section 542(d)(1)).

"(iv) TREATMENT OF CERTAIN LIQUIDATIONS.—Gross receipts derived from sales or exchanges of stock or securities shall not include amounts received by an S corporation which are treated under section 331 (relating to corporate liquidations) as payments in exchange for stock where the S corporation owned more than 50 percent of each class of stock of the liquidating corporation.

"(e) TREATMENT OF S TERMINATION YEAR.—

"(1) IN GENERAL.—In the case of an S termination year, for purposes of this title—

"(A) S SHORT YEAR.—The portion of such year ending before the 1st day for which the termination is effective shall be treated

as a short taxable year for which the corporation is an S corporation.

"(B) C SHORT YEAR.—The portion of such year beginning on such 1st day shall be treated as a short taxable year for which the corporation is a C corporation.

"(2) PRO RATA ALLOCATION.—Except as provided in paragraph (3), the determination of which items are to be taken into account for each of the short taxable years referred to in paragraph (1) shall be made—

"(A) first by determining for the S termination year—

"(i) the amount of each of the items of income, loss, deduction, or credit described in section 1366(a)(1)(A), and

"(ii) the amount of the nonseparately computed income or loss, and

"(B) then by assigning an equal portion of each amount determined under subparagraph (A) to each day of the S termination year.

"(3) ELECTION TO HAVE ITEMS ASSIGNED TO EACH SHORT TAXABLE YEAR UNDER NORMAL TAX ACCOUNTING RULES.—

"(A) IN GENERAL.—A corporation may elect to have paragraph (2) not apply.

"(B) ALL SHAREHOLDERS MUST CONSENT TO ELECTION.—An election under this paragraph shall be valid only if all persons who are shareholders in the corporation at any time during the S termination year consent to such election.

"(4) S TERMINATION YEAR.—For purposes of this subsection, the term 'S termination year' means any taxable year of a corporation (determined without regard to this subsection) in which a termination of an election made under subsection (a) takes effect (other than on the 1st day thereof).

"(5) TAX FOR C SHORT YEAR DETERMINED ON ANNUALIZED BASIS.—

"(A) IN GENERAL.—The taxable income for the short year described in subparagraph (B) of paragraph (1) shall be placed on an annual basis by multiplying the taxable income for such short year by the number of days in the S termination year and by dividing the result by the number of days in the short year. The tax shall be the same part of the tax computed on the annual basis as the number of days in such short year is of the number of days in the S termination year.

"(B) SECTION 443(d)(2) TO APPLY.—Subsection (d)(2) of section 443 shall apply to the short taxable year described in subparagraph (B) of paragraph (1).

"(6) OTHER SPECIAL RULES.—For purposes of this title—

"(A) SHORT YEARS TREATED AS 1 YEAR FOR CARRYOVER PURPOSES.—The short taxable year described in subparagraph (A) of paragraph (1) shall not be taken into account for purposes of determining the number of taxable years to which any item may be carried back or carried forward by the corporation.

"(B) DUE DATE FOR S YEAR.—The due date for filing the return for the short taxable year described in subparagraph (A) of paragraph (1) shall be the same as the due date for filing the return for the short taxable year described in subparagraph (B) of paragraph (1) (including extensions thereof).

"(f) INADVERTENT TERMINATIONS.—If—

"(1) an election under subsection (a) by any corporation was terminated under paragraph (2) or (3) of subsection (d),

"(2) the Secretary determines that the termination was inadvertent,

"(3) no later than a reasonable period of time after discovery of the event resulting in such termination, steps were taken so that the corporation is once more a small business corporation, and

"(4) the corporation, and each person who was a shareholder of the corporation at any time during the period specified pursuant to this subsection, agrees to make such adjustments (consistent with the treatment of the corporation as an S corporation) as may be required by the Secretary with respect to such period,

then, notwithstanding the terminating event, such corporation shall be treated as continuing to be an S corporation during the period specified by the Secretary.

"(g) ELECTION AFTER TERMINATION.—If a small business corporation has made an election under subsection (a) and if such election has been terminated under subsection (d), such corporation (and any successor corporation) shall not be eligible to make an election under subsection (a) for any taxable year before its 5th taxable year which begins after the 1st taxable year for which such termination is effective, unless the Secretary consents to such election.

"SEC. 1363. EFFECT OF ELECTION ON CORPORATION.

"(a) GENERAL RULE.—Except as otherwise provided in this subchapter and in section 58(d), an S corporation shall not be subject to the taxes imposed by this chapter.

"(b) COMPUTATION OF CORPORATION'S TAXABLE INCOME.—The taxable income of an S corporation shall be computed in the same manner as in the case of an individual, except that—

"(1) the items described in section 1366(a)(1)(A) shall be separately stated,

"(2) the deductions referred to in section 703(a)(2) shall not be allowed to the corporation, and

"(3) section 248 shall apply.

"(c) ELECTIONS OF THE S CORPORATION.—

"(1) IN GENERAL.—Except as provided in paragraph (2), any election affecting the computation of items derived from an S corporation shall be made by the corporation.

"(2) EXCEPTIONS.—In the case of an S corporation, elections under the following provisions shall be made by each shareholder separately—

"(A) subsection (b)(5) or (d)(4) of section 108 (relating to income from discharge of indebtedness),

"(B) section 163(d) (relating to limitation on interest on investment indebtedness),

"(C) section 617 (relating to deduction and recapture of certain mining exploration expenditures), and

"(D) section 901 (relating to taxes of foreign countries and possessions of the United States).

"(d) DISTRIBUTIONS OF APPRECIATED PROPERTY.—If—

"(1) an S corporation makes a distribution of property (other than an obligation of such corporation) with respect to its stock, and

"(2) the fair market value of such property exceeds its adjusted basis in the hands of the S corporation,

then, notwithstanding any other provision of this subtitle, gain shall be recognized to the S corporation on the distribution in the same manner as if it had sold such property to the distributee at its fair market value.

"PART II—TAX TREATMENT OF SHAREHOLDERS

"Sec. 1366. Pass-thru of items to shareholders.

"Sec. 1367. Adjustments to basis of stock of shareholders, etc.

"Sec. 1368. Distributions.

"SEC. 1366. PASS-THRU OF ITEMS TO SHAREHOLDERS.

"(a) DETERMINATION OF SHAREHOLDER'S TAX LIABILITY.—

"(1) IN GENERAL.—In determining the tax under this chapter of a shareholder for the shareholder's taxable year in which the taxable year of the S corporation ends (or for the final taxable year of a shareholder who dies before the end of the corporation's taxable year), there shall be taken into account the shareholder's pro rata share of the corporation's—

"(A) items of income (including tax-exempt income), loss, deduction, or credit the separate treatment of which could affect the liability for tax of any shareholder, and

"(B) nonseparately computed income or loss.

For purposes of the preceding sentence, the items referred to in subparagraph (A) shall include amounts described in paragraph (4) or (6) of section 702(a).

"(2) NONSEPARATELY COMPUTED INCOME OR LOSS DEFINED.—For purposes of this subchapter, the term 'nonseparately computed income or loss' means gross income minus the deductions allowed to the corporation under this chapter, determined by excluding all items described in paragraph (1)(A).

"(b) CHARACTER PASSED THRU.—The character of any item included in a shareholder's pro rata share under paragraph (1) of subsection (a) shall be determined as if such item were realized directly from the source from which realized by the corporation, or incurred in the same manner as incurred by the corporation.

"(c) GROSS INCOME OF A SHAREHOLDER.—In any case where it is necessary to determine the gross income of a shareholder for purposes of this title, such gross income shall include the shareholder's pro rata share of the gross income of the corporation.

"(d) SPECIAL RULES FOR LOSSES AND DEDUCTIONS.—

"(1) CANNOT EXCEED SHAREHOLDER'S BASIS IN STOCK AND DEBT.—The aggregate amount of losses and deductions taken into account by a shareholder under subsection (a) for any taxable year shall not exceed the sum of—

"(A) the adjusted basis of the shareholder's stock in the S corporation (determined with regard to paragraph (1) of section 1367(a) for the taxable year), and

"(B) the shareholder's adjusted basis of any indebtedness of the S corporation to the shareholder (determined without regard to any adjustment under paragraph (2) of section 1367(b) for the taxable year).

"(2) INDEFINITE CARRYOVER OF DISALLOWED LOSSES AND DEDUCTIONS.—Any loss or deduction which is disallowed for any taxable year by reason of paragraph (1) shall be treated as incurred by the corporation in the succeeding taxable year with respect to that shareholder.

"(3) CARRYOVER OF DISALLOWED LOSSES AND DEDUCTIONS TO POST-TERMINATION TRANSITION PERIOD.—

"(A) IN GENERAL.—If for the last taxable year of a corporation for which it was an S corporation a loss or deduction was disallowed by reason of paragraph (1), such loss or deduction shall be treated as incurred by the shareholder on the last day of any post-termination transition period.

"(B) CANNOT EXCEED SHAREHOLDER'S BASIS IN STOCK.—The aggregate amount of losses and deductions taken into account by a shareholder under subparagraph (A) shall

not exceed the adjusted basis of the shareholder's stock in the corporation (determined at the close of the last day of the post-termination transition period and without regard to this paragraph).

"(C) ADJUSTMENT IN BASIS OF STOCK.—The shareholder's basis in the stock of the corporation shall be reduced by the amount allowed as a deduction by reason of this paragraph.

"(e) TREATMENT OF FAMILY GROUP.—If an individual who is a member of the family (within the meaning of section 704(e)(3)) of one or more shareholders of an S corporation renders services for the corporation or furnishes capital to the corporation without receiving reasonable compensation therefor, the Secretary shall make such adjustments in the items taken into account by such individual and such shareholders as may be necessary in order to reflect the value of such services or capital.

"(f) SPECIAL RULES.—

"(1) SUBSECTION (a) NOT TO APPLY TO CREDIT ALLOWABLE UNDER SECTION 39.—Subsection (a) shall not apply with respect to any credit allowable under section 39 (relating to certain uses of gasoline, special fuels, and lubricating oil).

"(2) REDUCTION IN PASS-THRU FOR TAX IMPOSED ON CAPITAL GAIN.—If any tax is imposed under section 56 or 1374 for any taxable year on an S corporation, for purposes of subsection (a)—

"(A) the amount of the corporation's long-term capital gains for the taxable year shall be reduced by the amount of such tax, and

"(B) if the amount of such tax exceeds the amount of such long-term capital gains, the corporation's gains from sales or exchanges of property described in section 1231 shall be reduced by the amount of such excess.

For purposes of the preceding sentence, the term 'long-term capital gain' shall not include any gain from the sale or exchange of property described in section 1231.

"(g) CROSS REFERENCE.—

"For rules relating to procedures for determining the tax treatment of subchapter S items, see subchapter D of chapter 63.

"SEC. 1367. ADJUSTMENTS TO BASIS OF STOCK OF SHAREHOLDERS, ETC.

"(a) GENERAL RULE.—

"(1) INCREASES IN BASIS.—The basis of each shareholder's stock in an S corporation shall be increased for any period by the sum of the following items determined with respect to that shareholder for such period:

"(A) the items of income described in subparagraph (A) of section 1366(a)(1),

"(B) any nonseparately computed income determined under subparagraph (B) of section 1366(a)(1), and

"(C) the excess of the deductions for depletion over the basis of the property subject to depletion.

"(2) DECREASES IN BASIS.—The basis of each shareholder's stock in an S corporation shall be decreased for any period (but not below zero) by the sum of the following items determined with respect to the shareholder for such period:

"(A) distributions by the corporation which were not includible in the income of the shareholder by reason of section 1368,

"(B) the items of loss and deduction described in subparagraph (A) of section 1366(a)(1),

"(C) any nonseparately computed loss determined under subparagraph (B) of section 1366(a)(1),

"(D) any expense of the corporation not deductible in computing its taxable income and not properly chargeable to capital account, and

"(E) the amount of the shareholder's deduction for depletion under section 611 with respect to oil and gas wells.

"(b) SPECIAL RULES.—

"(1) INCOME ITEMS.—An amount which is required to be included in the gross income of a shareholder and shown on his return shall be taken into account under subparagraph (A) or (B) of subsection (a)(1) only to the extent such amount is included in the shareholder's gross income on his return, increased or decreased by any adjustment of such amount in a redetermination of the shareholder's tax liability.

"(2) ADJUSTMENTS IN BASIS OF INDEBTEDNESS.—

"(A) REDUCTION OF BASIS.—If for any taxable year the amounts specified in subparagraphs (B), (C), (D), and (E) of subsection (a)(2) exceed the amount which reduces the shareholder's basis to zero, such excess shall be applied to reduce (but not below zero) the shareholder's basis in any indebtedness of the S corporation to the shareholder.

"(B) RESTORATION OF BASIS.—If for any taxable year there is a reduction under subparagraph (A) in the shareholder's basis in the indebtedness of an S corporation to a shareholder, any net increase (after the application of paragraphs (1) and (2) of subsection (a)) for any subsequent taxable year shall be applied to restore such reduction in basis before any of it may be used to increase the shareholder's basis in the stock of the S corporation.

"(3) COORDINATION WITH SECTION 165(g).—This section and section 1366 shall be applied before the application of section 165(g) to any taxable year of the shareholder or the corporation in which the stock becomes worthless.

"SEC. 1368. DISTRIBUTIONS.

"(a) GENERAL RULE.—A distribution of property made by an S corporation with respect to its stock to which (but for this subsection) section 301(c) would apply shall be treated in the manner provided in subsection (b) or (c), whichever applies.

"(b) S CORPORATION HAVING NO EARNINGS AND PROFITS.—In the case of a distribution described in subsection (a) by an S corporation which has no accumulated earnings and profits—

"(1) AMOUNT APPLIED AGAINST BASIS.—The distribution shall not be included in gross income to the extent that it does not exceed the adjusted basis of the stock.

"(2) AMOUNT IN EXCESS OF BASIS.—If the amount of the distribution exceeds the adjusted basis of the stock, such excess shall be treated as gain from the sale or exchange of property.

"(c) S CORPORATION HAVING EARNINGS AND PROFITS.—In the case of a distribution described in subsection (a) by an S corporation which has accumulated earnings and profits—

"(1) ACCUMULATED ADJUSTMENTS ACCOUNT.—That portion of the distribution which does not exceed the accumulated adjustments account shall be treated in the manner provided by subsection (b).

"(2) DIVIDEND.—That portion of the distribution which remains after the application of paragraph (1) shall be treated as a dividend to the extent it does not exceed the accumulated earnings and profits of the S corporation.

"(3) TREATMENT OF REMAINDER.—Any portion of the distribution remaining after the application of paragraph (2) of this subsection shall be treated in the manner provided by subsection (b).

"(d) CERTAIN ADJUSTMENTS TAKEN INTO ACCOUNT.—Subsections (b) and (c) shall be applied by taking into account (to the extent proper)—

"(1) the adjustments to the basis of the shareholder's stock described in section 1367, and

"(2) the adjustments to the accumulated adjustments account which are required by subsection (e)(1).

"(e) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) ACCUMULATED ADJUSTMENTS ACCOUNT.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the term 'accumulated adjustments account' means an account of the S corporation which is adjusted for the S period in a manner similar to the adjustments under section 1367 (except that no adjustment shall be made for income which is exempt from tax under this title and no adjustment shall be made for any expense not deductible in computing the corporation's taxable income and not properly chargeable to capital account).

"(B) AMOUNT OF ADJUSTMENT IN THE CASE OF REDEMPTIONS.—In the case of any redemption which is treated as an exchange under section 302(a) or 303(a), the adjustment in the accumulated adjustments account shall be an amount which bears the same ratio to the balance in such account as the number of shares redeemed in such redemption bears to the number of shares of stock in the corporation immediately before such redemption.

"(2) S PERIOD.—The term 'S period' means the most recent continuous period during which the corporation has been an S corporation. Such period shall not include any taxable year beginning before January 1, 1983.

"PART III—SPECIAL RULES

"Sec. 1371. Coordination with subchapter C.

"Sec. 1372. Partnership rules to apply for fringe benefit purposes.

"Sec. 1373. Foreign income.

"Sec. 1374. Tax imposed on certain capital gains.

"SEC. 1371. COORDINATION WITH SUBCHAPTER C.

"(a) APPLICATION OF SUBCHAPTER C RULES.—

"(1) IN GENERAL.—Except as otherwise provided in this title, and except to the extent inconsistent with this subchapter, subchapter C shall apply to an S corporation and its shareholders.

"(2) S CORPORATION AS SHAREHOLDER TREATED LIKE INDIVIDUAL.—For purposes of subchapter C, an S corporation in its capacity as a shareholder of another corporation shall be treated as an individual.

"(b) NO CARRYOVER BETWEEN C YEAR AND S YEAR.—

"(1) FROM C YEAR TO S YEAR.—No carryforward, and no carryback, arising for a taxable year for which a corporation is a C corporation may be carried to a taxable year for which such corporation is an S corporation.

"(2) NO CARRYOVER FROM S YEAR.—No carryforward, and no carryback, shall arise at the corporate level for a taxable year for which a corporation is an S corporation.

"(3) TREATMENT OF S YEAR AS ELAPSED YEAR.—Nothing in paragraphs (1) and (2) shall prevent treating a taxable year for which a corporation is an S corporation as a taxable year for purposes of determining

the number of taxable years to which an item may be carried back or carried forward.

"(c) EARNINGS AND PROFITS.—

"(1) IN GENERAL.—Except as provided in paragraphs (2) and (3), no adjustment shall be made to the earnings and profits of an S corporation.

"(2) ADJUSTMENTS FOR REDEMPTIONS, LIQUIDATIONS, REORGANIZATIONS, DIVISIVES, ETC.—In the case of any transaction involving the application of subchapter C to any S corporation, proper adjustment to any accumulated earnings and profits of the corporation shall be made.

"(3) ADJUSTMENTS IN CASE OF DISTRIBUTIONS TREATED AS DIVIDENDS UNDER SECTION 1368(C)(2).—Paragraph (1) shall not apply with respect to that portion of a distribution which is treated as a dividend under section 1368(c)(2).

"(d) COORDINATION WITH INVESTMENT CREDIT RECAPTURE.—

"(1) NO RECAPTURE BY REASON OF ELECTION.—Any election under section 1362 shall be treated as a mere change in the form of conducting a trade or business for purposes of the second sentence of section 47(b).

"(2) CORPORATION CONTINUES TO BE LIABLE.—Notwithstanding an election under section 1362, an S corporation shall continue to be liable for any increase in tax under section 47 attributable to credits allowed for taxable years for which such corporation was not an S corporation.

"(e) CASH DISTRIBUTIONS DURING POST-TERMINATION TRANSITION PERIOD.—Any distribution of money by a corporation with respect to its stock during a post-termination transition period shall be applied against and reduce the adjusted basis of the stock, to the extent that the amount of the distribution does not exceed the accumulated adjustments account.

"SEC. 1372. PARTNERSHIP RULES TO APPLY FOR FRINGE BENEFIT PURPOSES.

"(a) GENERAL RULE.—For purposes of applying the provisions of this subtitle which relate to employee fringe benefits—

"(1) the S corporation shall be treated as a partnership, and

"(2) any 2-percent shareholder of the S corporation shall be treated as a partner of such partnership.

"(b) 2-PERCENT SHAREHOLDER DEFINED.—For purposes of this section, the term '2-percent shareholder' means any person who owns (or is considered as owning within the meaning of section 318) on any day during the taxable year of the S corporation more than 2 percent of the outstanding stock of such corporation or stock possessing more than 2 percent of the total combined voting power of all stock of such corporation.

"SEC. 1373. FOREIGN INCOME.

"(a) S CORPORATION TREATED AS PARTNERSHIP, ETC.—For purposes of subparts A and F of part III, and part V, of subchapter N (relating to income from sources without the United States)—

"(1) an S corporation shall be treated as a partnership, and

"(2) the shareholders of such corporation shall be treated as partners of such partnership.

"(b) RECAPTURE OF OVERALL FOREIGN LOSS.—For purposes of section 904(f) (relating to recapture of overall foreign loss), the making or termination of an election to be treated as an S corporation shall be treated as a disposition of the business.

"SEC. 1374. TAX IMPOSED ON CERTAIN CAPITAL GAINS.

"(a) GENERAL RULE.—If for a taxable year of an S corporation—

"(1) the net capital gain of such corporation exceeds $25,000, and exceeds 50 percent of its taxable income for such year, and

"(2) the taxable income of such corporation for such year exceeds $25,000,

there is hereby imposed a tax (computed under subsection (b)) on the income of such corporation.

"(b) AMOUNT OF TAX.—The tax imposed by subsection (a) shall be the lower of—

"(1) an amount equal to the tax, determined as provided in section 1201(a), on the amount by which the net capital gain of the corporation for the taxable year exceeds $25,000, or

"(2) an amount equal to the tax which would be imposed by section 11 on the taxable income of the corporation for the taxable year if the corporation were not an S corporation.

No credit shall be allowable under part IV of subchapter A of this chapter (other than under section 39) against the tax imposed by subsection (a).

"(c) EXCEPTIONS.—

"(1) IN GENERAL.—Subsection (a) shall not apply to an S corporation for any taxable year if the election under section 1362(a) which is in effect with respect to such corporation for such taxable year has been in effect for the 3 immediately preceding taxable years.

"(2) NEW CORPORATIONS.—Subsection (a) shall not apply to an S corporation if—

"(A) it (and any predecessor corporation) has been in existence for less than 4 taxable years, and

"(B) an election under section 1362(a) has been in effect with respect to such corporation for each of its taxable years.

"(3) PROPERTY WITH SUBSTITUTED BASIS.—If—

"(A) but for paragraph (1) or (2), subsection (a) would apply for the taxable year,

"(B) any long-term capital gain is attributable to property acquired by the S corporation during the period beginning 3 years before the first day of the taxable year and ending on the last day of the taxable year, and

"(C) the basis of such property is determined in whole or in part by reference to the basis of any property in the hands of another corporation which was not an S corporation throughout all of the period described in subparagraph (B) before the transfer by such other corporation and during which such other corporation was in existence,

then subsection (a) shall apply for the taxable year, but the amount of the tax determined under subsection (b) shall not exceed a tax, determined as provided in section 1201(a), on the net capital gain attributable to property acquired as provided in subparagraph (B) and having a basis described in subparagraph (C).

"(d) DETERMINATION OF TAXABLE INCOME.—For purposes of subsections (a)(2) and (b)(2), taxable income of the corporation shall be determined under section 63(a) without regard to—

"(1) the deduction allowed by section 172 (relating to net operating loss deduction), and

"(2) the deductions allowed by part VIII of subchapter B (other than the deduction allowed by section 248, relating to organization expenditures).

"PART IV—DEFINITIONS; MISCELLANEOUS

"Sec. 1377. Definitions and special rule.

"Sec. 1378. Taxable year of S corporation.

"Sec. 1379. Transitional rules on enactment.

"SEC. 1377. DEFINITIONS AND SPECIAL RULE.

"(a) PRO RATA SHARE.—For purposes of this subchapter—

"(1) IN GENERAL.—Except as provided in paragraph (2), each shareholder's pro rata share of any item for any taxable year shall be the sum of the amounts determined with respect to the shareholder—

"(A) by assigning an equal portion of such item to each day of the taxable year, and

"(B) then by dividing that portion pro rata among the shares outstanding on such day.

"(2) ELECTION TO TERMINATE YEAR.—Under regulations prescribed by the Secretary, if any shareholder terminates his interest in the corporation during the taxable year and all persons who are shareholders during the taxable year agree to the application of this paragraph, paragraph (1) shall be applied as if the taxable year consisted of 2 taxable years the first of which ends on the date of the termination.

"(b) POST-TERMINATION TRANSITION PERIOD.—

"(1) IN GENERAL.—For purposes of this subchapter, the term 'post-termination transition period' means—

"(A) the period beginning on the day after the last day of the corporation's last taxable year as an S corporation and ending on the later of—

"(i) the day which is 1 year after such last day, or

"(ii) the due date for filing the return for such last year as an S corporation (including extensions), and

"(B) the 120-day period beginning on the date of a determination that the corporation's election under section 1362(a) had terminated for a previous taxable year.

"(2) DETERMINATION DEFINED.—For purposes of paragraph (1), the term 'determination' means—

"(A) a court decision which becomes final,

"(B) a closing agreement, or

"(C) an agreement between the corporation and the Secretary that the corporation failed to qualify as an S corporation.

"(c) MANNER OF MAKING ELECTIONS, ETC.—Any election under this subchapter, and any revocation under section 1362(d)(1), shall be made in such manner as the Secretary shall by regulations prescribe.

"SEC. 1378. TAXABLE YEAR OF S CORPORATION.

"(a) GENERAL RULE.—For purposes of this subtitle—

"(1) an S corporation shall not change its taxable year to any accounting period other than a permitted year, and

"(2) no corporation may make an election under section 1362(a) for any taxable year unless such taxable year is a permitted year.

"(b) PERMITTED YEAR DEFINED.—For purposes of this section, the term 'permitted year' means a taxable year which—

"(1) is a year ending December 31, or

"(2) is any other accounting period for which the corporation establishes a business purpose to the satisfaction of the Secretary.

"(c) EXISTING S CORPORATIONS REQUIRED TO USE PERMITTED YEAR AFTER 50-PERCENT SHIFT IN OWNERSHIP.—

"(1) IN GENERAL.—A corporation which is an S corporation for a taxable year which includes December 31, 1982, shall not be treated as an S corporation for any subsequent taxable year beginning after the first day on which more than 50 percent of the stock is newly owned stock unless such subsequent taxable year is a permitted year.

"(2) NEWLY OWNED STOCK.—For purposes of paragraph (1), the stock held by any person on any day shall be treated as newly owned stock to the extent that—

"(A) the percentage of the stock of such corporation owned by such person on such day, exceeds

"(B) the percentage of the stock of such corporation owned by such person on December 31, 1982.

"(3) STOCK ACQUIRED BY REASON OF DEATH.—For purposes of paragraph (2), if—

"(A) a person acquires stock in the corporation after December 31, 1982, and

"(B) such stock was acquired by reason of the death of a person who held such stock (or predecessor stock) on such date,

then such stock shall be treated as held on December 31, 1982, by the person described in subparagraph (A). A similar rule shall apply in the case of a series of such acquisitions.

"SEC. 1379. TRANSITIONAL RULES ON ENACTMENT.

"(a) OLD ELECTIONS.—Any election made under section 1372(a) (as in effect before the enactment of the Subchapter S Revision Act of 1982) shall be treated as an election made under section 1362.

"(b) REFERENCES TO PRIOR LAW INCLUDED.—In applying this subchapter to any taxable year beginning after December 31, 1982, any reference in this subchapter to another provision of this subchapter shall, to the extent not inconsistent with the purposes of this subchapter, include a reference to the corresponding provision as in effect before the enactment of the Subchapter S Revision Act of 1982.

"(c) DISTRIBUTIONS OF UNDISTRIBUTED TAXABLE INCOME.—If a corporation was an electing small business corporation for the last preenactment year, subsections (f) and (d) of section 1375 (as in effect before the enactment of the Subchapter S Revision Act of 1982) shall continue to apply with respect to distributions of undistributed taxable income for any taxable year beginning before January 1, 1983.

"(d) CARRYFORWARDS.—If a corporation was an electing small business corporation for the last preenactment year and is an S corporation for the 1st postenactment year, any carryforward to the 1st postenactment year which arose in a taxable year for which the corporation was an electing small business corporation shall be treated as arising in the 1st postenactment year.

"(e) PREENACTMENT AND POSTENACTMENT YEARS DEFINED.—For purposes of this subsection—

"(1) LAST PREENACTMENT YEAR.—The term 'last preenactment year' means the last taxable year of a corporation which begins before January 1, 1983.

"(2) 1ST POSTENACTMENT YEAR.—The term '1st postenactment year' means the 1st taxable year of a corporation which begins after December 31, 1982."

SEC. 3. S CORPORATION TREATED LIKE PARTNERSHIP FOR PURPOSES OF CERTAIN PROVISIONS.

(a) DEPLETION IN THE CASE OF OIL AND GAS WELLS (SECTION 613A).—Subsection (c) of section 613A (relating to exemption for independent producers and royalty owners) is amended by adding at the end thereof the following new paragraph:

"(13) SUBCHAPTER S CORPORATIONS.—

"(A) COMPUTATION OF DEPLETION ALLOWANCE AT SHAREHOLDER LEVEL.—In the case of an S corporation, the allowance for depletion with respect to any oil or gas property shall be computed separately by each shareholder.

"(B) ALLOCATION OF BASIS.—The S corporation shall allocate to each shareholder his pro rata share of the adjusted basis of the S corporation in each oil or gas property held by the S corporation. The allocation shall be made as of the later of the date of acquisition of the property by the S corporation, or the first day of the first taxable year of the S corporation to which the Subchapter S Revision Act of 1982 applies. Each shareholder shall separately keep records of his share of the adjusted basis in each oil and gas property of the S corporation, adjust such share of the adjusted basis for any depletion taken on such property, and use such adjusted basis each year in the computation of his cost depletion or in the computation of his gain or loss on the disposition of such property by the S corporation. In the case of any distribution of oil or gas property to its shareholders by the S corporation, the corporation's adjusted basis in the property shall be an amount equal to the sum of the shareholders' adjusted bases in such property, as determined under this subparagraph.

"(C) COORDINATION WITH TRANSFER RULE OF PARAGRAPH (9).—For purposes of paragraph (9)—

"(i) an S corporation shall be treated as a partnership, and the shareholders of the S corporation shall be treated as partners, and

"(ii) an election by a C corporation to become an S corporation shall be treated as a transfer of all its properties effective on the day on which such election first takes effect.

"(D) COORDINATION WITH TRANSFER RULE OF PARAGRAPH (10).—For purposes of paragraphs (9) and (10), if an S corporation becomes a C corporation, each shareholder shall be treated as having transferred to such corporation his pro rata share of all the assets of the S corporation."

(b) WINDFALL PROFIT TAX.—

(1) Paragraph (1) of section 4996(a) (defining producer) is amended by adding at the end thereof the following new subparagraph:

"(C) SUBCHAPTER S CORPORATIONS.—

"(i) IN GENERAL.—If (but for this subparagraph) an S corporation would be treated as a producer of any crude oil—

"(I) such crude oil shall be allocated among the shareholders of such corporation, and

"(II) any shareholder to whom such crude oil is allocated (and not the S corporation) shall be treated as the producer of such crude oil.

"(ii) ALLOCATION.—Except to the extent otherwise provided in regulations, any allocation under clause (i)(I) shall be determined on the basis of the shareholder's pro rata share (as determined under section 1377(a)) of the income of the corporation."

(2) Section 4992 (relating to independent producer oil) is amended by adding at the end thereof the following new subsection:

"(f) S CORPORATION TREATED AS PARTNERSHIP.—For purposes of subsections (d) and (e)—

"(1) an S corporation shall be treated as a partnership, and

"(2) the shareholders of the S corporation shall be treated as partners of such partnership."

(c) OPTIONAL WRITEOFF OF CERTAIN TAX PREFERENCES (SECTION 58(i)).—

(1) Subparagraph (C) of section 58(i)(4) (defining nonlimited partnership intangible drilling costs) is amended to read as follows:

"(C) NONLIMITED INTANGIBLE DRILLING COSTS.—For purposes of this paragraph, the term 'nonlimited intangible drilling costs' means any qualified expenditure described in paragraph (2)(C) of an individual which is not allocable to a limited business interest (as defined in section 55(e)(8)(C)) of such individual."

(2) Subparagraph (D) of section 58(i)(5) is amended—

(A) by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of an S corporation and its shareholders.", and

(B) by striking out "PARTNERS" in the subparagraph heading and inserting in lieu thereof "PARTNERS AND SHAREHOLDERS OF S CORPORATIONS".

(3) The paragraph heading for paragraph (4) of section 58(i) is amended by striking out "INTEREST AS LIMITED PARTNER" and inserting in lieu thereof "LIMITED BUSINESS INTEREST".

(d) USED PROPERTY FOR PURPOSES OF INVESTMENT CREDIT (SECTION 48(c)).—Subparagraph (D) of section 48(c)(2) (relating to partnerships) is amended—

(1) by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of an S corporation and its shareholders.", and

(2) by striking out "PARTNERSHIPS" in the subparagraph heading and inserting in lieu thereof "PARTNERSHIPS AND S CORPORATIONS".

(e) INCOME FROM DISCHARGE OF INDEBTEDNESS (SECTION 108).—Paragraph (6) of section 108(d) (relating to application of section at partner level) is amended to read as follows:

"(6) SUBSECTIONS (a), (b), AND (c) TO BE APPLIED AT PARTNER LEVEL OR S CORPORATION SHAREHOLDER LEVEL.—In the case of a partnership, subsections (a), (b), and (c) shall be applied at the partner level. In the case of an S corporation, subsections (a), (b), and (c) shall be applied at the shareholder level."

(f) ELECTION TO EXPENSE CERTAIN DEPRECIABLE BUSINESS ASSETS (SECTION 179).—Paragraph (8) of section 179(d) (relating to dollar limitation in the case of partnerships) is amended—

(1) by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of an S corporation and its shareholders.", and

(2) by striking out "PARTNERSHIPS" in the paragraph heading and inserting in lieu thereof "PARTNERSHIPS AND S CORPORATIONS".

(g) AMORTIZATION OF REFORESTATION EXPENDITURES (SECTION 194).—Subparagraph (B) of section 194(b)(2) (relating to partnerships) is amended—

(1) by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of an S corporation and its shareholders.", and

(2) by striking out "PARTNERSHIPS" in the subparagraph heading and inserting in lieu thereof "PARTNERSHIPS AND S CORPORATIONS".

(h) TREATMENT OF LOSSES AND UNPAID EXPENSES AND INTEREST IN THE CASE OF TRANSACTIONS BETWEEN S CORPORATIONS AND CERTAIN RELATED ENTITIES (SECTION 267(b)).—

(1) Subsection (b) of section 267 (relating to losses, expenses, and interest with respect to transactions between related taxpayers) is amended by adding at the end thereof the following new paragraphs:

"(10) An S corporation and a partnership if the same persons own—

"(A) more than 50 percent in value of the outstanding stock of the S corporation, and

"(B) more than 50 percent of the capital interest, or the profits interest, in the partnership;

"(11) An S corporation and another S corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation; or

"(12) An S corporation and a C corporation, if the same individual owns more than 50 percent in value of the outstanding stock of each corporation."

(2) Section 267 is amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULES FOR UNPAID EXPENSES AND INTEREST OF S CORPORATIONS.—

"(1) IN GENERAL.—In the case of any amount paid or incurred by an S corporation, if—

"(A) by reason of the method of accounting of the person to whom the payment is to be made, the amount thereof is not (unless paid) includible in the gross income of such person, and

"(B) at the close of the taxable year of the S corporation for which (but for this paragraph) the amount would be deductible under section 162, 212, or 163, both the S corporation and the person to whom the payment is to be paid are persons specified in one of the paragraphs of subsection (b),

then no deduction shall be allowed in respect of expenses otherwise deductible under section 162 or 212, or of interest otherwise deductible under section 163, before the day as of which the amount thereof is includible in the gross income of the person to whom the payment is made.

"(2) CERTAIN SHAREHOLDERS, ETC., TREATED AS RELATED PERSONS.—For purposes of applying paragraph (1)—

"(A) an S corporation,

"(B) any person who owns, directly or indirectly, 2 percent or more in value of the outstanding stock of such corporation, and

"(C) any person related (within the meaning of subsection (b) of this section or section 707(b)(1)(A)) to a person described in subparagraph (B),

shall be treated as persons specified in a paragraph of subsection (b).

"(3) SUBSECTION (a)(2) NOT TO APPLY.—Subsection (a)(2) shall not apply to any amount paid or incurred by an S corporation."

(3) Subsection (b) of section 267 is amended by striking out "or" at the end of paragraph (8), and by striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon.

(i) WITHHOLDING FROM INTEREST AND DIVIDENDS.—

(1) Paragraph (1) of section 3453(b) (relating to certain middlemen treated as payors) is amended by striking out "or" at the end of subparagraph (B), by inserting "or" at the end of subparagraph (C), and by inserting after subparagraph (C) the following new subparagraph:

"(D) any S corporation which receives any payment,".

(2) Subsection (b) of section 3454 (defining dividend) is amended by striking out paragraph (2) and by redesignating paragraph (3) as paragraph (2).

(3) Paragraph (2) of section 3454(b) (as redesignated by paragraph (2)) is amended by inserting "and" at the end of subparagraph (F), by striking out ", and" at the end of subparagraph (G) and inserting in lieu thereof a period, and by striking subparagraph (H).

(4) Subsection (d) of section 31 (as amended by section 302 of the Tax Equity and Fiscal Responsibility Act of 1982) is amended to read as follows:

"(d) YEAR FOR WHICH CREDIT ALLOWED.—Any credit allowed by this section shall be allowed for the taxable year beginning in the calendar year in which the amount was withheld (or, in the case of subsection (c), in which the wages were received). If more than 1 taxable year begins in a calendar year, such amount shall be allowed as a credit for the last taxable year so beginning."

SEC. 4. TAX TREATMENT OF SUBCHAPTER S ITEMS.

(a) GENERAL RULE.—Chapter 63 (relating to assessment) is amended by adding at the end thereof the following new subchapter:

"Subchapter D—Tax Treatment of Subchapter S Items

"Sec. 6241. Tax treatment determined at corporate level.

"Sec. 6242. Shareholder's return must be consistent with corporate return or Secretary notified of inconsistency.

"Sec. 6243. All shareholders to be notified of proceedings and given opportunity to participate.

"Sec. 6244. Certain partnership provisions made applicable.

"Sec. 6245. Subchapter S item defined.

"SEC. 6241. TAX TREATMENT DETERMINED AT CORPORATE LEVEL.

"Except as otherwise provided in regulations prescribed by the Secretary, the tax treatment of any subchapter S item shall be determined at the corporate level.

"SEC. 6242. SHAREHOLDER'S RETURN MUST BE CONSISTENT WITH CORPORATE RETURN OR SECRETARY NOTIFIED OF INCONSISTENCY.

"A shareholder of an S corporation shall, on such shareholder's return, treat a subchapter S item in a manner which is consistent with the treatment of such item on the corporate return unless the shareholder notifies the Secretary (at the time and in the manner prescribed by regulations) of the inconsistency.

"SEC. 6243. ALL SHAREHOLDERS TO BE NOTIFIED OF PROCEEDINGS AND GIVEN OPPORTUNITY TO PARTICIPATE.

"In the manner and at the time prescribed in regulations, each shareholder in a corporation shall be given notice of, and the right to participate in, any administrative or judicial proceeding for the determination at the corporate level of any subchapter S item.

"SEC. 6244. CERTAIN PARTNERSHIP PROVISIONS MADE APPLICABLE.

"The provisions of—

"(1) subchapter C which relate to—

"(A) assessing deficiencies, and filing claims for credit or refund, with respect to partnership items, and

"(B) judicial determination of partnership items, and

"(2) so much of the other provisions of this subtitle as relate to partnership items,

are (except to the extent modified or made inapplicable in regulations) hereby extended to and made applicable to subchapter S items.

"SEC. 6245. SUBCHAPTER S ITEM DEFINED.

"For purposes of this subchapter, the term 'subchapter S item' means any item of an S corporation to the extent regulations prescribed by the Secretary provide that, for purposes of this subtitle, such item is more appropriately determined at the corporate level than at the shareholder level."

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 63 is amended by adding at the end thereof the following new item:

"Subchapter D. Tax treatment of subchapter S items."

SEC. 5. TECHNICAL AND CONFORMING AMENDMENTS.

(a) TECHNICAL AMENDMENTS.—

(1) SECTION 44D(d)(9).—Paragraph (9) of section 44D(d) (relating to pass-thru in the case of subchapter S corporations, etc.) is amended to read as follows:

"(9) PASS-THRU IN THE CASE OF ESTATES AND TRUSTS.—Under regulations prescribed by the Secretary, rules similar to the rules of subsection (d) of section 52 shall apply."

(2) SECTION 44E(d)(5).—Paragraph (5) of section 44E(d) (relating to pass-thru in the case of subchapter S corporations, etc.) is amended to read as follows:

"(5) PASS-THRU IN THE CASE OF ESTATES AND TRUSTS.—Under regulations prescribed by the Secretary, rules similar to the rules of subsection (d) of section 52 shall apply."

(3) SECTION 44F.—

(A) Subparagraph (A) of section 44F(f)(2) (relating to pass-thru in the case of subchapter S corporations, etc.) is amended to read as follows:

"(A) PASS-THRU IN THE CASE OF ESTATES AND TRUSTS.—Under regulations prescribed by the Secretary, rules similar to the rules of subsection (d) of section 52 shall apply."

(B) Clause (iv) of section 44F(g)(1)(B) is amended by striking out "an electing small business corporation (within the meaning of section 1371(b))" and inserting in lieu thereof "an S corporation".

(4) SECTION 46(a)(4).—The second sentence of paragraph (4) of section 46(a) (defining liability for tax) is amended by striking out "section 1378 (relating to tax on certain capital gains of subchapter S corporations)," and inserting in lieu thereof "section 1374 (relating to tax on certain capital gains of S corporations),".

(5) SECTION 46(c)(8)(C).—Subparagraph (C) of section 46(c)(8) (relating to special rules for partnerships and subchapter S corporations) is amended by striking out "electing small business corporation (within the meaning of section 1371(b))" and inserting in lieu thereof "S corporation".

(6) SECTION 46(e)(3).—Paragraph (3) of section 46(e) (relating to noncorporate lessors) is amended by striking out "an electing small business corporation (as defined in section 1371)" and inserting in lieu thereof "an S corporation".

(7) SECTION 48(e).—Subsection (e) of section 48 (relating to subchapter S corporations) is hereby repealed.

(8) SECTION 48(k)(5)(D)(i).—The second sentence of clause (i) of section 48(k)(5)(D) (relating to allocation of direct production costs) is amended by striking out "an electing small business corporation (within the meaning of section 1371)" and inserting in lieu thereof "an S corporation".

(9) SECTION 50A(a)(3).—The second sentence of paragraph (3) of section 50A(a) (defining liability for tax) is amended by striking out "section 1378 (relating to tax on certain capital gains of subchapter S corporations)," and inserting in lieu thereof "section 1374 (relating to tax on certain capital gains of S corporations),".

(10) SECTION 50B(d).—Subsection (d) of section 50B (relating to subchapter S corporations) is hereby repealed.

(11) SECTION 52(d).—Section 52 is amended by striking out subsection (d) and by re-

designating subsections (e) and (f) as subsections (d) and (e), respectively.

(12) SECTION 53(a).—The second sentence of subsection (a) of section 53 (relating to limitation based on amount of tax) is amended by striking out "section 1378 (relating to tax on certain capital gains of subchapter S corporations)," and inserting in lieu thereof "section 1374 (relating to tax on certain capital gains of S corporations),".

(13) SECTION 55(e)(8)(C).—Subparagraph (C) of section 55(e)(8) is amended by striking out "an electing small business corporation (as defined in section 1371(b))" and inserting in lieu thereof "an S corporation".

(14) SECTION 57(a).—The last sentence of section 57(a) (defining items of tax preference) is amended by striking out "an electing small business corporation (as defined in section 1371(b)) and".

(15) SECTION 57(b).—Subsection (b) of section 57 is amended—

(A) by striking out "an applicable corporation" in paragraph (1) and inserting in lieu thereof "a corporation",

(B) by striking out "applicable corporation" in paragraph (2) and inserting in lieu thereof "corporation", and

(C) by striking out paragraph (3).

(16) SECTION 58(d).—Subsection (d) of section 58 (relating to electing small business corporations and their shareholders) is amended to read as follows:

"(d) CERTAIN CAPITAL GAINS OF S CORPORATIONS.—If for a taxable year of an S corporation a tax is imposed on the income of such corporation under section 1374, such corporation shall be subject to the tax imposed by section 56, but computed only with reference to the item of tax preference set forth in section 57(a)(9)(B) to the extent attributable to gains subject to the tax imposed by section 1374."

(17) SECTION 62(9).—Paragraph (9) of section 62 (relating to pension, etc., plans of an electing small business corporation) is hereby repealed.

(18) SECTION 163(d)(4).—Paragraph (4) of section 163(d) (relating to limitation on interest on investment indebtedness) is amended by striking out subparagraphs (B) and (C) and redesignating subparagraph (D) as subparagraph (B).

(19) SECTION 168(f)(8)(B).—Clause (i) of section 168(f)(8)(B) (relating to special rules for leases), as in effect before the enactment of the Tax Equity and Fiscal Responsibility Act of 1982, is amended by striking out "an electing small business corporation (within the meaning of section 1371(b))" and inserting in lieu thereof "an S corporation".

(20) SECTION 168(f).—Subclause (I) of section 168(f)(8)(C)(i) (as added by subsection (a) of section 209 of the Tax Equity and Fiscal Responsibility Act of 1982) is amended by striking out "an electing small business corporation within the meaning of section 1371(b)" and inserting in lieu thereof "an S corporation".

(21) SECTION 170(e).—

(A) Subparagraph (A) of section 170(e)(3) (defining qualified contributions) is amended by striking out "an electing small business corporation within the meaning of section 1371(b))" and inserting in lieu thereof "an S corporation)".

(B) Clause (i) of section 170(e)(4)(D) is amended to read as follows:

"(i) an S corporation,".

(22) SECTION 172(f).—Subsection (f) of section 172 (relating to disallowance of net operating loss of electing small business corporations) is hereby repealed.

(23) SECTION 183(a).—Subsection (a) of section 183 (relating to activities not engaged in for profit) is amended by striking out "an electing small business corporation (as defined in section 1371(b))" and inserting in lieu thereof "an S corporation".

(24) SECTION 189(d).—Paragraph (2) of section 189(d) is amended by striking out "an electing small business corporation (within the meaning of section 1371(b))" and inserting in lieu thereof "an S corporation".

(25) SECTION 280(a).—The second sentence of subsection (a) of section 280 (relating to certain expenditures incurred in production of films, books, records, or similar property) is amended by striking out "an electing small business corporation (as defined in section 1371(b))," and inserting in lieu thereof "an S corporation,".

(26) SECTION 280A.—

(A) Subsection (a) of section 280A (relating to disallowance of certain expenses in connection with business use of home, rental of vacation homes, etc.) is amended by striking out "an electing small business corporation," and inserting in lieu thereof "an S corporation,".

(B) Paragraph (1) of section 280A(e) is amended by striking out "an electing small business corporation" and inserting in lieu thereof "an S corporation".

(C) Paragraph (2) of section 280A(f) is amended to read as follows:

"(2) PERSONAL USE BY SHAREHOLDERS OF S CORPORATION.—In the case of an S corporation, subparagraphs (A) and (B) of subsection (d)(2) shall be applied by substituting 'any shareholder of the S corporation' for 'the taxpayer' each place it appears."

(27) SECTION 291.—

(A) Subsections (a) and (b) of section 291 are each amended by striking out "an applicable corporation" each place it appears and inserting in lieu thereof "a corporation".

(B) Subsection (e) of section 291 is amended by striking out paragraph (2) and by redesignating paragraph (3) as paragraph (2).

(28) SECTION 447(c)(1).—Paragraph (1) of section 447(c) (relating to exception for small business and family corporations) is amended to read as follows:

"(1) an S corporation,".

(29) SECTION 447(g).—*Clause (i) of section 447(g)(4)(A) is amended to read as follows:*

"(i) *an S corporation, or*".

(30) SECTION 464(c)(1).—Paragraph (1) of section 464(c) (defining farming syndicate) is amended by striking out "an electing small business corporation (as defined in section 1371(b))" each place it appears and inserting in lieu thereof "an S corporation".

(31) SECTION 465.—

(A) Paragraph (1) of section 465(a) (relating to deductions limited to amount at risk) is amended by adding "and" at the end of subparagraph (A), by striking out subparagraph (B), and by redesignating subparagraph (C) as subparagraph (B).

(B) Paragraph (3) of section 465(a) is amended—

(i) by striking out "paragraph (1)(C)" and inserting in lieu thereof "paragraph (1)(B)", and

(ii) by striking out "PARAGRAPH (1)(C)" in the paragraph heading and inserting in lieu thereof "PARAGRAPH (1)(B)".

(C) The last sentence of paragraph (2) of section 465(c) is amended—

(i) by striking out "an electing small business corporation" the first place it appears and inserting in lieu thereof "an S corporation", and

(ii) by striking out "an electing small business corporation" the second place it appears and inserting in lieu thereof "the S corporation".

(D) Clause (ii) of section 465(c)(3)(B) is amended by striking out "electing small business corporation (as defined in section 1371(b))" and inserting in lieu thereof "an S corporation".

(E) Subparagraph (A) of section 465(c)(4) is amended by striking out "subsection (a)(1)(C)" and inserting in lieu thereof "subsection (a)(1)(B)".

(32) SECTION 992(d)(7).—Paragraph (7) of section 992(d) (relating to corporations not eligible to be a DISC) is amended to read as follows:

"(7) an S corporation."

(33) SECTION 1016(a)(18).—Paragraph (18) of section 1016(a) (relating to adjustments to basis) is amended to read as follows:

"(18) to the extent provided in section 1367 in the case of stock of, and indebtedness owed to, shareholders of an S corporation;".

(34) SECTION 1101(a)(3)(D).—Subparagraph (D) of section 1101(a)(3) (relating to non-pro rata distributions from certain closely held corporations) is amended by striking out "section 1371(a)(1)" and inserting in lieu thereof "section 1361(b)(1)(A)".

(35) SECTION 1212(a).—Subsection (a) of section 1212 (relating to capital loss carrybacks and carryovers of corporations) is amended by striking out paragraph (3) and by redesignating paragraph (4) as paragraph (3).

(36) SECTION 1251(b)(2)(B).—

(A) Subparagraph (B) of section 1251(b)(2) (relating to excess deductions account) is amended—

(i) by striking out "an electing small business corporation (as defined in section 1371(b))," and inserting in lieu thereof "an S corporation,", and

(ii) by striking out "electing small business corporation" each place it appears in the second and third sentences and inserting in lieu thereof "S corporation".

(B) Subparagraph (D) of section 1251(b)(2) is amended by striking out "an electing small business corporation" and inserting in lieu thereof "an S corporation".

(37) SECTION 1254(b)(2).—Paragraph (2) of section 1254(b) (relating to special rules for gain from dispositions of interest in oil, gas, or geothermal property) is amended by striking out "an electing small business corporation (as defined in section 1371(b))," and inserting in lieu thereof "an S corporation,".

(38) SECTION 1256(e)(3)(B).—Subparagraph (B) of section 1256(e)(3) (defining syndicate) is amended by striking out "an electing small business corporation within the meaning of section 1371(b)" and inserting in lieu thereof "an S corporation".

(39) SECTION 6037.—

(A) Section 6037 (relating to return of electing small business corporation) is amended—

(i) by striking out "Every electing small business corporation (as defined in section 1371(b))" and inserting in lieu thereof "Every S corporation",

(ii) by striking out "and such other information" and inserting in lieu thereof "each shareholder's pro rata share of each item of the corporation for the taxable year, and such other information", and

(iii) by striking out "ELECTING SMALL BUSINESS CORPORATION" in the section heading and inserting in lieu thereof "S CORPORATION".

(B) The table of sections for subpart A of part III of subchapter A of chapter 61 is amended by striking out "electing small business corporation" in the item relating to

section 6037 and inserting in lieu thereof "S corporation".

(40) SECTION 6042(b)(2).—Paragraph (2) of section 6042(b) (defining dividend) is amended to read as follows:

"(2) EXCEPTIONS.—For purposes of this section, to the extent provided in regulations prescribed by the Secretary, the term 'dividend' does not include any distribution or payment—

"(A) by a foreign corporation, or

"(B) to a foreign corporation, a nonresident alien, or a partnership not engaged in a trade or business in the United States and composed in whole or in part of nonresident aliens."

(41) SECTION 6362(f)(7).—Paragraph (7) of section 6362(f) (relating to partnerships, trusts, subchapter S corporations, and other conduit entities) is amended—

(A) by striking out "electing small business corporations (within the meaning of section 1371(a))" in subparagraph (D) and inserting in lieu thereof "S corporations", and

(B) by striking out "SUBCHAPTER S CORPORATIONS," in the paragraph heading.

(42) Section 6661(b).—Subparagraph (B) of section 6661(b)(1) is amended by striking out "an electing small business corporation (as defined in section 1371(b))" and inserting in lieu thereof "an S corporation".

(43) Subsection (d) of section 408 of the Employee Retirement Income Security Act of 1974 is amended by striking out "section 1379 of the Internal Revenue Code of 1954" and inserting in lieu thereof "section 1379 of the Internal Revenue Code of 1954 as in effect on the day before the date of the enactment of the Subchapter S Revision Act of 1982".

(b) CLERICAL AMENDMENT.—The table of subchapters for chapter 1 is amended by striking out the item relating to subchapter S and inserting in lieu thereof the following:

"SUBCHAPTER S. Tax treatment of S corporations and their shareholders."

SEC. 6. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), the amendments made by this Act shall apply to taxable years beginning after December 31, 1982.

(b) TRANSITIONAL RULES.—

(1) SECTIONS 1379 AND 62(9) CONTINUE TO APPLY FOR 1983.—Sections 1379 and 62(9) of the Internal Revenue Code of 1954 (as in effect before the date of the enactment of this Act) shall remain in effect for years beginning before January 1, 1984.

(2) ALLOWANCE OF EXCLUSION OF DEATH BENEFIT.—Notwithstanding section 241(b) of the Tax Equity and Fiscal Responsibility Act of 1982, in the case of amounts received under a plan of an S corporation, the amendment made by section 239 of such Act shall apply with respect to decedents dying after December 31, 1982.

(c) GRANDFATHER RULES.—

(1) SUBSIDIARIES WHICH ARE FOREIGN CORPORATIONS OR DISC'S.—*In the case of any corporation which on June 23, 1982, would have been a member of the same affilitaed group as an electing small business corporation but for paragraph (3) or (7) of section 1504(b) of the Internal Revenue Code of 1954, subparagraph (A) of section 1361(b)(2) of such Code (as amended by section 2) shall be applied by substituting "without regard to the exceptions contained in paragraphs (1), (2), (4), (5), and (6) of subsection (b) thereof" for "without regard to the exceptions contained in subsection (b) thereof".*

(2) CASUALTY INSURANCE COMPANIES.—

(A) IN GENERAL.—In the case of any qualified casualty insurance electing small business corporation—

(i) the amendments made by this Act shall not apply, and

(ii) subchapter S (as in effect on July 1, 1982) of chapter 1 of the Internal Revenue Code of 1954 and part III of subchapter L of chapter 1 of such Code shall apply.

(B) QUALIFIED CASUALTY INSURANCE ELECTING SMALL BUSINESS CORPORATION.—The term "qualified casualty insurance electing small business corporation" means any corporation described in section 831(a) of the Internal Revenue Code of 1954 if—

(i) as of July 12, 1982, such corporation was an electing small business corporation and was described in section 831(a) of such Code,

(ii) such corporation was formed before April 1, 1982, and proposed (through a written private offering first circulated to investors before such date) to elect to be taxed as a subchapter S corporation and to be operated on an established insurance exchange, or

(iii) such corporation is approved for membership on an established insurance exchange pursuant to a written agreement entered into before December 31, 1982, and such corporation is described in section 831(a) of such Code as of December 31, 1984.

A corporation shall not be treated as a qualified casualty insurance electing small business corporation unless an election under subchapter S of chapter 1 of such Code is in effect for its first taxable year beginning after December 31, 1984.

(3) CONTINUITY REQUIRED.—

(A) IN GENERAL.—This subsection shall cease to apply with respect to any corporation after—

(i) any termination of the election of the corporation under subchapter S of chapter 1 of such Code, or

(ii) the first day on which more than 50 percent of the stock of the corporation is newly owned stock within the meaning of section 1378(c)(2) of such Code (as amended by this Act).

(B) SPECIAL RULES FOR PARAGRAPH (2).—

(i) Paragraph (2) shall also cease to apply with respect to any corporation after the corporation ceases to be described in section 831(a) of such Code.

(ii) For purposes of determining under subparagraph (A)(ii) whether paragraph (2) ceases to apply to any corporation, section 1378(c)(2) of such Code (as amended by this Act) shall be applied by substituting "December 31, 1984" for "December 31, 1982" each place it appears therein.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 6055, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6055, the Subchapter S Revision Act of 1982, is intended to simplify and modify the tax rules relating to eligibility for subchapter S status and the operation of these small business corporations. This is accomplished principally by removing unnecessary eligibility restrictions, and by revising the rules relating to income and distributions that tend to create traps for the unwary.

Congress originally enacted the subchapter S provisions to minimize the effect of Federal income taxes on the choice of a business organization's form, and to permit the incorporation and operation of certain small businesses without the imposition of a tax at both the corporation and shareholder levels.

H.R. 6055 maintains the ability of small business corporations to elect a single level shareholder tax on the corporate earnings, and by simplifying the rules governing the election, encourages more small business to take advantage of this election.

The bill replaces the rules of present law with a partnership-like scheme of taxation for subchapter S corporations. In addition, because the history of subchapter S demonstrates the ability of sophisticated taxpayers, or those with sophisticated advisers, to reap unintended tax benefits from the subchapter S rules, the bill attempts to eliminate these unwarranted benefits.

H.R. 6055 was introduced on April 1, 1982, by the ranking minority member of the Committee on Ways and Means, Mr. CONABLE, and myself. This introduced bill was developed by the staffs of the tax-writing committees in cooperation with the Treasury Department, professional bar and accounting groups, and small business representatives to simplify the operation of the subchapter S provisions.

Mr. Speaker, H.R. 6055 will simplify subchapter S for small businesses. I strongly urge adoption of H.R. 6055, the Subchapter S Revision Act of 1982.

At this time, Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Select Revenue Measures who has worked on this bill; and I want to take this opportunity to thank the gentleman from California (Mr. STARK) and compliment him on a job well done.

Mr. STARK. Mr. Speaker, as the chairman of the Committee on Ways

and Means, Mr. ROSTENKOWSKI, stated, H.R. 6055 is the considered product of years of efforts by the staffs of the Joint Committee on Taxation, the Committee on Ways and Means, the Senate Finance Committee, and the Department of the Treasury, with valuable assistance from outside professional groups. The Subcommittee on Select Revenue Measures conducted a public hearing on H.R. 6055 on June 14, 1982, where testimony was generally favorable. On June 23 and July 12, 1982, the subcommittee considered H.R. 6055, adopting several amendments to improve the introduced bill before favorably reporting the bill to the full Committee on Ways and Means. One further improvement was made there.

The bill before the House today, has been the subject of much deliberation and refinement. It deserves careful attention and ultimate support by all Members of the House. I urge the speedy adoption of H.R. 6055.

I would at this point like to address a question to the chairman of the Committee on Ways and Means, the gentleman from Illinois. In H.R. 6055 as reported by the Ways and Means Committee, insurance companies generally are not eligible corporations under subchapter S. However, a transition rule allows certain insurance companies to elect subchapter S status if they are admitted to an insurance exchange prior to December 31, 1982, and would be described in section 831(a) of the code prior to December 31, 1984.

Mr. ROSTENKOWSKI. If the gentleman will yield, that is correct, yes.

Mr. STARK. I am concerned that promoters of tax shelters will set up "shelf" corporations to take advantage of this transition rule. Although these shelf corporations may be formally admitted to an insurance exchange, the ultimate stockholders of these corporations will not have acquired their interests in the corporations by December 31, 1982 and the corporations will not have taken any serious steps toward conducting insurance business by that date. It is my understanding that this transition rule is not intended to allow such corporations to simply set up as "shelf" corporations by the end of this year in order to find investors in the future.

Am I correct that this was the committee's intent?

Mr. ROSTENKOWSKI. Yes, the gentleman's understanding is correct.

Mr. RANGEL. Mr. Speaker, will the gentleman yield?

Mr. STARK. I yield to the gentleman from New York.

Mr. RANGEL. I thank the gentleman for yielding.

Mr. Speaker, I heard some of the debate. That was not my understanding of what took place in the gentleman's subcommittee. As relates to these insurance companies that have not moved to incorporate, it was my understanding that many State legislative bodies—such as New York State did, in fact—intend to create insurance exchanges and my commissioner of insurance, Commissioner Albert Lewis, did in fact work with the insurance industry in the State of New York.

Legislation was passed both in the assembly and the Senate and signed into law to enable them to set up an exchange in the State of New York. I do not think that they have met the criteria the gentleman from California (Mr. STARK) and the chairman of the full committee are trying to establish by this dialog.

I am hoping and certainly I had the encouragement of the subcommittee chairman, that the Senate might take another look at this and allow those States that have passed laws for the purposes of setting up exchanges to allow them to take advantage of the so-called transition rule.

Is it the gentleman's understanding that this dialog between the gentleman and the chairman of the full committee would not do violence to the spirit in which the gentleman suggested that the matter be taken up in the Senate?

Mr. STARK. This may very well do violence to bringing the matter up later. As the gentleman knows, in the consideration of this bill, it was agreed by the minority and the majority and the Joint Committee and the Treasury that operating these insurance companies or exchanges under subchapter S was not desirable. We did recognize that some had been set up relying on previous law, and it was not the intent of the subcommittee at that time to penalize them.

I would suspect that the Senate would find the same result. However, the colloquy between myself and the chairman today would not preclude a corporation from being set up and operating by December 31, 1982, if they could make it within that date.

Mr. RANGEL. If the gentleman will continue to yield, I just wanted to make certain, Mr. Chairman, that this exchange between the gentleman and the chairman of the full committee did not do violence to the understanding between the gentleman from California (Mr. STARK) and me as relates to active consideration of this matter in the Senate.

I am going to continue to look forward to the cooperation of the gentleman on this matter notwithstanding the exchange the gentleman has had with the chairman.

Mr. STARK. I would tell the gentleman from New York (Mr. RANGEL) if the corporations that the gentleman has referred to can fit within the rules of the transition rule, they would qualify, this colloquy notwithstanding.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6055, the Subchapter S Revision Act of 1982.

When the chairman of the Committee on Ways and Means, the gentleman from Illinois (Mr. ROSTENKOWSKI) and I introduced this measure, I requested comments on several technical points. Those comments are reflected in the provisions of the bill. The 80 percent foreign income test has been repealed; the 20 percent passive income test and the one class of stock requirement have been liberalized; and the overall objective making the treatment of subchapter S corporations similar to that of partnerships has been dealt with.

Mr. Speaker, when I first joined the Ways and Means Committee in 1967, this was a high item of priority on the committee's agenda. It has not been acted on in all the intervening years. It does, however, represent now the culmination of more than 10 years of work by the representatives of various professional groups, the Treasury, and our professional staffs.

□ 1230

I know that there is some disappointment that some items are not included in this that were appropriately to be considered as part of the subchapter S reform; but that does not mean, of course, that we will not have a continuing obligation to review subchapter S rules as we move forward and make further reform efforts as time goes on.

The process that we have been going through has served to resolve numerous differences that have developed.

I would hope that there would be no opposition to this measure simply because it is not more inclusive than it is. It is an appropriate step in the right direction and I urge its adoption.

I note in connection with that the comments of my distinguished colleague, the gentleman from New York, about the issue involving subchapter S use with respect to casualty insurance and think his remarks are entirely appropriate. We should not find grandfather discriminating against any particular State. I hope it will be reviewed with an eye not to giving any undue preference to foreign insurers also, such as Lloyds of London, who have some preference, even under the measure as it has been presented.

I do urge the adoption of H.R. 6055, Mr. Speaker.

Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, when H.R. 6055, the Subchapter S Revision Act of 1982, came from subcommittee

to the full Ways and Means Committee, it provided for a continuation of the "passive income test" for subchapter S corporations.

During the committee markup, I intended to move an amendment to eliminate the passive test altogether. After some discussion, the subcommittee chairman, the distinguished gentleman from California (Mr. STARK) suggested a compromise which was agreed to by me and accepted by the committee.

That compromise provided that there would be no passive income test for subchapter S eligibility, except for S corporations which had been regular corporations and had chapter S status while they had accumulated earnings and profits.

I accepted that version because it was a giant step in the right direction, not because it was the right direction. I still favor elimination of the passive income test and hope that our friends in the other body will hold the same opinion.

Mr. CONABLE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. KILDEE). The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 6055, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

MULTIEMPLOYER PENSION PLAN MANAGEMENT ACT

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7094) to amend the Internal Revenue Code of 1954 to impose a tax on failures to adhere to conditions of determination letters relating to independent management of the assets of multiemployer plans, as amended.

The Clerk read as follows:

H.R. 7094

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TAX ON FAILURE TO ADHERE TO CONDITIONS OF AGREED UPON EXISTING DETERMINATION LETTER RELATING TO INDEPENDENT MANAGEMENT OF PLAN ASSETS.

(a) IN GENERAL.—Chapter 43 of the Internal Revenue Code of 1954 (relating to qualified pension, etc., plans) is amended by adding at the end thereof the following new section:

"SEC. 4976. TAX ON FAILURE TO ADHERE TO CONDITIONS OF AGREED UPON EXISTING DETERMINATION LETTER RELATING TO INDEPENDENT MANAGEMENT OF ASSETS.

"(a) TAX IMPOSED.—If—

"(1) any independent asset management condition to an existing determination letter has been agreed to in writing by or on behalf of any multiemployer plan (within the meaning of section 414(f)) before September 15, 1982,

"(2) the Secretary has not agreed in writing to a withdrawal of such condition, and

"(3) any trustee or plan administrator with respect to the plan—

"(A) takes any action which he knows (or should know) will result in a violation of such condition, or

"(B) fails to take all reasonable action to prevent or correct any such violation,

then there is hereby imposed a tax with respect to the action (or failure to act) of such trustee or plan administrator for each calendar month during any part of which such violation is in effect.

"(b) AMOUNT OF TAX.—In the case of any plan, the amount of the tax imposed by this section for any calendar month shall be the lesser of—

"(1) one-half of 1 percent of the fair market value of the plan assets involved in the violation on the day during such calendar month on which such fair market value is the highest, or

"(2) $400,000.

"(c) JOINT AND SEVERAL LIABILITY.—The liability under this section of the trustees and plan administrator with respect to any violation shall be joint and several.

"(d) SECONDARY LIABILITY.—If any trustee does not have sufficient assets to pay the tax imposed by this section for any calendar month, his liability for such tax shall be treated as also the liability of the organization or other person which appointed such trustee.

"(e) DEFINITIONS.—For purposes of this section—

"(1) EXISTING DETERMINATION LETTER.—The term 'existing determination letter' means a letter of determination issued before September 15, 1982, by the Secretary as to the qualification of the plan under section 401 and as to the exemption under section 501 of the trust to which such plan relates.

"(2) INDEPENDENT ASSET MANAGEMENT CONDITION.—The term 'independent asset management condition' means a condition relating to a requirement that some or all of the assets of the plan be held by qualified independent managers (as defined in paragraph (38) of section 3 of the Employee Retirement Income Security Act of 1974).

"(f) ABATEMENT OF TAX IN CERTAIN CASES.—If the taxpayer establishes to the satisfaction of the Secretary—

"(1) that his action (or failure to act) is due to reasonable cause, and

"(2) that he has taken action to correct the violation,

then the Secretary may (after consultation with the Secretary of Labor) abate part or all of the tax imposed by subsection (a)."

(b) CLERICAL AMENDMENT.—The table of sections for chapter 43 of such Code is amended by adding at the end thereof the following new item:

"Sec. 4976. Tax on failure to adhere to conditions of agreed upon existing determination letter relating to independent management of assets."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to action taken (or failed to be taken) after September 14, 1982.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 7094, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1976, the Internal Revenue Service revoked the tax-exempt status of the Teamsters' Central States pension fund. This action was due to evidence of large-scale misuse of fund assets. Fund assets, which now are approximately $3.5 billion, were placed under the control of independent asset managers as a condition of the reinstatement of the fund's tax-exempt status. The fund's current contracts with the independent asset managers, entered into pursuant to the 1977 reinstatement, expire on October 3, 1982.

On November 11, 1981, the IRS issued a new favorable determination letter to the fund. This letter included an independent asset management condition. The condition was agreed to in writing on behalf of the fund.

Under present law, revocation of the fund's tax-exempt status is the only potential remedy available to the IRS if the condition requiring independent asset managers is violated. This disqualification sanction does not directly affect a plan trustee or administrator who violates the condition. However, it would affect employers who contribute to the fund, who could be denied deductions for their contributions. It also could affect employees, who could be taxed on benefits as they vest. As a result, the ability of the fund to pay benefits to its 500,000 participants and beneficiaries could be seriously impaired.

H.R. 7094 imposes a new excise tax sanction on plan trustees or adminis-

trators who violate an independent asset management condition under certain conditions. The bill at the desk contains technical amendments in order to clarify that the bill applies only to plans where an agreed-to determination letter is presently in effect, namely, the Central States Teamsters' pension fund. Under this legislation, revocation of the fund's tax-exempt status would no longer be the only available sanction. The bill follows the specific request of the administration that the Congress take prompt action on legislation to provide the additional remedy to safeguard plan assets more effectively for the benefit of participants and beneficiaries under a multiemployer plan. The administration cites as the immediate reason for the urgency of their request, their concern that this additional sanction is needed to insure that the fund continues to have qualified independent asset managers after the expiration of the current contracts on October 3 of this year. The Subcommittee on Oversight of the Committee on Ways and Means confirmed the need for this legislation by letter to the full committee on August 3, 1982, after the subcommittee's hearing on July 26, 1982.

Mr. Speaker, I urge adoption of H.R. 7094.

Mr. Speaker, I commend my colleague, the gentleman from New York (Mr. RANGEL) for the work that he has done, and I yield such time as he may consume to the gentleman.

Mr. RANGEL. Mr. Speaker, I think as the chairman pointed out, the administration requested the gentleman from Texas (Mr. PICKLE) and I to get this out. We had hearings. The Teamsters testified, and they are not opposed to this.

We have the correction in the bill as it relates to the specific agreement and I hope the body adopts the legislation in its present form.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support passage of H.R. 7094, which provides for taxes on trustees and managers of multiemployer pension plans who take action which they know, or should know, will violate conditions contained in determination letters issued to those plans by the Internal Revenue Service.

In 1976, the Internal Revenue Service withdrew the tax-exept status of one of the largest of the multiemployer pension funds. That tax-exempt status was reissued, on the condition that a large percentage of the plan's assets be controlled, not by the trustees of the fund or the fund management, but by independent asset managers.

The cumulative effect of the withdrawal of tax-exempt status from that fund or any other fund so situated, could have an adverse effect on the rights and pensions of thousands of workers who are protected by these pension plans. This bill would give the Government a better alternative, a more direct means of imposing sanctions on those individuals who violate conditions imposed upon plans and a way to avoid withdrawing tax-exempt status.

The bill has the support of the Department of Labor, and I ask my colleagues to approve it. H.R. 7094 will provide the Federal Government with an additional and needed tool to enforce conditions which have been attached to Internal Revenue Service determination letters.

Mr. CONABLE. Mr. Speaker, I am not aware of any further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 7094, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: "A bill to amend the Internal Revenue Code of 1954 to impose a tax on failures to adhere to conditions of existing determination letters relating to independent management of the assets of multiemployer plans."

A motion to reconsider was laid on the table.

NORMALIZATION METHOD FOR PUBLIC UTILITY PROPERTY

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1524) to amend sections 46(f) and 167(l) of the Internal Revenue Code of 1954 with respect to the treatment of public utility property, as amended.

The Clerk read as follows:

H.R. 1524

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. NORMALIZATION METHOD FOR PURPOSES OF DEPRECIATION.

(a) GENERAL RULE.—Paragraph (3) of section 168(e) of the Internal Revenue Code of 1954 (relating to special rule for certain public utility property) is amended by redesignating subparagraph (C) as subparagraph (D) and by inserting after subparagraph (B) the following new subparagraph:

"(C) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC.—

"(i) IN GENERAL.—One way in which the requirements of subparagraph (B) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of subparagraph (B).

"(ii) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of clause (i) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's tax expense, depreciation expense, or reserve for deferred taxes under subparagraph (B)(ii) unless such estimate or projection is also used, for ratemaking purposes, with respect to the other 2 such items and with respect to the rate base.

"(iii) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in clause (ii)) which are to be treated as inconsistent for purposes of clause (i)."

(b) AMENDMENT TO SECTION 167(l).—Subparagraph (G) of section 167(l)(3) of such Code (defining normalization method of accounting) is amended by adding at the end thereof the following new sentence:

"For purposes of this subparagraph, rules similar to the rules of section 168(e)(3)(C) shall apply."

SEC. 2. COMPUTATIONS FOR PURPOSES OF INVESTMENT CREDIT.

Subsection (f) of section 46 of such Code (relating to limitation in case of certain regulated companies) is amended by adding at the end thereof the following new paragraph:

"(10) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS, ETC., FOR PURPOSES OF PARAGRAPHS (1) AND (2).—

"(A) IN GENERAL.—One way in which the requirements of paragraph (1) or (2) are not met is if the taxpayer, for ratemaking purposes, uses a procedure or adjustment which is inconsistent with the requirements of paragraph (1) or paragraph (2), as the case may be.

"(B) USE OF INCONSISTENT ESTIMATES AND PROJECTIONS.—The procedures and adjustments which are to be treated as inconsistent for purposes of subparagraph (A) shall include any procedure or adjustment for ratemaking purposes which uses an estimate or projection of the taxpayer's qualified investment for purposes of the credit allowable by section 38 unless such estimate or projection is consistent with the estimates and projections of property which are used, for ratemaking purposes, with respect to the taxpayer's depreciation expense and rate base.

"(C) REGULATORY AUTHORITY.—The Secretary may by regulations prescribe procedures and adjustments (in addition to those specified in subparagraph (B)) which are to be treated as inconsistent for purposes of subparagraph (A)."

SEC. 3. EFFECTIVE DATES.

(a) GENERAL RULE.—The amendments made by sections 1 and 2 shall apply to taxable years beginning after December 31, 1979.

(B) SPECIAL RULE FOR PERIODS BEFORE MARCH 1, 1980.—

(1) IN GENERAL.—Notwithstanding the provisions of sections 167(l) and 46(f) of the Internal Revenue Code of 1954 and of any regulations prescribed by the Secretary of the Treasury (or his delegate) under such sections, the use for ratemaking purposes or for reflecting operating results in the taxpayer's regulated books of account, for any period before March 1, 1980, of—

(A) any estimates or projections relating to the amounts of the taxpayer's tax expense, depreciation expense, deferred tax reserve, credit allowable under section 38 of such Code, or rate base, or

(B) any adjustments to the taxpayer's rate of return,

shall not be treated as inconsistent with the requirements of subparagraph (G) of such section 167(l)(3) nor inconsistent with the requirements of paragraph (1) or (2) of such section 46(f), where such estimates or projections, or such rate of return adjustments, were included in a qualified order.

(2) QUALIFIED ORDER DEFINED.—For purposes of paragraph (1), the term "qualified order" means an order—

(A) by a public utility commission which was entered before March 13, 1980,

(B) which used the estimates, projections, or rate of return adjustments referred to in paragraph (1) to determine the amount of the rates to be collected by the taxpayer or the amount of a refund with respect to rates previously collected, and

(C) which ordered such rates to be collected or refunds to be made (whether or not such order actually was implemented or enforced).

(c) NO INFERENCE.—The application of subparagraph (G) of section 167(l)(3) of the Internal Revenue Code of 1954, and the application of paragraphs (1) and (2) of section 46(f) of such Code, to taxable years beginning before January 1, 1980, shall be determined without any inference drawn from the amendments made by sections 1 and 2 of this Act or from the rules contained in subsection (b) of this section. Nothing in the preceding sentence shall be construed to limit the relief provided by subsection (b).

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1524, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1524 clarifies the tax rules relating to the so-called normalization accounting methods for investment tax credits and accelerated cost recovery deductions attributable to certain public utility property. In general, the normalization rules require these tax benefits to be taken into account, for utility ratemaking purposes, over the service life of the asset that generates the benefits. Normalization assures that these tax benefits reduce the cost of new investments rather than immediately reduce utility rates.

The bill also authorizes the Treasury Department to issue regulations concerning the conditions under which ratemaking projections and adjustments would not be treated as consistent with those rules. These provisions apply to taxable years beginning after December 31, 1979.

In response to a controversy relating to certain rate orders issued during the 1970's by the California Public Utilities Commission, the bill also provides a special transition rule. Under the special rule, a ratemaking projection or adjustment that violated the normalization requirements would not result in a public utility's loss of eligibility for the investment tax credit or accelerated depreciation if the projection or adjustment: First, applied for a period ending before March 1, 1980; second, was included in an order entered by a public service or public utility commission before March 13, 1980; and third, was used to determine the amount of rates which were ordered to be collected or refunds which were ordered to be made.

The transition rule is designed to benefit Pacific Telephone & Telegraph Co., General Telephone Co. of California, and Southern California Gas Co. These companies made refunds or rate adjustments ordered by the California regulatory authority, thus passing on the tax benefits from accelerated depreciation and the investment tax credit. The Internal Revenue Service has taken the position that the orders do not comply with the existing normalization accounting rules and thus, the tax benefits must be repaid to the Treasury.

If the IRS position is sustained, the transition rule is expected to result in a revenue loss of approximately $2.2 billion, of this amount, it is anticipated that a revenue loss of $117 million would occur in fiscal year 1983 for refunds of taxes previously paid. The remainder would probably occur after fiscal year 1987, because of the timing of the audit process and delays of presumed litigation. If the IRS position is not correct, the transition rule in the bill would not result in any revenue loss.

Mr. Speaker, I urge adoption of H.R. 1524.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. MATSUI).

Mr. MATSUI. Mr. Speaker, I rise to speak in support of H.R. 1524, legislation which addresses a terribly inequitable situation caused by conflicting Federal and State rulings governing the proper method of accounting for the tax benefits of accelerated depreciation and the investment tax credit.

H.R. 1524 provides clarification of the normalization requirements for public utilities with respect to the investment tax credit and accelerated depreciation. More importantly, the bill provides a special rule so that Pacific Telephone, General Telephone of California, and Southern California Gas will not have to proceed with protracted litigation to determine their eligibility to claim accelerated depreciation benefits and ITC for the period from 1974 to 1980. Without such relief, these companies and their ratepayers may incur massive penalties and forfeitures estimated at $2.2 billion. In addition, the pendency of this litigation has cast a shadow of financial uncertainty over these utilities, which is already jeopardizing their bond ratings and impairing their ability to provide facilities and services so essential to California's economy.

In 1971, and again in 1974, the California Public Utilities Commission issued orders permitting the utility companies to account for the tax benefits in a manner that clearly complies with the normalization requirements of the code—full normalization. In both instances, the California Supreme Court reversed the commission orders, requiring the commission to consider alternatives to full normalization that would be more favorable to current ratepayers. The commission then implemented its 1977 order, requiring the utility companies to make refunds to customers, totaling approximately $520 million, in June 1980, and June 1981.

The Internal Revenue Service has ruled that the commission's partial flow-through methods embodied in the 1977 order do not satisfy the code's normalization requirements. If this position is ultimately sustained by the courts, the utility companies will retroactively lose the right to claim the tax benefits of accelerated depreciation and the investment tax credit, and will, through no fault of their own, incur back tax liabilities—including interest—of approximately $2.2 billion through December 31, 1979.

The utility companies and their customers are caught in the middle between conflicting Federal and State interpretations of the normalization requirements. H.R. 1524 would provide the necessary equitable relief. It would clarify the normalization provisions of the code so as to prevent similar disputes from arising in the future and would forgive the potential back tax liabilities of the utility companies.

H.R. 1524 would not treat the utility companies any more favorably than other utilities in the United States which normalize their tax benefits. These utilities are permitted to receive the benefits of accelerated depreciation

tion and the investment tax credit. This bill would operate merely to place the utility companies in the same position.

In addition to the adverse financial burdens this lengthy tax dispute has imposed on California utilities, there are grave concerns regarding its effect on jobs. Unless H.R. 1524 is approved, there may be substantial layoffs of public utility workers and other employees who provide support services to these utilities. This layoff will be the direct result of the commencement of the utilities' cost reduction efforts necessary if they are to meet their potential billion dollar tax liability. As Glenn Watts testified before the Ways and Means Committee:

In these times of 9.5 percent unemployment, I don't think anyone wants to see additional workers on the unemployment rolls.

The relief afforded by this legislation is fair. Without such legislative intervention, Congress objectives of stimulating investment through the normalization of tax benefits could be thwarted by a Federal court ruling sustaining California's position. Without the relief afforded by H.R. 1524, three California utilities' financial soundness would be severely jeopardized should the Federal court sustain the IRS. Only legislation can provide the immediate equitable relief preferable for all parties. It alone can reaffirm and strengthen Congress mandate for normalization while removing the financial cloud that so threatens my State's utilities and the citizens they serve. I ask for your support of H.R. 1524.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill arises out of an irritating situation. It has a long history. It reflects the difficulty we have had, particularly with the California Utility Commission, which has a tendency to want to flow through to all consumers the various tax incentives designed here to encourage capital formation.

The effect of this action over the years, Mr. Speaker, has been to give a short-term benefit to current consumers, to the long-term detriment of those who use utilities, the consumers, over a longer period of time and to create a short-term subsidy by other taxpayers to the consumers in those areas where flow through is required.

□ 1245

The gentleman from California (Mr. MATSUI) has described this condition and a Member on our side of the aisle, the distinguished gentleman from California (Mr. ROUSSELOT) has been very interested in correcting this situation.

I would like to think that our utilities commissions have a longer view of the necessity of internal generation of capital by utilities, just like the unregulated industries, if we are going to have a level of productivity and be able to meet the needs of the people over a period of time rather than currying short-term favor with the consumers by requiring tax flow throughs which then lead us to give additional tax incentives for capital formation purposes and to create distortions in the capital flow that the utilities have in particular.

Mr. Speaker, I support the suspension of the rules and passage of H.R. 1524, a bill which clarifies the tax treatment of public utility property.

Public utility tax accounting is one of the most complex subjects under the Internal Revenue Code. While the details may be difficult to understand, the broad policy goals in this area are clear. The policy is to treat the tax benefits of accelerated depreciation and the investment tax credit as capital incentives which are to be reflected in the utility's rate base over the projected lifetime of the utility's capital investments. Normalization is the accounting method which reflects this decision.

The alternative to normalization accounting would be a system which immediately reduces a utility's rate base by the amount of its accelerated depreciation and investment tax credit. This is called flow-through accounting. It was so nicknamed because it "flows through" immediately to the customers the tax reductions associated with accelerated depreciation and the investment tax credit. This accounting method may result in lower, near-term utility rates but it deprives the utility of the capital investment incentive necessary to develop long-term capacity.

The situation is further complicated because it involves three parties—the utility, the State utility commission, and the Internal Revenue Service. Since State utility commissions are not under Federal jurisdiction, the potential exists for inconsistent positions to arise among the three parties. Such inconsistent situations have occurred, and the objectives of H.R. 1524 is to resolve them.

H.R. 1524 reinforces and clarifies the existing tax policy that public utilities must use normalization accounting for ratemaking purposes in order to be eligible for the special capital investment tax incentives.

It also waives certain past violations which could be devastating, if I may say, were they to be fully enforced against some of the utilities in California. The waived violations are for those occurring before March 1, 1908, which were the result of public utility commission order entered prior to March 13, 1980.

The beneficiaries of waiving past violations will be several California utilities which have been caught up in a three-sided dispute involving themselves, the Internal Revenue Service, and the California Public Utility Commission.

H.R. 1524 is substantially similar to H.R. 6806 which passed the House on September 24, 1980, by a voice vote. The 96th Congress adjourned before final action on this issue could be concluded, complicated by the attachment of an irrelevant additional condition.

Mr. Speaker, H.R. 1524 should bring better understanding to a complicated area of the tax law. I support its passage.

I know of no further requests for time, and I yield back the balance of my time.

● Mr. ROUSSELOT. Mr. Speaker, I rise in support of H.R. 1524, a bill dealing with the treatment of public utility property under section 46(f) and 167(l) of the Internal Revenue Code.

Public utility tax accounting is one of the most complex areas in the Internal Revenue Code. While the details may be difficult to understand, the broad policy is to treat the tax benefits of accelerated depreciation and the investment tax credit as a capital investment incentive which is to be reflected in the utility's rate base over the projected lifetime of the utility's capital investments. Normalization is the accounting method which reflects this decision.

The alternative to normalization accounting would be a system which immediately reduces a utility's rate base by the amount of its accelerated depreciation and investment tax credit. This is the result of flow-through accounting. It was so nicknamed because it flows through immediately to the customers the tax reductions associated with accelerated depreciation and the investment tax credit.

Thus, flow-through accounting passes the Federal tax benefits directly to the utility customers. This results in lower, near-term utility rates, but it deprives the utility of the capital investment incentive necessary to develop long-range utility capacity.

Enforcement of the Federal policy in this area is complicated because the taxpayer utilities are regulated by State commissions which are not under Federal jurisdiction. The tax law addresses the enforcement issue by language which requires a utility to use normalization accounting for ratemaking purposes, or else it is not eligible for the benefits of accelerated depreciation and the investment tax credit.

H.R. 1524 reinforces and clarifies the existing tax policy that public utilities must use normalization accounting for ratemaking purposes in order to be eligible for the special capital investment tax incentives. It also waives certain past violations. The waived violations are for those occurring before March

1, 1980, which were the result of public utility commission orders entered prior to March 13, 1980. The waiving of past violations will enable several California utilities which have been caught up in a three-sided dispute involving themselves, the Internal Revenue Service, and the California Public Utility Commission to be relieved of an unfair tax burden.

Mr. Speaker, H.R. 1524 should bring better understanding to a complicated area of the tax law. I support its passage.

An identical bill as H.R. 1524 passed this House on September 24, 1980, by unanimous voice vote. Hearings were held in the Senate, and the Senate Finance Committee approved of the measure by unanimous voice vote on November 20, 1980. On December 16, 1980, Senator Long of Louisiana, as chairman of the Senate Finance Committee, sought unanimous consent of the Senate for the passage of the measure without amendments since the House had already adjourned sine die and could not accept any change in the bill. Both Senators from California spoke in support of the bill. Unfortunately it failed to pass the other body, since one Senator objected to it under a unanimous-consent request, as he wished to offer an amendment which would defer obligations of the unemployment compensation funds of certain States. That objection blocked the bill from any further consideration in the last Congress.

However, the need for H.R. 1524 is even greater this year. Why? First, with the divestiture of Pacific Telephone from the Bell System, Pacific Telephone will be left with an enormous tax liablity. This liability will be reflected in its Moody's and Standard & Poor rating, which will affect its ability to expand, construct facilities, or improve its service.

Second, due to a clause in the recently passed tax bill, TEFRA—Tax Equity and Fiscal Responsibility Act—which requires daily compounding of interest at current prime rates of tax deficiencies, General Telephone of California will have its liability increased from the present amount of approximately $400 million to over $800 million by 1988.

Mr. Speaker, in section 209(d)(4) of ERTA, this Congress stated its intent to address the matter of normalization in the near future, granting the Treasury Department only interim authority to issue regulations "until Congress acts further." Congress then anticipated prompt legislative action in this area, as would be accomplished by enactment of H.R. 1524.

Surely, the Members of this body must realize the terribly unfair and inequitable position this places on these public utilities. This is the reason for passage of H.R. 1524. It is designed to prevent a similar problem from arising in California and elsewhere in the future and to provide relief to these utilities during a limited transitional period ending on March 1, 1980.

Mr. Speaker, passage of this bill means jobs. We were all here on the floor of the House just last week discussing the importance of jobs to our economy. Before us today we have a bill that will do just that—keep the employed employed.

Jobs will be lost in California unless this measure passes. And, if you do not take my word for it, let me tell you what the president of the Communications Workers of America stated in testimony given on June 21, 1982, before the Committee on Ways and Means. Mr. Glenn E. Watts emphatically stated that failure to enact H.R. 1524 would seriously affect CWA members in many ways. There would be layoffs of telephone workers as a result of cutbacks in services as the company attempts to reduce costs to meet the tax burden. Thousands of companies which depend upon telephone company contracts for supplies and services would also be severely impacted. To quote Mr. Watts: "In these times of 9.5 percent unemployment, I don't think anyone wants to see additional workers on the unemployment rolls."

Public utilities must continually expand to keep pace with other competitors and to give the fastest, cheapest, and most efficient services possible to the general public. Major layoffs at any time, but especially in today's economy, could seriously affect the quality of services given by Pacific Telephone and General Telephone of California.

I believe that the testimony of the president of the CWA brings out other valuable points, citing the benefit of final passage of his measure, and I would like to take the liberty of inserting this testimony into the RECORD at this time:

TESTIMONY OF GLENN E. WATTS

Mr. Chairman, members of the Committee:

My name is Glenn Watts, and I am the president of the Communications Workers of America (CWA), a labor union which represents 650,000 working men and women in both the telecommunications industry and the public service sector.

I appreciate the opportunity to appear before you today to testify in favor of H.R. 1524. In the interest of time, I will make my remarks brief.

Let me lead-off by saying that CWA represents the bargaining rights of well over 65,000 employees of the Pacific Telephone and Telegraph Co., and over 18,000 workers employed by the General Telephone Co. of California. It is my opinion that failure to enact H.R. 1524 will seriously affect our Union members in a number of ways.

First, and most important, should the telephone companies not receive the tax normalization embodied in H.R. 1524, I can predict there will be thousands of lay-offs of telephone workers and a resultant cutback in services as the telephone companies attempt to reduce their costs to meet this potential tax burden. In these times of 9.5% unemployment, I don't think anyone wants to see additional workers on the unemployment rolls.

Second, although I can't speak directly for them, there are thousands of workers in hundreds of companies that benefit from telephone company contracts for supplies and construction services that would also be severely impacted by this legislation. As the telephone companies curtailed or cancelled the contracts with their suppliers the ripple effect would produce additional lay-offs and unemployment.

Third, public utility companies like the telephone companies must continually expand and modernize to keep pace in the highly competitive telecommunications industry. Part of this modernization is the extensive training our Union members must undergo on a continuing basis to keep their high productivity standards. Major lay-offs in this highly trained workforce could seriously affect the quality of service provided by Pacific Telephone and General of California.

And finally, employee morale would be seriously affected. Our members have a long tradition of pride in giving good service. That's what makes the American telephone system the best in the world. To be deprived of the resources needed to give good service would be very demoralizing to CWA members.

Before I conclude my testimony, I would like to bring to your attention another area in which H.R. 1524 will have a very definite impact.

As you may be aware, sometime in 1984 the American Telephone & Telegraph Co. will divest itself of its 22 Bell operating companies—Pacific Telephone included—under a consent agreement reached with the Department of Justice. It is of a primary concern to CWA that when this divestiture occurs, Pacific Telephone be in the soundest financial position possible, not only to the benefit of its employees, but also to the benefit of its customers.

I ask you, what kind of a future will Pacific Telephone have with a $3 billion tax liability hanging over its head?

For all of these reasons, I ask that you favorably report H.R. 1524.

I thank you for your time and your consideration.

Mr. Speaker, the Department of the Treasury, in public hearings, has stated that it has no objection to the enactment of sections 1 and 2 of H.R. 1524, and takes no position on section 3 of the bill. In testimony before the House Ways and Means Committee, a Treasury spokesman for Buck Chapoton, Assistant Secretary for Tax Policy, stated:

Although (section 3) of the bill would eliminate substantial potential tax liabilities, the revenue from the collection of these tax liabilities was not included in our estimates of the FY 1983 budget. In addition, while we believe that the rate orders of the California Public Utility Commission violated the normalization requirements, we anticipate that any asserted tax liabilities would be challenged by the affected taxpayers in court. It is unlikely that additional taxes would be collected for at least several additional years. Accordingly, enactment of this bill would affect our revenue estimates

only to the extent that it will require a refund of taxes already paid.

Mr. Speaker, this legislation is the result of many years of misinterpretation by, and lack of cooperation from, the Congress, the courts, the California Public Utilities Commission, and the Internal Revenue Service. This squabbling has placed two regulated utilities in the State of California in a position of flowing through to ratepayers a portion of their tax benefits for a period of 2 years which potentially makes these utilities ineligible to receive any tax benefits for the years the books are left open. In fact, they will owe the Federal Government back taxes for this privilege. Mr. Speaker, you can see that the magnitude of the penalty is tenfold to twentyfold the small amount that flows through to the customers.

This legislation is essentially remedial in nature, and is not intended to provide any special treatment for specific private enterprises. It is necessary. It restates and clarifies the present normalization rules relating to the investment tax credit and accelerated depreciation, and authorizes the Department of the Treasury to promulgate specific regulations detailing conditions under which ratemaking and adjustments are consistent with normalization It will provide for and insure uniform treatment of utilities with respect to these tax benefits.

I urge my colleagues to vote with me to pass this bill. It spells jobs. It spells equality.

As a legislator concerned with preserving equal treatment under the law, I support H.R. 1524. Letting California utilities take advantage of the normalization accounting—a method which utilities in your own States are permitted to use—it means better service and increased investment by the utilities. In the long run, Mr. Speaker, it is the consumer who benefits.

I recommend an "aye" vote. Thank you.●

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. BENNETT). The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 1524, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend the Internal Revenue Code of 1954 to provide that certain prcedures and adjustments shall be treated as inconsistent with the normalization method of treating public utility property."

A motion to reconsider was laid on the table.

TAX TREATMENT OF DIVIDENDS RECEIVED BY CERTAIN CONTROLLED FOREIGN CORPORATIONS

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3581) to amend the Internal Revenue Code of 1954 to exclude certain foreign commodity income from treatment as foreign personal holding company income, as amended.

The Clerk read as follows:

H.R. 3581

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) for purposes of section 954(a)(1) of the Internal Revenue Code of 1954, foreign base company income does not include any dividend received by a controlled foreign corporation from a qualified foreign subsidiary if—

(1) the dividend is out of earnings and profits of the qualified foreign subsidiary (for a taxable year beginning after 1982—and is attributable to the active conduct of the business of buying, selling, and distributing coffee,

(2) neither the country of incorporation of the controlled foreign corporation nor the country where the principal office of such corporation is located imposes any tax with respect to the receipt of such dividend,

(3) the controlled foreign corporation was incorporated before 1962 and its principal activity is carrying on a trade or business which it carried on for many years before 1962 and which it has continuously carried on since 1962 and through the date of the distribution, and

(4) the taxpayer acquired control of the controlled foreign corporation in 1978, but such control has been limited at all times after 1978 and before the date of the distribution by the fact that more than ½ of the stock which it holds in the controlled foreign corporation is held as beneficiary of a trust with respect to which the taxpayer's authority to appoint trustees is shared with the management of the controlled foreign corporation.

For purposes of paragraph (1), dividends out of the earnings and profits for any taxable year shall be treated as attributable to the active conduct of the business of buying, selling, and distributing coffee to the extent that such dividends do not exceed the portion of the earnings and profits attributable to such business for such year.

(b)(1) For purposes of this section, the term "qualified foreign subsidiary" means any foreign corporation—

(A) substantially all the stock of which is owned by the controlled foreign corporation, and

(B) to which an election under this subsection applies.

(2) An election under this subsection may be made only by the taxpayer described in subsection (a)(4) and only with respect to 1 foreign corporation. Such an election shall be made not later than the 60th day after the date of the enactment of this Act. Such an election, once made, shall be irrevocable.

(c) The provisions of this section shall apply to taxable years of foreign corporations beginning after December 31, 1982, and to taxable years of United States shareholders within which or with which such taxable years of such foreign corporations end.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3581, the bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3581 deals with the taxation of certain earnings of a foreign corporation controlled by a U.S. shareholder.

Under present law, dividends received by a foreign corporation which is controlled by U.S. shareholders may be taxable to the U.S. shareholders. However, there is no current taxation of the dividend if the corporation receiving the dividend was not acquired in order to reduce taxes, and the payment of the dividend is not for tax avoidance purposes.

In one case, the Internal Revenue Service has ruled that there should be current taxation of a U.S. majority shareholder of a Dutch company on dividends paid to that Dutch company, despite several factors that show the absence of a tax avoidance purpose. First, Dutch tax authorities have been putting pressure on the Dutch company to have its subsidiaries pay dividends. Second, 60 percent of the interest of the U.S. shareholder—Consolidated Foods Corp.—in the Dutch company is under the control of a voting trust. Finally, this Dutch company has been in business since 1753 and has been operating under its current structure for a number of years.

This bill generally does not disturb the Internal Revenue Service ruling position, and does not disturb it for past years for this taxpayer. For future years, the bill will exempt from current U.S. taxation, in narrowly defined circumstances, dividends received by a foreign corporation if certain conditions are met. These conditions are designed to apply to certain dividends received by the Dutch com-

pany partially owned by Consolidated Foods Corp.

Mr. Speaker, I urge adoption of H.R. 3581.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. STARK), chairman of the Subcommittee on Select Revenue Measures, who has had this under consideration.

Mr. STARK. I thank the chairman of the committee for yielding to me.

Mr. Speaker, H.R. 3581, introduced by the gentleman from Illinois (Mr. RUSSO), makes a narrow exception to the rule that dividends received by a foreign corporation which is controlled by U.S. shareholders may be taxable to the U.S. shareholders for one case where it has been argued that no tax avoidance purpose in making the dividend distribution is present. The intended beneficiary of this bill is Consolidated Foods Corp.

Mr. Speaker, at this point I would be glad to yield to the gentleman from Illinois (Mr. RUSSO) who has worked on this bill.

Mr. RUSSO. Mr. Speaker, I rise to urge my colleagues' support for the adoption of H.R. 3581, legislation dealing with the treatment of a particular source of foreign commodity income.

Under current law generally, income earned by foreign subsidiaries of U.S. companies remains untaxed until distributed to the U.S. parent company as dividends. However, if a foreign subsidiary directly or indirectly owned by a U.S. corporation meets certain tests designed to eliminate the use of tax havens and other low-tax countries to avoid tax on income from the United States and other high-tax-rate countries, then the U.S. shareholder is deemed to have received a dividend whether or not a dividend had actually been paid.

This rule does not apply if the income of the foreign subsidiary was derived from the sale of agricultural commodities which are not grown in marketable quantities in the United States. Obviously, in that case, there is no avoidance of U.S. tax. However, if income from that exempt commodity actually is paid in the form of a dividend to a foreign holding company, then that holding company may be deemed to have paid a dividend to its U.S. parent.

This anomalous result occurs because the otherwise exempt income has been turned into nonexempt income by appearing on the books of the foreign holding company as a dividend, even though the foreign holding company would be treated as having exempt income if it had directly earned the commodity income itself. My original bill, H.R. 3581, was introduced to alleviate the inequity caused by the interrelationship of these rules.

In October of 1981, the Subcommittee on Select Revenue Measures of the Committee on Ways and Means held a hearing on my bill, H.R. 3581. Testimony was received at that hearing from the Department of the Treasury, the Joint Committee on Taxation staff, and the general public. Subsequent to the hearing, on July 12, 1982, that subcommittee ordered favorably reported by voice vote H.R. 3581. My legislation was amended to reflect the observations raised at that hearing. Essentially, the subcommittee legislation was drafted to apply in the future to the Consolidated Foods Corp. The legislation is in no way retroactive. On September 15, 1982, the Committee on Ways and Means ordered the bill favorably reported and made minor technical amendments.

The salient facts of the subject transaction demonstrate the equity of the committee's action. In 1978, Consolidated Foods Corp., a U.S. corporation, purchased 65 percent of Douwe Egberts, a Dutch corporation. Douwe Egberts is engaged in the purchase, sale, and distribution of coffee, tea, and tobacco products. While incorporated in Holland in 1919, Douwe Egberts has been in business since 1753. Forty percent of Consolidated Foods' interest in Douwe Egberts—26 percent of the total stock—is held directly by Consolidated Foods, while 60 percent of the Consolidated Foods' interest—39 percent of the total stock—is held by a voting trust. The trustees of that trust are three independent Dutch citizens. Consequently, Consolidated Foods, in practical effect, controls less than a majority of the voting stock.

Douwe Egberts has several active non-Dutch subsidiaries with accumulated earnings and profits. The Dutch taxing authorities have been concerned that Douwe Egberts, by financing its activities through borrowing rather than through dividends from those non-Dutch subsidiaries, would obtain unwarranted interest deductions. Therefore, Douwe Egberts has been subject to some pressure from the Dutch taxing authorities to cause its subsidiaries to declare dividends, even though Holland would impose no tax on dividends remitted by those subsidiaries.

Consolidated Foods takes the position that any dividends remitted to Douwe Egberts by the subsidiaries would not be foreign personal holding company income and therefore not taxable to the U.S. parent under current U.S. law. However, in response to a ruling request from Consolidated Foods, the Internal Revenue Service disagreed, ruling that any dividends remitted would be taxable to the U.S. parent, Consolidated Foods, as foreign personal holding company income. The Service based this ruling on the view that the payment of dividends to Douwe Egberts would have as one of its significant purposes a substantial reduction of income tax—section 954(b)(4). If necessary, Consolidated Foods will litigate this issue and believes it will be successful. Of course, such litigation is expensive and very time consuming to the company and the U.S. Government alike.

The committee believed that in this case, the long history of operation of the foreign business and the concerns of the Dutch tax authorities tend to indicate a lack of tax avoidance purpose. While not intending to disturb the Internal Revenue Service ruling position for past years, the committee believed that these factors warrant exclusion of certain dividends from foreign base company income in future years; the legislation is prospective only.

The legislation before the House today will exempt from foreign base company income any dividend received from a qualified foreign subsidiary if certain technical conditions are met. As stated, the bill is drafted to address future transactions affecting Consolidated Foods Corp. In general terms, the four technical conditions that must be met are: First, the dividend is out of earnings and profits of the qualified foreign subsidiary and is attributable to the active conduct of the business of buying, selling, or distributing coffee; second, the country of incorporation and the principal office of the controlled foreign corporation do not impose a tax on the receipt of such dividend; third, the controlled foreign corporation was incorporated before 1962 to the date of distribution; and fourth, the taxpayer acquired control of the controlled foreign corporation in 1978 but such control has been limited by certain described circumstances.

Under the legislation, a qualified foreign subsidiary is a foreign corporation substantially all of the stock of which is owned by the controlled foreign corporation, and for which the controlled foreign corporation has elected the rule of exclusion that this bill provides. The legislation contains technical rules relating to this election.

It should be noted that this legislation is prospective only. The legislation will apply to taxable years of foreign corporations beginning after December 31, 1982, and to taxable years of U.S. shareholders within which or with which such taxable years of such foreign corporations end.

Nor is there any significant revenue loss associated with this legislation. On the basis of projections supplied by representatives of Consolidated Foods, it is estimated that this bill will reduce budget receipts by approximately $4 million annually beginning in fiscal year 1984. However, it is understood that the taxpayer would oppose an assertion by the Internal Revenue Service that the dividend distributions in

question are in fact taxable. Consequently, there would be an effect on budget receipts only if the taxpayer's position were not sustained by the court.

This legislation should be passed by us today so that it may be sent to the Senate for expeditious action this year.

Mr. Speaker, I thank the gentleman from California (Mr. STARK) for assisting in this matter, and also the chairman of the committee.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, as stated, this measure relates to the taxation of certain foreign personal holding company income. When the Congress moved in 1962 to enact provisions of the Internal Revenue Code of 1954 designed to curb certain foreign income abuses, it did not take into account the situation which gave rise to this bill. Because of those 1962 changes, the Committee on Ways and Means learned that through a transaction required by a foreign government, not by a U.S. corporation or its subsidiaries, a U.S. company will be subject to taxation.

The fact that the transaction, referred to in H.R. 3581, was undertaken at the request of the foreign government, as well as the foreign corporation's long history of actively conducting a specific type of trade or business, both indicate the tax avoidance has not motivated this transaction.

As a matter of fact, Mr. Speaker, as stated, one of the corporations involved here was formed in 1753, so clearly it was not one of those "shell" transactions designed to deal with taxes.

H.R. 3581 establishes a very limited exception to the 1962 rules. Under this exception, the bill's benefits can only be elected for one subsidiary, and the election must be made within 60 days of the bill's enactment.

It has been called to my attention that the administration opposes this measure. It was not made apparent to the members of the committee on this side of the aisle, and there was no substantial objection to it at the time it came up in committee.

For that reason, I will leave to the Members their view of the administration's reasons. It may be that it is because it is designed for a very limited transaction that they object to it. However, that also limits the chance of abuse. I think the Members should take that into account.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. CONABLE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I would like to point out that the administration does oppose enactment of this bill. It is my understanding that their opposition is based upon the fact that there is no adequate or compelling reason to permit the U.S. shareholders to exclude from their gross income dividends received from controlled foreign corporations.

So their objection seems to be on a fairly general basis to the bill, but I would point out that because the administration does oppose enactment of this particular bill that I will ask for a record vote on it so that the Members have an opportunity to register their views.

Mr. CONABLE. Mr. Speaker, I thank the gentleman for explaining his position.

I must say I do believe there is an issue of fairness involved here, as well as a precedent, and at least this legislation has been carefully drawn so that precedentially it will not lead to widespread abuse.

Mr. STARK. Mr. Speaker, will the gentleman yield to me?

Mr. CONABLE. I yield to the gentleman from California.

Mr. STARK. I thank the gentleman for yielding.

Mr. Speaker, as the gentleman from New York well knows, this bill came before the subcommittee which I chair and the subcommittee is very cautious about reporting single-purpose legislation.

I think I am correct in stating that the bill came out of our subcommittee unanimously.

Mr. Speaker, we recognized that it was for the relief of a particular taxpayer, but I think we felt that while there may have been some rather elaborate reincorporation procedures that the taxpayer could go through that in this instance justified our bringing legislation to the floor.

Mr. CONABLE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the bill H.R. 3581, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

APPLICATION OF SECTION 252 OF ECONOMIC RECOVERY TAX ACT OF 1981 TO CERTAIN TRANSFERS IN 1973

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4577) to amend Public Law 97-34, as amended.

The Clerk read as follows:

H.R. 4577

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(a) IN GENERAL.—Notwithstanding subsection (c) of section 252 of the Economic Recovery Tax Act of 1981, the amendment made by subsection (a) of such section 252 (and the provisions of subsection (b) of such section 252) shall apply to any transfer of stock to any person if—

(1) such transfer occurred in November or December of 1973 and was pursuant to the exercise of an option granted in November or December of 1971,

(2) in December 1973 the corporation granting the option was acquired by another corporation in a transaction qualifying as a reorganization under section 368 of the Internal Revenue Code of 1954,

(3) the fair market value (as of July 1, 1974) of the stock received by such person in the reorganization in exchange for the stock transferred to him pursuant to the exercise of such option was less than 50 percent of the fair market value of the stock so received (as of December 4, 1973),

(4) in 1975 or 1976 such person sold substantially all of the stock received in such reorganization, and

(5) such person makes an election under this section at such time and in such manner as the Secretary of the Treasury or his delegate shall prescribe.

(b) LIMITATION ON AMOUNT OF BENEFIT.—Subsection (a) shall not apply to transfers with respect to any employee to the extent that the application of subsection (a) with respect to such employee would (but for this subsection) result in a reduction in liability for income tax with respect to such employee for all taxable years in excess of $100,000 (determined without regard to any interest).

(c) STATUTE OF LIMITATIONS.—

(1) OVERPAYMENTS.—If refund or credit of any overpayment of tax resulting from the application of subsection (a) is prevented on the date of enactment of this Act (or at any time within 6 months after such date of enactment) by the operation of any law or rule of law, refund or credit of such overpayment (to the extent attributable to the application of subsection (a)) may, nevertheless, be made or allowed if claim therefor is filed before the close of such 6-month period.

(2) DEFICIENCIES.—If the assessment of any deficiency of tax resulting from the application of subsection (a) is prevented on the date of the enactment of this Act (or at any time within 6 months after such date of enactment) by the operation of any law or rule of law, assessment of such deficiency (to the extent attributable to the application of subsection (a)) may, nevertheless, be made within such 6-month period.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New

York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4577, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4577 permits certain individuals who received stock in 1973 pursuant to the exercise of employee stock options to elect to have section 252 of the Economic Recovery Tax Act of 1981 apply retroactively in certain limited circumstances. This will allow certain "insider trading" rules of the securities law to be taken into account in determining when the stock received is transferable and therefore taxed.

Under the bill, any reduction in tax pursuant to such election could not exceed $100,000 with respect to any one employee. The statute of limitations is amended by the bill to permit refunds, or credits, or assessments, attributable to the provisions of the bill. The intended beneficiaries of this bill are John G. Franzia, Jr., Joseph S. Franzia, and Fred T. Franzia. It is estimated that this bill will reduce budget receipts by a negligible amount.

Mr. Speaker, I urge adoption of H.R. 4577.

□ 1300

Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support H.R. 4577, which amends the restrictive property rules in Public Law 97-34.

The Economic Recovery Tax Act of 1981 adopted certain rules relating to the taxation of stock received upon the exercise of a "nonqualified stock option." The rules apply prospectively only.

This prospective application prevents the rules from applying to certain transactions undertaken prior to 1981. H.R. 4577 allows the 1981 act rules to apply to certain transactions occuring prior to 1981 under very limited circumstances.

The measure was approved without dissent by the Committee on Ways and Means. Thus, I know of no substantial opposition on this side of the House.

The administration, I understand, opposes this measure also. It involves, in effect, only three members of the Franzia family, and I think it is important to put this fact on the record so that there will not be claimed something is being slipped through for the benefit of individuals. Even if that is the case, Mr. Speaker, if it appears to be special interest legislation, if an issue of substantial injustice is involved, I see no reason why the House should not consider that and try to rectify an injustice. In this situation we are a court of last resort.

I will say that there is some controversy about this question of this limited application. It is not dissimilar to the earlier bill we discussed just a few minutes ago.

Mr. Speaker, I yield to the gentleman from California (Mr. STARK) if he wishes to make some remarks in view of my comments and in view of the announced opposition of the administration.

Mr. STARK. Mr. Speaker, I thank the distinguished ranking minority Member for yielding to me to just say again that I take a back seat to no one for opposing most special interest legislation in the Tax Code. This is a situation, if I can restate it, wherein the sellers of the securities were caught up on a conundrum which has now been rectified in the Code, so we are basically making a rule that we found to be correct retroactive.

What happened basically was that the people were required to pay the tax at the time their stock was sold. The Securities and Exchange rules prohibited them from selling the stock, and then the tax was assessed at a time when they could not sell the stock, causing two different Federal rules, in effect, to cause them a great deal of financial loss at the time. One alternative is to say that that is too bad. The other is to say that that was an unintended result. It was a law that we have since sought to correct, and I understand that on the basis of symmetry the administration's opposition, but I think again this was reported unanimously from the Subcommittee on Select Revenue Measures, and I would urge its adoption.

Mr. CONABLE. In effect, these taxpayers were prohibited from taking advantage of an opportunity that other taxpayers had by virtue of an order which was not germane to this particular issue.

Mr. STARK. The gentleman is absolutely correct. I thank him for yielding.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding. Again, the information I have been provided indicates the administration feels that the precedent being set here, there is no adequate or compelling reason for it, for making section 252 of the Economic Recovery Tax Act of 1981 retroactive. Once again, because of that opposition, I will get a record vote on the measure.

I thank the gentleman for yielding.

Mr. CONABLE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 4577, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Pursuant to clause 5 of rule I and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of order is considered withdrawn.

MONEY PURCHASE PLAN AMENDMENTS

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4948) to amend the Internal Revenue Code of 1954 to provide for the application of cash or deferred arrangement rules to money purchase plans, as amended.

The Clerk read as follows:

H.R. 4948

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. GENERAL RULE.

Subsection (k) of section 401 of the Internal Revenue Code of 1954 (relating to cash or deferred arrangements) is amended—

(1) by adding at the end of paragraph (1) the following new sentence: "A money purchase pension plan shall not be considered as not safisfying the requirements of subsection (a) merely because the plan includes a qualified salary reduction arrangement.",

(2) by inserting after "arrangement" in paragraph (3)(A) the following: "under a profit-sharing or stock bonus plan, or a qualified salary reduction arrangement under a money purchase pension plan,", and

(3) by adding at the end thereof the following new paragraph:

"(5) QUALIFIED SALARY REDUCTION ARRANGEMENT.—

"(A) IN GENERAL.—A qualified salary reduction arrangement is an arrangement, under a money purchase pension plan—

"(i) under which a covered employee may elect to have the employer make payments as contributions to a trust under the plan on behalf of the employee, or to the employee directly in cash, and

"(ii) which provides that an employee's right to his accrued benefit derived from employer contributions made to the trust pursuant to his election is nonforfeitable.

"(B) MONEY PURCHASE PENSION PLAN.—For purposes of this subsection, the term 'money purchase pension plan' means a pension plan—

"(i) which is a defined contribution plan (as defined in section 414(i)),

"(ii) which was in existence on June 27, 1974, and which, on that date, included a salary reduction arrangement, and

"(iii) under which neither the employee contributions nor the employer contributions may exceed the levels provided for by the contribution formula in effect under the plan on that date."

SEC. 2. TAXABILITY OF BENEFICIARIES.

Paragraph (8) of section 402(a) of the Internal Revenue Code of 1954 (relating to cash or deferred arrangements) is amended by inserting after "(as defined in section 401(k)(2))" the following: ", or a qualified salary reduction arrangement under a money purchase pension plan (as defined in section 401(k)(5))".

SEC. 3. CONFORMING AMENDMENTS.

(a) The caption of subsection (k) of section 401 of the Internal Revenue Code of 1954 is amended by inserting "; QUALIFIED MONEY PURCHASE PENSION PLAN" after "ARRANGEMENTS".

(b) The caption of paragraph (8) of section 402(a) of such Code is amended by inserting "; QUALIFIED MONEY PURCHASE PENSION PLAN" after "ARRANGEMENTS".

SEC. 4. EFFECTIVE DATE.

(a) IN GENERAL.—The amendments made by section 1 shall apply with respect to taxable years beginning after December 31, 1980. The amendment made by section 2 shall apply with respect to contributions made after that date. The amendments made by section 3 shall take effect on the date of enactment of this Act.

(b) TRANSITION RULE.—Any contribution made after December 31, 1979, and before the first day of the first plan year beginning after December 31, 1980, to a trust under a plan which includes a salary reduction plan or arrangement described in section 2006(b)(2) of the Employee Retirement Income Security Act of 1974 shall be treated as made to a trust which is part of a plan which includes a qualified salary reduction arrangement (as defined in section 401(k)(5) of the Internal Revenue Code of 1954), whether or not the trust to which the contribution is made meets the requirements of section 401(k)(5) of such Code, and section 135(c)(2) of the Revenue Act of 1978 shall apply in respect of such a contribution under any pension plan.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks on H.R. 4948, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4948 affords certain deferred compensation arrangements under money purchase pension plans tax treatment comparable to that afforded cash or deferred arrangements under profit sharing or stock bonus plans by the Revenue Act of 1978.

Under the 1978 Revenue Act, amounts deferred by an employee after 1979 pursuant to a cash or deferred arrangement under a profitsharing or stock bonus plan are excluded from the employee's income if certain requirements are met. No rules were provided by the 1978 act for amounts deferred pursuant to a similar salary reduction arrangement under a money purchase pension plan.

Many tax-exempt organizations have money purchase pension plans with a salary reduction feature. This feature is similar to a cash or deferred arrangement under a profitsharing or stock bonus plan. Tax-exempt organizations may be precluded from adopting profitsharing or stock bonus plans.

H.R. 4948 provides that amounts deferred by an employee after 1979 pursuant to a salary reduction arrangement under a money purchase pension plan which was in existence on January 27, 1974, will be excluded from the employee's income if the plan satisfies rules with respect to employee participation and prohibited discrimination in favor of employees who are officers, shareholders, or highly compensated employees. The bill applies to money purchase pension plans of taxable employers and tax-exempt organizations.

Mr. Speaker, H.R. 4948 extends the favorable tax treatment afforded deferred compensation arrangements meeting certain qualifications to similar arrangements not currently able to enjoy such treatment. The bill will have a negligible effect on budget receipts. It corrects an inequity in our current tax laws. Therefore, I urge the adoption of H.R. 4948.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. MATSUI).

Mr. MATSUI. Mr. Speaker, I thank the gentleman very much.

Mr. Speaker, H.R. 4948 addressesses an anomaly in existing pension tax law. An anomaly which discriminates severely against nonprofit organizations and tax-exempt entities.

Existing law recognizes three distinct types of pension plans that are accorded favorable tax treatment. They are profit sharing plans, stock bonus plans, and money purchase pension plans. One means for funding these three pension plans is through a cash or deferred arrangement. Under such an arrangement, an employee is given the choice of receiving a stipulated amount of cash as current compensation or of contributing all or part of that amount to a retirement plan.

Prior to 1972, elective contributions under a cash or deferred arrangement were not taxed currently to plan participants. Although the Treasury Department in 1972 proposed to subject these plans to immediate taxation, ERISA stayed the implementation of these regulations until the Congress could review the matter further.

The Revenue Act of 1978 provided permanent protection for qualified cash or deferred arrangements under profit sharing or stock bonus plans. Elective contributions under these arrangements are not taxed currently to plan participants if the plans meet the statutory strandards relating to nondiscrimination in participation and contribution, vesting, and timing of plan distributions. The 1978 act however, did not provide any permanent protection for money purchase pension plans containing cash or deferred arrangements. Moreover, those plans in existence as of June 27, 1974, which were previously protected under ERISA were not afforded any protection.

This distinction between profit sharing and money purchase plans with qualified cash or deferred arrangements appears not to be based on sound policy. This inequality is important in that money purchase pension plans are the principal means by which small tax-exempt and nonprofit organizations provide for the retirement needs of their employees. Tax-exempt organizations are precluded from participating in profit sharing or stock bonus plans due to their nonprofit and nonstock issuance status.

H.R. 4948 proposes to place money purchase pension plans with cash or deferred arrangement on parity with these other pension plans. The 1978 Revenue Act nondiscrimination standards applicable to stock or profit plans would be extended to money purchase pension plans. Therefore, participants making elective contributions to money purchase pension plans under cash or deferred arrangements would be accorded favorable tax treatment only where the plans meet the requirements that the 1978 act imposed on profit sharing and stock bonus plans.

Money purchase pension plan participants with cash or deferred arrangements in existence on June 27, 1974, would be grandfathered in; however, their level of contribution would be frozen at the 1974 rate. Grandfathering of these plans prevents disruption of retirement plans for those persons who had relied on the controlling

law. Similar treatment was afforded to stock bonus and profit sharing in the 1978 act.

It is most appropriate that the Congress proceeds to address this problem immediately. Pending Treasury regulation will require all employees who participate in salary reduction money purchase pension plans to include in their gross income all contributions made after December 31, 1979. At a time when the Congress has adopted a strong public policy in favor of employee contributions to retirement plans, it would be most inequitable to abandon those employees who have in good faith been participating in a common and valid retirement program.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4948 relating to certain money purchase pension plans.

The 1978 Revenue Act established statutory rules governing the tax treatment of cash and deferred profit-sharing plans. These plans offer participants a great deal of flexibility in planning for their retirement years and are therefore very attractive to employer and employee.

The 1978 act cash and deferred rules were not, however, extended to money purchase pension plans. This has created problems because, in operation, cash and deferred arrangements under money purchase pension plans and profit-sharing plans are the same. Administrative efforts to correct these problems have been unsuccessful because of lack of adequate statutory authority.

H.R. 4948 extends the 1978 act's cash and deferred provisions to money purchase pension plans that meet specific requirements, including the provisions of the 1978 act regarding participation and discrimination. Thus, the provisions of the bill are not available to money purchase pension plans that violate the current cash and deferred rules on discrimination.

I urge the bill's adoption.

Mr. Speaker, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 4948, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

PERIODIC PAYMENT SETTLEMENT TAX ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 to insure periodic payments for damages received on account of personal injuries or sickness, and for other purposes, as amended.

The Clerk read as follows:

H.R. 5470

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Periodic Payment Settlement Tax Act of 1982".

SEC. 2. TREATMENT OF RECIPIENT OF SETTLEMENT PERIODIC PAYMENTS.

Paragraph (2) of section 104(a) of the Internal Revenue Code of 1954 (relating to compensation for injuries or sickness) is amended by striking out "whether by suit or agreement" and inserting in lieu thereof "whether by suit or agreement and whether as lump sums or as periodic payments".

SEC. 3. TREATMENT OF ASSIGNEE-PAYOR.

(a) GENERAL RULE.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by redesignating section 130 as section 131 and by inserting after section 129 the following new section:

"SEC. 130. CERTAIN PERSONAL INJURY LIABILITY ASSIGNMENTS.

"(a) GENERAL RULE.—Any amount received for agreeing to a qualified assignment shall not be included in gross income to the extent that such amount does not exceed the aggregate cost of any qualified funding assets.

"(b) TREATMENT OF QUALIFIED FUNDING ASSETS.—In the case of any qualified funding asset—

"(1) the basis of such asset shall be reduced by the amount excluded from gross income under subsection (a) by reason of the purchase of such asset, and

"(2) any gain recognized on a disposition of such asset shall be treated as ordinary income.

"(c) QUALIFIED ASSIGNMENT.—For purposes of this section, the term 'qualified assignment' means any assignment of a liability to make periodic payments as damages (whether by suit or agreement) on account of personal injury or sickness—

"(1) if the assignee assumes such liability from a person who is a party to the suit or agreement, and

"(2) if—

"(A) such periodic payments are fixed and determinable as to amount and time of payment,

"(B) such periodic payments cannot be accelerated, deferred, increased, or decreased by the recipient of such payments,

"(C) the assignee does not provide to the recipient of such payments rights against the assignee which are greater than those of a general creditor,

"(D) the assignee's obligation on account of the personal injuries or sickness is no greater than the obligation of the person who assigned the liability, and

"(E) such periodic payments are excludable from the gross income of the recipient under section 104(a)(2).

"(d) QUALIFIED FUNDING ASSET.—For purposes of this section, the term 'qualified funding asset' means any annuity contract or obligation of the United States if—

"(1) such annuity contract or obligation is used by the assignee to fund periodic payments under any qualified assignment,

"(2) such annuity contract or obligation is designated by the taxpayer (in such manner as the Secretary shall by regulations prescribe) as being taken into account under this section with respect to such qualified assignment, and

"(3) such annuity contract or obligation is purchased by the taxpayer not more than 60 days before the date of the qualified assignment and not later than 60 days after the date of such assignment."

(b) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 of such Code is amended by striking out the item relating to section 130 and inserting in lieu thereof the following new items:

"Sec. 130. Certain personal injury liability assignments.

"Sec. 131. Cross references to other Acts."

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply to taxable years ending after December 31, 1981.

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was not objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on H.R. 5470, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5470, the Periodic Payment Settlement Tax Act of 1982, clarifies the tax treatment of periodic payments of awards for personal injury damages.

The bill specifically excludes from a recipient's income amounts received as damages for personal injury or sickness whether paid in lump sums or periodic payments. In addition, any amount received for agreeing to assume a liability for periodic payments for personal injury damages will not be included in income to the extent used to purchase an annuity or U.S. obligation to cover the liability.

The changes made by H.R. 5470 afford taxpayers certainty in structur-

ing personal injury settlements or judgments. At the same time, the bill is carefully crafted to prevent the possibility of abuse by taxpayers who make the payments to injured parties.

It is estimated that the bill will have a negligible effect on budget receipts.

Mr. Speaker, I urge the adoption of H.R. 5470.

Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 5470, relating to the tax treatment of personal injury damages.

Currently, amounts received as compensation for personal injuries are excluded from gross income under statutory rules if received in a lump sum, and administratively, if received as periodic payments.

Statutory rules do not exist governing the tax treatment of a third party that assumes the responsibility for paying personal injury damages.

H.R. 5470 establishes statutory rules governing the tax treatment of: First, damages received as compensation for personal injuries whether received as a lump sum or as periodic payments; and second, amounts received by third parties which assume responsibility for paying the personal injury damages. Under these rules, personal injury damages received as a lump sum or as a periodic payment will continue to be tax exempt. In addition, amounts received by third parties to compensate others for personal injuries generally will not be taxable to the third party if invested in an annuity or obligation of the United States and if the proceeds of these investments are used to compensate the injured party.

H.R. 5470 makes necessary changes in our tax laws and I urge its adoption.

Mr. Speaker, there is no objection to this bill of which I am aware. I have no requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 5470, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness."

A motion to reconsider was laid on the table.

COMPUTER EQUIPMENT CONTRIBUTION ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5573) to amend the Internal Revenue Code of 1954 to encourage contributions of computers and other sophisticated technological equipment to elementary and secondary schools, as amended.

The Clerk read as follows:

H.R. 5573

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Computer Equipment Contribution Act of 1982".

SEC. 2. CHARITABLE CONTRIBUTIONS OF COMPUTER EQUIPMENT TO PRIMARY AND SECONDARY SCHOOLS.

Subsection (e) of section 170 of the Internal Revenue Code of 1954 (relating to certain contributions of ordinary income and capital gain property) is amended by adding at the end thereof the following new paragraph:

"(5) SPECIAL RULE FOR CONTRIBUTIONS OF COMPUTER EQUIPMENT TO PRIMARY AND SECONDARY SCHOOLS.—

"(A) LIMIT ON REDUCTION.—In the case of a qualified contribution of computer equipment, the reduction under paragraph (1)(A) shall be no greater than the amount determined under paragraph (3)(B).

"(B) QUALIFIED CONTRIBUTION OF COMPUTER EQUIPMENT.—For purposes of this paragraph, the term 'qualified contribution of computer equipment' means a charitable contribution by a corporation of tangible personal property described in paragraph (1) of section 1221, but only if—

"(i) the contribution is to a qualified educational organization and is made through the governing body of such organization,

"(ii) the contribution is made pursuant to a written plan of the taxpayer under which there will not be undue concentrations of the taxpayer's contributions of computer equipment from the geographic standpoint or from the standpoint of the relative economic status of the donees' students,

"(iii) the property is assembled by the taxpayer and the taxpayer is regularly engaged in the business of assembling and selling computer equipment of the same kind as such property,

"(iv) the contribution is made—

"(I) not later than 6 months after the date the assembly of the property is substantially completed, and

"(II) during 1983,

"(v) the original use of the property is by the donee,

"(vi) the property is computer equipment substantially all the use of which by the donee will be at the institution directly in the education of students,

"(vii) the property is not transferred by the donee in exchange for money, other property, or services, and

"(viii) the taxpayer receives from the donee a written statement representing that its use and disposition of the property will be in accordance with the provisions of clauses (vi) and (vii).

"(C) QUALIFIED EDUCATIONAL ORGANIZATIONS.—For purposes of this paragraph, the term 'qualified educational organization' means—

"(i) an educational organization which is described in subsection (b)(1)(A)(ii), and

"(ii) a school operated as an activity of an organization described in section 501(c)(3) and exempt from income tax under section 501(a) if such school normally maintains a regular faculty and curriculum and normally has a regularly enrolled body of pupils or students in attendance at the place where its educational activities are regularly carried on.

Such term shall not include any institution of higher education (as defined in section 3304(f)) and shall not include any organization not located in the United States.

"(D) COMPUTER EQUIPMENT.—For purposes of this paragraph, the term 'computer equipment' means—

"(i) a data processor which—

"(I) can be programed in at least 3 standard computer languages,

"(II) has a random access memory with a capacity for at least 32,000 bytes, and

"(III) is (or can be) connected with a screen for visual display of the data,

"(ii) if donated by the taxpayer for use in connection with a data processor described in clause (i) donated by the taxpayer—

"(I) a display screen,

"(II) a printer, or

"(III) a disc drive, and

"(iii) any installation equipment for equipment described in clause (i) or (ii).

"(E) CORPORATION.—For purposes of this paragraph, the term 'corporation' shall not include—

"(i) an electing small business corporation (as defined in section 1371(b)),

"(ii) a personal holding company (as defined in section 542), and

"(iii) a service organization (as defined in section 414(m)(3))."

Sec. 3. Effective Date.

The amendment made by section 2 shall apply to taxable years ending after December 31, 1982.

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker. I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There is no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill, H.R. 5573, presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1315

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5573, the Computer Equipment Contribution Act of

1982, provides a special increased income tax deduction for charitable contributions, made during 1983, of newly manufactured computers to primary and secondary schools, for use at the school directly in the education of students. The objective of the bill is to encourage manufacturers to donate computers for use in classrooms throughout the country, so that young students will become trained in new technology. Skill in using computers has become essential as more and more jobs require computer competency.

To obtain the favorable tax treatment afforded by H.R. 5573, a donating company must demonstrate that the computers will be donated to a wide cross section of students, so that there will not be a concentration of donated computers from a geographic standpoint nor from the standpoint of the relative economic status of the students. In addition, certain other requirements are imposed by the bill to assure that the donated computers are not obsolete, and that they are used directly in the education of students.

H.R. 5573 is effective for contributions made during calendar year 1983. The delay in effective date until next year will allow companies to prepare for contributing computers to schools under a program that satisfies the distribution requirements in the bill. While one manufacturer, Apple Computer, has announced that it plans to contribute tens of thousands of computers to elementary and secondary schools under the bill, any computer company may take advantage of the special deduction rule provided by the bill. It is estimated that the bill will reduce budget receipts by $15 million in fiscal year 1983, $21 million in fiscal year 1984, and a negligible amount in 1985.

Mr. Speaker, I urge adoption of H.R. 5573.

Mr. Speaker, I yield to the gentleman from California (Mr. STARK), the chairman of the subcommittee that considered this legislation.

Mr. STARK. Mr. Speaker, I thank the chairman of the committee for yielding to me.

Mr. Speaker, I rise in support of H.R. 5573, the Computer Equipment Contribution Act of 1982, which I introduced and which is cosponsored by over 85 of our colleagues. This legislation would liberalize the charitable deduction that a business could take for donating personal computers to our primary and secondary schools.

Mr. Speaker, education, more than ever, seems to hold the key to this Nation's economic reassurance. Recent studies have indicated that economic expansions may be more impacted by Government policy on education than Government policy on captial formation. All fields of education are vital, but in the scheme of things they may not all be equal. What determines our national destiny at a point in history is partly a reflection of the values and subjects which we have emphasized in our Nation's schools. Few doubt that the tremendous emphasis that we placed on mathematics and the sciences after Sputnik produced noticeable and beneficial results.

Today the United States has somewhat of a lead in the rapidly expanding areas of computers, communications, and other forms of high technology. This lead, where it exists, is slipping, and we need to make every effort to assure that our educational system is responding to that challenge. In this regard, I introduced H.R. 5573, which I hope will be one step in insuring a greater educational commitment to these vital areas of study.

H.R. 5573 would allow companies who donated computers to primary and secondary schools, a deduction for the cost of the equipment, plus one-half of the difference between their cost and the fair market value. This rule is identical to a provision currently in law for valuing donation of scientific equipment to colleges and universities for research purposes. The company donating the equipment would be required to have a written plan assuring economic and geographic diversity in its donation program. The equipment donated could be no more than 6 months old and must be used directly in the education of students. This legislation was drafted partly in response to an extremely generous offer by the Apple Computer Co. to donate a computer—and supporting equipment—to many of public and private elementary and secondary schools in the country. The Joint Committee on Taxation estimates that the legislation would reduce revenues by $15 million in 1983 and $21 million in 1984. I think that this legislation represents a good deal for the American taxpayer, a good deal for our schools, and a good deal for companies interested in increasing this Nation's ability to compete in the ever more sophisticated world of computers and high technology.

I hope my colleagues will support passage of this vital legislation.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

A number of school districts in my area have had the foresight to go ahead and buy large volumes of computers for their schools and have expended a number of tax dollars in the current year and last year for such equipment. Is this bill not basically penalizing those school districts by saying that although they made the expenditure to actually purchase the equipment, other school districts are now going to get it through donation.

Mr. STARK. Mr. Speaker, if the chairman of the committee will yield, I would respond to the gentleman by saying that on the purchase of these computers, I think the schools in the gentleman's district were very wise, and I think he will find that they have been successful and they would like more. The one offer that was made publicly, for instance, is that any school in the United States, elementary or secondary, that requires one will receive one from the Apple Computer Co., for example.

So the effect of this bill would be to add to the program, and I would be almost certain that the gentleman would find his schools are happy with what they already have and could use additional equipment because it would allow more students to have access and more students to use these computers in a variety of situations.

Mr. WALKER. Mr. Speaker, if the gentleman will yield further, that may be fine if they can get donated equipment of a compatible nature with what they have purchased. However, if the companies from whom they have purchased computers would not be participating in this program in some way, it could well be they could not receive compatible equipment, which means that the programs into which they have also put considerable tax money would not be available for use across the board.

Mr. STARK. Mr. Speaker, the gentleman might very well be correct if the same computer company would not donate additional computers. However, the computer companies that have indicated their interest in donating this equipment also intend to provide software, so that while they may not be able to expand the same teaching system, these schools may benefit from additional courses.

For example, some computers can be programed to substitute for expensive science experiments. So they could have a real educational benefit in having additional opportunities.

Mr. WALKER. Mr. Speaker, if the gentleman will yield further, I have one other point.

Mr. ROSTENKOWSKI. Mr. Speaker, the gentleman from Illinois refuses to yield further. There are other Members here who want to speak on the bill, and the gentleman can get time on his own side.

Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in opposition to H.R. 5573.

The act is as it has been described by the preceding speakers. The House will recall that the general rule for giving away equipment is that the

donor is allowed to deduct the cost of the equipment. There are two exceptions, one of rather long standing, relating to contributions to charitable organizations to take care of the ill or the needy or infants with medical supplies, food, and so forth. They are allowed a larger deduction. Last year we allowed also a larger deduction for contributors of computer type equipment for research in colleges.

This bill extends that exception a little further. The reason that it is a problem for me, Mr. Speaker, is that it will enable certain computer manufacturers to make all the computers that they can conceivably sell, and a few more. If they do not sell them, they still have the ability within 6 months of manufacture to contribute them to a school and receive twice their cost for the deduction against their taxes. To me that would seem to give a rather unfair advantage to computer companies of a certain kind that had a productive capability or that were in a field where there was a technological turnover and models would have to be changed.

To me, Mr. Speaker, it is a little bit like our dairy law because it gives an incentive to manufacturers to manufacture more than the market needs, because they can always sell more to the Government; they can truck them off to their local high school or vocational technical school.

There is another problem with the bill, and that is that it is rather exclusive. It seems to be aimed at one company, although a number of companies, it is true, may take advantage of it.

But we are using only computers. I wonder why. We are training people for all kinds of jobs in our vocational schools. I do not know why we would not give the same kind of deduction for a lathe, particularly one of these pneumeric driven machines or other machinery which were not necessarily computers but represent new technological skills in today's production processes. Those are not included.

Mr. Speaker, because the bill seems to me to be overly specific, because it seems to me to give an unreasonable incentive to certain companies to produce and be able to have a guaranteed market for their machinery, I intend to oppose the bill.

Mr. Speaker, does the gentleman from Pennsylvania (Mr. WALKER) seek recognition?

Mr. WALKER. I do, Mr. Speaker.

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

If I may, I would like to address a further question. A few moments ago, when I was quizzing with regard to the bill, the gentleman indicated some concern about software. Is software included in this bill? Would the school districts have the software donated to them as well?

Mr. STARK. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from California.

Mr. STARK. Mr. Speaker, I thank the gentleman for yielding.

As to software, to the extent it is part of the computer package, the operational software for the computer would be included. The software manufactured by separate manufacturers who may sell software as a separate business is not included.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. FRENZEL. I yield further to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, if I understand it correctly, once they got the donated machinery which, of course, does put them in a stream for software, they will have to purchase all the software, which, of course, can become a very expensive item for the school districts as well, and they would have no ability to really negotiate on some of that because the software stream would be established by the donation. Is that a correct assumption?

Mr. STARK. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from California.

Mr. STARK. Mr. Speaker, I think that would depend on the donor and the particular type of equipment. Some personal computers take a wide range of software, and it could be an expensive proposition. Other personal computers are very simple, and the operational software is available. Some computers can take software from other companies.

This would depend tremendously on the different products and computers that are available. It is the intention of one donor to make available a complete package, including some software, but the only difference would be that this donor—in this case the Apple Computer Company—would not be able to get a deduction for the software. They intend to donate it anyway, but they would not get the tax deduction.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. STARK. Mr. Speaker, if the gentleman will yield further so I could just go one step further and correct his statement on his objection, they would not be able to get double the cost. The way the deductions are structured, if they paid at the full 46-percent rate, the maximum they would be able to get is 92 percent of the cost, and they might not be able to get that much because it is limited to their actual cost plus half the difference in value, and that could vary. But in all instances they would have some investment, if you will, although it could approach a very small amount.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for that correction. It is accurate, and I regret my overstatement.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. FRENZEL. I yield further to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

That was the next point I wanted to explore with the gentleman from Minnesota, if I could. Do I understand correctly that as to the donated value that will be a tax writeoff, it can be considerably above the figure of the cost of manufacture?

Mr. FRENZEL. It can be up to twice as much as the cost. It is either the retail value if the producer sells in retail or whatever the wholesale value is if he sells into that stream of commerce. But it is a maximum in either case of twice the manufacturer's cost of the machinery.

Mr. WALKER. Mr. Speaker, I thank the gentleman very much for his clarification, and I thank him for yielding.

Mr. FRENZEL. Mr. Speaker, may I ask the gentleman from California (Mr. STARK) is that an accurate statement of the limitation?

I yield to the gentleman for a response.

Mr. STARK. Mr. Speaker, it is my understanding that it would be 92 percent if you are in the 46-percent tax bracket. You could not use the 100 percent; you would always have that marginal difference.

Mr. FRENZEL. I agree, Mr. Speaker, and I also believe that with the normal markups on this kind of equipment it will always be at the ceiling; it will be at two times the cost.

Mr. Speaker, I have no further requests for time.

GENERAL LEAVE

Mr. FRENZEL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. FRENZEL. Mr. Speaker, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Tennessee (Mr. GORE).

Mr. GORE. Mr. Speaker, I rise in support of H.R. 5573, the Computer Equipment Education Act of 1982.

I bring a special interest to this legislation as chairman of the Congressional Clearinghouse on the Future. We have been looking at the matter of computer literacy during the past few years and earlier this year sponsored a special session for Members of Congress.

What has become crystal clear during these informal examinations is that computer literacy is becoming a necessary tool as our Nation and the world moves into a new era of high technology—technology developed and deployed not only for industry, defense, and Government, but for every American of every age.

In early June, the National Science Foundation released the "Institute for the Future" report on the implications of new electronic information technology on our lives in the coming years. One of the points made in the study is that we will all be living and learning with computers. It follows that those of us who are prepared to deal with this new technology in our daily lives will be the first to prosper with it.

In fact, the ability to incorporate basic computer literacy into the skills of our young people could be the difference between a generation of occupational misfits or a rapid growth in productivity at all skill levels in our economy.

As they enter the job market, our high school students are the most vulnerable to inadequacy in skills. We are told that millions of jobs will be lost in manufacturing and other labor sectors in the coming two decades—all because of rapid technological developments bringing about new productivity gains. We also know that there is another side to that scale—millions of jobs will be created in the service sector and in new aspects of older industries, most incorporating sophisticated new computer and communications technology.

In a just released study by the Office of Technology Assessment, it is stated that—

> The growing use of information technology throughout society is creating major new demands for education and training in the United States and is increasing the potential economic and social penalty for not responding to those demands.

We must be sure that the students of today do not become a lost generation. We must remember that students are able to pursue an elective education only so far—often only as far as a school's resources. In the case of computer hardware and instruction, those resources are nil.

Certainly, some students will find a way to acquire computer skills even if they do not get them in elementary and secondary schools. However, the millions of teenagers who will not be able to pick and choose such post-secondary instruction will be those who need these skills the most, because they are the ones who are most vulnerable to the kinds of disastrous economic swings we are now witnessing.

Our schools and educational planners recognize this problem, but their hands are often tied by budgetary constraints. The purchase of a $2,000 computer and maintaining the instructor to use it is simply out of reach for most public schools, certainly those in my district and throughout my home State of Tennessee.

The modest tax deduction allowed in H.R. 5573 may be one answer—a very limited impact on revenues with a clear long range benefit for schools throughout the Nation and for our society. This Congress has already extended tax incentives to stimulate donations of computer hardware for research purposes. I suggest that the payoff in long-term increased scientific achievement might be even greater if our Nation's primary and secondary schools were able to obtain the hardware necessary to begin basic instruction.

I strongly urge my colleagues to support H.R. 5573.

□ 1330

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. Mr. Speaker, I want to rise in support of the legislation and compliment both the chairman of the subcommittee, the gentleman from California (Mr. STARK) and the chairman of the full committee, the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. Speaker, today we have an opportunity to take a relatively painless step that would have important, positive consequences for the economy of this country.

By supporting H.R. 5573, the Computer Equipment Contribution Act, we can see to it that computers become available to schools all across this Nation.

This legislation would extend a provision added last year to the Tax Code. For a single year, it would allow deductions for companies who donate computers to schools.

It is estimated that by 1985 this country will have a shortage of 100,000 engineers in the electronic industry. At a time when so much of our economic future depends on our high tech industries, it is folly for us to ignore this statistic. High tech training and education is essential to our Nation's future. This bill is a simple, positive way of responding to that need.

When this bill was first proposed, some objections were raised. The final bill responds to most of those objections. For instance, the bill's original 30 percent of income cap has been lowered to the 10 percent applicable to other charitable contributions. Restrictions have been added to assure that contributions are not limited to wealthy schools or narrow geographic areas.

This Nation has already suffered unnecessary economic setbacks. We have seen it in autos, and we have seen it in steel.

The time for America to prepare for its high tech future is now.

This bill helps see to it that we will have the trained personnel to keep this critical sector of our economy strong and thriving.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 4 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, I thank the chairman and want to compliment the gentleman from California (Mr. STARK) as well for bringing forth this very, very creative and very much needed piece of legislation.

What this legislation does more than any other act that we will take part in this year in the Congress is recognize the changing nature of the American economy.

It is necessary for us to recognize the need to instill some computer literacy into the grammar schools and into the high schools of this country. The way we were taught the skills that we were given, all of us who serve in this body, will not be the new jobs which are created in the latter part of this decade and into the 1990's and the 21st century. A whole new era has dawned upon this country.

In the area of high technology, microelectronics, telecommunication, robotics, this entire revolution promises to impact every single part of the American economy and our lifestyle. If we do not make that changeover to training young people in these high thought content areas then we will lose the opportunity of giving the leadership in the coming generations to the world in the production of these products.

We right now are not giving that kind of opportunity to our young people. This cooperation between the private sector and our secondary and primary schools will help to telescope a process which could take a decade but which, with this kind of cooperative effort, might only take two, three, or four years to begin to instill in secondary and primary schools the primacy which ought to be attached to this kind of education.

What will it do? It will provide the new jobs for our economy. Five percent of the new jobs in the past decade have come from the manufacturing sector and that is all. Eighty-nine percent of the jobs have come from the service sector, and that is where this new training will pay dividends because that is where the new jobs are going to come from.

And not just there, but in the electronic milking schedules for the farmer, in the electronic fund transfer for banks, the automatic dialing of telephones, biotechnology, revolutionary designs of new transportation systems and all of this will be affected.

Here is the problem right now in this country: we are engaged in the

education equivalent of a book burning. Right now in the vast majority of high schools our graduates have no chemistry, no physics, no computer science, and they have only a modicum of math.

The percentage of science and engineers in our society has declined since 1965. It has doubled in Japan. It has increased fourfold in the Soviet Union.

In Japan, with half our population, they have graduated 74,000 engineers a year whereas we have 58,000. The Soviet Union has 400,000.

In the field of computer sciences there is an estimated demand in this country for 54,000 graduates a year. We are graduating only 13,000.

Mr. Speaker, we are eating our seed corn in cutting education budgets and in cutting aid for education. We cannibalize our universities and we make it impossible for us to produce those people that will be able to fill these needs in our future.

● Mr. PARRIS. Mr. Speaker, I rise in support of the bill, H.R. 5573, the Computer Equipment Contribution Act of 1982. This bill will allow companies to donate computers and other technological equipment to elementary and secondary schools. This donation will give public school systems the opportunity to significantly expand their capacity to provide students with training and instruction in the use of technological equipment of the future.

In addition, this legislation will allow a company to donate a maximum of 30 percent of its taxable income for a temporary period of time. The current ceiling for such donations is set at 10 percent of the company's annual income. In an era of budget cuts and limited funds for educational programs, I appreciate the desirability of obtaining such costly items as computers and technological equipment by private sector donations.

Basic technological and computer training for America's youth is a necessary step to insure our country's future position in the world's rapidly expanding and competitive high technology areas. I therefore urge my colleagues to support and pass this vital legislation.●

● Mr. CONABLE. Mr. Speaker, I rise in support of H.R. 5573, relating to contributions of computers to certain schools.

The Economic Recovery Tax Act of 1981 established special rules governing the deductibility of contributions made to colleges or universities of scientific equipment used for certain types of research. These rules are not applicable to contributions to primary and secondary schools.

Current budget problems prevent many school boards and districts from providing pupils with computers and related equipment needed to develop the skills required in the job markets of the future. H.R. 5573 attempts to correct this problem to a limited degree by extending the principles of the 1981 act to certain contributions of computers that are made to primary and secondary schools.

Specifically, the computers must be donated during 1983 and within 6 months of their completion to primary or secondary schools under a program that results in the computers being distributed to schools that are diverse in terms of location and economic status. Other requirements are provided. H.R. 5573 Thus provides a limited incentive.●

● Mrs. HECKLER. Mr. Speaker, the Computer Equipment Act of 1982 (H.R. 5573) represents a vitally important component in America's efforts to counteract a wave of scientific and technological illiteracy that is spreading across the country. In the next two decades, as many as 75 percent of the work force will need computer skills to perform their jobs. If the emerging work force is not adequately prepared for this coming "decade of technology," they will not only become functionally illiterate, but our very ability to excel in scientific and technological endeavors will be threatened. At stake is the competitiveness of American products in international markets, reduced productivity in the electronics/information processing industry—which is fast approaching 50 percent of our gross national product—and a diminished national security capability.

There are some experts who feel that an understanding of computers may be fundamental to democracy itself. According to Adeline Naiman, managing director of the Technical Education Research Centers in Cambridge, Mass:

> In a democracy, in order for people to know how to make their own decisions, it will be important for them to understand computers.

Clearly, with the rapid increase of computers in commerce and everyday life, the need to begin familiarizing today's students in computer technology is critical. This is why I was the first cosponsor of this bill; as the ranking minority member on the Science, Research and Technology Subcommittee of the Committee on Science and Technology, I quickly recognized the importance of this legislation. Before the bill's introduction I discussed the issue with Steven Jobs, president of Apple Computer, who offered to provide, at no cost, a computer center to the Nation's 75,000 primary and secondary schools.

Even though a number of Massachusetts' high-technology firms; that is, Wang, Raytheon, Digital Equipment Corp., have already been donating equipment, I believe this bill will encourage broader participation.

Computers are as essential as pencil and paper to insure a proper education. In today's highly competitive and computer-oriented job market, students must have access to "hands-on" computer training. Those school districts that provide computer instruction will give their students a competitive advantage over those that do not, and those States that offer the highest number of qualified workers will do a better job of attracting high-technology companies and other firms that rely on information processing.

The Computer Equipment Contribution Act represents a natural extension of my efforts last year to convince the administration to add a similar provision that allowed deductions on computer equipment donated to colleges and universities to the Economic Recovery Act. This legislation will extend the current tax deduction for scientific equipment allowed for universities to secondary and primary schools. For students to properly excell in college they really need to become familiar with computers at a much younger age. We all know how young people take to computer and video games. It is time we channeled those productive energies in more employable directions.

There are many advantages to incorporating computers into the classroom. Experts have found that computers actually enhance the learning process itself. There are three primary factors that improve the learning experience. First, the computer provides for immediate reinforcement. Second, a computer makes a perfect fit into the theory that a child's ability to manipulate objects is directly related to learning. Finally, the automatic feedback from the computer supports goal-directive behavior and might be adding to the extended attention span students are developing.

There are also advantages in the application of computers in science and math classrooms. Students can use the equipment for data analysis and process control, allowing more time to think about the experiments. Learning to write programs will improve problem-solving skills as students reduce complex problems to a series of simpler problems.

According to a recent National Science Foundation (NSF) study, the field of computer technology is changing so quickly that educational institutions will need some help in absorbing the new potential applications for the classroom.

Computing not only calculates but transforms information. Traditionally, computers have been used in education as research tools, subjects of study, and vehicles for training students in computing languages. These applications are rapidly broadening so that computers are now commonly used to:

One, aid in instruction—computer-aided instruction and computer-based education; two, edit text and process publications; three, access libraries and data bases; four, communicate messages—electronic mail.

These new opportunities provide additional capabilities in accomplishing intellectual tasks.

The next stages of computer use will have new and qualitatively different effects that will ripple through the framework of existing institutions causing controversy and competition for already tight resources. Opportunities for diversifying the educational process will arise as we develop new and more productive instructional techniques through the confluence of computing, communications, and video disk technology. Already we see a large growth taking place in education outside of traditional institutions. Today over $10 billion is spent per year on continuing education; that is, seminars, training.

The revolution in computer power—25 percent per year gains in performance for the past 15 years—continues to create options for new applications. Each student will soon be able to afford his or her own microprocessor/terminal. The market for some computers in the United States has grown from zero 5 years ago to over 300,000 units per year today. The current talent pool in higher education capable of meeting the needs for instruction and research in computing fails to meet our national needs by an order of magnitude. Reports from the National Science Foundation, the Bureau of Labor Statistics, and computer-science groups indicate that this imbalance will continue to grow.

The deficit of teachers at these demand levels is exacerbated by the difficulty of retaining young faculty members due to the lure of high salaries and the availability of specialized computing facilities within industry. This is precisely why I introduced the National Science and Technology Improvement Act (H.R. 6930), a bill that encourages secondary and college/university science and math teachers to stay on the job. I would ask my colleagues to examine my bill as a companion to H.R. 5573.

We must broaden the framework for discussion of computing to consider the current role of education in the transformation of the United States from an industrial to an information society.

The predominant occupational distribution has shifted in the last 100 years from farming to industry to information handling. Information processing has become the dominant national economic activity. Information activities—both direct and indirect—now account for over 46 percent of the gross national product, and over 50 percent of the labor income is now earned by information workers.

Information is the foundation of organizations and the essence of education. How information is gathered and stored, who has access to it, how it is used—all these affect the structure of an institution.

Business and industry are fast realizing that the computer is not a computer for calculating but a tool for information processing. New applications of these information tools—computers, communications, and software—reflect new opportunities to improve the productivity and efficiency of this segment of our economy, which in turn affects all other sectors.

These changes are leading to what has been called the information society. Other nations have identified the links between education, computing, research, productivity, and the information society and are planning and investing to achieve new economic goals. The Japanese have an information society plan, the French have a plan telematique. The United States is just beginning to identify the roles of, and the relationship between, the different sectors in this transformation.

These points highlight the relationships between computing in higher education and national needs. Not only in computer science, but in all areas of training, research and instruction, higher education contributes to national goals and productivity, trade, research, and citizen participation in society. As our economy becomes increasingly dependent on the production and distribution of information services, the many roles which computing plays in higher education will become more important to our national welfare.

However, if computing is to make significant new contributions to educational and national goals, we must have computers in the schools.

I would urge my colleagues to support the Computer Equipment Contribution Act in order to facilitate the transfer of computer technology to the classrooms of America.●

● Mr. BIAGGI. Mr. Speaker, as a member of the House of Education and Labor Committee and a consponsor of H.R. 5573, the Computer Equipment Contribution Act, I wish to express may strong support for this legislation and urge its immediate passage.

Consideration of this bill comes at a time when we find education at the crossroads. School budgets at the local level are being stretched to the limit as a result of massive cuts in education funding—nearly 25 percent in the past 2 years. This bill will provide a small, but important incentive for incorporating educational technology into our schools. It allows a 1-year rule, for 1983 only, for charitable contributions of newly manufactured computers to primary and secondary schools. It provides assurance that in the provision of such equipment to schools, that there be geographical equity as well as educational access to the services of these computers by children of all income levels.

This legislation was generated by the offer of the Apple Computer Co. to give their computers to schools next year. At a hearing conducted before our Select Education Subcommittee last week on educational technology, we learned that a variety of computerized devices are available to schools to assist them in teaching both studetns and teachers. We also learned that there are a number of companies which are involved in this area. It is my hope that this legislation would provide a substantial incentive to other computer companies to follow the lead of Apple and donate there equipment to schools. The companies will benefit, as will the students and their teachers.

Mr. Speaker, in light of our present lack of adequate resources for educational programs, we must look to alternative methods of instruction which will serve the greatest numbers of people at the least cost. It is clear that computers are and will continue to be vital to this effort, particularly with advances in technology which make greater numbers of computers available to more people at lower costs. This bill is a forward-sighted piece of legislation that would provide important incentives to schools and private industry to look to technology for our schools. I urge its immediate adoption.●

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 5573, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

REQUEST FOR PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORT ON H.R. 5133, DOMESTIC CONTENT LEGISLATION

Mr. GORE. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until

midnight tonight to file a report on the bill, H.R. 5133, domestic content legislation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

Mr. FRENZEL. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

REDUCTION IN RATE OF CERTAIN TAXES PAID TO VIRGIN ISLANDS

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income.

The Clerk read as follows:

H.R. 7093

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled,

SECTION 1. REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

(a) IN GENERAL.—Subpart D of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to possessions) is amended by inserting after section 934 the following new section:

"SEC. 934A. REDUCTION IN INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

"(a) GENERAL RULE.—For purposes of determining the tax liability incurred by citizens and resident alien individuals of the United States, and corporations organized in the United States, to the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands—

"(1) the rate of the taxes imposed by sections 871(a)(1) and 881 shall not exceed 10 percent, and

"(2) subsection (a) of section 934 shall not apply to such taxes.

"(b) REDUCED RATES NOT TO APPLY TO PRE-EFFECTIVE DATE EARNINGS.—

"(1) IN GENERAL.—The reduction under subsection (a)(1), and any reduction under section 934 pursuant to subsection (a)(2), in a rate of tax imposed by section 871(a)(1) or 881 shall not apply to dividends paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction.

"(2) ORDERING RULE.—For purposes of paragraph (1), dividends shall be treated as first being paid out of earnings and profits accumulated for taxable years beginning before the effective date of the reduction (to the extent thereof)."

(b) WITHHOLDING.—Subchapter A of chapter 3 of such Code (relating to withholding of tax on nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING ON VIRGIN ISLANDS SOURCE INCOME.

"For purposes of determining the withholding tax liability incurred the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands by citizens and resident alien individuals of the United States, and corporations organized in the United States, the rate of withholding tax under sections 1441 and 1442 on income subject to tax under section 871(a)(1) or 881 shall not exceed the rate of tax on such income under section 871(a)(1) or 881, as the case may be."

(c) TECHNICAL AMENDMENT.—Subsection (a) of section 934 of such Code is amended by inserting before the period at the end thereof "or in section 934A".

(d) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart D of part III of subchapter N of chapter 1 of such Code is amended by inserting after the item relating to section 934 the following new item:

"Sec. 934A. Reduction in income tax rate on Virgin Islands source income."

(2) The table of sections for subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1444. Withholding on Virgin Islands source income."

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to amounts received after the date of the enactment of this Act in taxable years ending after such date.

(2) WITHHOLDING.—The amendment made by subsection (b) shall apply to payments made after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill presently under consideration, H.R. 7093.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 7093 deals with certain taxes imposed by the Virgin Islands on payments of passive-type income to U.S. corporations and individuals.

Under present law, the Internal Revenue Code of the United States is generally applied as the local tax law in the Virgin Islands. Under the code, the Virgin Islands may reduce its income tax only for United States and Virgin Islands corporations that earn a significant portion of their income in the Virgin Islands.

The Internal Revenue Code requires the Virgin Islands to impose a 30-percent tax on passive investment income paid by Virgin Islands persons to non-Virgin Islands persons, including U.S. persons. The Virgin Islands cannot now forgive this tax. Although there is some dispute about this tax liability for the recipient of passive investment income from the Virgin Islands, it is the position of the Internal Revenue Service that the recipient is liable for the tax.

The current 30-percent tax on the gross amount of passive investment income paid by Virgin Islands persons to U.S. persons discourages investment by U.S. persons in the Virgin Islands. Because no deductions are allowed, the tax on this income, in many cases, is higher than the regular corporate or individual tax would be if deductions were allowed. Reduction of this tax will remove as impediment to investment in the Virgin Islands by U.S. persons.

H.R. 7093 will reduce the 30-percent tax imposed by the Virgin Islands to 10 percent when the recipient is a U.S. individual or corporation, and will impose a corresponding withholding obligation on the Virgin Islands payor of the income. The bill will allow the Virgin Islands Government to reduce this 10-percent rate further in its discretion. The bill will not affect payments of Virgin Islands source passive income to non-U.S. persons. The bill is expected to have a negligible effect on budget receipts.

Mr. Speaker, I urge adoption of H.R. 7093.

Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from the Virgin Islands (Mr. DE LUGO).

Mr. DE LUGO. Mr. Speaker, I thank the chairman of the committee for yielding and wish to thank him for his assistance on this legislation and the members of the committee for their support.

Mr. Speaker, I ask the support of my colleagues for the passage of H.R. 7093. This bill reduces the 30-percent withholding tax in the Virgin Islands to 10 percent for U.S. citizens and residents of the United States and for corporations organized in the United States, and allows the Virgin Islands Legislature to reduce the tax further as it sees fit. The bill is extremely important to the economic growth of the Virgin Islands, a matter of particular urgency given the difficulties faced by the territory as a result of Federal budgetary constraints.

The bill, which has full administration support, passed the House Ways and Means Committee last week. I thank the chairman, Mr. ROSTENKOWSKI, for his support in getting the bill through his committee and to the floor for consideration today. I also thank my cosponsors of the bill, Mr. HOLLAND, Mr. HEFTEL, and Mr. SCHULZE. Their consistent support of this legislation and sympathy for the problems it addresses is deeply appreciated by myself and the people of the Virgin Islands. I particularly want to

thank Mr. SCHULZE for his support of the bill here on the floor today.

The bill addresses the need in the U.S. Virgin Islands for direct measures to attract new investment. With the numerous trade agreements the United States has entered into, the Virgin Islands is finding it increasingly difficult to compete for offshore businesses. Several businesses have declined the Virgin Islands Government's efforts to get them to locate in the territory, citing the 30 percent withholding tax as their sole impediment. Furthermore, the 30 percent withholding tax has not produced resounding tax benefits for the Virgin Islands Treasury. The burden of paying the 30 percent tax on interest has stifled business expansion due to reluctance by mainland banks to lose 30 percent of their interest on loans to Virgin Islands taxes. On the other hand, dividends have not been declared by many businesses who chose to avoid the tax by accumulating earned surplus instead of declaring dividends.

The bill is important for the people of the Virgin Islands. It provides investment incentive that should lead to a better circulation of capital, more available mortgage money, and potential for funding a much-needed housing development, but most importantly, it will provide jobs for our people. It promises more in revenues to the Virgin Islands Treasury through this expansion than ever resulted from withholding of the 30 percent tax.

For these reasons, I ask you to vote for the passage of H.R. 7093.

Mr. ROSTENKOWSKI. Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill has been described by previous speakers on this floor.

As far as I know, there is no objection within the committee to this bill.

In particular, one of the Members on the minority side, the distinguished gentleman from Pennsylvania (Mr. SCHULZE) has been a strong proponent, along with the delegate from the Virgin Islands, of this particular legislation.

Mr. Speaker, this only lets the Virgin Islands reduce the withholding from its own tax system. It does not necessarily affect U.S. taxes.

But I think the committee is wise to have passed this. I think the House should adopt it. But I think we should all understand that this implies no obligation on the part of the U.S. Government to make up any of this revenue foregone.

I am delighted to see that the people of the Virgin Islands have become determined supply siders. They believe increased investment is actually going to increase tax revenues. So do I.

There may have to be, however, a slight lag. I just want them to be sure that they are prepared for that.

Mr. Speaker, I yield back the balance of my time.

● Mr. SCHULZE. Mr. Speaker, I rise in support of H.R. 7093 relating to withholding of taxes on certain income from the Virgin Islands.

Currently, the Treasury Department and certain taxpayers are in disagreement over: First, whether the Virgin Islands may impose a withholding tax on dividends and other types of passive income paid by Virgin Islands' corporations to taxpayers that are outside the Virgin Islands; and second, the amount of this tax.

The bill resolves these disagreements in the case of payments of dividends, interest and other types of passive income from Virgin Island sources to U.S. taxpayers by providing that these payments are subject to a 10-percent withholding tax. The bill allows the Virgin Islands to reduce this 10-percent rate further.

It is my hope that further amendments will be made to the rules governing the taxation of income earned in the Virgin Islands. The amendments will clarify the applicable rules and allow the Virgin Islands to attract additional businesses that will provide residents of the Virgin Islands with new employment opportunities.●

● Mr. CONABLE. Mr. Speaker, I rise in support of H.R. 7093, relating to the taxation of investment income from Virgin Islands' sources.

A controversy currently exists over the manner in which passive investment income earned in the Virgin Islands should be treated under our tax laws. Litigation has not resolved the controversy.

H.R. 7093 establishes statutory rules governing the taxation of passive investment income earned in the Virgin Islands by U.S. taxpayers, and thus provides a limited solution to the current controversy. The bill does not address the issue of how foreign recipients should be taxed on this type of income. It thus has limited, but helpful application, and I urge its adoption.●

Mr. ROSTENKOWSKI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 7093.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

MISCELLANEOUS TARIFF AMENDMENTS OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6867) to change the tariff treatment with respect to certain articles, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6867

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. AMENDMENT OF TARIFF SCHEDULES.

Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a schedule, item, headnote or other provision, the reference shall be considered to be made to a schedule, item, headnote or other provision of the Tariff Schedules of the United States.

TITLE I—TARIFF SCHEDULES AMENDMENTS

Subtitle A—Permanent Changes in Tariff Treatment

SEC. 101. FURS FROM CHINA.

Headnote 4 to subpart B of part 5 of schedule 1 is amended by striking out "or of the People's Republic of China".

SEC. 102. CERTAIN FISH NETTING AND FISH NETS.

(a) With respect to articles entered after December 31, 1982, and before January 1, 1984, item 355.45 is amended by striking out "18¢ per lb. + 28.6% ad val." and inserting in lieu thereof "15¢ per lb. + 26.7% ad val.".

(b) With respect to articles entered after December 31, 1983, and before January 1, 1985, item 355.45 is amended by striking out "15¢ per lb. + 26.7% ad val." and inserting in lieu thereof "9¢ per lb. + 22.8% ad val.".

(c) With respect to articles entered after December 31, 1984, and before January 1, 1986, item 355.45 is amended by striking out "9¢ per lb. + 22.8% ad val." and inserting in lieu thereof "3¢ per lb. + 18.9% ad val.".

(d) With respect to articles entered after December 31, 1985, item 355.45 is amended by striking out "3¢ per lb. + 18.9% ad val." and inserting in lieu thereof "17% ad val.".

(e) As used in this section, the term "entered" means entered, or withdrawal from warehouse for consumption, in the customs territory of the United States.

SEC. 103. CERTAIN FOURDRINIER WIRE.

(a) Subpart B of part 3 of schedule 6 is amended by striking out item 642.30 and inserting in lieu thereof the following:

	"Fourdrinier wires, seamed or not seamed, suitable for use in papermaking machines (whether or not parts of, or fitted or attached to, such machines):			
642.31	With 240 or more wires to the linear inch.	Free	10% ad val.	75% ad val.
642.32	Other	19.4% ad val.	10% ad val.	75% ad val.".

(b)(1) The rate of duty in column numbered 1 for item 642.32 (as added by subsection (a)) shall be subject to any staged rate reductions for item 642.30 which were proclaimed by the President before the effective date of the amendment made by subsection (a).

(2) Whenever the rate of duty specified in column numbered 1 for such item 642.32 is reduced to the same level as the correspond-

ing rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in such "LDDC" column shall be deleted.

SEC. 104. CLASSIFICATION OF DOLLS AND TOY FIGURES

(a)(1) Subpart E of part 5 of schedule 7 is amended—

(A) by adding at the end of the headnotes thereto the following new headnotes:

"3. For the purposes of the superior heading to items 737.47 and 737.49 and of item 737.51, 'toy figures of inanimate objects' are only imaginary creatures that either—

"(i) do not possess features of human or other earthly creatures;

"(ii) possess both earthly and non-earthly features but are predominantly non-earthly in nature; or

"(iii) possess features which are a hybrid of features of more than one animate object.

This definition does not cover toy figures of objects which are readily recognizable as vegetables, minerals, robots, or machines, whether or not such figures possess humanoid or earthly features.

"4. Items 737.23, 737.28, 737.30, and 737.47 do not include any doll or toy that either—

"(i) will maintain the three dimensional shape of its torso if the stuffing or filler is removed, or

"(ii) is constructed such that the 'filler' material consists of one piece (such as one piece of foam rubber) or more than one piece that achieves the same effect as one piece.

"5. For the purposes of items 737.26 and 737.51, 'skins' are the outer coverings or shells of those dolls or toy figures which, if imported stuffed or filled, would be classified in items 737.23, 737.28, 737.30, and 737.47, but do not contain stuffing or filling in the torso when imported.

"6. For the purposes of item 737.47, the term 'filled' includes toy figures which are not completely filled or are filled with materials such as plastic beads or crushed nutshells but which otherwise possess the characteristics of toy figures classifiable as 'stuffed'.";

(B) by redesignating items 737.45 and 737.50 as 737.42 and 737.43, respectively; and

(C) by adding in numerical sequence the following new items:

	"Toy figures of inanimate objects, not having a spring mechanism:			
737.47	Stuffed or filled	13.6% ad val.	7% ad val.	70% ad val.
737.49	Other	13.6% ad val.	7% ad val.	70% ad val.
737.51	Skins for toy figures of animate or inanimate objects.	13.6% ad val.	7% ad val.	70% ad val.".

(2) The rates of duty in column numbered 1 for items 737.47, 737.49, and 737.51 (as added by subsection (a)(1)(C)) shall be subject to any staged rate reductions for item 737.95 which were proclaimed by the President before the effective date of the amendments made by subsection (a).

(3) Whenever the rate of duty specified in column numbered 1 for each of such items 737.47, 737.49, and 737.51 (as added by paragraph (1) of this subsection) is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower rate, the rate of duty in such "LDDC" column shall be deleted.

SEC. 105. BUTTON BLANKS OF CASEIN.

(a) Subpart A of part 7 of schedule 7 is amended—

(1) by striking out "(item 745.40)" in headnote 2(b) of such subpart and inserting in lieu thereof "in the superior heading to items 745.41 and 745.42"; and

(2) by striking out item 745.40 and inserting in lieu thereof the following:

	"Button blanks and molds, and parts of buttons:			
745.41	Button blanks, of casein	Free		45% ad val.
745.42	Other	22.1% ad val.	11.4% ad val.	45% ad val.".

(b)(1) The rate of duty in column numbered 1 for item 745.42 (as added by subsection (a)(2)) shall be subject to any staged rate reductions for item 745.40 which were proclaimed by the President before the effective date of the amendments made by subsection (a).

(2) Whenever the rate of duty specified in column numbered 1 for such item 745.42 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in such "LDDC" column shall be deleted.

SEC. 106. MATERIALS CERTIFIED BY NASA.

(a) Subpart A of part 3 of schedule 8 is amended—

(1) by inserting immediately after "Subpart A—United States Government" the following headnote:

"Subpart A headnote:

"1. With respect to item 837.00, the return of materials from space by the National Aeronautics and Space Administration shall not be considered an importation, and an entry of such materials shall not be required."; and

(2) by adding immediately after item 836.00 the following new item:

	"Articles for the National Aeronautics and Space Administration and articles imported to be launched into space under launch services agreements with the National Aeronautics and Space Administration:		
837.00	Materials certified by it to the Commissioner of Customs to be imported to be launched into space, spare parts, or necessary and uniquely associated support equipment for use in connection with a launch into space.	Free	Free".

(b) Item 837.00 (as added by subsection (a)) shall not apply to articles entered, or withdrawn from warehouse for consumption, after December 31, 1994.

Subtitle B—Temporary Changes in Tariff Treatment

SEC. 121. CANTALOUPES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"903.65	Cantaloupes, fresh, if entered during the period from January 1 to May 15, inclusive, of any year (provided for in items 148.12 and 148.17, part 9B, schedule 1).	Free	No change	On or before 5/15/85".

SEC. 122. HATTERS' FUR.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"903.85	Fur, not on the skin, prepared for hatters' use (provided for in item 186.20).	Free	No change	On or before 12/31/85".

SEC. 123. NEEDLECRAFT DISPLAY MODELS.

Subpart B of part 1 of the Appendix is amended as follows:

(1) The headnotes to such subpart are amended by adding at the end thereof the following new headnote:

"5. For the purposes of the superior heading to items 906.10 and 906.12, the term 'mass-produced kits' includes only those which are designed to be sold in the customs territory of the United States exclusively in kit form.".

(2) The following new superior heading and new items are inserted in numerical sequence:

	"Needle-craft display models, primarily hand stitched, of completed mass-produced kits:			
906.10	Articles provided for in items 355.16, 360.70, 360.78, 364.18, 364.23, 364.30, 365.78, 365.84, 365.86, 366.79, 367.34, 367.55, 367.60, 386.04, 386.06, 386.09, 386.50, 388.40, and 389.62 of schedule 3 (except shoe uppers and tents).	Free	No change	On or before 6/30/85
906.12	Aprons and baby bibs (provided for in items 383.03, 383.08, 383.20, and 383.50 of schedule 3).	Free	No change	On or before 6/30/85".

SEC. 124. CERTAIN DISPOSABLE GOWNS AND SURGICAL DRAPES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"905.50	Bonded fiber fabric disposable gowns designed for use in hospitals, clinics, laboratories or contaminated areas, of man-made fibers (provided for in items 379.96 and 383.92, part 6F, schedule 3) and bonded fiber fabric disposable surgical drapes, of man-made fibers (provided for in item 389.62, part 7B, schedule 3).	5.6 percent ad val.	26.5 percent ad val.	On or before 1/1/88".

SEC. 125. P-HYDROXYBENZOIC ACID.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.00	P-Hydroxybenzoic Acid (provided for in item 404.44, part 1, schedule 4).	Free	No change	On or before 9/30/85".

SEC. 126. TRIPHENYL PHOSPHATE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.00	Triphenyl phosphate (provided for in item 404.48, part 1B, schedule 4).	Free	No change	On or before 9/30/85".

SEC. 127. BIS (4-AMINOBENZOATE)-1,3 PROPANEDIOL (TRIMETHYLENE GLYCOL DI-P-AMINOBENZOATE).

Item 907.05 of the Appendix is amended—

(1) by striking out "however provided for in items 402.36 through 406.63" and inserting in lieu thereof "provided for in item 405.07"; and

(2) by striking out "6/30/83" and inserting in lieu thereof "6/30/84".

SEC. 128. COLOR COUPLERS AND COLOR INTERMEDIATES.

(a)(1) Item 907.10 of the Appendix is amended by striking out "6/30/82" and inserting in lieu thereof "9/30/85".

(2) Item 907.12 of the Appendix is amended by striking out "6/30/82" and inserting in lieu thereof "9/30/85".

(b) The amendments made by subsections (a) and (b) shall apply with respect to articles entered, or withdrawn from warehouse for consumption, after June 30, 1982.

SEC. 129. ETHYLBIPHENYL.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.14	Mixtures of 3-ethylbiphenyl (m-ethylbiphenyl) and 4-ethylbiphenyl (p-ethylbiphenyl) (provided for in item 407.16, part 1B, schedule 4).	Free	No change	On or before 6/30/85".

SEC. 130. DICOFOL.

(a) Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.15	1,1-Bis (4-Chlorophenyl)-2,2,2,-trichloroethanol (Dicofol) (provided for in item 408.28, part 1C, schedule 4).	11.2% ad val.	7¢ per lb. + 41% ad val.	On or before 9/30/85".

(b) Effective with respect to articles provided for in item 907.15 (as added by subsection (a)) that are entered, or withdrawn from warehouse for consumption, on and after each of the dates set forth below, column 1 for such item is amended by striking out the rate of duty in effect on the day before such date and inserting in lieu thereof the rate of duty appearing below next to each such date:

Date:	Rate of duty:
January 1, 1983	10.3% ad val.
January 1, 1984	9.5% ad val.
January 1, 1985	8.6% ad val.

(c) The rate of duty on an article provided for in such item 907.15 that is—

(1) entered, or withdrawn from warehouse for consumption on or after the effective date of the amendment made by subsection (a) and before October 1, 1985; and

(2) a product of a least developed developing country;

shall be 6.9 percent ad valorem.

SEC. 131. UNCOMPOUNDED ALLYL RESINS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.16	Allyl resins, uncompounded (provided for in item 408.96, part 1C, schedule 4).	Free	No change	On or before 9/30/84".

SEC. 132. CAFFEINE.

Subpart B of part 1 to the Appendix is amended by inserting in numerical sequence the following new item:

"907.22	Caffeine (provided for in item 437.02, part 3B, schedule 4).	6% ad val.	No change	On or before 12/31/83".

SEC. 133. NATURAL GRAPHITE.

Item 909.01 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "12/31/84".

SEC. 134. COPPER SCALE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"911.05	Copper scale (provided for in item 603.70, part 1, schedule 6).	Free	No change	On or before 9/30/85".

SEC. 135. CERTAIN CLOCK RADIOS.

Subpart B of part 1 of the Appendix is amended—

(1) by adding at the end of the headnotes to such subpart the following new headnote:

"6. For the purposes of item 911.95, the term 'entertainment broadcast band receivers' means receivers designed principally to receive signals in the AM (530–1710 KHz) and FM (88–108 MHz) entertainment broadcast bands, whether or not capable of receiving signals on other bands such as aviation, television, marine, public safety, industrial, and citizens bands."; and

(2) by inserting in numerical sequence the following new item:

"911.95	Entertainment broadcast band receivers valued not over $40 each (however provided for in schedule 6), incorporating timekeeping or time display devices, not in combination with any other article, and not designed for motor vehicle installation.	Free	No change	On or before 9/30/84".

SEC. 136. BICYCLE PARTS.

(a) Item 912.05 of the Appendix is amended by striking out "6/30/83" and inserting in lieu thereof "6/30/86".

(b) Item 912.10 of the Appendix is amended—

(1) by deleting "click stick levers," and inserting in lieu thereof "trigger and twist grip controls for three-speed hubs,";

(2) by inserting "including cable or inner wire for caliper brakes and casing therefor, whether or not cut to length," immediately after "parts of all the foregoing,"; and

(3) by striking out "6/30/83" and inserting in lieu thereof "6/30/86".

SEC. 137. HEAT-SET, STRETCH TEXTURING MACHINES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.07	Machines designed for heat-set, stretch texturing of continuous man-made fibers (provided for in item 670.06, part 4E, schedule 6).	Free	No change	On or before 9/30/85".

SEC. 138. HOSIERY KNITTING MACHINES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.08	Single cylinder fine gauge hosiery knitting machines and double cylinder jacquard hosiery knitting machines (provided for in items 670.16 and 670.18, part 4E, schedule 6).	Free	No change	On or before 9/30/85".

SEC. 139. DOUBLE-HEADED LATCH NEEDLES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.09	Double-headed latch needles (provided for in item 670.58, part 4E, schedule 6).	Free	No change	On or before 6/30/85".

SEC. 140. PROSTHESES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.20	Externally-powered electric prosthetic devices for amputees (provided for in item 709.57, part 2B, schedule 7), and parts thereof.	Free	No change	On or before 9/30/84".

SEC. 141. TOY AND NOVELTY ITEMS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.25	Articles provided for in parts 5D and 5E of schedule 7 (except balloons, marbles, dice, and die-cast vehicles), valued not over five cents per unit; and jewelry provided for in part 6A of schedule 7 (except parts), valued not over 1.6 cents per piece.	Free	No change	On or before 12/31/86".

SEC. 142. CERTAIN DOLLS AND TOY FIGURES.

Subpart B of part 1 of the Appendix is amended by inserting at the end thereof the following new items:

"912.30	Stuffed dolls (with or without clothing) and doll skins for stuffed dolls (provided for respectively in items 737.21, 737.23 and 737.26, part 5E, schedule 7).	Free	No change	On or before 12/31/85
912.34	Stuffed or filled toy figures of inanimate objects not having a spring mechanism (provided for in item 737.47, part 5E, schedule 7).	Free	No change	On or before 12/31/85
912.36	Skins for stuffed toy figures of animate and inanimate objects (provided for in item 737.51, part 5E, schedule 7)..	Free	No change	On or before 12/31/85".

Subtitle C—Taking Effect of Amendments to Tariff Schedules

SEC. 151. EFFECTIVE DATE.

Except as provided in sections 102 and 128(b), the amendments made by subtitles A and B shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act, but not before October 1, 1982.

TITLE II—MISCELLANEOUS CUSTOMS PROVISIONS

SEC. 201. INTERNATIONAL TRANSMISSION OF BUSINESS DOCUMENTS; IMPORTERS OF RECORD.

(a) General headnote 5 is amended—

(1) by striking out "and" at the end of subdivision (d);

(2) by redesignating subdivision (e) as subdivision (f); and

(3) by adding immediately after subdivision (d) the following:

"(e) records, diagrams, and other data with regard to any business, engineering, or

exploration operation, whether on paper, cards, photographs, blueprints, tapes, or other media; and"

(b) Item 870.10 is repealed.

(c) Section 483 of the Tariff Act of 1930 (19 U.S.C. 1483) is repealed.

(d) Section 484 of the Tariff Act of 1930 (19 U.S.C. 1484) is amended—

(1) by amending subsection (a)—

(A) by amending that part of paragraph (1) thereof which precedes subparagraph (A) to read as follows: "Except as provided in sections 490, 498, 552, 553, and 336(j) of this Act and in subsections (h) and (i) of this section, one of the parties qualifying as 'importer of record' under paragraph (2)(C) of this subsection, either in person or by an agent authorized by him in writing—",

(B) by redesignating paragraph (2)(C) as paragraph (2)(D), and by inserting immediately after paragraph (2)(B) the following:

"(C) When an entry of merchandise is made under this section, the required documentation shall be filed either by the owner or purchaser of the merchandise or, when appropriately designated by the owner, purchaser, or consignee of the merchandise, a person holding a valid license under section 641 of this Act. When a consignee declares on entry that he is the owner or purchaser of merchandise, the appropriate customs officer may, without liability, accept the declaration. For the purposes of this title, the importer of record must be one of the parties who is eligible to file the documentation required by this section.", and

(C) by striking out "consignees" in paragraph (2)(D) (as redesignated by subparagraph (B)) and inserting in lieu thereof "importers of record";

(2) by striking out "consignee" in subsections (c) and (d) and inserting in lieu thereof "importer of record"; and

(3) by amending subsections (h) and (i) to read as follows:

"(h) The carrier bringing the merchandise into the port at which entry is to be made may certify any person to be the owner, purchaser, or consignee of the merchandise, and that person may be accepted as such by the appropriate customs officer. A carrier shall not certify a person pursuant to this subsection unless it has actual knowledge of or reason to believe in the accuracy of such certification.

"(i) For the purposes of this section, the appropriate customs officer may accept a duplicate bill of lading signed or certified to be genuine by the carrier bringing the merchandise to the port at which entry is to be made.".

(e) Sections 485, 487, 494, and 505(a) of the Tariff Act of 1930 (19 U.S.C. 1485, 1487, 1494, and 1505(a)) are each amended by striking out "consignee" wherever it appears and inserting in lieu thereof "importer of record".

(f) Section 557 of the Tariff Act of 1930 (19 U.S.C. 1557) is amended—

(1) by inserting "purchaser" immediately after "owner" in the first sentence of subsection (a); and

(2) by striking out "consignee" in subsection (d) and substituting in lieu thereof "importer of record".

(g) The amendments made by this section shall apply with respect to merchandise entered on and after the 30th day after the date of the enactment of this Act.

SEC. 202. DELIVERY INTO SUCCESSIVE BONDED WAREHOUSES REGARDLESS OF LOCATION.

The first sentence of the eighth paragraph of section 311 of the Tariff Act of 1930 (19 U.S.C. 1311) is amended by striking out "at an exterior port" and "immediate".

SEC. 203. WATCHES AND WATCH MOVEMENTS FROM THE INSULAR POSSESSIONS.

Effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the effective date of the amendments made by subtitles A and B of title I of this Act—

(1) general headnote 3(a)(i) is amended by striking out "(or more than 70 percent of their total value with respect to watches and watch movements)"; and

(2) headnote 6 of part 2 of subpart E of schedule 7 is amended—

(A) by striking out "paragraph (b)" in paragraph (a) and inserting in lieu thereof "paragraphs (b) through (h)";

(B) by striking out "an insular possession of the United States outside the customs territory of the United States" in paragraph (a), and inserting in lieu thereof "the Virgin Islands, Guam, and American Samoa (hereinafter in this headnote referred to as the 'insular possessions')"; and

(C) by striking out paragraphs (b) through (d) and inserting in lieu thereof the following new paragraphs:

"(b) Watches and watch movements produced or manufactured in an insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials they contain if they conform with the provisions of this headnote, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (c) of this headnote.

"(c) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 7,000,000 units. In subsequent calendar years, the Secretaries of Commerce and the Interior (the 'Secretaries'), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations; except that the quantity they establish in each calendar year shall not—

"(i) exceed 10,000,000 units, or ⅛ of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (d) of this headnote), whichever is greater;

"(ii) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

"(iii) be increased to more than 7,000,000 units or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.

"(d) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements (including solid state watches and watch movements) during the preceding calendar year, shall report such determination to the Secretaries and shall publish such determination in the Federal Register.

"(e) In calendar year 1983, not more than 5,200,000 units of the total quantity of such articles which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa. For calendar years after 1983, the Secretaries may establish for each of the insular possessions new shares of the total amount which may be entered free of duty, taking into account the capacity of the insular possession to produce and ship its assigned amounts; except that no share of an insular possession may—

"(i) for any calendar year be fewer than 500,000 units;

"(ii) for each of calendar years 1984 and 1985, be reduced by more than 200,000 units below its share for the immediately preceding year; and

"(iii) for each calendar year after 1985, be reduced by more than 500,000 units below its share for the immediately preceding calendar year.

"(f) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (c), and (e) of this headnote on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses therefore. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of production in the insular possessions on domestic production of like articles and shall establish allocation criteria, which may include minimum assembly requirements, that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

"(g) TEMPORARY PRODUCTION INCENTIVE CERTIFICATES.—

"(i) Effective January 1, 1983, the Secretaries, acting jointly, shall verify the wages paid by each producer to permanent residents of the insular possessions in the preceding calendar year, and, by March 1 of each year through calendar year 1994, shall issue to each producer a certificate for a portion of the amount so verified, determined pursuant to subparagraph (ii) of this paragraph.

"(ii) The value of each producer's certificate shall equal 90 percent of each producer's creditable wages on the assembly of the first 300,000 units produced annually, plus a graduated declining percentage to be annually established by the Secretaries of the producer's creditable wages on the assembly of additional units, up to a maximum of 750,000 units annually; except that—

"(A) the aggregate value of all certificates may not exceed an annual certificate limit, the value of which bears the same ratio to $5,000,000 as the gross national product of the United States for the preceding calendar year, as determined by the Department of Commerce, bears to the gross national product of the United States for calendar year 1982, and if such limit is exceeded, the value of each producer's certificate shall be reduced proportionately by an amount sufficient to account for the amount by which the aggregate base amount exceeds the annual certificate limit; and

"(B) each producer's certificate shall not be reduced below an amount equal to 90 percent of each producer's creditable wages on the assembly of up to the first 300,000 units produced annually, unless the aggregate of these reduced certificates exceeds the annual certificate limit, in which event each producer's certificate shall again be reduced proportionately to account for the excess.

"(iii) Such certificates entitle the certificate holder to secure the refund of duties equal to the face value of the certificate on watches and watch movements (including

solid state watches and watch movements) and, with the exception of discrete cases, parts therefor imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of these refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.

"(iv) Such certificates, or portions thereof, are negotiable.

"(v) Such certificates shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

"(vi) For purposes of calculating the value of each producer's production incentive certificates to be issued during calendar year 1983 only, the greater of either (A) a producer's creditable wages for calendar year 1982, or (B) an amount equal to 60 percent of a producer's creditable wages for calendar year 1981 shall be considered the creditable wages for calendar year 1982 for purposes of subparagraph (ii) of this paragraph.

"(h) The Secretaries are authorized to issue such regulations, not inconsistent with other provisions herein, as they determine necessary to carry out their respective duties under this headnote. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.".

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill presently under consideration, H.R. 6867.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 6867, as reported by the Committee on Ways and Means, is an omnibus bill incorporating 30 miscellaneous tariff and trade provisions which were considered in the committee with amendments. They involve temporary duty suspensions, permanent duty eliminations, duty reductions, certain provisions affecting U.S. Customs Administration, and the lifting of an embargo.

Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Subcommittee on Trade, the gentleman from Florida, (Mr. SAM GIBBONS,) for the purpose of presenting H.R. 6867.

□ 1345

Mr. GIBBONS. Mr. Speaker, as the distinguished chairman of the Committee on Ways and Means has explained, H.R. 6867 consolidates 30 miscellaneous tariff and trade bills which, less one completely noncontroversial exception, were subject to public hearings and consideration in the Subcommittee on Trade.

In both the Subcommittee on Trade and the Committee on Ways and Means, we have sought to fully examine the merits of each provision in the bill. I recognize that it is not possible to fully satisfy every individual who might be affected by one of these provisions but, where there has been any question, we have sought to work with the parties to establish positions that best meet the needs of all parties involved.

I believe that H.R. 6867, as it stands today, is a package of tariff and trade provisions which are meritorious and best meet the needs of all interested parties.

Let me again say that these provisions have been reviewed in depth prior to being brought here today. I will be happy to answer any questions my colleagues may have. I would like to briefly explain the provisions of H.R. 6867, as follows:

Section 101 contains a provision, introduced by myself as H.R. 5707, which would repeal an existing embargo on the importation of seven types of fur skins from the People's Republic of China. The current embargo, which applies both to the Republic of China and the U.S.S.R., bans the U.S. import of mink, fox, muskrat, marten, weasel, ermine, and kolinsky fur skins.

Section 102, as amended, contains a provision introduced by Mr. STUDDS as H.R. 4002. It would accelerate the scheduled duty reduction of TSUS item 355.45, "other fish netting and fishing nets (including sections thereof), of textile materials," by implementing the planned column 1 (MFN) rates earlier than scheduled. The 1984 rate would be implemented in 1983, the 1986 rate in 1984, the 1988 rate in 1985, and the 1989 rate of 17 percent ad valorem in 1986.

Section 103 contains a provision introduced by Mr. GOODLING as H.R. 4494. It would establish a new tariff item providing permanent duty-free treatment on Fourdrinier wire suitable for use in capacitor papermaking machines. Other Fourdrinier wire would continue to be dutiable.

Section 104 contains a provision, introduced by Mr. GUARINI as H.R. 5764, which provides definitions for and reclassification of certain stuffed dolls and other toy figures. Section 142 of H.R. 6867 contains the remaining provisons of the original bill.

Section 105 contains a provision introduced by Mr. RATCHFORD as H.R. 5080. It provides permanent duty-free treatment to button blanks of casein by establishing a new tariff item and by appropriately amending subpart A headnote of part 7 of schedule 7.

Section 106 contains a provision, introduced by Mr. FUQUA as H.R. 4844, which provides duty-free treatment to articles for NASA (and other articles launched into space under launch services agreements with NASA) if NASA certifies that such articles are to be launched into space, are spare parts, or are necessary and uniquely associated support equipment for use in connection with a launch into space. In addition, it provides that materials being returned from space by NASA would not be considered an importation and thereby entry of such materials would not be required. These provisions would be effective for materials entered between 15 days after enactment and December 31, 1994.

Section 121 contains a provision, introduced by Mr. DE LA GARZA as H.R. 5790, which provides until June 15, 1985, column 1 (MFN) duty-free treatment of fresh cantaloups during the period from January 1 to May 15 of each year. Cantaloups entering during the referenced period incur a duty of 35-percent ad valorem for both column 1 and column 2 entries.

Section 122 contains a provision, introduced by Mr. DERWINSKI as H.R. 5386, to suspend until December 31, 1985, the 15-percent ad valorem column 1 (MFN) rate of duty on hatters' fur.

Section 123 contains a provision, introduced by myself as H.R. 6396, to provide column 1 (MFN) duty-free treatment until June 30, 1985, on imports of needlecraft display models which are replicas of needlecraft kits.

Section 124 contains a provision, introduced by myself as H.R. 5891, to provide a temporary reduction until January 1, 1988, in duties on disposable gowns and surgical drapes made of bonded fiber fabric and designed for use in hospitals, clinics, laboratories, and contaminated areas. The provision would equalize the rates of duty between paper products and the bonded fiber fabric products.

Section 125, as amended, contains a provision introduced by Mr. SCHULZE as H.R. 5498. It would provide a 3-year duty suspension on column 1 imports of p-hydroxybenzoic acid. This would be accomplished by establishing a new tariff item for that purpose. This provision would suspend until September

30, 1985, the current rate of duty of 11.3 percent ad valorem for column 1 (MFN) entries and 7 percent ad valorem for LDDC entries.

Section 126, as amended, contains a provision introduced by Mr. GEPHARDT as H.R. 5730. It provides a 3-year duty suspension on column 1 (MFN) entries of triphenyl phosphate, a chemical used chiefly as a plasticizer.

Section 127 contains a provision, introduced by Mr. SHANNON as H.R. 5499, which would extend until June 30, 1984, suspension of the column 1 (MFN) rate of duty on bis(4-aminobenzoate)-1,3 propanediol (trimethylene glycol di-p-aminobenzoate). The duty on this article is currently suspended until June 30, 1983.

Section 128 contains a provision, introduced by Mr. FRENZEL as H.R. 6943, which would continue, until September 30, 1985, the suspension of column 1 (MFN) duty on color couplers and color intermediates. Current law provided a duty suspension which expired June 30, 1982; this provision would be retroactive to that date.

Section 129 contains a provision, introduced by Mr. VANDER JAGT as H.R. 4642, which would temporarily suspend until June 30, 1985, the column 1 (MFN) rate of duty on isomeric mixtures of ethylbiphenyl.

Section 130 contains a provision, introduced by myself as H.R. 4913, to reduce the duty on dicofol, an insecticide used on many fruit, vegetable, ornamental, and field crops.

Section 131 contains a provision, introduced by Mr. GEJDENSON as H.R. 4806, to temporarily suspend the column 1 (MFN) rate of duty until September 30, 1984, on uncompounded allyl resins.

Section 132 contains a provision, introduced by Mr. DOWNEY as H.R. 5811, which provides a reduction in the column 1 (MFN) rate of duty on caffeine from the current level of 8.5 percent to 6 percent until December 31, 1983. This duty will currently reduce, as a result of the multilateral trade negotiations, to 8 percent on January 1, 1983.

Section 133 contains a provision, introduced by Mr. GUARINI as H.R. 5041, to extend the temporary suspension of the column 1 (MFN) rate of duty on natural graphite which expired on June 30, 1981, until January 1, 1985.

Section 134 contains a provision, introduced by Mr. VANDER JAGT as H.R. 4641, to provide for the temporary suspension of the column 1 (MFN) rate of duty on copper scale until September 30, 1985.

Section 135 contains a provision, introduced by Mr. VANDER JAGT as H.R. 5554, which provides, until September 30, 1984, temporary suspension of the column 1 (MFN) rate of duty on clock radios which have solid state clocks and the radio portion of other clock radios.

Section 136 contains a provision, introduced by Mr. ROSTENKOWSKI as H.R. 5823, which provides, until June 30, 1986, a continued suspension of the column 1 (MFN) rate of duty on certain bicycle parts.

Section 137 contains a provision, introduced by Mr. BROYHILL as H. R. 5884, which temporarily suspends until September 30, 1985, the column 1 (MFN) rate of duty on machines designed for heat-set, stretch texturing of continuous manmade fibers.

Section 138 contains a provision, introduced by Mr. BROYHILL as H.R. 5839, which temporarily suspends until September 30, 1985, the column 1 (MFN) rate of duty on single cylinder, fine gauge hosiery knitting machines and double cylinder jacquard hosiery knitting machines.

Section 139 contains a provision, introduced by Mr. MARTIN of North Carolina as H.R. 4155, to temporarily suspend the column 1 (MFN) rate of duty on double-headed latch needles until June 30, 1985.

Section 140 contains a provision, introduced by Mr. SAWYER as H.R. 4602, to temporarily suspend, until September 30, 1984, the column 1 (MFN) rate of duty on externally-powered electric prosthetic devices and their parts.

Section 141 contains a provision, introduced by Mr. SCHEUER as H.R. 6268, which temporarily suspends until December 31, 1986, the column 1 (MFN) rate of duty on small toy and novelty items valued not over 5 cents per unit and jewelry valued not over 1.6 cents per piece.

Section 142, as amended, contains a provision. introduced by Mr. GUARINI as H.R. 5764, to temporarily suspend until December 31, 1985, the column 1 (MFN) rate of duty on stuffed dolls, skins for stuffed dolls, skins for stuffed toy figures of animate and inanimate objects, and stuffed or filled toy figures of inanimate objects.

Section 201, as amended, contains a provision, introduced by Mr. FRENZEL as H.R. 5170, to allow business documents to enter the United States in a no-entry-required status as "intangibles." Such documents primarily enter duty free as provided in TSUS item 870.10. In addition, the provision would prohibit nominal consignees from conducting customs business on behalf of any other person unless the consignee is a licensed customshouse broker.

Section 202 contains a provision, introduced by Mr. SCHULZE as H.R. 4690, which would allow articles to be delivered into successive customs bonded storage warehouses as long as the ultimate purpose remains that of export. Under current law, articles withdrawn from a bonded manufacturing warehouse may be delivered only to a bonded storage warehouse at an exterior port for the sole purpose of immediate export.

Section 203 contains a provision, introduced by Mr. DE LUGO as H.R. 5758, to encourage production of watches in the insular possessions of the United States. Section 203 provides a rebate of duties paid on other watch imports for the industry on a by-company basis which would reflect the amount of insular possessions' labor content in the watches, eliminating the existing limit of 70 percent foreign content, establishing the annual limit on duty free entry at 7 million units which can be adjusted downward by no more than 10 percent in any 1 year or upward by no more than 20 percent in any 1 year, and continuing to provide country allocation authority to the Secretaries of Commerce and Interior.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I know that the bill permits the importation of furs from the People's Republic of China.

There has been some concern expressed by the domestic mink industry that this would provide for a substantial undercutting of domestically produced furs.

Did the Ways and Means Committee consider this particular issue during its markup of this bill?

Mr. GIBBONS. Yes, it did. In fact, we had a spokesman for the fur producers in this country, and when we explained to him that these were not furs from Russia, these were furs from China, he said, "I do not care, as long as they are not furs from Russia."

We thought that all of the objections to that particular provision had been dropped.

No one has ever made me personally aware of any objection to this bill. As I say, I am the primary sponsor, and so are other leading members of the Ways and Means Committee. I do not think it would do disastrous to our fur industry.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I would like to just talk about this for a little bit, because I have had a couple of letters from mink ranchers who apparently were unaware that their organization or an organization actually endorsed this bill in our hearings.

The fact is that once we grant MFN status to any country under our international obligations, we are not allowed to embargo, to boycott, or to charge column 2 duty unless we have a pretty good justifiable reason, like a war or something.

In this case there was a flat-out embargo on Chinese furs, which was contradictory to our treaty and particularly contradictory to our MFN agree-

ment with China. This has been a source of great irritation in our international relations as we have sought to draw our country closer to the People's Republic of China and vice versa. It is a very modest thing. The minks that are produced in China are definitely of a substandard grade. I think the nervousness that exists among breeders is that eventually they will breed up and become competitive. I think at that time we can look at the tariff, because I do want to assure everyone that we are not eliminating the tariff.

Mr. GIBBONS. That is right.

Mr. FRENZEL. We are leaving the tariff on imported mink. I think once all of the people involved in the business understand that, they will feel a lot more comfortable. I think many of them believed that we were going to remove the tariff altogether. This bill does not do that, and that is not our intention.

Mr. GIBBONS. I thank the gentleman from Minnesota for that explanation. It is a very accurate explanation.

Mr. Speaker, if there are no further questions from the Members, I yield back the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I, too, support the passage of H.R. 6867, a bill that combines a number of separately introduced bills making miscellaneous changes in the Tariff Schedules of the United States. Most of the provisions are noncontroversial and have a very limited impact on the collection of customs revenue and on the economy in general.

As the distinguished chairman of the Trade Subcommittee has already explained, H.R. 6867 makes three types of changes. Title I, first of all, covers a group of products on which the duty will be permanently eliminated. These products have not been produced in the United States for a number of years and an evaluation of the market shows little likelihood of any domestic production in the future.

The section of permanent duty eliminations also covers certain imports where special circumstances warrant duty-free entry. An example is the duty-free entry of materials to be launched into space, or those items returned to this country by NASA after having been launched into space. There is little need for a tariff on importations of this type, and eliminating the tariff and entry documentation in this case will reduce the overall cost of space flights.

The second category of provisions in title I is temporary duty suspensions. Those items for which temporary suspensions are sought usually are not at the present time being made in this country, but the potential for domestic production still exists.

Often the temporary suspension gives an American firm relief from the duty of an imported component while production facilities in the United States are being built. In any case, the temporary nature of the suspension allows Congress to review, at the end of a 3-year period, the current status of the marketplace and the effect of duty-free treatment on any emerging domestic production.

The final category of provisions covered by H.R. 6867 relates to customs procedures and qualifications for two special cases of importations—business documents and watches imported from the insular possessions. I am the sponsor of the changes in tariff treatment for business documents and the related provision clarifying that customs brokers are required to prepare the entry papers in cases where the owners of the business documents or other items are not making the entry in their own name.

This addresses a problem that arose as a result of the expanding courier service industry and the subsequent confusion over who is responsible for the customs entry of business documents and packages transported by such couriers. I hope the changes we expect to accomplish here will eliminate most of the confusion among couriers, customs brokers, and the Customs Service over imports of business documents.

Mr. Speaker, the provisions made by this bill will offer duty relief to a wide range of industries using those kinds of products or components of products, where imports are necessary to assure the continued health of existing domestic production. The bill also provides clarification and simplification of certain customs procedures. The cost of the bill is $42 million, but applied to individual provisions the cost is minimal.

I urge my colleagues to join me in support of H.R. 6867.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

GENERAL LEAVE

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

● Mr. GUARINI. Mr. Speaker, I rise in general support of H.R. 6867, the miscellaneous tariff and trade bill. This omnibus bill is a carefully crafted measure that deserves the support of this body. H.R. 6867 is the result of weeks of hearings and deliberations by the Trade Subcommittee of the House Ways and Means Committee. I would like to thank Chairman GIBBONS for his efforts in bringing this bill before us today.

There are two sections of H.R. 6867 in which I had a direct role. Section 131 of H.R. 6867 calls for a duty suspension on natural graphite until December 31, 1984. This item was originally introduced by me as H.R. 5041.

The suspension of duty on natural graphite is very noncontroversial. There has been a duty suspension on natural graphite for the 6 years before June 1981 when the present legislation expired.

There is absolutely no American production of natural graphite. The administration wholeheartedly supports this measure, as does the Pencil Makers Association, Inc. American producers who use graphite in their products are currently at a disadvantage with many foreign producers since all of the graphite they use must be imported. The high quality natural graphite which would be affected by this proposed legislation exists in limited quantity worldwide. Continuation of the duty suspension would control raw material costs for U.S. firms which manufacture products using this graphite. Otherwise, U.S. firms would pay a duty of 6.4 percent ad valorem under column 1.

The second item in H.R. 6867 which I have a direct interest in is section 140, legislation I introduced to bring increased employment to certain industrial sectors of our society. This legislation, originally H.R. 5764, seeks a 3-year duty suspension on the importation of certain stuffed inanimate toy objects and the skins for stuffed dolls.

I can assure my colleagues that this legislation has undergone thorough scrutiny and revision to insure that no domestic firms will be adversely affected by this legislation. Section 140 allows for the duty-free importation of the skins of stuffed animals. These skins are stuffed by American workers in what is a very highly labor intensive procedure. American workers then add the outer workings of the stuffed animal (such as eyes and any clothing), and the product is boxed and marketed in this country. This bill does not allow for the importation of doll clothing imported separately or the importation of stuffed toy figures of animate objects, what we commonly refer to as stuffed animals.

As a result of the changes made at the committee level, this bill has the full backing of the administration. Also, with the large concentration of textile workers in my district, I can assure you that the ILGWU and the American Textile Manufacturers Institute (ATMI) have no objection to this legislation.

Passage of this legislation will be a great help to the support industries that provide the packaging, the paper, and the accessory items. Most of these

American industries have been hard pressed in recent years. This legislation offers us a change to keep these industries working and increase employment in the American soft toy industry.●

● Mr. CONABLE. Mr. Speaker, I support the passage of H.R. 6867, which encompasses many miscellaneous changes in the Tariff Schedules of the United States. The changes proved to be noncontroversial at committee level and do not adversely affect in any substantial way the collection of customs revenue.

H.R. 6867 changes existing law in three basic ways. First, it permanently eliminates the duty on products which have not been made domestically for years and are not likely to be produced here in the foreseeable future.

Second, the bill makes temporary duty suspensions on items which are not now being made in this country, but which might be produced domestically at some time in the future.

Third, H.R. 6867 includes provisions dealing with customs procedures and qualifications for two special cases of importations—business documents and watches imported from our insular possessions.

The bill thus would make numerous, relatively minor improvements in current law. It would not in any way, as far as the Committee on Ways and Means has been able to determine, damage domestic interests in the slightest respect, and it should have the desirable effect of enhancing our position in world trade.●

● Mr. DERWINSKI. Mr. Speaker, I would like to bring to the attention of my colleagues H.R. 6867, a bill under consideration today which incorporates a number of tariff bills approved by the Committee on Ways and Means.

The Subcommittee on Trade initially held hearings on each of the bills in this omnibus legislation. The bill which I initially introduced, H.R. 5386, has been incorporated into the bill under consideration. H.R. 5386 calls for providing temporary duty-free treatment of imported hatters' fur and would suspend until December 31, 1985, the column 1 (MFN) duty on fur not on the skin, prepared for hatters' use. The temporary suspension is designed to end with the expiration of the U.S. Generalized System of Preferences (GSP). There would be no change in the column 2 (statutory) duty of 35 percent ad valorem.

Hatters' fur currently enters the United States under Tariff Schedules of the United States (TSUS) item 186.20, at a column 1 (MFN) duty 15 percent ad valorem. This item is eligible for duty-free treatment under the GSP. No reduction was made in the tariff of this item in the multilateral trade negotiations.

The need for H.R. 5386 was called to my attention by a hat manufacturing firm located in my congressional district since hoods imported from GSP-eligible countries are completely free of duty. The high duty on rabbit fur, compared to the duty on semifinished hoods, is hurting my constituent firm severely and has forced this firm to reduce its work force substantially. The firm's major competitors now import hoods duty-free from GSP countries thus avoiding the higher labor costs of producing hoods from the raw fur in the United States.

The problem is clear. My constituent firm and others importing hatters' fur under that provision, continue to be subject to a rate of duty that makes it increasingly impossible to sell its specialized products which are military and police hats and Western style hats in competition with importers under other tariff provisions whose importations are duty free or subject to extremely low rates.

The proposal for duty-free treatment of hatters' fur for a 3-year period is equitable. It offsets the anomaly which causes the raw material to be subject to substantial duty, while a semifinished product is imported duty-free, and it will terminate the exportation of jobs that has resulted from that irregularity.

I offer my support for H.R. 6867 and urge my colleagues to offer full support for this measure.●

● Mr. GEJDENSON. Mr. Speaker, I rise in support of H.R. 6867, the miscellaneous tariff bill that is before us.

This bill is a compilation of various tariff measures that were referred to the Trade Subcommittee during previous months. Each provision has been carefully examined for its effect on the economy and for its consistency with U.S. trade policy. The subcommittee worked closely with the administration and sought private-sector comment. Any measure that was found to be controversial, or that required further study, was put aside to be worked on at a later date.

H.R. 6867 includes duty reduction and suspension measures designed to change outdated items in the Tariff Schedules of the United States. One such provision—section 129—resulted from legislation that I introduced last year to repeal the tariff on an industrial prepolymer resin. The substance, allyl resin, is used in making engineering plastics that eventually go into producing electric and electronic components. There is an 8-percent ad valorem duty on the substance that is scheduled under the multilateral trade negotiations (MTN) to be reduced to 5.8 percent by 1987. This is a protective tariff: Prior to 1980 a domestic producer furnished the substance. The U.S. firm has ceased production, however, and there no longer is a domestic interest to protect. H.R. 6867 will remove this unnecessary tariff that is ultimately passed along to consumers. Additionally, the electronic connectors that are manufactured with allyl resin go into computers, process controllers, and telecommunications equipment. Spokesmen from the full political spectrum have acknowledged the role that high-technology advancement holds in creating jobs, revitalizing the economy, and making the United States more competitive in international trade. It is to our advantage to relieve the industry of this nonproductive tariff.

I urge my colleagues' passage of H.R. 6867. The bill represents a careful effort by the Trade Subcommittee, and by its chairman, Mr. GIBBONS, that warrants our support.●

● Mr. BEDELL. Mr. Speaker, I rise to address my concerns with one provision of H.R. 6867, the Miscellaneous Tariff Amendments of 1982. This bill amends certain aspects of the tariff schedules of the United States to foster trade and to encourage economic growth. The Committee on Ways and Means has crafted a bill largely deserving of support and I commend its efforts.

I am concerned about one section of this bill which would lift our current embargo on furs exported from the People's Republic of China. There is a great fear among the fur farmers in Iowa that a repeal of this embargo will have drastic impact on their industry.

The fur industry employs a great many people in Iowa and throughout the United States, on family farms, in processing, in byproducts, and in retailing. It would be a great tragedy to see these hard-working Americans impacted by a move to allow the influx of cheap furs from the People's Republic of China. This bill would authorize China to export mink, fox, marten, muskrat, kolinsky, ermine, and weasel pelts to the United States.

We have heard a great deal of debate on the impacts of this legislation on the American fur producer. According to the Committee on Ways and Means, the impact will be minimal. Their figures estimate that the total value of Chinese furs, if they doubled their capacity, would not exceed $1.2 million per year, or about 1.5 percent of the current imports into our country. These figures do not suggest that opening trade with the People's Republic of China would have significant impact on our markets. However, many trade consultants have expressed divergent opinions from those expressed by the committee, and I believe we must not act in a manner that will endanger the livelihood of America's fur farmers.

It is important to allay the fears of those fur farmers who have misunderstood this legislation; the bill will not remove the tariff schedule in effect

for fur pelts followed by all other fur-exporting countries. Thus the tariff which currently offers some protection for our domestic fur producers will continue to do so in the future. And this bill does not allow the Soviet Union to export its furs to the United States.

The United States imposed its embargo on China as a result of the Korean war; this embargo has remained in effect to the present notwithstanding our new trade relationship with China. It is against the policy of the United States to embargo products produced by a country that we have granted a most-favored-nation status, as we have done in the case of the People's Republic of China. However, we must not forget that opening of trade in new markets can be a disruptive and often destabilizing situation for our own domestic markets.

I hope my colleagues will consider the impact of this legislation on the Nation's fur industry when voting today on H.R. 6867. Thank you.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 6867, as amended.

The question was taken.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

UNIFORMED SERVICES PAY ACT OF 1982

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6317) to revise the manner in which the October 1, 1982, pay increase for members of the uniformed services is to be determined, to make various adjustments in military personnel and compensation programs, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6317

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Uniformed Services Pay Act of 1982".

TITLE I—COMPENSATION ISSUES

SEVERANCE OF LINKAGE BETWEEN MILITARY PAY RAISE AND FEDERAL CIVILIAN PAY RAISE FOR OCTOBER 1, 1982, PAY RAISE

SEC. 101. (a) The adjustment required by section 1009 of title 37, United States Code, in certain elements of the compensation of members of the uniformed services to become effective on October 1, 1982, shall not be made.

(b)(1) Based upon the most recent annual survey conducted by the Bureau of Labor Statistics for the purpose of section 5305(a)(1)(A) of title 5, United States Code, the President's agent provided for under section 5305(a)(1) of such title shall include, in the report required by such section for the compensation adjustment to be effective with respect to the first pay period beginning on or after October 1, 1982, a recommendation for an appropriate overall percentage adjustment in the elements of compensation specified in section 1009(a) of title 37, United States Code. Such recommendation shall be based upon increases in rates of pay over the previous twelve-month period for workers in private enterprise.

(2) Except as provided in subsection (c), the President shall adjust the elements of compensation specified in section 1009(a) of title 37, United States Code, in accordance with the recommendation of the agent under paragraph (1), effective on October 1, 1982.

(c)(1) If, because of national security considerations, national emergency, or economic conditions affecting the general welfare, the President should consider it inappropriate to make the compensation adjustments required by subsection (b), he shall prepare and transmit to Congress before September 1, 1982, such alternative plan with respect to an adjustment for the elements of compensation specified in section 1009(a) of title 37, United States Code, as he considers appropriate, together with the reasons therefor, in lieu of the compensation adjustments required by subsection (b). Any such alternative plan shall specify an overall percentage adjustment in the elements of compensation specified in section 1009(a) of title 37, United States Code.

(2) An alternative plan transmitted by the President under paragraph (1) becomes effective on October 1, 1982, and continues in effect unless, before the end of the first period of thirty calendar days of continuous session of Congress after the date on which the alternative plan is transmitted, either House adopts a resolution disapproving the alternative plan so recommended and submitted, in which case the compensation adjustments for the elements of compensation specified in section 1009(a) of title 37, United States Code, shall be made effective as provided by paragraph (4). For the purposes of this paragraph, the continuity of a session is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the thirty-day period.

(3) The provisions of subsections (d)-(k) of section 5305 of title 5, United States Code, apply with respect to an alternative plan transmitted by the President under paragraph (1) in the same manner as such provisions apply with respect to an alternative plan transmitted by the President under subsection (c)(1) of that section.

(4) If either House adopts a resolution disapproving an alternative plan transmitted under paragraph (1), the President shall take the action required by subsection (b)(2) and adjust the rates of compensation specified in section 1009(a) of title 37, United States Code, effective as of October 1, 1982.

(5) The rates of pay that take effect under this section shall modify, supersede, or render inapplicable, as the case may be, to the extent inconsistent therewith—

(A) all provisions of law enacted before the effective date of all or part (as the case may be) of the adjustment; and

(B) any prior recommendations or adjustments which took effect under other provisions of law.

(6) The rates of pay that take effect under this section shall be printed in the Federal Register and the Code of Federal Regulations.

(d) Subsections (c) and (d) of section 1009 of title 37, United States Code (other than subsection (d)(2)(B) of such section), shall apply to any pay adjustment made pursuant to this section in the same manner as such subsections apply to an increase described in subsection (b)(3) of such section.

ADJUSTMENT IN BASIC PAY OF CERTAIN OFFICERS WITH PRIOR ENLISTED AND WARRANT OFFICER SERVICE

SEC. 102. (a) Section 203(d) of title 37, United States Code, is amended to read as follows:

"(d) The basic pay of a commissioned officer who is in pay grade O-1, O-2, or O-3 and who is credited with a total of over four years' active service as a warrant officer and enlisted member shall be computed in the same manner as the basic pay of a commissioned officer in the same pay grade who has been credited with over four years' active service as an enlisted member.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1982.

EXTENSION OF ENLISTMENT AND REENLISTMENT BONUS AUTHORITIES FOR ACTIVE FORCES

SEC. 103. (a) Sections 308(g) and 308a(c) of title 37, United States Code, are amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1987".

(b) Section 308f(c) of such title is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1987".

FREEZE ON CERTAIN ALLOWANCES DURING FISCAL YEAR 1983

SEC. 104. (a) During fiscal year 1983, the amounts in effect for the following allowances may not exceed the amounts in effect for such allowances on the date of the enactment of this Act:

(1) The rates for dependents for the monetary allowance in lieu of transportation under section 404(d) of title 37, United States Code.

(2) Weight allowances for transportation of baggage and household effects prescribed under section 406(b) of such title.

(b) During fiscal year 1983, the regulations determining when permission to mess separately may be granted for purposes of the basic allowance for subsistence paid under section 402(b) of such title may not be revised so as to authorize any category of members to be granted such permission which was not eligible for such permission on the date of the enactment of this Act.

HAZARDOUS DUTY PAY FOR CERTAIN TOXIC FUEL HANDLERS

SEC. 105. (a) Section 301(a)(12) of title 37, United States Code, is amended by inserting "or the testing of aircraft or missile systems (or components of such systems) during which highly toxic fuels or propellants are used" after "propellants".

(b) The amendment made by subsection (a) shall take effect on October 1, 1982.

CLARIFICATION OF ELIGIBILITY FOR SEPARATION PAY

SEC. 106. (a) Subsection (c) of section 1174 of title 10, United States Code, is amended to read as follows:

"(c)(1) Except as provided in paragraphs (2) and (3), a member of an armed force other than a regular member who after September 14, 1981, is discharged or released from active duty and who has completed five or more, but less than twenty, years of active service immediately before that discharge or release is entitled to separation pay computed under subsection (d)(1) or (d)(2), as determined by the Secretary concerned, if—

"(A) the member's discharge or release from active duty is involuntary; or

"(B) the member was not accepted for an additional tour of active duty for which he volunteered.

"(2) If the Secretary concerned determines that the conditions under which a member described in paragraph (1) is discharged or separated do not warrant separation pay under this section, that member is not entitled to that pay.

"(3) A member described in paragraph (1) who was not on the active-duty list when discharged or separated and who had not completed at least five years of continuous active duty immediately before such discharge or release is not entitled to separation pay under this section.".

(b) Subsection (g)(2) of such section is amended by inserting ", other than section 1212 of this title," after "any other provision of law".

(c) The amendments made by this section shall take effect on October 1, 1982.

EXTENSION OF MINIMUM INCOME PROVISION FOR CERTAIN WIDOWS

SEC. 107. (a) Section 4(a)(1) of the Act entitled "An Act to amend chapter 73 of title 10, United States Code, to establish a Survivor Benefit Plan, and for other purposes", approved September 21, 1972 (10 U.S.C. 1448 note), is amended by striking out "on the effective date of this Act is, or within one calendar year after that date becomes," and inserting in lieu thereof "on September 21, 1972, was, or during the period beginning on September 22, 1972, and ending on March 20, 1974, became,".

(b) Any annuity payable by reason of subsection (a) shall be payable only for months after September 1982.

MODIFICATIONS TO RESERVE OFFICER TRAINING CORPS' SCHOLARSHIP PROGRAM

SEC. 108. (a)(1) Section 2101(3) of title 10, United States Code, is amended by striking out the period and inserting in lieu thereof "(except that, in the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps course, such term includes a fifth academic year or a combination of a part of a fifth academic year and summer sessions).".

(2) Section 2104(a) of such title is amended by inserting "at least" before "two".

(3) Section 2107(c) of such title is amended by inserting after the first sentence the following new sentence: "In the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps course, financial assistance under this section may also be provided during a fifth academic year or during a combination of a part of a fifth academic year and summer sessions.".

(4) Section 209(a) of title 37, United States Code, is amended by striking out "20" and inserting in lieu thereof "30".

(b)(1) Section 2005 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(f) The Secretary concerned shall require, as a condition to the Secretary providing financial assistance under section 2107 or 2107a of this title to any person, that such person enter into an agreement described in subsection (a). In addition to the requirements of clauses (1) through (4) of such subsection, any agreement required by this subsection shall provide—

"(1) that if such person fails to complete the education requirements specified in the agreement, the Secretary will have the option to order such person to reimburse the United States in the manner provided for in clause (3) of such subsection without the Secretary first ordering such person to active duty as provided for under clause (2) of such subsection and section 2107(f) and 2107a(f) of this title; and

"(2) that any amount owed by such person to the United States under such agreement shall bear interest at the rate equal to the highest rate being paid by the United States on the day on which the reimbursement is determined to be due for securities having maturities of 90 days or less and shall accrue from the day on which the member is first notified of the amount due to the United States as a reimbursement under this section.".

(2) The amendment made by paragraph (1) shall apply with respect to agreements entered into after September 30, 1982.

(c)(1) Section 2107(b)(5) of title 10, United States Code, is amended—

(A) by striking out "either" in the matter preceding subparagraph (A);

(B) by striking out "or" at the end of subparagraph (A);

(C) by striking out the period at the end and inserting in lieu thereof "; or"; and

(D) by adding at the end the following:

"(C)(i) accept an appointment, if offered, as a commissioned officer in the Army, Navy, Air Force, or Marine Corps, as the case may be; and

"(ii) serve in a reserve component of that armed force until the sixth anniversary of the receipt of such appointment, unless such appointment is otherwise extended by subsection (d) of section 2108 of this title, under such terms and conditions as may be prescribed by the Secretary of the military department concerned.".

(2) The second sentence of section 2107(b) of such title is amended—

(A) by inserting "or (5)(C)" after "(5)(B)"; and

(B) by striking out the period at the end and inserting in lieu thereof ", except that performance of service under clause (5)(C) shall include not less than two years of active duty.".

(3) The amendments made by this subsection shall apply with respect to agreements entered into under section 2107(b)(5) of title 10, United States Code, after September 30, 1982.

TITLE II—COMPUTATION OF RETIRED PAY

TERMINATION OF SIX-MONTH ROUNDING RULE FOR COMPUTING RETIRED PAY

SEC. 201. (a)(1) The text of each of the footnotes listed in paragraph (2) is amended to read as follows: "Before applying percentage factor, credit each full month of service that is in addition to the number of full years of service creditable to the member as one-twelfth of a year and disregard any remaining fractional part of a month.".

(2) The footnotes referred to in paragraph (1) are the following:

(A) Footnote 3 of the table in section 1401 of title 10, United States Code.

(B) Footnote 2 of the table in section 1402(a) of such title.

(C) Footnote 1 of the table in section 1402(d) of such title.

(D) Footnote 1 of the table in section 1402a(a) of such title.

(E) Footnote 1 of the table in section 1402a(d) of such title.

(F) Footnote 4 of the table in section 3991 of such title.

(G) Footnote 2 of the table in section 3992 of such title.

(H) Footnote 4 of the table in section 8991 of such title.

(I) Footnote 2 of the table in section 8992 of such title.

(b) Subsection (f) of section 1174 of title 10, United States Code, is amended to read as follows:

"(f) In determining a member's years of active service for the purpose of computing separation pay under this section, each full month of service that is in addition to the number of full years of service creditable to the member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(c)(1) The text of section 6328 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing the retired pay of officers retiring under this chapter, each full month of service that is in addition to the number of full years of service creditable to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(2) The first sentence of section 6330(d) of such title is amended to read as follows: "For the purposes of subsection (c), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(3) Paragraph (2) of section 6151(b) of such title is amended to read as follows:

"(2) In determining the number of years to be used as a multiplier under this subsection, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(4) The text of section 6404 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing retired pay and separation pay on discharge under this chapter, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(d) The fourth sentence of section 423 of title 14, United States Code, is amended to read as follows: "In computing the number of years of service by which the rate of 2½ percent is multiplied, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(e) Subsection (b) of section 16 of the Coast and Geodetic Survey Commissioned Officers' Act of 1948 (33 U.S.C. 853o) is amended to read as follows:

"(b) In computing the number of years of service of an officer for the purposes of subsection (a), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(f) Section 211(e) of the Public Health Service Act (42 U.S.C. 212(e)) is amended by striking out "a part of" and all that follows and inserting in lieu thereof "each full month of service that is in addition to the number of full years of service credited to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(g) The amendments made by this section shall apply with respect to (1) the computation of retired or retainer pay of any individual who becomes entitled to that pay after September 30, 1982, and (2) the recomputation of retired pay under section 1402, 1402a, 3992, or 8992 of title 10, United States Code, of any individual who after September 30, 1982, becomes entitled to recompute retired pay under any such section.

TITLE III—PERSONNEL MANAGEMENT ISSUES

TRANSFER OF PUBLIC HEALTH SERVICE OFFICERS TO OTHER UNIFORMED SERVICES

SEC. 301. (a)(1) Section 716 of title 10, United States Code, is amended to read as follows:

"§716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service

"(a)(1) The President may, within authorized strengths and with the consent of the officer involved, transfer any commissioned officer of a uniformed service from his uniformed service to, and appoint him in, another uniformed service. The Secretary of Defense, the Secretary of the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy, the Secretary of Commerce, and the Secretary of Health and Human Services shall jointly establish, by regulations approved by the President, policies and procedures for such transfers and appointments.

"(2) In this section, 'uniformed service' means any of the armed forces, the Commissioned Corps of the National Oceanic and Atmospheric Administration, or the Commissioned Corps of the Public Health Service.

"(b) An officer transferred under this section may not be assigned precedence or relative rank higher than that which he held on the day before the transfer.

"(c)(1) An officer who previously served on active duty as a commissioned officer of the National Oceanic and Atmospheric Administration or the Public Health Service and who is appointed or reappointed as a commissioned officer in any other uniformed service shall be credited for purposes of computing such officer's eligibility to retire, and the amount of such officer's retired pay, with the number of years of service with which he was credited for such purposes on the day before the termination of his previous period of active duty.

"(2) For the purpose of determining the grade and rank within grade of a commissioned officer of the Public Health Service who transfers to, and is appointed as a commissioned officer in, an armed force, the Secretary concerned may, under regulations prescribed by the Secretary of Defense, credit such officer at the time of such appointment with any period of active commissioned service that such officer performed as a commissioned officer in the Public Health Service.".

(2) The item relating to such section in the table of sections at the beginning of chapter 41 of such title is amended to read as follows:

"716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

(b) Clause (13) of section 3(a) of the Act of August 10, 1956 (33 U.S.C. 857a(a)), is amended to read as follows:

"(13) Section 716, Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

NOMINATIONS TO SERVICE ACADEMIES

SEC. 302. (a)(1) Clause (10) of section 4342(a) of title 10, United States Code, relating to the number of cadets at the United States Military Academy, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(2) Clause (10) of section 6954(a) of such title, relating to the number of midshipmen at the United States Naval Academy, is amended to read as follows:

"(10) One from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(3) Clause (10) of section 9342(a) of such title, relating to the number of cadets at the United States Air Force Academy, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(b)(1) Clause (8) of section 4342(a) of title 10, United States Code, is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

(2) Clause (8) of section 6954(a) of such title is amended to read as follows:

"(8) One nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States residing in the Republic of Panama who are citizens of the United States.".

(3) Clause (8) of section 9342(a) of such title is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

APPOINTMENT OF CITIZENS OF NORTHERN MARIANA ISLANDS AS COMMISSIONED OFFICERS

SEC. 303. (a) Notwithstanding any provision of law respecting citizenship and in accordance with the covenant entitled "A Covenant to establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America" (approved on March 24, 1976, by Public Law 94-241), a citizen of the Northern Mariana Islands who indicates in writing to a commissioned officer of the Armed Forces of the United States an intent to become a citizen, and not a national, of the United States upon full implementation of such covenant, and who is otherwise qualified for military service under applicable laws and regulations, may be appointed as an officer in the Armed Forces of the United States, may be appointed or enrolled in the Senior Reserve Officers' Training Corps program of any of the Armed Forces under chapter 103 of title 10, United States Code, and may be selected to be a participant in the Armed Force Health Professions Scholarship program under chapter 105 of such title.

(b) This section shall expire upon the establishment of the Commonwealth of the Northern Mariana Islands.

TITLE IV—MISCELLANEOUS

LIMITATION ON CONTRACTING-OUT CERTAIN FUNCTIONS

SEC. 401. Section 502 of the Department of Defense Authorization Act, 1981 (94 Stat. 1086; 10 U.S.C. 2304 note), is amended by adding at the end thereof the following new subsections:

"(g) A commercial or industrial type function of the Department of Defense may not be performed by a private contractor if the Secretary of Defense determines that in order to meet national defense needs such function must be performed by military or civilian personnel of the Department of Defense. An activity of the Department of Defense that is a commercial or industrial type function shall be considered to be necessary to meet national defense needs if the Secretary determines that—

"(1) the activity or the military personnel assigned thereto are utilized in, or are subject to deployment in, a direct combat role;

"(2) the activity is essential for training in skills that are exclusively military in nature;

"(3) the activity is needed to provide work assignments for a rotation base for overseas or sea duty assignments;

"(4) the activity performs depot or intermediate-level maintenance or logistical support and is necessary to ensure—

"(A) a ready and controlled source of technical competence and resources to meet effectively and efficiently peacetime, mobilization, and sustained combat equipment readiness requirements, or

"(B) that combat and combat support activities be self-sufficient insofar as possible in providing maintenance or logistical support for assigned weapons systems and equipment;

"(5) performance of the function by other than military or civilian personnel of the Department of Defense would adversely affect national defense capabilities; or

"(6) in the case of an activity performed on a military installation, performance of the function by military or civilian personnel of the Department of Defense is so critical to safety or security at the installation or to the well-being of personnel assigned to duty at the installation that any interruption in the performance of the function would be potentially hazardous or deleteri-

ous to the safety of personnel or security at the installation.

"(h) As a part of any notification to Congress under subsection (a)(2)(A), the Secretary of Defense shall include (without modification) the assessment of the military commander of the major operating command to which is assigned the function to be studied for possible performance by a private contractor as to whether such function, under any of clauses (1) through (6) of subsection (e), must be performed by military or civilian personnel of the Department of Defense in order to meet national defense needs.

"(i) In performing any cost comparison required by subsection (a)(2)(B), the Secretary of Defense shall ensure that the cost comparison includes a full and complete accounting of costs for both the Government and private contractor performance. In any such cost comparison, the cost to the Government of the cost comparison process, the preparation of the statement of work for the function, and any other costs associated with the contracting process shall be included among the costs of performance by private contractor.

"(j)(1) Except as provided in paragraph (2), in the case of any new requirement for a commercial or industrial type function or activity of the Department of Defense established after the end of the 60-day period beginning on the date of the enactment of this subsection, the Secretary of Defense shall determine (before deciding whether to use Department of Defense personnel or a private contractor for the performance of the function or activity) whether performance of the function or activity would be less costly to the Government using Department of Defense personnel or a private contractor. Any such determination shall be made based on a cost comparison carried out in accordance with such procedures as the Secretary of Defense may prescribe.

"(2) Paragraph (1) does not apply to a function that under subsection (e) may not be performed by a private contractor because of a determination by the Secretary of Defense under that subsection.".

MEDICAL MALPRACTICE PROTECTION FOR HEALTH-CARE PERSONNEL OF THE SOLDIERS' AND AIRMEN'S HOME

SEC. 402. (a) Subsection (a) of section 1089 of title 10, United States Code, relating to defense of certain suits arising out of medical malpractice, is amended by inserting "the United States Soldiers' and Airmen's Home," after "the Department of Defense,".

(b) Subsection (f) of such section is amended by striking out "or his designee may, to the extent that he or his designee deems" and inserting in lieu thereof "may, to the extent that the head of the agency concerned considers".

(c) Subsection (g) of such section is amended—

(1) by striking out "and" at the end of clause (2);

(2) by redesignating clause (3) as clause (4); and

(3) by inserting after clause (2) the following new clause (3):

"(3) the board of commissioners of the United States Soldiers' and Airmen's Home, in the case of an employee of the United States Soldiers' and Airmen's Home; and".

(d) The amendments made by this section shall apply only to claims accruing on or after the date of the enactment of this Act.

REPEAL OF REPORTING REQUIREMENT RELATING TO EMPLOYMENT IN DEFENSE INDUSTRIES

SEC. 403. Section 410 of Public Law 91-121, approved November 19, 1969 (50 U.S.C. 1436), is repealed.

ACCEPTANCE OF VOLUNTARY SERVICES FOR MILITARY MUSEUMS AND FAMILY SUPPORT PROGRAMS

SEC. 404. (a) Chapter 81 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1587. Authority to accept certain voluntary services

"(a) Notwithstanding section 3679(b) of the Revised Statutes (31 U.S.C. 665(b)), the Secretary of a military department may accept from any person voluntary services to be provided for a museum or a family support program operated by that military department.

"(b) A person providing voluntary services under subsection (a) shall be considered to be an employee for the purposes of chapter 81 of title 5, relating to compensation for work-related injuries, and to be an employee of the government for the purposes of chapter 171 of title 28, relating to tort claims. Such a person who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee for any other purpose by reason of the provision of such services.".

(b) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 1586 the following new item:

"1587. Authority to accept certain voluntary services.".

CLARIFICATION OF RELATIONSHIP BETWEEN AUTHORIZATIONS AND APPROPRIATIONS

SEC. 405. Subsection (a) of section 138 of title 10, United States Code, is amended to read as follows:

"(a) No funds may be appropriated for any fiscal year for the military functions of the Department of Defense or obligated or expended—

"(1) for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, naval torpedoes and related support equipment, other weapons, ammunition, or other procurement;

"(2) for research, development, test, or evaluation (or procurement or production related thereto);

"(3) for operation and maintenance; or

"(4) for military construction (as defined in subsection (f));

unless such funds have been specifically authorized by law.

TECHNICAL AMENDMENTS

SEC. 406. (a) Title 10, United States Code, is amended as follows:

(1) Effective on October 1, 1982, section 520(a) is amended—

(A) by striking out "For the fiscal year beginning on October 1, 1980" and all that follows through "1982, the" and inserting in lieu thereof "The";

(B) by striking out "such fiscal year" the first place it appears in the last sentence and inserting in lieu thereof "any fiscal year"; and

(C) by striking out "number of such" and all that follows through "into" in the last sentence and inserting in lieu thereof "total number of persons originally enlisted or inducted to serve on active duty (other than active duty for training) in".

(2) The heading of section 532 is amended to read as follows:

"§ 532. Qualifications for original appointment as a commissioned officer".

(3) Section 1405 is amended by striking out "(formula B)" both places it appears and inserting in lieu thereof "(formula A)".

(4) The heading of section 1448 is amended to read as follows:

"§ 1448. Application of plan".

(5) Section 2005 is amended—

(A) by striking out "of this section" each place it appears in subsections (c) and (d); and

(B) by striking out "section—" in subsection (e) and inserting in lieu thereof "section:".

(6) Section 2101 is amended—

(A) by striking out "chapter—" and inserting in lieu thereof "chapter:";

(B) by striking out " 'program' " and inserting in lieu thereof " 'Program' ";

(C) by striking out the semicolon at the end of paragraph (1) and inserting in lieu thereof a period;

(D) by striking out " 'member' " and inserting in lieu thereof " 'Member' ";

(E) by striking out "; and" and inserting in lieu thereof a period; and

(F) by striking out " 'advanced' " and inserting in lieu thereof " 'Advanced' ".

(7)(A) Section 2116 is repealed.

(B) The table of sections at the beginning of chapter 104 is amended by striking out the item relating to section 2116.

(8) Section 2120 is amended by striking out "chapter—" and inserting in lieu thereof "chapter:".

(9) Section 2134 is amended by striking out the second sentence of such section.

(b) Title 37, United States Code, is amended as follows:

(1) Section 305a(d) is amended by striking out "clause (B)" and inserting in lieu thereof "clause (2)".

(2) Section 308b(a)(1) is amended by striking out "services" and inserting in lieu thereof "service".

The SPEAKER pro tempore. Is a second demanded?

Mrs. HOLT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentlewoman from Maryland (Mrs. HOLT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, on behalf of the gentleman from Alabama (Mr. NICHOLS) the distinguished chairman of the Subcommittee on Military Personnel and Compensation, I am pleased to bring to the floor H.R. 6317, the Uniformed Services Pay Act of 1982.

Mr. Speaker, the bill is broad in scope. It provides for a pay raise for military personnel this October; and it contains additional restrictions regarding contracting out of defense activities.

Though broad, it would have a substantial impact on specific problem areas. It renews the authority to pay

enlistment and reenlistment bonuses; it improves the provisions related to the Reserve Officer Training Corps scholarship program; and it enhances the ability to transfer needed health professionals from the Public Health Service to the Armed Forces.

However, the committee also determined that some elements of military compensation, although important and meriting increases in the future, have less priority than other provisions contained in the bill. As a result of that consideration, the bill provides for a freeze at today's levels on certain elements of compensation for which the President's budget requested increases in fiscal year 1983.

I would like to comment briefly on several of the major provisions of the bill.

OCTOBER PAY INCREASE

Of course, the major issue we addressed in the bill was the October pay raise for military personnel. The administration proposed an 8-percent pay increase of military personnel and a 5-percent increase for Federal civilians.

Under current law, a survey of wages in the private sector is conducted each year to determine the increase in those wages over the preceding year. The President can, without further action from the Congress, increase Federal civil service pay by the amount indicated by the survey. In addition, he has the authority to provide a lesser increase to the Federal civilian work force if he believes that to be desirable, but the Congress may pass a resolution in either House disapproving the lesser amount, in which case the President must increase Federal civilian pay by the amount indicated by the survey.

Military pay is then increased, under current law, by the same percentage as Federal civilian pay.

This year the survey indicates that private sector pay has increased by between 8 and 9 percent over last year. In effect, the President's budget recommended the full 8-percent increase for military personnel to maintain comparability with the private sector (which was just reestablished last year) but recommended a "cap" on pay for Federal civilians at 5 percent. This recommendation could not be implemented under current authority: both Federal civilian pay and military pay must be increased by the same percent. Thus, the committee saw a need to enact special military pay legislation to authorize the flexibility to provide a higher raise for the military.

As the Members know, all bills providing authorization must be reported by May 15 under the Budget Act. When the committee reported this bill, there was some uncertainty regarding the level of cuts to be proposed in the defense budget.

With regard to the pay raise, the committee recommended continuation of the present mechanism. However, for the October 1, 1982, pay raise only, the military increase would be based on the increase in wages in the private sector since last year (as opposed to the increase recommended for the civil service as is currently authorized), and the President would retain his authority to cap the pay increase but could cap the military and civilian at different levels (as opposed to requiring the caps to be at the same level as is currently authorized).

The bill, as reported by the committee, has obviously been overtaken by events with regard to this provision. There is general agreement within the executive and legislative branches that both military and civilian employees should receive a 4-percent increase in October. In fact, the President has submitted a plan which, under current law, would result in such an increase.

TEMPORARY FREEZE ON CERTAIN ALLOWANCES

The bill would place a 1-year limitation on certain allowances for service members. The Department of Defense has requested increases in the mileage allowances for members and dependents who are assigned a permanent change of station and in the weight allowances for transportation of household goods in conjunction with such a move. The Department is also requesting funds to expand eligibility for payment of career basic allowance for subsistence to single enlisted members in pay grade E-5 and above.

The bill would freeze these allowances at the levels in effect during fiscal year 1982—except the mileage allowance for the member would be permitted to increase if appropriations are granted for that purpose.

Although the committee believes that all these requested increases can be justified under normal circumstances, we believe that these increases have lower priority than some of the other items in the bill and can be deferred.

CONTRACTING OUT RESTRICTIONS

Finally, Mr. Speaker, the bill also contains language that would impose additional guidelines on the contracting out process.

The language does essentially three things. It places into law criteria for exempting activities from consideration for contracting out based on national security needs. The criteria in the bill are identical to those that have already been established by regulation by the Secretary of Defense. There is one additional criterion meant to address the problem raised by Federal firefighters. The additional criterion would permit the Secretary of Defense to exclude from contracting out those activities whose performance is so critical to the safety of personnel on the base that a risk of interruption in performance would be unacceptable.

Under these criteria, although the authority for determining when exemptions are appropriate is vested in the Secretary of Defense, the commander of the major command, a three or four-star officer, would also be required to submit his personal assessment of the impact of contracting each of these functions under the established criteria.

In addition, this legislation would require the Department of Defense to attribute the cost of the study process to the private contractor for purposes of the cost comparison since the Government would not be incurring this cost unless contracting proves to be cheaper overall.

The final provision would simply require the Department of Defense to determine if it is cheaper to perform new requirements by private contractor or by Government personnel. This is consistent with the basic philosophy of the Office of Management and Budget circular but is contrary to a new revision under consideration that directs that all new functions be performed by private contractor regardless of cost.

The committee is convinced that the issue of contracting out is an important one in its impact on readiness and hopes that the proposed language will reorient the program so that it insures that money is saved where appropriate but does not affect functions important to national defense.

SUMMARY

Mr. Speaker, the cost of the bill has been recently reestimated by the Congressional Budget Office to be about $700 million per year. The vast bulk of this cost is attributable to the extension of existing bonus authority for enlisting and reenlisting in critical skills.

Mr. Speaker, this is an important bill, and I strongly urge the Member's support.

The bill also contains a number of other important provisions:

UNIFORMED SERVICES PAY ACT OF 1982

COMPENSATION ISSUES

October pay increase

Sever current link with civil service for October 1, 1982, pay raise.

Tie to current index but measure increase over previous year.

Continue capping authority of President, but permit capping of either civilian or military pay or both but at different levels.

Technical correction to allow prior enlisted and warrant officer service to be added in determining eligibility to use separate prior service officer pay tables.

Extend reenlistement/enlistment bonus authority

Extend for 5 years to September 30, 1987.

Limit increases in certain allowances in fiscal year 1983

Dependent travel: Freeze dependent mileage reimbursement rate at 7¢ per mile.

Weight allowances for transportation of household goods: Freeze weight allowances at current levels.

Career Basic Allowance for Subsistence: Freeze payment of BAS to single enlisted personnel to those currently receiving it.

Other issues

Clarify application of hazardous duty pay for fuel handlers: Provide pay to fuel handlers who work on components of rocket engines and aircraft as well as other fuel handlers who work on the rocket engines and aircraft themselves and who currently receive this pay.

Clarify separation pay eligibility: Provide only for officers whose careers have been involuntarily interrupted; exclude officers voluntarily called to active duty for short periods of time.

Provide open enrollment period for reserves in Survivor Benefit Plan: Provide same open enrollment for reservists who had completed 20 years of service, but who are not yet age 60 as was provided recently for active duty retirees.

Extend coverage of minimum income widow provision: Cover individuals who became widows during the last 6 months of the initial 18-month open enrollment period for the Survivor Benefit Plan.

Provide extended financial assistance to ROTC participants: Provide tuition and subsistence allowance for more than 4 years; and Require additional commitment to serve on active duty.

Require recoupment of cost of ROTC scholarships from participants who fail to complete the program and who are not called to active duty.

Modify service requirement for ROTC participants: Provide scholarship recipients with an additional form of service to meet their obligation: 2 years on active duty plus 4 years in the selected reserve.

RETIREMENT CHANGES

Authorize rounding of years of service to closest month in computing retired pay instead of closest year.

PERSONNEL MANAGEMENT ISSUES

Public Health Service transfer authority: Provide same transfer of PHS service credit for grade determination and retirement that is authorized for other uniformed services.

Appointment of citizens of American Samoa to academies: Authorize the Delegate instead of the governor to nominate one cadet to each academy.

Technical language change on appointments to academies by Administrator of Panama Canal Commission.

Authorize appointment of citizens of the Northern Mariana Islands as commissioned officers.

OTHER ISSUES

Contracting-out restrictions

Codify the current national defense exclusion criteria used for exempting activities from contracting out, including an additional criterion that would exempt an activity if the risk of interruption of service would be unacceptable.

Require that commander of the major command submit his personal assessment of the impact of contracting out a function.

Require that the cost of conducting the study be attributed to the cost of the contractor performance.

Require the Department of Defense to determine whether performance of a new requirement by private contractor or government employees would be less expensive.

Medical malpractice protection for Soldier's and Airman's Home: Provide same malpractice protection for physicians at the Home that exists for physicians in similar facilities.

Repeal reporting requirement for retirees employed in defense industry: Repeal reporting requirement that is nearly never used.

Military museums and family support programs: Permit voluntary work to be performed and cover such individuals under Tort Claims Act and Federal Employees Compensation Act.

Mr. Speaker, I reserve the balance of my time.

Mrs. HOLT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6317, the Uniformed Services Pay Act of 1982. This bill deals with the mechanism for this October's military pay raise, as well as a number of other personnel-related issues.

When the committee reported this legislation to the House earlier this year, in compliance with the May 15 deadline contained in the Budget Act, Congress had not yet established the budget ceilings for fiscal year 1983. As a result, the committee structured the pay raise mechanism in H.R. 6317 to provide the maximum flexibility to adjust to the requirements of the budget. The committee's recommendations would have made it possible for the President to give military and civilian employees the same pay raise, different raises, or no pay raise at all depending on the state of the economy.

The pay raise mechanism provided in this legislation has largely been overtaken by events, however. The first concurrent resolution on the budget, approved in June, provides authority for only a 4-percent pay raise for both Federal civilian and military personnel. Further, the President in late August announced that he was recommending a pay raise of 4 percent for Federal workers. As a result, there is little question that this October's military pay raise will be only 4 percent, rather than the 8 percent proposed in the President's budget as necessary to maintain comparability with salaries in the private sector.

After finally reestablishing comparability last year—in other words, after bringing military pay back up to a par with salaries paid in the private sector—I hate to see us begin to backslide immediately. By the same token, these are extraordinary times, and they demand extraordinary measures. The budget deficit must be brought down to more manageable levels, even though this may require sacrifice from all segments of our society.

I am deeply concerned, however, that we not permit the 4-percent pay cap this year to become a recurrent feature of the military compensation system, as was the case in the late seventies. As recently as just 2 years ago, we were wringing our hands in despair at the decline in recruit quality, as well as the exodus of skilled mid-career technicians and noncommissioned officers. One service official characterized the situation as a "hemorrhage of talent."

In recent months we have witnessed a dramatic reversal. The caliber of recruits and the retention of experienced personnel are at record levels. Many factors have contributed to this remarkable turnaround: A change in national attitude toward military service, the worsening economy, and, most importantly, the comprehensive package of compensation initiatives enacted by the Congress during 1980 and 1981.

We should not confuse the current flush of success with a permanent solution to our manpower shortfalls. It is critically important, I believe, that the restrictions imposed this year be a one-time phenomenon. The House must remain committed to keeping military pay competitive with private industry. This October's pay cap is tolerable only because of the extraordinary economic conditions facing our Nation today. We must be especially careful to counteract the adverse effects with positive actions next year.

I want to turn now to several other provisions of H.R. 6317. The extension of the current authority to pay enlistment and reenlistment bonuses is undoubtedly the most important.

During last year's military pay debate, much attention was focused on the question of targeting; that is, directing additional pay to those individuals who are hard to recruit or to retain in the service. The present compensation system provides a substantial degree of targeting through enlistment and reenlistment bonuses. Bonuses are a cost-effective expenditure of manpower funds and provide substantial flexibility to the individual services to meet their unique manpower requirements by directing added resources into the areas of greatest need. The authority for enlistment and reenlistment bonuses expires at the end of this month, and the committee recommends a 5-year extension of this important program.

The House is well aware of the growing shortage of scientists and engineers nationwide and the serious impact of this situation on national defense. The Reserve Officer Training Corps scholarship program is increasingly becoming the primary source of new engineers for the services. Many schools of engineering now require a 4½ or even a 5-year program of study in order to complete a bachelor's degree in engineering. Regardless of the requirements, however, ROTC scholarships cover a maximum of 4 year of education. H.R. 6317 would authorize tuition assistance and subsistence payments for up to an additional 10 months beyond the 4 years if that

is a degree requirement. It should be emphasized that this does not affect an individual who simply needs more time because of poor or failing grades. Further, the individual who receives added ROTC benefits will incur an added military service obligation.

Other revisions in the ROTC program recommended by the committee would provide greater flexibility for the services in the type of military service obligation they can require in exchange for educational assistance, as well as an improved recoupment mechanism for those who fail to complete the program.

Last year's Omnibus Reconciliation Act mandated the closure of the Public Health Service hospitals and clinics. It is administratively possible for Public Health Service commissioned officers to transfer to the military services, but they may not receive credit for their PHS service for either grade determination or retirement purposes. This is an obvious disincentive. Although physician staffing in the military services has improved substantially over the past few years, some shortages persist, particularly for specialists. H.R. 6317 would make transfer to the military services substantially more attractive to those physicians and other health care personnel that the services may wish to attract and would facilitate the selective use of this available pool of skilled medical manpower.

In conclusion, I again urge my colleague's favorable support of H.R. 6317. Although the military pay raise provisions contained in the legislation has been overtaken by the budget process, it is critically important that the present mechanism in the law to target moneys to critical skills and shortage areas—the enlistment and reenlistment bonus programs—be extended prior to their September 30 expiration.

□ 1400

Mr. MONTGOMERY. Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. IRELAND).

Mr. IRELAND. Mr. Speaker, there are many features of this bill that I strongly support. However, it is unfortunate that a piece of legislation of this magnitude is being debated before a very empty House. It is more unfortunate that this bill is on the Suspension Calendar. Not only are we talking about approval of a great expenditure of money, this bill will place into permanent law new contracting out prohibitions which I do not believe are in the national interest.

I want to bring to the attention of the Members that H.R. 6317 directs that the expense of a cost comparison study conducted by the Government, the preparation of a statement of work and all other costs associated with the contracting process, be added to a contractor's bid or proposal when calculating the cost of performance by a private sector firm. For my colleagues less familiar with the procurement process, there are a variety of costs associated with conversion to contract performance. These range from procurement costs associated with the preparation of a work statement and other costs relative only to the preformance of the study which determines the decision to convert.

Section 401 fails to make necessarily distinctions between the kinds of costs appropriately borne by a contractor and those which are part of the Government's internal management costs. The provisions as presently written will provide a decisive edge to in-house performance of activities by agency personnel in many cost comparisons studies.

It is in the national interest to assure a full and complete accounting of all costs associated with Government contracting activities in an equitable and financially reliable fashion. While in some cases it is appropriate to allocate these costs to a contractor. It should not include costs which are incurred regardless of whether an activity is performed in-house or not. Just as the Government accures savings over time as a result of the conversion, the cost associated with the study as the determinant in that conversion should be amortized over the period of contract performance. Amortization would assure that no single business assumes a disadvantage due to arbitrary cost differentials. The OMB cost comparison handbook which provides guidelines to agencies on this issue, currently uses 5 years for amortization for conversion costs and cost savings. I suggest that a better approach to this issue would be to instruct OMB to devise criteria for fair and equitable amortization of costs.

By assuring full and equal accounting for costs for both in-house and contractor performance, we can be assured that the decisions based on cost studies actually reflect the best interests of the Government and the taxpayers. Government should not be in the business of competing with the private sector. As a result of this bill's requirements, I find myself in the position that I must vote nay on H.R. 6317. I would ask the committee to allow the entire House to vote on this legislation.

Mrs. HOLT. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, while I am often and generally in agreement with the positions advocated and the actions taken by the House Armed Services Committee, I am compelled in this instance to voice my opposition to certain provisions contained in the 1983 military pay bill, and I would like to associate myself with the remarks of the gentleman from Florida (Mr. IRELAND) and make one other observation as to the restrictions placed on the Secretary of Defense's discretionary authority to determine the appropriateness of contracting out services.

Section 401 provides that commercial or industrial type functions at the Defense Department may not be performed by a private contractor if the Secretary determines that those functions should be performed by Government personnel in order to meet national defense needs. I agree wholeheartedly with that concept, and I would have no objections to this legislation if the committee had stopped there and preserved the Secretary's ability to make that determination.

The committee, however, sets forth the section 401 six broad categories of functions which should be kept in-house because they involve national security requirements. Five of these six categories are already factors which keep national security functions performed by Government personnel.

My objection is directed to the categories which may essentially leave the Secretary no choice but to find these types of functions intrinsic to national security and, therefore, cannot be performed by the private sector.

It seems to my these provisions may prevent the Secretary from drawing upon the private sector to meet those needs when appropriate. By restricting his authority, the committee may be encouraging the DOD to hire its own civilian work force or use its military personnel to perform activities ranging from aircraft maintenance to advanced date processing.

I am not suggesting that we compromise national security interests to allow these activities to be performed by the private section. Quite the contrary. We must insure that any function involving national defense capabilities be performed by Government employees, not by private contractors.

I strongly suggest, however, that we may be restricting the Secretary's authority and ability to make those types of decisions if the language of section 401 as it now exists is not modified.

Just one additional point, Mr. Speaker, and this is one that concerns me: That is that title I of the pay bill severs the link between military and civilian pay raises in the Defense Department. Although my office has not heard from any Federal employee organizations on this matter, I am concerned in reviewing this measure that this action may establish an unfortunate precedent at the expense of the civilian employee.

I appreciate having the opportunity to voice these concerns. I would like to urge the committee to address and consider these areas in conference by taking the steps the conferees deem to

be appropriate before determining the provisions of this legislation that we will be called upon to adopt or reject in final passage of the conference report.

Mr. MONTGONERY. Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. WHITE), a member of the subcommittee.

Mr. WHITE. Mr. Speaker, we have had a running battle over the years as to contracting out. In fact, last year, as an illustration, there was an attempt made to call for contracting out for hospitals. The Armed Services Committee reacted to this by saying that, in fact, this would really erode the ability of trained personnel to respond in time of emergency; and the Senate did recede on that particular issue.

We have before us now an issue in the pay bill attempting to respond to a call for this House to come forward with criteria after the House itself has called for a moratorium of 1 year. There were six criteria under which it was said that the Secretary of Defense could not contract out. I might say that of those six, five are already in the Secretary of Defense's rules and regulations.

This committee only added one additional criterion. So the first five are already set out in the bill. The last one pertains to security of the installation and safety of the personnel, which I think is very apt as far as criteria for not contracting out.

Whatever we do here today, of course, will be ironed out in the conference report. It would be a shame if we should stall on this important measure of pay for military personnel on the basis of matters that could certainly be addressed at the time of the conference.

I want to point out, as far as the question of who should absorb the costs, too often illustrations have been made and shown where a contracting out was attempted, and at the time of the study it was determined that indeed the study itself cost more than the estimated savings that would be realized over the period of the time of the contract.

It was decided, in the discretion of this committee, that the wisest procedure would be to include the cost of determining whether there would be a savings in the actual first bid. That, I think, is certainly a savings to the taxpayer, because it certainly slows down the Department of Defense in going forward with the contracting-out provisions that in themselves inherently are not appropriate and certainly would find it would be determined, in fact, to not be responsive to the needs of the taxpayers themselves.

What we are saying here is, "If the Department is going to contract out, then one has to consider the cost of the study itself in the bid; and if the Department does not think there will be that much saved, they should not go forward with it in the first place."

Furthermore, for small business purposes, we make an exception to this. We say: "If the company has 10 or less employees then they can make a simplified cost estimate so they do not have the voluminous estimates and studies now required for cost studies."

In other words, small business is addressed. They will not have this great expenditure added to their bid themselves, if there are 10 persons or less involved in the contracting out.

We think the criteria set out are appropriate. We are under a 1-year moratorium. We are under a charge to come forward with recommendations and criteria, and set forth guidelines to the Secretary of Defense. Five of those already are in the regulations. We only add one. We think that the committee should certainly go forward and adopt this bill and send it over to the Senate and let us go forward in a conference report to iron out the differences between the two Houses.

Mrs. HOLT. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I simply would like to point out that the arguments just made by the gentleman from Texas (Mr. WHITE), I think, are excellent arguments. I think they show why this bill should never have been brought up under the Suspension Calendar. These are problems that should have been addressed by the Members of this body. They should not be addressed in a conference committee where this body has limited opportunity to address the issues, whether one addresses them from the standpoint of the Federal employees or from the standpoint of small business.

It would have been well on the contracting-out issue that we have an opportunity to vote, amend, do whatever this House desired.

□ 1415

Bringing it up under this particular procedure means that we will not have that kind of opportunity; so I am disappointed, Mr. Speaker, that we find ourselves with a bill that has major spending in it and also has some controversial items in it and that we find ourselves with it having been brought up under suspension, giving us no opportunity to work the will of the House.

Mr. MONTGOMERY. Mr. Speaker, I yield 1 minute to the gentleman from Guam (Mr. WON PAT).

Mr. WON PAT. Mr. Speaker, I am pleased to join my illustrious colleague, Congressman SONNY MONTGOMERY, in support of H.R. 6317, the uniform services pay bill.

As a cosponsor of this important bill, I am pleased to call on the House today to approve this bill which will give our fighting men and women an 8-percent pay raise. We who sit on the House Armed Services Committee believe that this Nation must support those who serve in the military with decent pay and decent benefits. This bill will help accomplish this goal by supporting the administration's request for an 8-percent pay raise for members of the U.S. military.

This bill also carries with it a vital amendment which was approved by the House Armed Services Committee that permits residents of the Northern Mariana Islands to be appointed as commissioned officers in the Armed Forces of this Nation. Several years ago, Congress approved another bill at my request which authorized citizens of the Northern Marianas to serve as enlisted personnel in the various branches of the military. I am pleased to note that several hundred residents of Saipan have taken advantage of that public law. Today, we seek to extend this privilege of service to those in the Northern Marianas who desire to become officers. This provision is needed.

There are a number of young men who have either graduated from Reserve officer training courses or are already enrolled in ROTC courses. Unless this amendment becomes law, they will not be able to assume their commissions. That would be a tragic loss to these young people and to this Nation. The Pentagon has notified me that they support this proposal and I urge that it be adopted today.

I am equally supportive of the other provisions of this bill, including extension of the special recruiting bonuses. I have been very proud to endorse previous military pay raises and ask that we help our military men and women meet the high cost of living in today's society. Thank you.

Mrs. HOLT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to briefly talk about the contracting out. The gentleman from Florida and the gentleman from Pennsylvania have made good points. One of the problems we have had in getting this bill up at such a late date, we really did not know what the pay raise would end up being, either 4 or 8 percent; so we had some delays caused by the administration.

I would hope either gentleman would not call for a vote of this legislation. If it was defeated, it would mean we would have to go back to the committee and we would have to reconsider and rework the bill again.

We need to move right along. October 1 is right upon us. I assure the gentleman from Florida and the gen-

tleman from Pennsylvania that we on the committee who will be on the conference committee will certainly look into this matter that has been pointed out on the contracting-out issue.

It is a broad bill, but this is the only way we could get it up and move ahead with the bill to have it effective October 1 and I hope the bill will be passed today.

● Mr. BENNETT. Mr. Speaker, I rise today to support a provision in H.R. 6317 that incorporates legislation I have introduced for several years to correct an oversight in the law relating to benefits for military widows. My legislation makes certain widows of retired military personnel eligible for annuities payable under the survivor benefit plan, if they became widows within 18 months after the 1972 effective date of the Armed Forces Survivor Benefit Plan Act.

The principal purpose of the Armed Forces Survivor Benefit Plan Act was to establish a survivor benefit plan as an element of the military retirement system. In doing this, the act provided automatic coverage for retiring military personnel who were married or had dependent children. Military personnel who had retired prior to the 1972 effective date of the act were allowed a 1-year period in which they could elect to participate in the plan.

Similarly, the widows of such retirees were allowed 1 year in which to elect to participate. In subsequent changes to the act, the period of open enrollment in the plan was extended 6 months for military personnel who retired prior to 1972. However, the corresponding enrollment period for widows was not extended. My bill would correct this oversight, and make the provisions of the act more uniform and fair in their application. I urge the Members of the House to support this legislation.●

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the bill, H.R. 6317, as amended.

The question was taken.

Mr. PARRIS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 6317.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERSONAL EXPLANATION

(Mr. GUARINI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUARINI. Mr. Speaker, on rollcall No. 331, the Walgren amendment to the fiscal year 1983 appropriations bill for the Department of Housing and Urban Development and related agencies, I had intended to vote "nay." I oppose this amendment as I had last year, yet inadvertently I was recorded as voting "yea."

Mr. Speaker, I ask unanimous consent that this statement as opposed to the Walgren amendment appear in the permanent RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

VETERANS' EMPLOYMENT AND EDUCATION ASSISTANCE ACT OF 1982

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6794) to amend title 38, United States Code, to improve job training and job placement programs and educational assistance programs for veterans, as amended

The Clerk read as follows:

H.R. 6794

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; AMENDMENTS TO TITLE 38, UNITED STATES CODE

SECTION 1. (a) This Act may be cited as the "Veterans' Employment and Education Assistance Act of 1982".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision of law, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—EMPLOYMENT ASSISTANCE

CONGRESSIONAL FINDINGS

SEC. 101. The Congress makes the following findings:

(1) There exists serious unemployment and underemployment among veterans as a group and particularly among disabled veterans, Vietnam-era veterans, and recently separated veterans.

(2) Alleviating unemployment and underemployment among veterans is a national responsibility.

(3) Because of the special nature of veterans employment and training problems and the national responsibility to meet those problems, programs to address those problems can best be administered through a systematic, uniform Federal program to provide funds for veterans employment assistance programs.

EXTENSION OF JOBS PROGRAMS TO VETERANS WITH 10 AND 20 PERCENT DISABILITIES

SEC. 102. (a) Section 2011 is amended—

(1) in paragraph (1)—

(A) by striking out "special"; and

(B) by striking out "for a disability rated at 30 per centum or more";

(2) by striking out paragraph (3); and

(3) by redesignating paragraphs (4) and (5) as paragraphs (3) and (4), respectively.

(b) Section 2001 is amended—

(1) by striking out "special" in paragraph (1);

(2) by striking out paragraph (3);

(3) by redesignating paragraph (4) as paragraph (3) and by striking out "2011(4)" in such paragraph and inserting in lieu thereof "2011(3)"; and

(4) by redesignating paragraphs (5) and (6) as paragraphs (4) and (5), respectively.

(c)(1) Section 2007(c) is amended by striking out "special disabled veterans,".

(2) Subsections (a) and (b) of section 2012 are amended by striking out "special".

(3) Section 2014(g) is amended by striking out "special disabled veterans" and inserting in lieu thereof "disabled veterans with disabilities rated at 30 percent or more".

PURPOSE OF JOBS TRAINING PROGRAMS

SEC. 103. Section 2002 is amended—

(1) by inserting "and regulations" after "to this end policies"; and

(2) by inserting "priority in the provision of employment and training services and" after "and persons".

JURISDICTION OF ASSISTANT SECRETARY OF LABOR FOR VETERANS' EMPLOYMENT

SEC. 104. Section 2002A is amended by adding at the end the following new sentence: "The officials within the Department of Labor administering chapter 43 of this title shall be administratively and functionally responsible to the Assistant Secretary of Labor for Veterans' Employment.".

STATE DIRECTORS FOR VETERANS' EMPLOYMENT

SEC. 105. (a)(1) Section 2003 is amended by striking out the section heading and all of the matter preceding clause (1) and inserting in lieu thereof the following:

"§ 2003. State Directors for Veterans' Employment

"(a) The Secretary of Labor shall assign to each State a representative of the Veterans' Employment Service to serve as the State Director for Veterans' Employment, and shall assign full-time clerical support to each such Director. The Secretary shall also assign to each State one Assistant Director for Veterans' Employment per each 250,000 veterans and eligible persons of the State veterans population and such additional Assistant Directors for Veterans' Employment as the Secretary shall determine, based on the data collected pursuant to section 2007 of this title, to be necessary to assist the Veterans' Employment Director to carry out effectively in that State the purposes of this chapter. Full-time Federal clerical support personnel assigned to State Directors for Veterans' Employment shall be appointed in accordance with the provisions of title 5 governing appointments in the competitive service and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) Each State Director for Veterans' Employment and Assistant Director for Veterans' Employment (1) shall be an eligible

veteran who at the time of appointment has been a bona fide resident of the State for at least two years, and (2) shall be appointed in accordance with the provisions of title 5 governing appointments in the competitive service and paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title. If the Assistant Secretary determines that no qualified veteran who has been a bona fide resident of the State for at least two years is available at the time of an appointment under the preceding sentence, the Assistant Secretary may appoint any qualified eligible veteran.

"(c) Each such Director for Veterans' Employment and Assistant Director for Veterans' Employment shall be attached to the public employment service system of the State to which they are assigned. They shall be administratively responsible to the Secretary of Labor for the execution of the veterans' and eligible persons' counseling and placement policies of the Secretary through the public employment service system and in cooperation with other employment and training programs administered by the Secretary, by other Federal jobs training program grantees in the State, or directly by the State.

"(d) In cooperation with the public employment service system staff and the staffs of each such other program in the State, the Director for Veterans' Employment and such director's assistants shall—".

(2) The item relating to such section in the table of sections at the beginning of chapter 41 is amended to read as follows:

"2003. State Directors for Veterans' Employment.".

(b) Clause (6) of such section is amended to read as follows:

"(6) be functionally responsible for the supervision of the participation of veterans in Federal and federally-funded employment and training programs and monitor the implementation and operation of such programs to assure that eligible veterans, veterans of the Vietnam era, disabled veterans, and eligible persons receive priority in the provision of services when such priority is required by law or regulation;".

(c) Such section is further amended by striking out the period at the end of clause (7) and inserting in lieu thereof a semicolon and by adding at the end thereof the following:

"(8) supervise the listing of jobs and subsequent referrals of qualified veterans as required by section 2012 of this title;

"(9) be responsible for the supervision of complaints of discrimination filed under section 2012 of this title to assure complaints are resolved in a timely fashion;

"(10) cooperate with employers to identify disabled veterans who have completed or are taking training under chapter 31 of this title and who are in need of employment by working closely with Veterans' Administration officials in the Office of Vocational Rehabilitation and Counseling; and

"(11) when requested, shall assist Federal and State agencies and private employers in identifying and acquiring prosthetic and sensory aids and devices which tend to enhance the disabled veterans' employability.".

DISABLED VETERANS' OUTREACH PROGRAM

SEC. 106. (a) Subsection (a) of section 2003A is amended by adding at the end the following new paragraph:

"(5) Funds appropriated to make grants or otherwise provide assistance to States under this section shall be appropriated from general revenues and shall be specifically set forth in appropriation Acts. Funds made available to States under this section may only be used for the purposes of this section.

"(6) The Secretary shall carry out his functions under this section through the Assistant Secretary of Labor for Veterans' Employment.".

(b) Subsection (b)(2) of such section is amended by inserting after the first sentence the following new sentence: "The Assistant Secretary, after consultation with the appropriate State directors assigned under section 2003 of this title, may grant waivers of the limitation in the preceding sentence.".

(c) Subsection (c) of such section is amended—

(1) by striking out "prime sponsors under the Comprehensive Employment and Training Act" in clause (4) and inserting in lieu thereof "appropriate grantees under other Federal and federally-funded employment and training programs"; and

(2) by adding at the end the following:

"(8) Development of outreach programs with the Veterans' Administration's vocational rehabilitation staff, with institutions of higher learning, non-degree-granting institutions (including vocational and technical schools), and with employers to assure maximum assistance to disabled veterans enrolled in a program under chapter 31 of this title.".

(c) Subsection (e) of such section is amended by adding at the end the following new sentence: "The Assistant Secretary shall monitor the employment of disabled veterans' outreach program specialists to ensure that the provisions of subsection (a)(2) of this section with respect to the employment of such specialists are complied with.".

ESTIMATES OF FUNDS FOR ADMINISTRATION

SEC. 107. (a) Subsection (a) of section 2006 is amended—

(1) by inserting "and chapters 42 and 43 of this title" after "of this chapter" in the first sentence; and

(2) by adding at the end the following new sentence: "These funds shall include amounts necessary to fund disabled veterans' outreach program specialists programs under section 2003A of this title and shall only be approved by the Assistant Secretary of Labor for Veterans' Employment if the level of funding proposed is in compliance with section 2003A of this title. Each budget submission with respect to such funds shall include a separate listing of the proposed number and specific locations for disabled veterans outreach program specialists appointed under section 2003A of this title.".

(b) Subsection (d) of such section is amended by inserting ", in consultation with the Assistant Secretary of Labor for Veterans' Employment," after "Secretary of Labor".

ANNUAL REPORT TO CONGRESS

SEC. 108. Section 2007(c) is amended by adding at the end the following new sentence: "The report shall also include a report on activities carried out under section 2003A of this title.".

NATIONAL EMPLOYMENT ASSISTANCE PROGRAM FOR VETERANS

SEC. 109. (a)(1) Chapter 41 is amended by adding at the end the following new section:

"§ 2009. Veterans' employment assistance program

"(a)(1) The Congress determines that many veterans, particularly disabled and Vietnam era veterans, continue to experience employment problems and that it is necessary and appropriate to increase the opportunities for veterans to obtain employment, job training, counseling, and job placement services.

"(2) The Secretary of Labor, through the Assistant Secretary of Labor for Veterans' Employment, shall establish and administer a national employment and training assistance program for the provision of such services to veterans through grants to qualified recipients as determined under this section.

"(b)(1) Grants under subsection (a) of this section may be made to State agencies, to agencies of political subdivisions of any State, and to private, nonprofit organizations. Before making a grant to any such entity, the Secretary shall determine whether the entity can effectively provide services described in subsection (a) of this section through such a grant, taking into consideration—

"(A) the experience of the entity involved with employment and job training problems of veterans;

"(B) the familiarity of the applicant with the community where the applicant will provide services to veterans under the program; and

"(C) the capability of the applicant to administer effectively a comprehensive employment and training program for veterans.

"(2) Before a grant may be made to any entity that the Secretary has determined to be a qualified recipient of such a grant, the entity shall submit an application for the grant to the Secretary. Each such application shall be submitted in such form and manner and shall contain such information as the Secretary may require.

"(c)(1) In order to make maximum use of existing programs, the Secretary shall encourage recipients of grants under this section to enter into cooperative arrangements with private industry and business concerns (including small business concerns), educational institutions, trade associations, and organized labor in addition to cooperative arrangements with other Federal and State employment and job training programs to provide such services.

"(2) The Secretary shall ensure that maximum effectiveness and efficiency are achieved in providing the services described in subsection (a) of this section by coordinating, in consultation with the Administrator, the administration of the program established under this section with the administration of other employment and job training programs, vocational rehabilitation programs, and readjustment counseling programs administered under this title. The Secretary shall give particular emphasis to coordinating the administration of this section with the administration of section 612A of this title by the Administrator.

"(d)(1) Programs of on-the-job training for which grants are made under this section shall be designed so as to achieve maximum coordination with programs for which benefits are authorized under section 1787 of this title.

"(2) Employability development programs for which grants are made under this section shall be designed in coordination and cooperation with Veterans' Administration programs of readjustment counseling under section 612A of this title and with veterans assistance offices established pursuant to section 242 of this title.

"(3) Because State Employment Services have responsibility for other veterans job

placement programs and activities, including the disabled veterans outreach program under section 2003A of this title and the local veterans employment representatives program under section 2004 of this title, job placement programs for which grants are made under this section shall be designed in each State in coordination and cooperation with the State Employment Service for that State.

"(4) Grants may be made under this section for demonstration programs in cooperation with the Department of Defense and the Veterans' Administration to provide to members of the Armed Forces preseparation counseling concerning opportunities in the civilian labor market and preseparation job search assistance for members who decline to reenlist in the Armed Forces.

"(e) The Secretary shall approve or disapprove any application for a grant under this section within ninety days after the receipt of the application for such grant.

"(f) The Secretary may, either directly or by way of grant, contract, or cooperative agreement, furnish such technical assistance and conduct such research and development projects as the Secretary considers necessary to establish and carry out the program described in subsection (a) of this section.

"(g) Regulations prescribed to carry out this section shall include provisions establishing proper fiscal controls, accountability, and program performance of grant recipients under this section. To determine the effectiveness of the program authorized by this section, such regulations shall require that each recipient of a grant under this section, as a condition of receiving such grant, agree to submit a report to the Assistant Secretary for each year for which the recipient receives funds under such grant. Each such report shall include, as determined by the Secretary, the following information with respect to the previous year:

"(1) The number of eligible veterans requesting assistance from the grant recipient.

"(2) The number of eligible veterans referred to job interviews by the grant recipient.

"(3) The number of eligible veterans referred to job interviews by the grant recipient who completed job interviews.

"(4) The number of eligible veterans placed in jobs to which they had been referred by the grant recipient.

"(5) The number of eligible veterans counseled by the grant recipient after being placed in jobs to which they had been referred by the grant recipient.

"(6) The number of eligible veterans placed in permanent jobs to which they had been referred by the grant recipient.

"(7) Such additional information as may be required by the Secretary or provided by the grant recipient.

"(h) Not later than January 1 of each year, the Secretary shall submit to the Committees on Veterans' Affairs of the House of Representatives and the Senate a report on the operation of the program established under this section during the preceding fiscal year. Each such report shall include an evaluation of the effectiveness of the program in carrying out the purposes of this section during the fiscal year, the efficiency with which services were provided under the program during the fiscal year, and such recommendations for further legislative action relating to veterans' employment as the Secretary considers appropriate.

"(i) The authority of the Secretary to enter into contracts or make grants under this section is subject to the availability of appropriations for that purpose.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"2009. Veterans' employment assistance program.".

(b) The Secretary of Labor shall prescribe regulations to implement the grant program authorized by section 2009 of title 38, United States Code, as added by subsection (a), not later than one hundred and eighty days after the date of the enactment of this Act.

SECRETARY OF LABOR'S COMMITTEE ON VETERANS' AFFAIRS

SEC. 110. (a) Chapter 41 is amended by adding after section 2009 (as added by section 109) the following new section:

"§ 2010. Secretary of Labor's Committee on Veterans' Affairs

"(a) There is established within the Department of Labor an advisory committee to be known as the 'Secretary's Committee on Veterans' Affairs'. The members of the Committee shall serve without compensation or other reimbursement.

"(b) The Committee shall be chaired by the Secretary of Labor. The Assistant Secretary of Labor for Veterans' Employment shall serve as vice chairman of the Committee. The Committee shall include—

"(1) representatives of—

"(A) the Secretary of Health and Human Services;

"(B) the Administrator;

"(C) the Director of the Office of Personnel Management;

"(D) the Chairman of the Equal Employment Opportunity Commission; and

"(E) the Administrator of the Small Business Administration;

"(2) a representative of each of the chartered veterans' organizations having a national employment program; and

"(3) such other members as may be appointed by the Secretary after consultation with the Assistant Secretary for Veterans' Employment.

"(c) The Committee shall meet at least quarterly for the purpose of bringing to the attention of the Secretary problems and issues relating to veterans' employment.".

(b) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2009 (as added by section 109) the following new item:

"2010. Secretary of Labor's Committee on Veterans' Affairs.".

PERSONS ELIGIBLE FOR CHAPTER 42 EMPLOYMENT AND TRAINING PROGRAMS

SEC. 111. Section 2011 is amended—

(1) in clause (1)—

(A) by striking out "or"; and

(B) by inserting ", or (C) a person who but for receipt of military retired pay would be eligible to receive compensation" after "service-connected disability"; and

(2) in clause (4) (as redesignated by section 2(a)) by inserting "and the United States Postal Service and Postal Rate Commission" after "title 5".

VETERANS EMPLOYMENT EMPHASIS UNDER FEDERAL CONTRACTS

SEC. 112. Section 2012 is amended by adding at the end the following new subsection:

"(d) Each contractor to whom subsection (a) of this section applies shall report at least quarterly on the total number of new hires of such contractor and the number of such hires who are Vietnam era veterans, disabled veterans, and other eligible veterans. Each such report shall be filed with the State Veterans' Employment Director provided for in section 2003 of this title.".

VETERANS EMPLOYMENT WITH THE FEDERAL GOVERNMENT

SEC. 113. (a) Section 2014(c) is amended—

(1) by inserting "(1)" after "(c)"; and

(2) by adding at the end the following new paragraph:

"(2) Any veteran who believes that information concerning opportunities to participate in a competitive civil service examination was not made available to the employment offices of the United States Employment Service as required by section 3327 of title 5 and that such veteran was thereby denied an opportunity to participate in such examination may file a complaint with the Office of Personnel Management, which shall promptly investigate the complaint.".

(b) Subsection (d) of such section is amended by striking out "Each report under the preceding sentence shall" and inserting in lieu thereof "Each such report shall include the number of employment openings listed pursuant to section 3327 of title 5, together with the number of veterans referred to such openings and the number actually receiving jobs, and the number of complaints filed under subsection (c)(2) of this section, and the disposition of such complaints, and shall also".

REPEAL OF EXEMPLARY REHABILITATION CERTIFICATES PROGRAM

SEC. 114. Section 6 of Public Law 90-83, approved September 11, 1967 (29 U.S.C. 601-607), is repealed.

EFFECTIVE DATE

SEC. 115. The amendments made by this title shall take effect on October 1, 1982.

TITLE II—EDUCATION ASSISTANCE

REPEAL OF VETERANS' REPRESENTATIVES PROGRAM

SEC. 201. (a) Section 242 is amended by adding at the end the following new subsection:

"(c) The Administrator may station veterans benefits counselors at locations other than Veterans' Administration offices, including educational institutions, to provide assistance regarding benefits under this title to veterans and other persons eligible for benefits under this title and to provide outreach services under this subchapter.".

(b)(1) Section 243 is repealed.

(2) The table of sections at the beginning of chapter 3 is amended by striking out the item relating to such section.

REPEAL OF 50-PERCENT EMPLOYMENT RULE FOR VOCATIONAL SCHOOLS

SEC. 202. (a) Section 1673(a) is amended—

(1) by striking out "(1)" before "The";

(2) by redesignating clause (A) as clause (1);

(3) by striking out clause (B) and inserting in lieu thereof the following:

"(2) any sales or sales management course which does not provide specialized training within a specific vocational field;";

(4) by redesignating clause (C) and (D) as clauses (3) and (4), respectively; and

(5) by striking out paragraph (2).

(b) Section 1723(a) is amended—

(1) by striking out "(1)" before "The";

(2) by redesignating clause (A) as clause (1);

(3) by striking out clause (B) and inserting in lieu thereof the following:

"(2) any sales or sales management course which does not provide specialized training within a specific vocational field;";

(4) by redesignating clauses (C) and (D) as clauses (3) and (4) respectively; and

(5) by striking out paragraph (2).

(c) The amendments made by this section shall take effect on October 1, 1982.

TECHNICAL AMENDMENT RELATING TO 85-15 RULE

SEC. 203. (a) Section 1673(d) is amended—

(1) by striking out "The Administrator" in the first sentence and inserting in lieu thereof "(1) Except as provided in paragraph (2) of this subsection, the Administrator";

(2) by striking out "(other than" and all that follows through "of this title)"; and

(3) by adding at the end the following new paragraph:

"(2) Paragraph (1) of this subsection—

"(A) does not (except as provided in section 1691(c) of this title) apply with respect to the enrollment of a veteran in a course offered pursuant to subchapter V of this chapter;

"(B) does not apply with respect to the enrollment of a veteran in a farm cooperative training course; and

"(C) does not apply with respect to the enrollment of a veteran in a course described in section 1789(b)(6) of this title.".

(b) Section 1691(c) is amended by striking out "section 1673(d)" and inserting in lieu thereof "section 1673(d)(1)".

RATE OF EDUCATIONAL ASSISTANCE FOR INDEPENDENT STUDY PROGRAMS

SEC. 204. Section 1682(e) is amended by striking out "entitlement shall be charged at one-half of the full-time institutional rate" and inserting in lieu thereof "the amount of such veteran's entitlement to educational assistance under this chapter shall be charged in accordance with the rate at which the veteran is pursuing the independent study program but at not more than the rate at which such entitlement is charged for pursuit of such program on less than a half-time basis".

REVISION OF RATES FOR INCARCERATED PERSONS

SEC. 205. (a) Section 1508(g) is amended—

(1) by striking out "(1) Notwithstanding any other provision of this title and subject to the provisions of paragraph (2) of this subsection, no subsistence allowance may" and inserting in lieu thereof "A subsistence allowance may not"; and

(2) by striking out paragraph (2).

(b) Section 1682(g) is amended—

(1) by striking out "(1) Subject to the provisions of paragraph (2) of this subsection, the" and inserting in lieu thereof "The"; and

(2) by striking out paragraph (2).

(c) Section 1780(a) is amended by striking out "prison or jail" and inserting in lieu thereof "penal institution for conviction of a felony".

CLARIFICATION OF CLASS HOUR FOR PURPOSES OF LABORATORY AND SHOP COURSES

SEC. 206. Section 1788(a) is amended by inserting after the second sentence the following new sentence: "For purposes of clauses (B) and (C) of the preceding sentence, the requirement of two hours of attendance per week for the laboratory portions of such courses, and the requirement of three hours of attendance per week for the shop portions of such courses, shall be considered to be satisfied even though the last hour of attendance in any class is fifty minutes in order to allow customary intervals between hours of instruction and even though customary rest periods are allowed.".

DISCONTINUANCE OF EDUCATIONAL ASSISTANCE

SEC. 207. Section 1790(b) is amended by adding at the end the following new paragraph:

"(3) Notwithstanding the evidence required to discontinue educational assistance to an individual eligible veteran or eligible person under paragraph (2) of this subsection, the Administrator may discontinue such assistance to eligible veterans and eligible persons already enrolled, and may disapprove the enrollment of any eligible veteran or eligible person, in any course with respect to which the Administrator (A) finds (i) that the course fails to meet any of the approval requirements of this chapter, or (ii) that the educational institution offering the course has violated the recordkeeping or reporting requirements of this chapter or chapter 31, 32, 34, or 35 of this title, and (B) finds that the State approving agency and the educational institution offering the course have been advised of such violation and the institution has failed to take corrective action within a reasonable period of time (as determined by the Administrator) after such notification. Whenever the Administrator discontinues assistance under this paragraph, the Administrator shall give notice as required under paragraph (2) of this subsection.".

MODIFICATION OF REPORTING REQUIREMENT ON DEFAULT RATES UNDER LOAN PROGRAM

SEC. 208. The second sentence of section 1798(e)(3) is amended—

(1) by striking out "in maximum feasible detail";

(2) by inserting "and" at the end of clause (A); and

(3) by striking out clauses (B) and (C) and inserting in lieu thereof the following:

"(B) data regarding the default experience and default rate with respect to (i) loans made under this section in connection with accelerated payments under section 1682A of this title, and (ii) other loans made under this section.".

ADMINISTRATIVE IMPLEMENTATION OF CERTAIN DEPARTMENT OF DEFENSE EDCUCATIONAL ASSISTANCE PROGRAMS

SEC. 209. Section 1622 is amended by adding at the end the following new subsection:

"(e) Any amount transferred to the Administrator from the Secretary of a military department under an interagency agreement for the administration by the Veterans' Administration of an educational assistance program established by the Secretary under chapter 107 of title 10 may be deposited into and disbursed from the fund.".

ADJUSTMENT OF COMPUTATION OF RATE OF BENEFIT PAYMENT FOR PARTICIPANTS MAKING LUMP-SUM CONTRIBUTIONS UNDER CHAPTER 32 PROGRAM

SEC. 210. Section 1622(d) is amended by striking out "$75" and inserting in lieu thereof "$100".

EXTENSION OF PERIOD FOR ENROLLMENT IN CHAPTER 32 PROGRAM

SEC. 211. Section 408(a)(1) of the Veterans' Education and Employment Assistance Act of 1976 (38 U.S.C. 1621 note) is amended by striking out "December 31, 1981" and "June 1, 1981" and inserting in lieu thereof "March 30, 1983" and "January 15, 1983", respectively.

TITLE III—MISCELLANEOUS PROVISIONS

PERIOD FOR WAIVER BY THE ADMINISTRATOR OF IMPROPER PAYMENTS, OVERPAYMENTS, AND DEBTS

SEC. 301. (a) Section 3102(a) is amended by striking out "two years" and inserting in lieu thereof "one hundred and eighty days".

(b) The amendment made by subsection (a) shall apply only with respect to notifications of indebtedness that are made by the Administrator after the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. SAWYER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. SAWYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I yield such time as he may consume to the chairman of the Subcommittee on Education, Training, and Employment, the distinguished gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I encourage my colleagues in this House to unanimously endorse this legislation we are considering today, H.R. 6794, the Veterans' Employment and Education Assistance Act of 1982.

I say this because we are in a period of the highest unemployment among Vietnam veterans since the end of the Vietnam conflict. In July nearly 700,000 Vietnam veterans were out of work and, adding discouraged workers, that number soars. Too many of these veterans, because of the time spent serving their country in the Armed Forces, are still 2 to 4 years behind their nonveteran peers in job experience and proficiency. Consequently, they have been the last hired and first fired during this time of recession and economic instability. Others have had psychological readjustment problems that have been severely exacerbated by unemployment and underemployment. The team leader at one of the Veterans' Administration vet centers recently stated:

This program (the VA Psychological Readjustment Counseling Program) began in March of 1980, and clearly the situation for Vietnam vets is the worst it has been in the last 2 years. Never have I seen people so desperate in terms of work. You cannot expect anyone to readjust without a job.

Mr. Speaker, since last fall the Subcommittee on Education, Training and Employment has held six hearings here in Washington and one field hearing on the employment situation of Vietnam veterans. We thoroughly reviewed veterans employment pro-

grams administered by the Veterans' Administration, the Department of Labor, the Office of Personnel Management, and the U.S. Postal Service. We also reviewed the education and training programs administered by the Veterans' Administration. The subcommittee concluded, after evaluating the many hours of extensive testimony, that unemployment and underemployment is a severe, continuing problem for Vietnam veterans and that legislation is necessary to strengthen and expand existing programs with innovative changes and additions to the existing structure and service. On July 22, the Committee on Veterans' Affairs ordered reported H.R. 6794, the Veterans' Employment and Education Assistance Act of 1982, legislation designed to improve and make more effective the assistance Congress has made available to help veterans obtain employment.

Very briefly, H.R. 6794 would strengthen and improve the Veterans' Employment Service in the Department of Labor. In that regard, the bill would clarify the duties and responsibilities of the position of the Assistant Secretary of Labor for Veterans' employment, a position established by the 96th Congress as one of the provisions of Public Law 96-466. H.R. 6794 would also clarify the responsibilities of the State Directors of Veterans' Employment who are under the jurisdiction of the Assistant Secretary of Labor for Veterans' Employment. Another major provision would require line-item funding by the Department of Labor for the Disabled Veterans Outreach Program (DVOP). Additionally, the bill would require that Department of Labor funds allocated to grantees for veterans' training, employment, counseling and job placement services shall be administered by the Assistant Secretary of Labor for the granting of such funds as well as the accountability and performance of those who receive grant funds for veterans' purposes.

This is a particularly significant provision in view of both the legislation we are considering today and the amendment to the recently passed H.R. 5320, the Job Training Partnership Act, which set aside funds for the implementation of veterans' programs specified in that legislation. Public Law 96-466 created the position of Assistant Secretary of Labor for Veterans Employment (ASVE) in order to give more force, clarity, and direction to all veterans' employment programs within the Department of Labor. The ASVE is the chief advocate and adviser to the Secretary of Labor regarding these programs. I believe it is vital to include in this legislation a reconfirmation of congressional intent regarding the authority and role of the ASVE.

The educational provisons of H.R. 6794 include minor program revisions and technical changes requested by the Veterans' Administration. One of the changes would repeal the requirement that vocational schools report on the number of graduates who, during the preceding 2-year period, have obtained employment in the field for which the school provided training. The repeal of the so-called 50 percent employment rule will save an estimated $223,000 in fiscal year 1983. There are a number of other minor provisions in this bill which are explained in the section-by-section analysis which I will include at the end of my statement.

This bill has received the strong support and endorsement of the American Legion, the Veterans of Foreign Wars, the Disabled American Veterans, the AMVETS, and the Vietnam Veterans of America among other nationally recognized veterans organizations.

Mr. Speaker, unemployment is a national problem which affects all members of the population, veterans and nonveterans alike. There is no doubt, however, that many of the unemployment problems facing veterans, particularly those with service-connected disabilities and Vietnam era veterans, are related to their military service. Although the Congress has consistently placed particular emphasis on the unique nature of veterans employment and readjustment problems and targeted this group for specialized assistance, H.R. 6794 would, for the first time in law, clearly state that veterans' unemployment problems are a national responsibility. This bill will not solve the employment problems of all these veterans. It will, however, go a long way toward strengthening education programs and providing an improved and more effective program of job training and job placement for unemployment and underemployed veterans.

I want to express my thanks to all the members of the Subcommittee on Education, Training, and Employment, and particularly MARGARET HECKLER, the ranking minority member of the subcommittee, for their help in the drafting of this bill. I also want to thank the chairman of the full committee, SONNY MONTGOMERY. His assistance and full support for this legislation is very much appreciated.

I urge unanimous support for this much needed legislation.

I hereby request that the section-by-section analysis of the bill be included as part of my remarks:

SECTION-BY-SECTION ANALYSIS—H.R. 6794, VETERANS' EMPLOYMENT AND EDUCATION ASSISTANCE ACT OF 1982

TITLE I—EMPLOYMENT ASSISTANCE

The first section of the bill provides that the act may be cited as the "Veterans Employment and Education Assistance Act of 1982".

Section 101 outlines the following congressonal findings: (1) that there exists serious unemployment and underemployment among veterans; (2) alleviating these problems is a national responsibility; and

(3) programs to address those problems can best be administered through a systematic, uniform Federal program.

Section 102 of the bill contains a number of technical amendments to Chapters 41 and 42 that extend eligibility under the Federal Contractor Job Listing program to all disabled veterans entitled to VA compensation by eliminating the "special disabled veteran" category—those rated at 30 percent or more.

Section 103 makes two amendments to Chapter 41, § 2002. The first would require the Assistant Secretary for Veterans' Employment to promulgate and administer "regulations," in addition to policies dealing with veteran job placement and related activities. The second amendment would require that veterans and eligible persons be provided "priority in the provision of employment and training services" in addition to maximum opportunities.

Section 104 of H.R. 6794 would make officials administering the Veterans' Reemployment Rights (VRR) program administratively and functionally responsible to the Assistant Secretary for Veterans' Employment.

Section 105 makes a number of amendments to § 2003, Chapter 41, including renaming the section "State Directors for Veterans' Employment." The amendments would: require the full-time clerical support of the State Directors to be "Federal" and preference for veterans in such appointments; allow appointment to the positions of Veterans Employment Service State Director or Assistant, in any State, of any qualified veteran if the Assistant Secretary determines that no qualified veteran who has been a bona fide resident of the State for at least two years is available at the time of the vacancy in the position; add to the responsibilities of the VES directors and assistants (1) functional responsibility for the supervision of the participation of veterans in Federal employment and training programs; (2) supervision of job listings, referrals and complaints under the Federal Contractor Job Listing program; (3) to cooperate with employers who identify veterans who have completed or are taking training under Chapter 31, Title 38; and (4) upon request, to assist Federal and State agencies and private employers in identifying and acquiring prosthetic and sensory aids and devices which tend to enhance the disabled veterans' employability.

Section 106 of the bill contains a number of technical amendments to section 2003A—Disabled Veterans Outreach Program Specialists. The first would require funds appropriated for DVOP to be appropriated from general revenues and requires the Secretary of Labor to carry out his functions for the DVOP through the Assistant Secretary for Veterans' Employment (ASVE). The second amendment allows for the AVSE to grant a waiver to the three-fourths limitation on the number of DVOP staff to be stationed at Job Service offices. The third deletes references to CETA and inserts "appropriate grantees under other Federal and federally funded employment and training programs" and adds a new function for the DVOP specialist of development of outreach programs with various en-

tities to assure maximum assistance to disabled veterans enrolled in a program under Chapter 31 of Title 38. The fourth change adds a new requirement for the AVSE to monitor the employment of DVOP specialists to ensure compliance with the required appointment priorities.

Section 107 amends section 2006 of Chapter 41 by including Chapters 42 and 43 with Chapter 41 for the requirement to estimate the funds necessary for proper and efficient administration of those Chapters. The amendment specifically requires amounts necessary for the DVOP and a separate listing of the proposed number and locations of DVOP staff. Amendments also require the Secretary to consult with the ASVE to consider a demonstrated lack of need for utilization of such funds for any other purpose.

Section 108 amends § 2007 of Chapter 41 by requiring inclusion of activities carried out under section 2003A (DVOP) in the annual report to Congress.

Section 109 provides for the inclusion of a new section to Chapter 41 entitled "§ 2009. Veterans' employment assistance program". The new Section 2009 provides for the following:

Part (a) requires the Secretary to establish and administer a national employment and training assistance program for veterans through grants to qualified recipients.

Part (b) sets forth general criteria by which the Secretary will determine the suitability of grant applications and information to be included in an application.

Part (c) requires maximum use of existing programs by requiring the Secretary to encourage grantees under this section to enter into cooperative agreements with entities dealing directly or indirectly with employment and training matters. The Secretary, in consultation with the VA Administrator, is to ensure maximum effectiveness and efficiency in providing services under this section by coordinating with other programs administered under title 38.

Part (d) requires coordination in the development of OJT, employability development, and job placement programs with VA programs for OJT readjustment counseling and veterans assistance office, and DOL's DVOP. This part also authorizes grants for demonstration programs in cooperation with DOD and VA to provide preseparation counseling and job search assistance.

Part (e) requires the Secretary to approve or disapprove any grant application within 90 days after receipt.

Part (f) authorizes the Secretary to provide directly or through grant, contract, or cooperative agreement, such technical assistance, research and development projects as are necessary to establish and carry out the program of this section.

Part (g) requires that regulations be issued establishing proper fiscal controls, accountability, and annual program reporting requirements to be submitted by the grantee to the Assistant Secretary.

Part (h) requires an annual report to the Committees on Veterans' Affairs of the House and Senate detailing the program established, effectiveness, efficiency and recommendations for legislative action.

Section 110 provides for establishment of a Secretary of Labor's Committee on Veterans' Affairs. Part (a) of the new section 2010 establishes the subject advisory committee; part (b) sets forth the following Committee membership: Chairman, Secretary of Labor; Vice Chairman, ASVE; Representatives of the Secretary of Health and Human Services, the VA Administrator, the Director of the Office of Personnel Management, the Chairman of the Equal Employment Opportunity Commission, the Administrator of the Small Business Administration, and a representative of each of the chartered veterans organizations having a national employment program.

Section 111 of the bill makes two amendments to § 2011 of Chapter 42. The first amends the definition of "disabled veteran" to include "a person who but for receipt of military retired pay would be eligible to receive compensation." The second would expand the definition of "department or agency" to include the United States Postal Service and Postal Rate Commission. This has the effect of making the USPS and PRC subject to the provisions of Chapter 42, namely the Federal Contractor Job Listing program and employment emphasis programs within the Federal Government.

Section 112 of the bill would require Federal contractors to report at least quarterly on the total number of new hires, separately identifying Vietnam-era veterans, disabled veterans, and other eligible veterans.

Section 113 amends § 2014 of Chapter 42. The amendment provides for complaints under this subpart to be filed with and investigated by the Office of Personnel Management. Second, this subsection is amended by requiring OPM to report the number of employment openings listed pursuant to section 3327 of Title 5, together with the number of veterans referred and placed in such jobs, and the number of complaints filed under subsection (C)(2) of this section, and the disposition of such complaints.

Section 114 would repeal the Exemplary Rehabilitation Certificate program.

Section 115 makes the amendments of this Act effective October 1, 1982.

TITLE II—EDUCATION ASSISTANCE

Section 201(a) of the bill would add a new subsection (c) to section 242 of title 38. This change would specifically authorize the Administrator to station veterans' benefits counselors at locations away from the VA regional offices.

Subsection (b) would repeal authority presently contained in section 243 which authorizes the Veterans' Representatives (Vet-Rep) program.

The table of sections at the beginning of chapter 3 would be amended to delete the reference to section 243.

Vet-Reps were originally established a number of years ago through administrative action on the part of the VA to assist schools and veterans at a time when there were peak enrollments of veterans attending school under the GI Bill. The administrative action was subsequently formalized in the law in section 243.

At the time the program was established in law, many veterans were experiencing long delays in obtaining their education checks and the Vet-Reps were assigned to establish lines of communications in an effort to correct this as well as other problems. The Vet-Reps were to be present full time on school campuses having large enrollments of eligible veterans and eligible dependents, and were to visit other schools periodically. With the passage of time and the decline in enrollments, the need for these individuals has diminished considerably. At the VA regional offices, veterans' benefits counselors are now effectively performing many of the duties previously accomplished by the Vet-Reps. Thus, the special authority contained in section 243 authorizing this program is no longer required and should be repealed.

Section 202(a) of the measure would amend section 1673(a) to repeal the current GI Bill requirement that vocational schools report on the numbers of their graduates who, during a specified 2-year period, have obtained employment in the field for which the school has provided training.

Subsection (b) would amend section 1723(a) to repeal the same 50-percent employment requirement, set forth in chapter 35, applicable to the dependents' education program area.

Subsection (c) would provide that the repeal take effect on October 1, 1982.

The 50-percent employment requirement was originally enacted in Public Law 93-508 and was designed to prevent and mitigate abuses of the VA's education programs. At the time this provision was placed in the law, there were over 600,000 veterans enrolled in vocational training who were pursuing several thousand courses in these schools. It was determined that many of these courses were not providing training that would allow the veteran to obtain employment following completion. Therefore, in order to assure that the training these veterans received would lead to jobs, the requirement was placed in the law providing that these schools substantiate that at least 50 percent of those who graduated within a specified 2-year period had actually been employed in the field for which trained. This requirement resulted in the disapproval of several hundred courses which could not meet the mandate of the law.

Since that time, the number of courses which have been disapproved has dropped from the initial 25 percent to approximately 3 percent. In addition, the number of veterans pursuing these courses has also dropped—to approximately 129,000 in fiscal year 1981.

Preparing and filing these employment reports is quite costly and necessitates considerable numbers of man-years of effort on the part of schools, the state approving agencies, and the VA. Over the past few years, the Congress has enacted a number of changes which have had the effect of eliminating a considerable number of schools from the reporting requirement. For example, schools are exempt if they can demonstrate that filing the report would result in an administrative hardship on them or if they can show that the number of veterans and dependents enrolled in their courses is minimal. The VA indicates the reporting requirement has had the desired result of reducing the number of courses which have not met the goal of providing jobs and recommends it now be eliminated.

Section 203(a) of the measure would amend section 1673(d) to insert a cross-reference to section 1691(c), which provides that schools in which service personnel pursuing high school completion or GED (general equivalency certificate) courses without charge to their entitlement must comply with the 85-15 veteran-dependent enrollment provisions set forth in section 1673(d).

Subsection (b) would amend section 1691(c) to change the citation from 1673(d) to 1673(d)(1) to reflect a slight recasting made in this latter section by the bill.

In the enactment of Public Law 96-466, the Congress amended section 1691 to permit service personnel, as well as veterans, who lack a high school diploma or an equvialency certificate, to pursue such training without charge to any entitlement to educational assistance they may have under VEAP (chapter 32) or the GI Bill (chapter 34). Schools providing such train-

ing would be required to meet the 85-15 enrollment requirements of section 1673(d). In amending the law, the Congress did not incorporate a cross-reference in this latter section. The Committee believes it would be appropriate to provide the cross-reference for clarification purposes and to assure that this requirement is specifically cited in section 1673(d).

Section 204 of the measure would amend section 1682(e) to correct an oversight which resulted from the enactment of Public Law 96-466. Language was included in that section to require that entitlement for pursuit of a pure independent study program be charged at the half-time rate. This has resulted in an unintended situation where a veteran, who is pursuing this type of study on less than a half-time basis, is charged entitlement at a greater rate than course pursuit. The change made here would merely base the entitlement charge on the actual rate of pursuit.

Subsections (a) and (b) of section 205 of the bill would modify the basis for paying subsistence allowance to incarcerated veterans pursuing programs of vocational rehabilitation under chapter 31 and for paying educational assistances to incarcerated veterans and dependents pursuing programs of education under chapters 34 and 35.

In the enactment of Public Law 96-466, the Congress provided that a veteran, incarcerated in a Federal, State, or local penal institution based upon a felony conviction, would not be paid a subsistence allowance while pursuing a vocational rehabilitation program under chapter 31. The veteran would continue to be paid his or her educational costs.

In the same law, the Congress also provided that a veteran, pursuing a program of education under chapter 34, or a dependent pursuing a program of education under chapter 35, would be limited to his or her educational costs as well.

These limitations were imposed because it was determined that the payment of the educational allowances represented a duplication of benefits, in that the veteran or dependent was already having his or her subsistence provided by the governmental unit in charge of the prison or jail. Moreover, the additional monies received by these individuals were causing problems for prison officials in that the funds often were being used for illicit purposes, such as the purchase of drugs; invited thefts; and resulted in other disciplinary problems for the prison officials.

In the same law, the Congress also provided that where the veteran was in a work-release program or a halfway house, the Administrator would be required to determine whether all of the individual's living expenses were being defrayed by a Federal, State, or local government. If so, the veteran or dependent was barred from receiving the additional subsistence or educational allowance. The VA states this provision has caused administrative problems in having to make these determinations, and has not been cost effective.

The proposal contained in subsections (a) and (b), while retaining the bar to payment of subsistence and limiting the educational assistance allowances to educational costs for incarcerated veterans and dependents, would include individuals in half-way houses or in work-release programs connected with their incarceration. Because of the administrative difficulties and costs regarding the requirements on verification of living expenses required in section 1682(g)(2) the Committee accepts the recommendation to eliminate section 1682(g)(2).

Subsection (c) would amend section 1780(a) to modify clause (6). This provision was added to the law by Public Law 96-466. This provision bars the payment of educational benefits to those veterans and dependents who are incarcerated in a Federal, State, or local prison or jail, for any course to the extent that the tuition and fees are paid under any Federal (other than VA), State, or local program, or for which there are no tuition or fees. This provision is applied in any case where the veteran is incarcerated—whether based upon a felony or a misdemeanor conviction.

This provision has required the Veteran's Administration to make determinations as to the type of conviction, as well as the amount of payments which are being made by some other government unit. The Veterans' Administration states that applying this section to misdemeanor convictions has created administrative problems. Individuals are released from incarceration for a misdemeanor in a short period of time, and the necessity of making needed adjustments in benefits generally in small amounts has not been cost effective.

The Committee, therefore, would have Section 1780(a)(6) apply only in those cases where the veteran or dependent is incarcerated for conviction of a felony.

Section 206 would amend section 1788(a) to permit certain veterans, who are pursuing nondegree vocational programs at institutions which also provide diploma or degree programs, a 10-minute period of time at the end of a laboratory or shop course to go to the next class.

Under current law, such an individual must be in attendance in the last hour of the laboratory or shop portion of the class for the full 60-minute period. This can result in the veteran being late to the next class. The proposal would alleviate this situation.

Those veterans pursuing degree-type or nondegree classroom-theory courses are allowed a 50-minute hour plus the 10-minute interval between classes for course measurement purposes. The change being proposed here would allow the nondegree student sufficient time to move to the subsequent class.

Section 207 would amend section 1790(b) to add a new clause (3) which would allow the Administrator, under certain conditions, to discontinue the enrollment of all eligible veterans and eligible persons in certain courses.

Public Law 95-202 added a new clause (2) to section 1790(b) to require that, where the Administrator took action to discontinue (including to suspend) the benefits of any eligible veteran or eligible person in a course, he must find that the veteran or eligible person is not or was not entitled to such assistance. In addition, this new provision also required the Administrator to concurrently provide written notice to any such veteran or eligible person of the action being taken and to advise the veteran or eligible person that he or she was, thereafter, entitled to a statement of the reasons for such action and the opportunity to be heard thereon.

In the view of the Veterans' Administration, this requirement has unduly prolonged erroneous payments to individuals simply because the initial evidence, although indicating widespread statutory violations, does not implicate every single veteran or eligible dependent enrolled.

The change being recommended here would minimize and prevent overpayments of benefits by allowing the Administrator to discontinue educational assistance en masse where there is evidence that a course fails to meet approval requirements, or where the recordkeeping or reporting practices of the educational institution cannot be relied upon as a basis for continued payment of such allowances. Such discontinuance of benefits would be made only after the school and the State approving agency has been notified of the problem and the school has failed to take corrective action within a reasonable period of time. The veteran or eligible person would be notified that this or her benefits are being affected, the reason for the action being taken, and the right to be heard in the same manner as is required under current law.

The inability of the VA under existing law even to suspend benefits pending investigation of the effect of noted violations has led to many preventable overpayments. This proposal would assist the VA in curtailing such overpayments.

Section 208 of the measure would amend section 1798(e)(3) to delete the requirement that the Administrator report to the Congress annually on the default rate under the VA's education loan program on a school-by-school basis.

The education loan program has, in recent months, been drastically curtailed by law. The compiling of the required school-by-school statisitics has proved to be administratively costly. The VA would continue to report to the Congress once a year on the default rate in this program, but on an overall basis, not by individual schools.

Section 209 would amend section 1622 to permit the Veterans' Administration to utilize the educational assistance account, established for the deposit and disbursement of contributory education funds under the Post-Vietnam Era Veterans' Assistance Program (VEAP), for receipt and payment of funds received from the Department of Defense for the new so-called "901" education program.

In the enactment of Public Law 96-342, the Congress authorized a new educational program for individuals enlisting or reenlisting in the armed services between October 1, 1980, and October 1, 1981. This new program is termed the "901" program. It will be funded by the Department of Defense, but administered by the Veterans' Administration.

The VEAP account is an established automated system which lends itself to the modification required to run the new "901" program. Allowing the VA to deposit funds received from the military services for the 901 program into the VEAP account, while keeping the two funds separate, would enable the VA to use the VEAP account for administration of both programs. Without this authority, the VA would be required to establish a completely manual system for the new program, a situation which, on its face, would make it difficult to administer.

Section 210 of the measure would amend section 1622(d) to strike out "$75" and insert "$100."

In the enactment of Public Law 96-466, authority was granted individuals to make lump-sum contributions to the VEAP fund in addition to, or in lieu of, a regular monthly contribution. The law also provided that these lump-sum contributions would be considered to have been made by monthly contributions from the participant's military pay rate at the rate of $75 per month. In

the same law, the maximum amount an individual contributing monthly could make on such basis was raised from $75 to $100.

Thus, when computing the rate of payment under the lump-sum contribution system, the lower rate of $75 was used, rather than the higher rate authorized under the monthly contributory basis. The change made here would merely equate the lump-sum amount with the monthly amount, thereby equalizing the amount of the monthly benefit the individual may be paid under the formula set out in section 1631(a)(2) of title 38.

Section 211 of the measure would amend section 408(a)(1) of the Veterans' Education and Employment Assistance Act of 1976 (38 U.S.C. 1621 note) by striking out "December 31, 1981, and June 1, 1981" and inserting in lieu thereof "March 30, 1983" and "January 15, 1983" respectively.

On May 30, 1981, the President sent a message to Congress regarding the Veterans' Education Assistance Program in which he stated, "Over the next several months the Administration will be continuing its evaluation and review of both the VEAP and Department of Defense test programs, with a view toward developing legislative recommendations regarding education programs for servicemembers and veterans. In view of this effort, I am recommending that the VEAP program be continued beyond its current termination date of December 31, 1981. This will permit the Administration to complete its review and will provide time for submission of legislative recommendations that I anticipate will be submitted in early 1982.

"Recently, the Veterans' Administration submitted legislation to the Congress that would authorize a 1-year extension of the Veterans' Educational Assistance Program and make certain other adjustments in Public Law 94-502. I urge the Congress to enact this legislation." Therefore, in accordance with the President's request, the changes in the termination dates for this program would be effected by this section.

TITLE III

Miscellaneous provisions and effective dates

Section 301(a) of the measure would amend section 3102(a) to reduce from the current 2 years to 180 days, the period of time within which an individual may request a waiver of recovery of an overpayment made to such individual.

Subsection (b) would provide that the revision set forth in subsection (a) would apply only to notifications of indebtedness made by the Administrator after the date of the enactment of the bill.

When the 2-year period was originally enacted into law, the policy, as shown by the legislative history of this provision, was that veterans should be given at least as much time to request a waiver as a Federal employee who had been overpaid. Since that time, however, the VA benefit overpayment problem has become more critical. The Committee believes that allowing the individual 180 days within which to request a waiver is sufficient. This would mean that the time during which a waiver request could be considered would be a period during which events are fresh, memories relatively unclouded, and witnesses more available. This would also mean the individual would be given a speedier resolution of the matter and the VA would be in a better position to provide needed documents, witnesses, and an explanation while these are close at hand.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I commend the gentleman for this legislation. I certainly support it.

I do have two questions as I look at it. One, the gentleman has alluded to, and that is repealing the requirement that vocational schools report on the number of their graduates who have obtained employment in the field they are receiving training for.

It looks to me that that is a protection so that we do not have these fly-by-night schools. I am sure there is some reason for that, but I would be curious as to the gentleman's explanation here.

Mr. EDGAR. Well, for a long period of time it did provide protection and we think that enough protection has been provided to this point that there are enough checks and balances in the system and that we are getting good reporting in other ways, so that this provision was redtape that these schools had to provide. We have had enough reviews from other agencies that review the technical capabilities of the vocational schools.

We did have a problem with this in past years. I believe that much of that problem has been corrected in that area.

Mr. SIMON. Mr. Speaker, I thank the gentleman and I will take his word on that.

I also note that we repeal the veterans representative program on the campuses. Is this because of the duplication between the two programs and we do not need that?

Mr. EDGAR. I was a very strong supporter of the Vet Rep program, but we discovered that we have gone down to I think one person in the whole country who is a Vet Rep. We just felt that that was such an insignificant program at this point and there were other veterans counselors provided on the campuses that that was no longer needed in law. If it was a program as it was many years ago where it was spread throughout the Nation on an equal basis and Vet Reps were providing the specialized services to the veterans that are so important, we would have surely continued that program, but because other programs have come in and overlapped and because the importance of that particular provision had dwindled administratively, we just felt that it was inappropriate to continue it on the books.

Mr. SIMON. I thank the gentleman. I commend the gentleman for his leadership, as well as my colleague, the gentleman from Mississippi, and I strongly support the bill.

Mr. SAWYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill before us is intended to accomplish the very praiseworthy goal of expanding and strengthening existing programs that were excellent in design but, in practice, fell short of achieving their purposes. I support H.R. 6794 because it acknowledges that veterans' employment problems are a national responsibility, that veterans are suffering from a high incidence of unemployment, and creates a new structure for Federal veterans' assistance programs.

The chairman of the Subcommittee on Education, Training, and Employment of the House Veterans' Affairs Committee, BOB EDGAR, and the subcommittee's ranking minority member, MARGARET HECKLER, have worked with dedication and skill to develop this legislation and I join the full committee's chairman in commending them.

Through many hours of hearings the need for administrative modifications and changes in the language of existing law became clear. One of those changes that is particularly praiseworthy, in my opinion, concerns the Disabled Veterans Outreach program. The primary purpose of this program is to identify disabled veterans in need of employment assistance and help them obtain employment services.

Although it is widely acknowledged that DVOP is highly successful, it has been troubled by funding uncertainties, section 106 of the bill before us is designed to correct that flaw by providing that DVOP will be funded from the general revenues rather than employer taxes.

This provision along with other excellent features of the measure will, I believe, improve the Federal Government's job training and job placement efforts for veterans, and I recommend its unanimous endorsement.

□ 1430

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I strongly support the legislation before us today, the Veterans' Employment and Education Assistance Act of 1982. H.R. 6794 will go a long way toward strengthening existing education programs for veterans and providing an improved and more effective program of job training and job placement for unemployed and underemployed veterans.

Unemployment today among disabled veterans and veterans of the Vietnam era is at an all time high. In June of this year, over 700,000 Vietnam era veterans were looking for work. The unemployment rate for those veterans between the ages of 25 and 29 was a devastating 17.3 percent, almost 7 percentage points higher than that for nonveterans in the same age group. Too many of these unemployed veterans have been laid off during the recent economic slump be-

cause of the "last hired, first fired" practice. While these veterans were serving their country during the longest and most controversial conflict since the Civil War, their nonveteran peers began their civilian careers, thus establishing 2-4 years of seniority over those who were serving in the military.

Further, "Legacies of Vietnam: Comparative Adjustment of Veterans and Their Peers," a report prepared for the Veterans' Administration by the center for policy research and released in March 1981, concluded that:

When background differences between veterans and non-veterans are statistically controlled, veterans still show some residual disadvantage in educational and occupational attainment, especially in the case of vietnam veterans. This leads us to conclude that military service in vietnam had a negative effect upon post-military achievement.

This is a situation that concerns all of us, and I want to commend my colleague, BOB EDGAR, for taking the lead in addressing this critical problem by introducing and developing the legislation before us. BOB's concern for all veterans, particularly disabled and Vietnam era veterans, has been well demonstrated by the long hours and hard work he has put in as chairman of the Subcommittee on Education, Training, and Employment. I also want to commend MARGARET HECKLER, the ranking minority member of the subcommittee, for her contribution to this legislation, and the support of all members of the subcommittee which held a number of hearings in developing the legislation before us today. I also want to thank the ranking minority member of the committee, JOHN PAUL HAMMERSCHMIDT, for his cooperation and assistance on this legislation.

I strongly urge all members to vote in favor of H.R. 6794.

● Mrs. SNOWE. Mr. Speaker, I rise in support of the Veterans Employment and Education Assistance Act of 1982. This bill is designed to greatly improve the job training and job placement programs and educational assistance programs for our Nation's veterans.

We as a nation have a tremendous obligation to the veterans of this country, especially where veteran employment and job opportunities are concerned. As a whole, unemployment is a human tragedy, but veterans have been particularly hard hit by joblessness in recent months. It is discouraging to note that the current unemployment rate among disabled and Vietnam-era veterans is the highest since the end of the Vietnam conflict in 1973. Faced with this fact, I am especially pleased that Congress in making a concerted effort, as evidenced by this bill, to bolster existing job service programs for veterans and secure a consistent funding source for the Disabled Veterans Outreach program (DVOP).

Specifically, the bill would fund through the use of general revenues the highly successful DVOP program. Past evidence has shown that this program has been a tremendous benefit to the veteran. I know that the program in my home State of Maine was so successful that it had essentially became a role model for similar programs across the Nation. I certainly would like to see this tradition continue.

H.R. 6794 sets up a national employment assistance program for veterans. It allows grants to be administered to qualified recipients, including State and community agencies and private, nonprofit organizations, to operate job training, counseling, and placement programs and employment service programs. Authorizations for related research, demonstration programs and technical assistance also are also included in the bill.

The emphasis here is simply on the idea of a community based outlet providing targeted assistance to area veterans in search of jobs.

After sacrificing and contributing so much, our veterans face unemployment in great numbers, but hundreds of thousands are underemployed. I believe that is incumbent upon us to right this terrible wrong plaguing our society, and I am pleased that this legislation is before us today to do just that.

I am proud to be a cosponsor of H.R. 6794, and hope that my colleagues will join me in supporting this worthwhile measure.●

● Mr. CORRADA. Mr. Speaker, I rise in strong support of H.R. 6794, the Veterans Employment and Education Assistance Act of 1982 which introduces innovative changes in veterans employment programs as well as in veterans educational assistance programs.

The bill brings forth a systematic and uniform program administered by the Department of Labor through local State employment service offices to efficiently face the employment needs of our veterans. It also includes adjustments in veterans education programs to strengthen them in line with their objectives of aiding in the readjustment process.

The act is designed to revive our past intensive efforts to expedite the rehabilitation process of our returning servicemen by putting them to work. The record shows that the job counseling, training and placement services we set up for our veterans have not been successful enough. This is particularly true for Vietnam-era veterans whose unemployment level in all age groups dramatically exceeds their nonveterans counterpart and to this day 685,000 of them still remain unemployed. In Puerto Rico, for instance, the general unemployment rate is 24.6 percent while among veterans it exceeds 40 percent.

Even at times when our Nation faces economic difficulties we must not disregard the needs of these brave and faithful citizens. It was at times of uncertainty and despair that they pulled through and answered to our country's call to duty. Times are harder and are bound to get harder, therefore we must redouble our efforts in this quest for their readjustment to civilian life if we are to pull through for them in as much as they did for us. I realize there are no quick fixes or easy solutions to the problem of high unemployment and underemployment among veterans but we must certainly do our most to assist them in recognition for their sacrifices on behalf of our freedom and democracy.

I urge my colleagues to vote for the passage of this legislation.●

● Mr. APPLEGATE. Mr. Speaker, I wish to express my strong support of H.R. 6794, the Veterans' Employment and Education Assistance Act of 1982.

Although this comprehensive measure is important to all veterans in that it will improve job training and job placement assistance for veterans, it particularly addresses the problems faced by Vietnam and disabled veterans. Hearings held by my colleague from Pennsylvania have attested to the existing high unemployment rate among these individuals. Unfortunately, the unemployment and underemployment rate for veterans has soared in our floundering economy.

The unilateral approach contained in this bill—that is, the administration of a systematic uniform Federal program totally geared toward veterans' employment problems—is vital if we are to alleviate this national responsibility. In the long run, the provisions of this bill will not only enhance veterans employment—both in the private sector and at State and Government levels—it will assist the Nation's economy as a whole.

It is my understanding that the bill also makes necessary changes in the administration of the education programs.

I wish to commend the chairman of the Subcommittee on Education and Training, the Honorable BOB EDGAR from Pennsylvania for his dedication to the welfare of this Nation's veterans which has been demonstrated time and time again. I also wish to express appreciation to the chairman of the full committee, the Honorable G. V. (SONNY) MONTGOMERY of Mississippi for his strong and capable leadership.

Mr. Speaker, I urge favorable consideration of this bill.●

Mr. MONTGOMERY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend

the rules and pass the bill, H.R. 6794, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill, H.R. 6794.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

WOLF TRAP FARM PARK ACT

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6875) to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6875

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to provide for the establishment of the Wolf Trap Farm Park in Fairfax County, Virginia, and for other purposes", approved October 15, 1966 (16 U.S.C. 284-284b), is amended by adding at the end the following new sections:

SEC. 4. (a) The Secretary is authorized to make available to the Foundation, in the form of a grant, $9,000,000 to be used for the reconstruction of the Center, subject to the provisions of this section. Such grant shall be made available in increments as needed for such purpose and only if the Foundation has agreed under terms and conditions satisfactory to the Secretary to provide, from non-Federal sources, sufficient contributions on a timely basis to complete the reconstruction of the Center.

"(b) The Secretary may make loans to the Foundation to the extent needed to complete the reconstruction of the Center in an amount equal to twice the amount of non-Federal contributions received, and provided, by the Foundation for such reconstruction work. The total amount of such loans may not exceed $8,000,000. Loans made under this subsection shall be repaid in full, with interest on any unpaid obligation at a rate determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketing obligations of the United States with remaining periods to maturity comparable to the maturity of the loan, plus such additional charge, if any, as the Secretary may determine, for the purpose of covering other costs of servicing the loan. In determining the terms and conditions governing any loan, the Secretary shall fix a term of not more than five years from the date the loan agreement is executed.

"(c) No grants or loans may be made under this section unless the Secretary has entered into a written agreement with the Foundation under which the Foundation agrees—

"(1) to expend all funds for the reconstruction of the Center (and for construction or reconstruction of any related structures or fixtures) only in accordanace with circulars published by the Office of Management and Budget applicable to Federal grants to nonprofit organizations, and in accordance with the provisions of the Davis-Bacon Act (40 U.S.C. 276a-a7);

"(2) to comply with such other terms and conditions as the Secretary deems appropriate; and

"(3) to maintain, during the term of the cooperative agreement described in section (5), and at the Foundation's expense, insurance on the Center respecting such risks, in such amounts, and containing such terms and conditions, as are satisfactory to the Secretary. Any repairs or reconstruction carried out with Funds obtained from the receipt of the proceeds of any such insurance shall be subject to the approval of the Secretary.

"(d) The Secretary shall be responsible for overseeing the reconstruction and shall have final approval over the plans for, and location and design of, the Center, and the Foundation shall be responsible for managing the construction activities, including the selection (in accordance with the requirements referred to in paragraphs (1) and (2) of subsection (c)) of persons to perform architectural, engineering construction, and related services.

"(e) No grants or loans may be made under this section unless the Secretary has received what the Secretary deems to be adequate written assurance from the Administrator of the Federal Aviation Agency that any easement granted to the Commonwealth of Virginia by the Administrator for construction of the Dulles Toll Road will contain conditions acceptable to the Secretary (including acceptable noise and air pollution standards) legally enforceable by the Administrator and by the Secretary which are adequate to protect the park from undue noise and air pollution and visual degradation attributable to such toll road both during and after its construction, and will also contain legally enforceable assurances that the Commonwealth of Virginia will promptly take such steps as may be necessary after such road is contructed to ensure that noise and air pollution levels do not exceed the standards specified in the easement. Such steps may include a partial or total ban on truck traffic on the toll road or other mitigation recommended by the Secretary or the Administrator.

"(f) The Secretary may also provide support services, as requested by the Foundation, on a reimbursable basis, for purposes of reconstruction of the Center.

"SEC. 5. (a) The Secretary is authorized and directed to enter into a cooperative agreement with the Foundation respecting the presentation of performing arts and related educational and cultural programs at the Center, and in such other areas of the park as may be agreed to. The Secretary may provide technical and financial assistance under such a cooperative agreement for such purposes, pursuant to such terms and conditions as he deems appropriate.

"(b) As a condition of entering into a cooperative agreement under this section, the Secretary shall require that—

"(1) the Foundation maintain the insurance described in section 4(c)(3) of this Act; and

"(2) the Foundation maintain its status as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from taxation under section 501(a) of such Code.

"(c) A cooperative agreement under this section shall provide that—

"(1) the Secretary and the Comptroller General of the United States or their duly authorized representatives shall have access to any pertinent books, documents, papers, and records of the Foundation to make audits, examinations, excerpts, and transcripts;

"(2) the Foundation shall prepare an annual report to the Secretary, which shall also be submitted to the appropriate committees of the United States House of Representatives and the United States Senate, summarizing the activities of the previous year (together with a comparison of goals and objectives with actual accomplishments) and presenting a plan for the forthcoming year; and

"(3) such cooperative agreement may be terminated at the convenience of the United States if the Secretary determines that such termination is required in the public interest.

The cooperative agreement shall contain such other terms and conditions as the Secretary deems appropriate. Until such cooperative agreement is entered into, nothing in this section shall be construed to affect or impair the validity of the agreement between the National Park Service and the Foundation dated September 16, 1980. Such agreement shall remain in force and effect until terminated under the terms and conditions of such agreement or until an agreement is entered into under this section. Nothing in this section shall be construed to affect the authority of the Secretary under any other provision of law to enter into a contract or an agreement, not conflicting with the cooperative agreement described in this section, with any other organization or entity with respect to the administration of the park.

"SEC. 6. All right, title, and interest in the Center shall be vested in the United States. Nothing in this Act shall be construed to provide that the Foundation shall be considered to be a Federal agency or instrumentality for purposes of applying any law or regulation of the United States or of any State.

"SEC. 7. Following disbursement of any grant under this Act for the reconstruction of the Center, the Secretary shall submit quarterly reports to the appropriate committees of the United States House of Representatives and the United States Senate setting forth the progress of the reconstruction, any present or anticipated problems of any type, the financial projections for remaining work, and the progress made by the Foundation in raising funds for purposes of the reconstruction. The report shall set forth quarterly goals respecting the reconstruction of the Center and shall compare the performance during the prior quarter to the goals set forth for that quarter.

"SEC. 8. (a) The Secretary shall cooperate with, and seek cooperation from, other Federal, State, and local agencies (including the Federal Aviation Administration) to protect the park from undue noise intrusions, air pollution, and visual degradation.

"(b) The Secretary shall monitor air and noise pollution within the park which is associated with the Dulles road corridor (including the airport access and toll roads) and shall notify the Federal Aviation Administration, the Commonwealth of Virginia, and the appropriate committees of Con-

gress if, after conferring with the Administrator of the Federal Aviation Administration, the Secretary finds that such air or noise pollution is exceeding the standards set forth in section 4(e). Within sixty days after any such notification, the Administrator of the Federal Aviation Administration shall take steps to reduce air or noise pollution so as to conform to such standards. The Secretary or the Foundation may bring an action in the United States District Court for the District of Columbia to enjoin any violation by the Commonwealth of Virginia of the easement referred to in section 4(e).

"SEC. 9. A general management plan for the park shall be prepared and periodically revised in a timely manner in accordance with the provisions of section 12(b) of the Act of August 18, 1970 (84 Stat. 825: 16 U.S.C. 1a through 1a-7). Such plan shall be submitted to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate no later than January 1, 1984, and such revisions shall be submitted to such committees of the Congress in a timely manner.

"SEC. 10. There is authorized to be appropriated not more than $17,000,000 to carry out sections 4 to 5 of this Act. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts.

"SEC. 11. As used in this Act, the term—

"(1) 'Secretary' means the Secretary of the Interior.

"(2) 'Park' means the Wolf Trap Farm Park established under this Act, including the Center.

"(3) 'Center' means the Filene Center in the Park. Such term includes all real property and fixtures which are within or directly related to the Filene Center.

"(4) 'Foundation' means the Wolf Trap Foundation for the Performing Arts organized pursuant to the District of Columbia Nonprofit Organization Act.

"SEC. 12. This Act may be referred to as the 'Wolf Trap Farm Park Act'.".

The SPEAKER pro tempore. Is a second demanded?

Mr. LUJAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from New Mexico (Mr. LUJAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, H.R. 6875 would authorize the Secretary of the Interior to provide financial assistance to the Wolf Trap Foundation for the reconstruction of the Filene Center, located at Wolf Trap Farm Park, Va., a unit of the national park system. The bill also would direct the Secretary to enter into a cooperative agreement with the Foundation regarding programing at the Filene Center.

When fire destroyed the Filene Center at Wolf Trap Farm Park, Va., on April 4, 1982, it was, as renowned opera star Beverly Sills testified:

An international loss . . . and mustn't be treated as a minor casualty. (Losing it) is a catastrophe.

During the 10 years that the Filene Center at Wolf Trap was in operation, 5½ million people have enjoyed more than 23,000 artists from throughout the United States and abroad in some 900 separate performances of nearly 600 different productions. The Center accommodated 3,500 people under the roof, with room for 3,000 more outdoors on the adjoining lawn. In addition, millions of Americans have enjoyed the series of televised performances called "In Performance at Wolf Trap."

Established by act of Congress in 1966, Wolf Trap Farm Park encompasses approximately 145 acres in Fairfax County, Va., 13 miles from Washington, D.C. About 100 acres of the park were donated to the United States by Mrs. Jouett Shouse. Mrs. Shouse also donated five usable buildings and funds for construction of the Filene Center.

The park, including the Filene Center, is administered by the Secretary of the Interior as a unit of the national park system. The Wolf Trap Foundation, established in 1968 at the request of the Secretary, handles the presentation of performing arts programs under a cooperative agreement with the National Park Service.

Because the Filene Center was a Federal facility, the Filene Center was considered "self-insured," meaning that the Federal Government would bear the costs of its repair or replacement in the event of its damage or loss. The estimated cost of reconstruction is $18 million, according to current National Park Service figures.

I might add that if anyone thinks that that is an enormous sum for reconstructing this type of facility, I had occasion this summer to attend a performance at the Blossom Music Center in my community, which is the summer home of the Cleveland Orchestra. It is a magnificent outdoor performing arts center.

I asked the manager and architect how much they estimated it would cost to replace the building at the Blossom Music Center and they said $36 million. That is just exactly twice what it is estimated to cost to replace the Filene Center in Wolf Trap Farm Park.

Mr. Speaker, the Wolf Trap Foundation has agreed to raise sufficient funds from private contributions to pay for half the estimated costs of the reconstruction if the Federal Government will provide the other half. The Foundation would manage the construction activities, under the close supervision of the National Park Service. Even though the reconstructed facility will be Federal property, the foundation has agreed to maintain insurance coverage for the new facility.

The Subcommittee on Public Lands and National Parks held 2 days of hearings on the legislation. Concerns were expressed about the possible adverse environmental effects—especially noise—on the new Filene Center resulting from an adjacent toll road proposed to be built by the Commonwealth of Virginia. The toll road would be parallel to the existing Dulles Airport access road under terms of an easement to be granted by the Federal Aviation Administration. It would pass within 300 feet of the original Filene Center site.

Concerns were also expressed about the ability of the Foundation to repay the loan, and the appropriate role of the Foundation with respect to National Park Service.

As a response to these concerns, a detailed and comprehensive amendment in the nature of a substitute was approved by the full committee. Basically, the substitute does the following:

First. It provides more precise controls on the use of Federal funds for the reconstruction, including a requirement that any loans be provided only so as to match, on a 2-to-1 basis, funds raised by the Foundation. It also reduces the total authorized loan authority from $9 million to $8 million. The substitute also clarifies the respective roles of the National Park Service and the Foundation in the reconstruction effort.

Second. It requires that legally enforceable measures be taken to protect Wolf Trap from the impact of the Dulles road corridor, particularly from the proposed new toll road.

I might say those measures would be primarily the erection of sound absorbing barriers between the road and Wolf Trap Park.

The substitute also requires that the Secretary monitor air and noise levels at Wolf Trap after the toll road is constructed.

Third. It provides for development of a cooperative agreement between the National Park Service and the Wolf Trap Foundation for the presentation of performing arts and related educational and cultural programs, and specifies a number of requirements to be included in the agreement.

Before closing, I would like to thank several people who helped on this legislation, most particularly its sponsors, Mr. UDALL, Mr. LUJAN, and Mr. WOLF, and several Members of the Interior Committee who raised important concerns, including Mr. VENTO, Mr. WILLIAMS, Mr. KILDEE, Mrs. BYRON, Mr. WEAVER, Mr. CLAUSEN, and Mr. BROWN.

I would also like to thank the staff who worked so hard on this bill, including Loretta Neumann, Clay

Peters, Mark Trautwein, Janet Chisholm, Senellie Singeo, and Barbara Phillips of the committee staff, and Rick Healy of Mr. VENTO's staff.

Last but no means least, I would like to thank Mrs. Jouett Shouse, whose great contribution made Wolf Trap possible, and representatives of the Wolf Trap Foundation including G. William Miller, Carol Harford, and Robert Mendelsohn. Also, from the Interior Department, Jack Fish, Jack Benjamin, Ben Biderman, and Ross Dembling.

Mr. Speaker, I urge all the Members of the House to support this legislation.

Mr. LUJAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to commend the gentleman from Ohio for his patience and leadership on this legislation, and also the staff, who worked very hard.

Mr. Speaker, the legislation now before us represents a great deal of work by the Interior Committee to perfect and fine tune a bill which authorizes Federal aid in the reconstruction of the Filene Center Theater at Wolf Trap Farm Park, in Virginia.

The Filene Center was originally built over a decade ago with private funds. It and the land upon which it sits, in excess of 100 acres, was donated to the Federal Government, and is now a unit of our national park system operated by the National Park Service as the Wolf Trap Farm Park. The Wolf Trap Foundation works in close cooperation with the National Park Service, and the foundation is principally responsible for providing the programs scheduled for the center. The entire arrangement represents a close cooperative relationship between the Government and the private sector.

After the catastrophic fire of last April which totally destroyed the center, the administration proposed legislation which embodied a partnership in cost sharing between the Government and the Wolf Trap Foundation; the center would be rebuilt on a 50-50 cost sharing basis. H.R. 6875, as initially introduced, embraced this cost-sharing approach. The legislation before us, while embodying a totally new text, preserves that 50-50 cost-sharing approach. However, the current bill text is much more detailed in the provisions of how this partnership will work. It endeavors to more precisely define responsibilities, timetables, construction and performance standards, and later operational arrangements for the overall park, including the new center itself. This bill is designed to provide the best working arrangements between the Government and the foundation, and hopefully protects with sensitivity and care, the Government's financial investment.

Mr. Speaker, a great deal of credit for the well-thought-out details of this bill is deserved by the chairman of the Subcommittee on Public Lands and National Parks, the Honorable JOHN SEIBERLING, and particularly by his staff person, Loretta Neumann. The hearings and further staff investigations brought forth a great many details of concern, and the bill provisions represent an effort to deal with these matters.

Mr. Speaker, while I believe that both the bill and the committee report quite comprehensively address most matters related to the rebuilding, there are a number of matters which I believe deserve further comment.

A significant concern has developed with regard to possible extraneous noise intrusion problems coming upon the center and adversely affecting the performances, emanating from the nearby Dulles Road corridor—airport access and yet-to-be constructed toll road. In order to minimize that type of problem, and also to minimize the extent and cost of mitigation effort to be undertaken by the highway interests, it is crucially important that the site chosen for the reconstruction of the center be located in the best location within the park to separate it as far as possible from highway noise.

Several alternate locations have been considered, but the long favored choice of the foundation is to return to the original site, some 300 feet from the existing highway corridor. The alternate sites are farther distance from the corridor. There has been some concern that the foundation may desire a return to the original site more on a basis of sentiment than on a basis of it factually representing the best choice with regard to the most freedom from extraneous noise conflict. It is crucially important that the Federal investment here be amply protected by assuring that the most noise-free site be chosen, unless the difference from other sites is only marginally better and/or other factors such as increased cost strongly override such a choice. The language of the bill (section 4(d)) which gives final reconstruction decisions to the Secretary—particularly as to location and design—was strengthened by the full committee to emphasize this very concern, and the feeling of the committee is strong and absolute that the Secretary fully and purposefully exercise his authority here to assure that the final decision as to location and design for the center is made by him with total assurance that it is in the best interests of maximum reduced conflict with extraneous noise, and maximum beneficial internal acoustical properties. It well may be necessary for even more noise measurements, analysis, and evaluations to be made, beyond those already completed, in order to totally assure the proper conclusion as to the best location and design.

The Department of Transportation and the Federal Aviation Administration should check this matter very closely as well, as their interests have much at stake in the final center location and design decisions. They will have to arrange and pay for necessary mitigation from unacceptable noise, and they should help assure the minimization of such potential conflict and difficulties by assuring that the final reconstruction site is the best correlated to minimal noise conflict.

The final point I wish to make has to do with the cooperative relationship between the National Park Service and the Wolf Trap Foundation which is so essential for the optimum operation of the overall park. The bill provides for a cooperative agreement to constitute the basic document for setting forth this relationship, and such an agreement is already in place at the moment, and is working. Among other essential ingredients, it is important that any new agreement address such subjects as both entities keeping each other totally informed of the other's planned public activities for the park, in a timely manner; the disposition and handling of food service and similar typically concession type operations; the responsibility of all operational costs for all aspects of the park; and the proper financial separation of the foundation's park-related operations from its nonpark operations, as it relates to the overall Wolf Trap Farm Park operation. In regard to the latter, it is important that the foundation's operation of nonpark properties such as "the Barns" be properly financially and otherwise separated from its Government-related Wolf Trap Farm Park operations. To the extent there are current questions or problems related to these types of matters, the current cooperative agreement should possibly be amended.

Mr. Speaker, as I have already said, I believe this is a good and responsible bill. I urge my colleagues to lend their support to its adoption by the House.

Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. WOLF).

Mr. WOLF. Mr. Speaker, I rise in support of the bill.

Mr. Speaker, before I make my statement, I want to pay special thanks to Chairman SEIBERLING and Chairman UDALL and Congressman LUJAN. The gentleman from Ohio (Mr. SEIBERLING) and the gentleman from New Mexico (Mr. LUJAN) have really made a difference in getting this out in a very quick and efficient manner. Had the Congress gone home before it acted, I think it would have meant that Wolf Trap would not be open

either next year or the year after that, probably.

So before I begin, I want to thank both of those gentlemen and their staffs for the great job they have done.

Mr. Speaker, I am pleased today to rise in support of this legislation, H.R. 6875, which authorizes the Secretary of the Interior to provide financial assistance for the reconstruction of the Filene Center, located at Wolf Trap Farm Park, a National Park Service facility in northern Virginia. This bill is the product of an agreement between the administration and the Wolf Trap Foundation to secure funding on a private/public partnership basis for the prompt rebuilding of the performing arts center which was destroyed by fire in April. Under this agreement, the Federal Government and the Wolf Trap Foundation are sharing the cost through a $9 million grant and an $8 million loan, with interest, to the foundation.

This effort between the Federal Government and the Wolf Trap Foundation will allow the Filene Center to be rebuilt at a cheaper cost than the Government alone would have been required to pay, since the private sector is sharing the cost. Under this bill, the prompt rebuilding of the Filene Center can begin which will also mean a cost savings to taxpayers since inflation and other factors would substantially add to the cost of a long-term government-only project.

Because the Federal Government owns and operates this park facility, I believe there exists an obligation for Federal involvement in its rebuilding. As a self-insurer, the Federal Government would have, in time, financed this project. Moreover, H.R. 6875 contains a provision to secure and maintain satisfactory insurance on the Filene Center, at the Wolf Trap Foundation's expense, for so long as the foundation has a cooperative agreement with the National Park Service.

Wolf Trap Farm Park Filene Center has provided evenings of great entertainment for millions of vistors from across the country and around the world besides serving residents in the Washington metropolitan area. The active interest and involvement of individuals and private businesses in this cooperative partnership is a clear expression of dedicated participation resulting in legislation signifying effective government working with, and for, the people.

I support passage of this bill as favorably reported by the Interior Committee and urge my colleagues to join in supporting this bill.

□ 1445

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. WOLF. I yield to my colleague from Virginia.

Mr. PARRIS. Mr. Speaker, I appreciate the gentleman yielding, and I want to associate myself with the remarks of the previous speaker, particularly those of my colleague from Virginia, Mr. WOLF.

In a typically modest manner, he did not mention his literally untiring efforts on behalf of the reconstruction of Wolf Trap since the date of this tragic fire. I just want to thank him publicly for his leadership in the passage of this legislation and for this facility, which has been such a force in the cultural community of Northern Virginia.

Mr. WOLF. I thank the gentleman.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. WOLF. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I just simply want to echo what our colleague from Virginia (Mr. PARRIS) said. We accept all the accolades and all that for doing our jobs. After all, the bill comes before us in the committee and we act on it, but the gentleman in the well, the gentleman from Virginia (Mr. WOLF) certainly deserves most of the credit. He kept after us and after us and after us until we finally got it done, and he deserves a lot of the credit.

Mr. WOLF. I thank the gentleman very much for those comments.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I just wanted to take a brief moment to extend to the chairman of the subcommittee, Mr. SEIBERLING, and to our ranking member of the full committee, Mr. LUJAN, my own personal appreciation for the kind of attention given to the scheduling of the hearings and the movement on this reconstruction of the Wolf Trap facility.

I think those of us who have had the privilege of attending some of the events that have occurred out there have come to recognize that this is a true national treasure, so it is to that end that the reconstruction of Wolf Trap, which was in fact a sort of local disaster because of the fire, has the potential of having that new beginning and rebirth of the activity that made it the very fine facility it has been, and has attracted so many of the great talents from throughout the Nation and, in many cases, the world, to come to the Washington, D.C., area to add to the culture, to the arts, and the quality of performance we have observed.

I certainly want to extend my appreciation for the leadership of the committee, and also my appreciation to the gentleman from Virginia (Mr. WOLF) who certainly has, as has been stated, done yeoman work in presurring us to advance this legislation and to consider it here on the floor.

● Mr. BROYHILL. Mr. Speaker, the House of Representatives today has before it legislation which would provide a grant of $9 million and loans of $8 million to the Wolf Trap Foundation for the reconstruction of the Filene Center.

There is no other city in the United States which attracts as many visitors as Washington, D.C. As the Capital of our Nation, the people of Washington, D.C., have always been proud of its unparalleled cultural activities. The Filene Center at Wolf Trap Farm Park is recognized around the world as a great forum for the performing arts. It has hosted 23,000 artists and almost 6 million people since its opening in 1972.

The Wolf Trap farm was donated to the Federal Government by Mrs. Kay Shouse. Her generosity and the generosity of thousands of citizens combined with past appropriations from Congress has resulted in one of the finest outdoor parks in the Nation. This, combined with the Filene Center, a unique facility for the performing arts, makes Wolf Trap second to none in the country.

When fire destroyed the Filene Center, the Wolf Trap Foundation initiated a massive fundraising effort to rebuild the Center. The private sector is committed to raising half of the funds required. Since the Filene Center is a Federal facility and the Federal Government does not insure its property, I rise in support of this action to help restore Wolf Trap to its status as a great forum for the performing arts.●

● Mr. McCLORY. Mr. Speaker, one of the great tragedies of this century—certainly a monumental loss to our area and to the whole institution of American culture—was the disastrous destruction by fire of the Filene Center at the Wolf Trap Farm Park.

This great facility, made possible largely through the generosity and dedication of Catherine (Mrs. Jouett) Shouse, has served to entertain and enrich the lives of millions of Americans who have attended the musical and dramatic performances at this great cultural facility.

Mr. Speaker, my wife Doris and I have personally attended many of the programs at Wolf Trap, and we have participated in the activities with many public-spirited citizens who have supported the facilities at Wolf Trap. We are aware individually of the great benefits which have been derived by those who have visited Wolf Trap and have attended performances both within the enclosure of the Filene Center or on the grounds which surrounded this structure. Wolf Trap rivals some of those other comparable areas such as Ravinia Park near Chi-

cago, Robin Hood Dell near Philadelphia, Tanglewood near Boston, and the Hollywood Bowl near Los Angeles.

If permitted to have been insured, the funds would probably already be available and substantial reconstruction would now be in progress. However, being a Federal facility and, therefore, self-insured by the U.S. Government, the pending legislation, H.R. 6875, is necessary in order to provide a substantial portion of the financing for a new Filene Center. Certainly, no more enduring investment could be approved by this Congress and no more far-reaching benefits could be derived from any Federal appropriation or expenditure than those which are authorized by this legislation. Mr. Speaker, I commend Catherine Shouse on her great courage and determination to see that the Filene Center at Wolf Trap is rebuilt. She and the Center's Executive Director, Carol Harford, through their ingenuity and persistence have been able to maintain continuity in the cultural programs at Wolf Trap this year in a portable structure on loan from the Government of Saudia Arabia. Passage of the Wolf Trap Farm Park Act will assure that the Congress and the administration recognize the need to reestablish the permanent facility which can enable Wolf Tarp to fulfill its great cultural role in our area and our Nation.

Mr. Speaker, I urge the Members to give their wholehearted support to this measure.●

● Mr. UDALL. Mr. Speaker, today I am most pleased to offer for the consideration of the House H.R. 6875, the Wolf Trap Farm Park Act. I am sure that all of us will recall that on the night of April 4, 1982, the magnificient Filene Center at Wolf Trap Park was destroyed completely by fire. This was a tragic event for lovers of the performing arts not only in the Washington metropolitan area but also for those around the world. The Filene Center was certainly one of the most beautiful and cherished outdoor amphitheaters in the world and the programing there—from opera to jazz, from ballet to Chinese acrobats—provided something for everyone at a reasonable price.

The tragedy was further underscored by the fact that what was destroyed was a living monument to cooperation between generous American citizens and the Federal Government. For the Wolf Trap Farm Park became a unit of the national park system in 1966 when about 100 acres of rolling northern Virginia land, along with five buildings, were donated to people of the United States by Mrs. Jouett Shouse. The Filene Center itself was financed by private contributions and donated to the Federal Government. The partnership continued over the years as the Wolf Trap Foundation, a nonprofit group of prominent citizens representing the best in the fields of the performing arts, cultural and educational affairs, business and Government, conducted programing at the Filene Center and elsewhere in the park at the request of the Secretary of the Interior.

Now that fire has destroyed this immensely popular facility, today we are drawing on that same spirit of cooperation and dedication to rebuild the Filene Center. Because the Filene Center was owned by the Federal Government it did not carry private insurance. Instead, it was self-insured by the Government—in other words, the Government itself assumed the responsibility for replacing it in the event of a tragedy such as the one that occurred on the night of April 4.

As we soon discovered, the cost of rebuilding the Filene Center under this self-insurance policy would not be cheap—the latest estimates put the price tag at somewhere around $18 million. So the Park Service and the Wolf Trap Foundation have agreed to split the bill down the middle. In other words, the Federal Government will put up $9 million to reconstruct its facility, while the foundation pledges to generate from private sources the remaining $9 million. Already it has raised nearly $2 million. H.R. 6875 confirms this agreement and, in addition, provides that the Government may make loans to the foundation of up to $8 million at a 2 to 1 matching ratio, all loans to be repaid the Government within 5 years. In addition, the bill requires the foundation to maintain private insurance on the Filene Center so that we are never faced with this situation again.

The bill contains numerous provisions assigning responsibility for all reconstruction activities and guaranteeing close oversight by the responsible committees of the Congress. It also contains requirements that the Dulles highway corridor, about to be joined by a new four-lane toll road that will come within 300 feet of the Filene Center, not impair the usefulness of the Center, especially by generating intolerable noise.

Finally, the bill formally recognizes the unique partnership between the National Park Service and the Wolf Trap Foundation by instructing the Secretary to enter into a cooperative agreement, similar to the one now in effect, regarding the presentation of performing arts programing and related educational and cultural activities at the park.

Mr. Speaker, this is an excellent bill that we have worked on long and hard to guarantee that the magnficient Filene Center is returned to the people but that it be done at minimal cost to the taxpayers and that all activities associated with the reconstruction be closely scrutinized by the Park Service and Congress. The bill is supported by the adminstration and was reported out of the Interior and Insular Affairs Committee without opposition. I urge my colleagues to support this bipartisan effort.●

Mr. LUJAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SEIBERLING. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) to suspend the rules and pass the bill, H.R. 6875, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks in the RECORD on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

GRAZING IN CAPITOL REEF NATIONAL PARK

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1872) to amend the act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phaseout schedule, and for other purposes, as amended.

The Clerk read as follows:

S. 1872

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Where any Federal lands included within the boundary of Capitol Reef National Park are legally occupied or utilized on the date of enactment of this Act for grazing purposes, pursuant to a lease, permit, or license which is—

(1) for a fixed term of years issued or authorized by any department, establishment, or agency of the United States, and

(2) scheduled for termination before December 31, 1987,

notwithstanding the provisions of section 3 of the Act of December 18, 1971, entitled "An Act to establish the Capitol Reef National Park in the State of Utah" (85 Stat. 740; 16 U.S.C. 273b), the Secretary of the Interior shall allow the persons holding such grazing privileges (or their heirs) to retain such grazing privileges until December 31, 1987.

SEC. 2. The Secretary of the Interior, acting through the Director of the National Park Service, shall take such steps as may be necessary to, within ninety days after the enactment of this Act, enter into a contract

with the National Academy of Sciences for the purpose of conducting a study of grazing in Capitol Reef National Park and vicinity to:

(1) determine the historic and current impact of grazing upon the natural ecosystem and cultural resources of the park;

(2) determine the impacts of grazing upon visitor use within the park;

(3) evaluate alternatives to grazing within Capitol Reef National Park including means to increase grazing carrying capacity on adjacent Bureau of Land Management lands;

(4) determine the economic impact upon grazing permit holders, and on the local economy, if such permits were terminated; and

(5) include such other information and findings as may be deemed necessary by the Director of the National Park Service.

Such study shall be conducted in accordance with the best scientific methodology (as set forth by the National Academy of Sciences) and shall be transmitted by the National Academy of Sciences to the Committee on Energy and Natural Resources of the United States Senate, to the Committee on Interior and Insular Affairs of the United States House of Representatives, and to the Director of the National Park Service no later than January 1, 1987. Progress reports regarding the study shall be transmitted to the above Committees on January 1, 1984, and January 1 of each year thereafter.

SEC. 3. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Nothing in this section shall be construed to prevent the Secretary of the Interior from utilizing, for purposes of the contract referred to in section 2, funds which are available to the Secretary for such purposes under authority of law.

The SPEAKER pro tempore. Is a second demanded?

Mr. HANSEN of Utah. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from Utah (Mr. HANSEN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 1872 would direct the Secretary of the Interior, acting through the Director of the National Park Service, to take appropriate action during 90 days, to execute a contract with the National Academy of Sciences for the purpose of conducting a 4-year study of grazing at Capitol Reef National Park, in the State of Utah. In addition, the bill would allow the persons currently holding grazing privileges which would be subject to termination, under existing law, before December 31, 1987, to retain those privileges until that date.

Capitol Reef National Park was established by the act of December 18, 1971, which redesignated the Capitol Reef National Monument previously established by Executive order, as a national park. The 1971 act provided that the Secretary was to allow holders of existing grazing permits and their heirs to continue to exercise those permits during the term of the permit and one period of renewal thereafter.

The first of the grazing permits within Capitol Reef National Park were scheduled for termination during 1982.

Hearings were held by the Subcommittee on Public Lands and National Parks on S. 1872 and on a similar bill, H.R. 5892 introduced by our colleague from Utah, JIM HANSEN, on August 10, 1982. Both bills would have extended grazing privileges in the park, held by current permittees through the life of the permittee and the life of any family heir. Testimony presented at the hearing convinced the subcommittee that there was insufficient information regarding the problems of grazing within Capitol Reef National Park to overturn the existing law. Accordingly, the Committee on Interior and Insular Affairs adopted the language we have before us today.

Mr. Speaker, I believe the bill, as amended, provides the means to acquire the information that the Congress will need to properly consider this complex problem, and maintains the status quo as far as the existing permittees are concerned until such time as the Congress does act after receiving the appropriate information from the National Academy of Sciences. I recommend that the House act favorably on this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. HANSEN of Utah. Mr. Speaker, I rise in support of S. 1872, and I yield myself such time as I may consume.

Mr. Speaker, if you look at the history of this particular park we are looking at today, originally this was a national monument, and during the Johnson administration it was changed to a park. At that particular time it was worked out in the House and the Senate to be 40,000 acres, and later it was changed in the last 90 minutes of President Johnson's term to be 245,000 acres.

So, here we find in two little counties, Wayne County and Garfield County in Utah, that their main support is agriculture. The main part of the agriculture is grazing Hereford cattle. We now find that phasing these people out, these ranchers, who since 1880 have depended upon this particular livelihood, which is the tax base of these two counties, and those folks who come from the East, I do not know if they can appreciate the size of these counties where possibly the largest city is 600 people and some areas have just received electricity 10 years ago, now find that the tax base will be seriously eroded.

Contrary to people's belief, people coming through the area in the way of tourism do not add anywhere near the amount of money that should be expected. Therefore, if we look at this group of ranchers and find them in a situation of, how do they take care of this ranch. Those Members who have been through this Capitol Reef area will find that there is only a very small part of it that the tourist actually stop to look at; a beautiful place of rocks in an area where most of it is not even accessible unless it is by four-wheel drive vehicles which now are eliminated because of various reasons, and they have to go in by horseback.

It is these areas that are inaccessible where we are finding the cattle that are grazing. I have a hard time believing that a few white-faced cattle in any way take away from the esthetics of this beautiful area.

Therefore, I appreciate the work of Chairman SEIBERLING, that he has seen fit to hold these hearings to extend the livelihood, the very lifeblood of Wayne County and Garfield County, that they can continue with the base as it is looked at by the National Academy.

I would also like to point out that when we are asked the question are we hurting the range, can anyone imagine a man whose very livelihood depends on this range, having those cattle in there, that he would in any way desecrate or hurt in any way, shape or form this particular range? These are the custodians and the stewards of it. These are the people that have a greater interest in it than any range ecologists or any environmentalists or any person from anywhere in the world. I certainly cannot believe that these people would want to hurt it in any way, shape or form.

Therefore, I am happy and pleased that we are able to get it this far, and I hope that this will go through because if it does not make it, we have in effect slit the throats of 41 families and the whole economic base of two counties. I feel that this is a reasonable, prudent thing, and hope it will be passed. I urge this body to pass it.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. HANSEN of Utah. I yield to the distinguished ranking minority member of our committee, the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, when Capitol Reef National Park was authorized by the Congress in 1971, it provided for the phaseout of commercial livestock graz-

ing to occur in following years. Such livestock grazing is traditionally considered to be antithetical to the objectives of the preservation of natural ecosystems in national parks, and this policy and philosophy contributed to the phaseout rationale adopted in the 1971 act.

The bill before us, however, proposes to extend the phaseout deadline by 5 years, which would permit continued grazing operations by a number of affected persons during that period. During the first 4 years of that period, a professional study would be conducted by the National Academy of Sciences, to determine the effect of the grazing on the natural ecosystem and on visitor use, and to determine the economic effect of a phaseout on the local economy and on the permit holders.

Mr. Speaker, this is a simple bill, and I have no further comments to make on it.

Mr. SEIBERLING. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HANSEN of Utah. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass the Senate bill, S. 1872, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The title of the Senate bill was amended so as to read: "An Act to provide for a study of grazing phaseout at Capitol Reef National Park, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks in the RECORD on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PELL GRANT MODIFICATIONS

Mr. SIMON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7048), to require a separate family contribution schedule for Pell grants for academic years 1983-84 and 1984-85, to establish restrictions upon the contents of such schedule, and for other purposes, as amended.

The Clerk read as follows:

H.R. 7048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

MAXIMUM PELL GRANT

SECTION 1. Notwithstanding section 411(a)(2) of the Higher Education Act of 1965, the maximum Pell Grant a student may receive for academic year 1983-1984 under such Act shall not exceed $1,800 or 50 per centum of the cost of attendance (subject to section 3 of this Act) at the institution at which the student is in attendance.

SEPARATION OF PELL GRANT FAMILY CONTRIBUTION SCHEDULE FROM CAMPUS-BASED PROGRAMS

SEC. 2. The Secretary of Education shall establish or approve separate systems of need analysis for academic year 1983-1984 and for academic year 1984-1985 for the programs authorized under subpart 2 of part A, part C, and part E of title IV of the Higher Education Act of 1965.

COST OF ATTENDANCE

SEC. 3. Notwithstanding any other provision of law, the cost of attendance criteria used for calculating eligibility for and the amount of Pell Grants for academic years 1983-1984 and 1984-1985 shall be the same as those criteria in effect for academic year 1982-1983.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1983-1984

SEC. 4. (a) Except as provided in subsections (b) and (c), the family contribution schedule for academic year 1982-1983 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be the family contribution schedule for such Grants for the academic year 1983-1984.

(b) Each of the amounts allowed as an offset for family size in the family contribution schedule for academic year 1983-1984 shall be computed by increasing the comparable amount (for the same family size) in the family contribution schedule for academic year 1982-1983 by 7.3 per centum, and rounding the result to the nearest $100.

(c) For purposes of subsection (a), the family contribution schedule for academic year 1982-1983 shall be modified by the Secretary of Education for use for academic year 1983-1984—

(1) to reflect the most recent and relevant data, and

(2) to comply with section 482(b)(3) of the Higher Education Act of 1965 with respect to the treatment of payments under title 38 of the United States Code.

(d) The modified family contribution schedule under this section shall be published in the Federal Register not later than fifteen days after the date of enactment of this Act.

PELL GRANT FAMILY CONTRIBUTION SCHEDULE FOR ACADEMIC YEAR 1984-1985

SEC. 5. (a)(1) Except as provided in subsection (b), the family contribution schedule for academic year 1984-1985 for Pell Grants under subpart 1 of part A of title IV of the Higher Education Act of 1965 shall be established by the Secretary of Education, if the Secretary publishes a proposed schedule in the Federal Register by April 1, 1983, and submits it to the President of the Senate and the Speaker of the House of Representatives on the date of such publication.

(2) The proposed schedule shall be subject to public comment for thirty days. The Secretary shall publish and submit to the President of the Senate and the Speaker of the House of Representatives a final family contribution schedule not later than May 15, 1983, for the academic year 1984-1985.

(3) If the Secretary does not so publish and submit such schedule as required by paragraphs (1) and (2), the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution schedule for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(b) If the Secretary publishes and submits the final family contribution schedule as required by subsection (a) such schedule shall take effect unless, on or before July 1, 1983, either House of Congress adopts a resolution of disapproval of such schedule. In such event, the Secretary shall publish a new proposed family contribution schedule in the Federal Register and submit it to the President of the Senate and the Speaker of the House of Representatives not later than fifteen days after the date of the adoption of such resolution of disapproval. Such new schedule shall take into consideration such recommendations as may be made in either House of Congress in connection with such resolution. Such new schedule shall be effective (for academic year 1984-1985) on July 1, 1983, unless, prior to that date, either House of Congress adopts a resolution of disapproval of such new schedule. If the new schedule is also disapproved, the family contribution schedule in effect for academic year 1983-1984 shall be the family contribution for academic year 1984-1985, except as provided in subsections (c) and (d) of this section.

(c)(1) Each of the amounts allowed as an offset for family size in the family contribution schedule for academic year 1984-1985 shall be computed by increasing (or decreasing) the comparable amount (for the same family size) in the family contribution schedule for academic year 1983-1984 (as set by section 4(b) of this Act) by a percentage equal to the percentage increase (or decrease) in the Consumer Price Index for Wage Earners and Clerical Workers published by the Department of Labor, and rounding the result to the nearest $100.

(2) For purposes for paragraph (1) of this subsection, the percentage increase (or decrease) in the Consumer Price Index for Wage Earners and Clerical Workers is the change, expressed as a percent, between the arithmetic mean of such Consumer Price Index for the period from October 1, 1981, through September 30, 1982, and the arithmetic mean of such Index for the period from October 1, 1982, through September 30, 1983.

(3) The Secretary of Education shall publish in the Federal Register the changes in amounts allowed as an offset for family size as a consequence of the requirements of this subsection immediately after publication by the Secretary of Labor of the Consumer Price Index for September 1983.

(d) If, under subsection (a) or (b), the family contribution schedule for academic year 1983-1984 is required to be the family contribution schedule for academic year 1984-1985, the family contribution schedule for academic year 1983-1984 shall be modified by the Secretary of Education for use for academic year 1984-1985 to reflect the most recent and relevant data.

(e) The modified family contribution schedule under subsection (d) shall be published in the Federal Register not later than July 15, 1983.

LINEAR REDUCTION OF PELL GRANTS

SEC. 6. (a) Section 411(b)(3) of the Higher Education Act of 1965 is amended by striking out subparagraph (B) and inserting in lieu thereof the following:

"(B)(i) If, for any period of any fiscal year, the funds appropriated for payments under this subpart are insufficient to satisfy fully all entitlements, as calculated under subsection (a)(2)(B)(i), the amount paid with respect to each entitlement shall be—

"(I) the full amount for any student whose expected family contribution is $200 or less, or

"(II) a percentage of that entitlement, as determined in accordance with a schedule of reductions established by the Secretary for this purpose, for any student whose expected family contribution is more than $200.

"(ii) Any schedule established by the Secretary for the purpose of division (i) of this subparagraph shall contain a single linear reduction formula in which the percentage reduction increases uniformly as the entitlement decreases, and shall provide that if an entitlement is reduced to less than $100, no payment shall be made.".

(b) The amendment made by subsection (a) of this section shall be effective with respect to the computation of Pell Grants under section 411 of the Higher Education Act of 1965 for academic year 1983-1984 and for succeeding academic years.

VETERANS ELIGIBILITY FOR PELL GRANTS

SEC. 7. Notwithstanding any other provision of law, such sums as may be necessary not to exceed $30,000,000 of the amount appropriated by Public Law 97-257 for Pell Grants shall be available for the purpose of restoring eligibility for (and the amount of) Pell Grants to individuals adversely affected by the modification, pursuant to paragraphs (4) and (5) of section 124 of Public Law 97-92, of the family contribution schedule with respect to the treatment of payments under title 38, United States Code, to such individuals. The Secretary of Education shall take such steps as may be necessary to notify such individuals of such restored eligibility and to make appropriate allocations of the sum reserved by the preceding sentence.

The SPEAKER pro tempore. Is a second demanded?

Mr. ERLENBORN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. SIMON) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I will not take the 20 minutes on a bill that is important to this body and to the Nation. This bill was cosponsored by every member of the Subcommittee on Postsecondary Education. Let me pay tribute to my colleagues, the ranking member of the Committee on Education and Labor on the other side, my colleague from Illinois (Mr. ERLENBORN), and the ranking member of the full committee, the minority spokesman there, Mr. COLEMAN of Missouri.

□ 1500

This bill was passed out of committee unanimously. It is supported by the entire Committee on Education and Labor, and let me add that the chairman of the full committee (Mr. PERKINS) would be here to join in the discussion were he not involved right now in conference.

H.R. 7048 establishes a statutory family contribution schedule for the Pell grant program for the 1983-84 year and a mechanism for assuring that a family contribution schedule is in place for the 1984-85 school year if the Secretary of Education fails to timely publish and submit the 1984 schedule. The timetable has existed in law for many years. However, the Department, both HEW and the new Department of Education, have failed since the 1978-79 school year to submit the schedule on time.

Although the 1983-84 schedule was to be published in the Federal Register on April 1, 1982, for public comment and submitted to the Congress as a final rule for congressional review by July 1, 1982—the Department did not publish the proposed rule until August 2, 1982—more than 4 months late. This year's delay not only promises to delay the processing of Pell grant applications next year, but has already seriously interfered with the preparation and publication of the forms—private and Federal—which are usually available about October 1 of each year for use in the subsequent year's application process.

H.R. 7048 is the only way to assure that Pell grants for the 1983-84 school year will be processed on time and the forms for applying for all Federal aid and most State and institutional scholarship programs will be made available in a timely manner. Although the Department has expressed its objection to parts of the bill, the Secretary's regulatory authority has been preserved if he complies with the law and submits the 1984-85 family contribution schedule on time.

It is important that we move, and that schools and those who process the forms know what is happening. This simply assures that that can take place. It does not take away authority from the Secretary of Education if suggestions for modification are received on time. H.R. 7048 is our way of assuring that.

In addition, H.R. 7048 does the following:

It establishes an $1,800 maximum grant for 1983-84, the 1983 fiscal year, which is the same as the current law; it separates the needs analysis for families' income and assets for the Pell grant from the campus-based programs, the SEOG, work study, and NDSL; it substitutes a more progressive linear reduction system for the current ratable reduction system in the event that the Pell grants are not fully funded in the appropriations process; and it restores the eligibility of Vietnam-era and other veterans for Pell grants for fiscal year 1982-83 and succeeding years.

Here, Mr. Speaker, let me pay tribute to my colleague, the gentleman from Pennsylvania (Mr. EDGAR), and my colleague, the gentleman from Mississippi (Mr. MONTGOMERY), who has also expressed an interest in this problem. For those Members who may have received mail in their districts about veterans being knocked out of Pell grants or veteran's assistance, this will take care of that particular problem.

I want to impress upon my colleagues that there are no cost implications in the sense that we are going above what we have done already. There are cost implications in the sense that we are above what the administration has requested, but here, if the Appropriations Committee and the authorizing committee wish to restrict, they have that ability.

Mr. Speaker, I would finally underscore the importance of the House taking prompt action. The other body has already acted last Thursday on this. It is a matter of no small importance to the schools and to the students of this Nation. I hope we can move ahead and move rapidly, and I urge support for this bill.

● Mr. PERKINS. Mr. Speaker, I rise in support of H.R. 7048. This bill has two major purposes.

First, it makes available to veterans Pell grants which they have been denied for this current school year. This amendment is necessary because of a change in the law adopted last year dealing with the treatment of veterans' benefits in determining eligibility for Pell grants. Unfortunately that modification, which was proposed by the Reagan administration, has meant that hundreds and hundreds of veterans were abruptly denied Pell grants when they enrolled in school this September. Most of these veterans were denied these funds without any prior notice.

This amendment reserves up to $30 million for this purpose from the recently enacted supplemental appropriations of $140 million for the Pell grant program. This is the amount which the Department estimates would be the maximum needed to restore veterans to their eligibility for these grants. The remainder of this $140 million would be used to fully pay $1,800 maximum grants to eligible recipients.

The Committee on Education and Labor adopted this amendment due to our concerns about this problem and due to strong urgings from Congress-

man NEAL SMITH from Iowa and Congressman BOB EDGAR from Pennsylvania. Mr. SMITH was an ardent advocate of restoring these benefits to these veterans, and he deserves a good measure of credit for our committee's taking this action. Congressman EDGAR introduced a bill to correct this problem, and he vigorously argued before our committee on behalf of these veterans.

The second major purpose of this bill is to bring stability to the Pell grant program through requiring an automatic updating of the previous year's family contribution schedule for the next 2 academic years, 1983-84 and 1984-85, whenever the Department of Education fails to comply with the legislatively mandated time schedule for the submission of these income schedules.

This amendment is needed because the administration has dragged its feet for the past 2 years in complying with the time schedules for the Pell grant program. The effects of that laxness have been enormous uncertainty among students as to their receipt of financial student aid and tremendous administrative backlogs in campus student aid offices.

Recent studies have shown that these uncertainties about student aid have caused a number of students to shift from private universities to lower cost public colleges and universities. Some studies have even shown that students have not been able to enroll in higher education at all due to these financial uncertainties.

We must bring some order to Federal student aid programs, or we run the risk of harming the future social and economic well-being of our country through dampening our citizens' drive for greater education.

Mr. Speaker, for these reasons I urge the House to approve this bill, and I highly compliment Congressman PAUL SIMON, chairman of our Subcommittee on Postsecondary Education, for bringing this bill to the floor so promptly. I also congratulate TOM COLEMAN, the ranking minority representative on the subcommittee, and all of the other members of that subcommittee.●

Mr. ERLENBORN. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise to make certain that we have on the record the fact that the administration does strongly oppose this bill for several reasons. According to the administration's projections, this bill could cost, if fully funded, a total of $1.2 billion above the administration's fiscal year 1983 budget request.

I would point out on that score that I recognize the committee has brought forth a bill that comes within the congressional budget request. I think that is what we have to operate under, but since the administration is so strongly opposed to this bill, I think we ought to recognize that there is a threat of the administration's taking some kind of action in the way of a veto if it is not changed.

Mr. SIMON. Mr. Speaker, will the gentleman yield on that point?

Mr. WALKER. I am glad to yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I just wonder how recently the gentleman has talked with the administration on this. I have had some conversations with people high in the administration, and there is some indication that they may not oppose the legislation. I am not saying that they are not oppose to it, but they may not be in opposition and there is a possibility that the President may sign the bill.

Mr. WALKER. Mr. Speaker, I thank the gentleman for making that point. What I have is a paper that was prepared over the weekend. The gentleman may have more current information than I do.

I just thought it was well to raise these objections because the Members do not want to get caught in a bind because they were not even aware that the administration did have some problems with this legislation. From my personal standpoint, I do not know that I do have any serious problems with it.

The main issue that I have as a problem that the administration is raising is the fact that we are going to back down on the double funding question that supposedly was resolved in the reconciliation bill of 1981. The administration has expressed some concerns about that. I have some concerns about that because that does have a budget impact, not only in the current year but in the years ahead, if we reinstate that double funding procedure.

So, Mr. Speaker, in that case I think we might want to look at this bill closely. That one point does concern me. It would not cause me to vote against the bill as a whole, but I do raise it as a concern where I think the administration does have some legitimate fears.

Mr. SIMON. Mr. Speaker, if the gentleman will yield, I simply want to say that as of last Thursday I talked to someone very high in the administration and the indication was at that point that there seemed to be a reasonable possibility that the President would sign this bill.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Illinois (Mr. SIMON).

There was one other concern that the administration did raise about the bill, and that is that they do feel the Secretary's flexibility to modify family contribution schedules would be upset by this bill.

I understand why the committee is taking the action it is taking, but once again, I think the administration's views on this should be expressed.

Mr. Speaker, I just wanted to make the point that because of the administration's objections to the bill and because there is some controversy about a bill of this magnitude coming up on the Suspension Calendar, I do want to be assured that the Members of the House have an adequate opportunity to cast a vote on this question, and so I, therefore, will ask for a record vote on this particular bill.

Mr. Speaker, again I thank the gentleman from Illinois (Mr. ERLENBORN) for yielding this time to me.

Mr. ERLENBORN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 7048.

This legislation is the result of close cooperation between the majority and the Republican members of the Subcommittee on Postsecondary Education. In drafting H.R. 7048, the subcommittee sought to address the problem of an unsatisfactory Pell grant regulation issued over 3 months behind the schedule called for in the Higher Education Act, while making minimal legislative changes.

The regulation in question was issued by the Department of Education on August 2. It is unsatisfactory because it is designed to force a severe reduction in Pell grant appropriations through a series of significant program changes. These changes would, in my view, result in an unreasonable burden being placed on the families of low-income college students.

Many of these changes were contained in an administration bill which radically altered the data elements used in assessing the need for a Pell grant. This bill called for the elimination of consideration of items such as number of family members in postsecondary institutions and home equity. Other significant changes were contained in the proposed regulation.

Unfortunately, because the August 2 regulation was published 3 full months behind schedule, there was no time for the Subcommittee on Postsecondary Education to consider the administration's proposed legislative changes. Because of the effect these changes would have had on the Pell grant eligibility of thousands of low-income students extensive hearings were essential. Proper consideration of the administration bill, however, would have delayed the timetable for Pell grants for the 1983-84 academic year to the point of crisis. This crisis would have consisted of wholly unnecessary confusion resulting in many of this country's poorest college students

not knowing what, if any, Pell grant assistance would be available to them.

H.R. 7048 seeks to prevent such a crisis from arising. It is intended to override the August 2 regulation and set into law the parameters for the awarding of Pell grants for the 1983-84 academic year. These parameters are directly based on those in place for the 1982-83 academic year, just now underway.

In addition to correcting the immediate problem of establishing a family contribution schedule for the 1983-84 academic year, the bill also attempts to address the problem of delays in the 1984-85 schedule. H.R. 7048 establishes a mechanism which will assure the timely promulgation of the family contribution schedule for the 1984-85 academic year. In my view, enactment of this particular provision will help us avoid a repeat next year of the highly undesirable position we are now in of facing an unsatisfactory regulation with only a few legislative days remaining in the session.

In closing, I want to emphasize that H.R. 7048 will not increase 1983 appropriations for Pell grants. The bill is neutral with regards to appropriations and authorizations. In fact, because the legislation enacts new language for the distribution of Pell grants in the event of less than full appropriations, it actually will make it easier for Congress to adjust funding to account for limitations set in the budget process.

H.R. 7048 is a sound bill which is needed to assure the smooth operation of the Pell grant program. I urge passage of the bill.

● Mr. MONTGOMERY. Mr. Speaker, I want to compliment the gentleman from Illinois (Mr. SIMON), chairman of the Education and Labor Committee's Subcommittee on Postsecondary Education, for bringing this bill before the House.

As I understand it, among other things, the bill would direct the Education Department to set aside $30 million of the $140 million in supplemental appropriations for veterans. In addition, the bill would require that half rather than all of the student benefits be counted toward student income to establish eligibility.

Mr. Speaker, earlier this year joint hearings were held on this issue. BOB EDGAR, chairman of our Subcommittee on Education, Training and Employment, conducted hearings with Mr. SIMON and his subcommittee. It was generally agreed that a change should be made in determining veterans' eligibility for grant programs administered by the Office of Education. I compliment both the gentleman from Pennsylvania (Mr. EDGAR) and the gentleman from Illinois (Mr. SIMON) for working together to bring about a change I think will be in the best interest of our Nation's veterans.●

● Mr. DENARDIS. Mr. Speaker, I would like to express my support for H.R. 7048, a bill to establish a family contribution schedule (FCS) for the Pell grant program for academic year 1983-84 in law.

The family contribution schedule for the Pell grant program, normally promulgated through regulation by the Department of Education, is the basis for the formula by which Pell grants are made to needy students. The formula is an essential step in the process of obtaining sutdent assistance, and therefore, it is key that the formula be available at an early enough date to be of use to high school counselors, high school and college students, their parents, and the colleges and universities themselves.

The family contribution schedule for the next academic year was due to be issued on April 1, 1982. The Department of Education instead sent the family contribution schedule to Congress 4 months late in August. Clearly, the Department of Education failed to meet the statutory deadline in promulgating this proposed regulation. If we continue to follow the timetable which allows a comment period on the proposed regulation, then publication of the final regulation, and thena a congressionan review priod before the regulation becomes effective, we are delaying the process of determining eligibility for Pell grants even more. Already, the delay is being felt by high school and college counselors who are unable to give their students, who are trying to make their plans for the next school year, any firm idea of what the eligibility requirements might be. Another problem created by adherence to the regulation timetable would be that the Congress would not have any say on the final rule issued by the Department of Education because, most likely, the Congress will be in adjournment when that rule is published. If the Department continues to base its formula on a low funding level, as they have done so with the proposed family contribution schedule—all indications are that they will do so—then the final family contribution schedule would be unacceptable, too. However, if the Congress has adjourned, nothing could prevent the Department from implementing that schedule.

H.R. 7048 would remove the uncertainty associated with next year's family contribution schedule by setting it into law right now. The family contribution schedule for academic year 1984-85 would also be established if the Department of Education does not act according to the statute in a timely fashion. Very simply, H.R. 7048 would base next year's family contribution schedule on the one being used this year, updated for inflation by 7.3 percent. By setting into law the family contribution schedule for next year, we are sending a signal to students and colleges across the country which shows our concern for the Pell grant program and for the low-income student who benefits from this program.

The Pell grant program serves the neediest students who are pursuing a higher education. Last year, approximately 2.7 million students were served. The majority of those students had family incomes of $15,000 or below. By enacting H.R. 7048, we are helping these students who have the greatest need. If we fail to enact this bill, we are throwing into jeopardy their academic plans, hopes, and futures.●

● Mr. BIAGGI. Mr. Speaker, I rise to urge support of this legislation before us, H.R. 7048, which would establish a statutory contribution schedule for the Pell grant program for the next school year. As a consponsor of this legislation, I urge its immediate adoption.

The issue of delays in the processing of Pell grants is not new. Each and every year, colleges finaicial aid officials are plagued by the lack to timely publication of this schedule, which assists them in determining the amount of awards that eligible students will receive under this program. It takes into accoaunt both student and family assets, as well as student need. This year we are again faced with an inordinate delay in the publication of this proposed schedule—4 months after the deadline set forth in law and 33 days after the final rule was to be published. This is clearly unacceptable.

This bill, which enjoys bipartisan support in the Education and Labor Committee—where I am the ranking New York member—will put an end to this delay once and for all. It would provide a family contribution schedule for the 1983-84 academic year similar to this year's schedule. It would also provide for a backup provision which would give us a contribution schedule for the following 1984-85 year if again, the IYS publication is subject to inordinate and unnecessary delays by the Secretary. Finaly, it would grant long overdue peace of mind to both families and schools to allow for appropriate financial planning at a time when resources to pay for college expenses are being stretched to the brink.

I am also very supportinve of the provisions in H.R. 7048 which would reestablish veterans benefits being counted as in previous years. This year, veterans benefits are being counted as students aid, thus making a majority of veterans ineligible for Pell grants. Such a provision is a direct slap in the face of the hundreds of thousands of noble men and women who served their Nation in time of war and in time of peace. The benefits they receive are but a small repayment that we can make to them in

return for their service. To discount them from this program in such a mannger is foolhardy and ill-conceived at a time when the majority of veterans are seeking to retrain and educate themselves so that they can return to civilian life as productive members of society. This bill will assist in this effort by insuring that they remain eligible for this important education aid program.

This bill is a timely response to the pressing need to provide a minimal guarantee to families and schools that the Pell grant contribtuion schedule can and should be removed from partisan, political bickering. I urge my colleges to join us in supporting this proposal.●

Mr. ERLENBORN. Mr. Speaker, I have no further requests for time.

Mr. SIMON. Mr. Speaker, I have no further requests for time.

□ 1510

The SPEAKER pro tempore (Mr. BENNETT). The question is on the motion offered by the gentleman from Illinois (Mr. SIMON) that the House suspend the rules and pass the bill, H.R. 7048, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. SIMON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMUNITY SERVICES BLOCK GRANT ACT AMENDMENTS

Mr. SIMON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 7065) to amend the Community Services Block Grant Act to clarify the authority of the Secretary of Health and Human Services to designate community action agencies for certain community action programs administered by the Secretary for fiscal year 1982, and for other purposes.

The Clerk read as follows:

H.R. 7065

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 682(b)(4) of the Community Services Block Grant Act (42 U.S.C. 9911(b)(4)) is amended—

(1) by inserting "(A)" after "(4)";

(2) by inserting "or to entities designated under subparagraph (B)" before the period at the end thereof; and

(3) by adding at the end thereof the following new subparagraph:

"(B)(i) In any case in which a community action agency is denied refunding or is terminated for cause by the Secretary during fiscal year 1982 (regardless of whether such community action agency seeks review of such determination), the Secretary, with the concurrence of the chief executive officer of the State involved, may designate another public or private nonprofit agency to administer a community action program (as defined in section 210(a) of the Economic Opportunity Act of 1964, as in effect on September 30, 1981) in the same community.

"(ii) If, after the Secretary makes a designation under clause (i) and before the State involved begins operating programs under the block grant established in this subtitle, a final determination is made to restore funding to the community action agency which was terminated or whose refunding was denied, than the agency designated under clause (i) shall lose its designation (as of the effective date of such final determination).

"(iii) Notwithstanding the foregoing provisions of this section, if the Secretary makes a designation under clause (i), then the agency so designated shall be considered to be an eligible entity for purposes of this subtitle through fiscal year 1983.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Illinois (Mr. SIMON) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, I yield myself such time as I may consume.

H.R. 7065 is a bill which makes a technical clarification to the community services block grant. This bill will enable the Department of Health and Human Services to designate an interim community services agency in Sacramento, Calif., to replace the previous agency that was defunded by the Department earlier this year.

This bill is noncontroversial. It has the support of the majority and minority as well as the support of the Department of Health and Human Services. It will not adversely impact on any other community, and the bill will cost no additional money. It will simply allow Sacramento to receive its fiscal year 1982 community services funds.

Mr. Speaker, I urge my colleagues to support the passage of this technical amendment.

Mr. ERLENBORN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 7065.

This legislation makes a small technical clarification in the Community Services Block Grant Act enacted by Congress in reconciliation last year.

H.R. 7065 involves no new commitment of funds and was drafted in close cooperation with the Department of Health and Human Services. It will have absolutely no adverse effect on any other community action agency serving other communities.

I urge adoption of the bill.

Mr. SIMON. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. MATSUI).

I want to add my commendation to him for his vigorous pursuit of this problem which impacts on his community.

Mr. MATSUI. Mr. Speaker, first I would like to thank the gentleman from Illinois (Mr. SIMON) for carrying this matter to the floor today. I appreciate his efforts very much and, of course, the gentleman from North Carolina (Mr. ANDREWS) and the gentleman from Connecticut (Mr. RATCHFORD) were extremely helpful in committee. Again I would like to also thank the gentleman from Illinois (Mr. ERLENBORN) on the minority side of the aisle.

Mr. Speaker, the bill is a technical clarification of the Community Services Block Grant Act. It is entirely noncontroversial, will cost the Treasury no additional funds, and will simply enable the community of Sacramento, Calif., to collect its $758,000 in community services funds for fiscal year 1982.

Earlier this year, the Department of HHS, with the full concurrence of local elected officials, defunded Sacramento's community services agency. The Department then said, however, that it lacked authority under the Community Services Block Grant Act to designate an interim agency that could handle community service programs until the block grant took effect in fiscal year 1983. As a result, Sacramento was unable to receive its funds.

Despite repeated attempts to work out an administration solution to this problem with HHS, we have been forced to resort to a legislative remedy.

H.R. 7065 will clarify that the Secretary of HHS has authority to designate an interim community services agency when the previous agency has been defunded or terminated for cause.

The bill is noncontroversial. It has received the support of the Department of HHS, which has determined that the bill will not adversely impact any other communities.

It is important that the bill be passed into law before the end of the fiscal year. Otherwise, Sacramento will lose the money.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr.

SIMON) that the House suspend the rules and pass the bill, H.R. 7065.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SIMON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PUBLIC HEALTH SERVICE AMENDMENTS

Mr. WAXMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6458) to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6458

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

THE ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION AND THE NATIONAL INSTITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM, AND THE NATIONAL INSTITUTE ON DRUG ABUSE

SECTION 1. (a)(1) Title V of the Public Health Service Act is transferred to the end of the Public Health Service Act and redesignated as title XXI and sections 501 through 515 are redesignated as sections 2101 through 2115, respectively.

(2) Sections 217(c), 217(d), and 384 of the Public Health Service Act (42 U.S.C. 218 and 278) are each amended by striking out "501" and inserting in lieu thereof "2101".

(b)(1) The Public Health Service Act is amended by inserting after title IV a new title designated as follows:

"TITLE V—ADMINISTRATION AND COORDINATION OF THE NATIONAL INSTITUTE OF MENTAL HEALTH, THE NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM, AND THE NATIONAL INSTITUTE ON DRUG ABUSE

"PART A—ADMINISTRATION AND INSTITUTES".

(2) Section 201 of the Act of May 14, 1974 (42 U.S.C. 3511) is transferred to title V of the Public Health Service Act established by paragraph (1), redesignated as section 501, and amended—

(A) by striking out "of Health, Education, and Welfare" each place it occurs;

(B) in subsection (c), by striking out "of the Public Health Service Act"; and

(C) by adding at the end the following:

"(e) There shall be in the Administration an Assistant Administrator to whom the Administrator shall delegate the function of promoting the prevention research programs of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse and coordinating such programs between the institutes and between the institutes and other public and private entities.

"(f) The Administrator shall establish a process for the prompt and appropriate response to information provided the Administrator respecting (1) scientific fraud in connection with projects for which funds have been made available under this Act, and (2) incidences of violations of the rights of human subjects of research for which funds have been made available under this Act." The process shall include procedures for the receiving of reports of such information from recipients of funds under this Act and taking appropriate action with respect to such fraud and violations.".

(3) Section 101 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 is transferred to title V of the Public Health Service Act, inserted after the section 501 inserted by paragraph (2), redesignated as section 502, and amended—

(A) in subsection (a)—

(i) by striking out "this Act" the first time it occurs and inserting in lieu thereof "this section",

(ii) By striking out "assigned to the Secretary of Health and Human Services hereafter in this Act referred to as the Secretary')" and inserting in lieu thereof "related to alcohol abuse and alcoholism assigned to the Secretary", and

(iii) by striking out "of the Public Health Service Act",

(B) by amending subsection (d) to read as follows:

"(d) The Director of the institute shall establish in the Office of the Director an office to administer and promote the prevention research programs of the institute.", and

(C) by amending the section heading to read as follows:

"NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM"

(4) Section 501 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 502 inserted by paragraph (3) of this subsection, redesignation as section 503, and amended—

(A) in subsection (a)—

(i) by inserting SEC. 503." before "(a)",

(ii) by striking out "this title" and inserting in lieu thereof "this section",

(iii) by striking out "of the Secretary of Health and Human Services (hereinafter in this title referred to as the 'Secretary') with respect to drug abuse prevention functions" and inserting in lieu thereof "relating to drug abuse assigned to the Secretary by this Act", and

(iv) by striking out "of the Public Health Service Act",

(B) by striking out "(hereinafter in this title referred to as the 'Director')" in subsection (b)(1),

(C) by amending subsection (d) to read as follows:

"(d) The Director of the institute shall establish in the Office of the Director an office to administer and promote the prevention research programs of the institute.", and

(D) by striking out the section heading "§ 501. Establishment of Institute" and inserting in lieu thereof the following:

"NATIONAL INSTITUTE ON DRUG ABUSE"

(5) Subsection (a) of section 406 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to section 503 (as so redesignated), inserted after subsection (d), and redesignated as subsection (e).

(6) Section 455 of the Public Health Service Act is inserted in title V of the Public Health Service Act after the section 503 inserted by paragraph (4) of this subsection, redesignated as section 504, and amended—

(A) by striking out "designate an administrative unit in the Institute" in subsection (d) and inserting in lieu thereof "establish in the Office of the Director an office", and

(B) by striking out "and" at the end of paragraph (2) of such subsection, by striking out the period at the end of paragraph (3) and inserting in lieu thereof ", and", and by adding after paragraph (3) the following new paragraph:

"(4) administer and promote the prevention research programs of the Institute.".

(7) The following sections are inserted in title V of the Public Health Service Act after the section 504 inserted by paragraph (6):

"REPORTS ON ALCOHOLISM, ALCOHOL ABUSE, AND DRUG ABUSE

"SEC. 505. (a) The Secretary shall submit to Congress on or before the expiration of the one-year period beginning on the date of the enactment of this section and every three years thereafter a report—

"(1) containing current information on the health consequences of using alcoholic beverages,

"(2) containing a description of research findings made with respect to alcohol abuse and alcoholism, and

"(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

"(b) The Secretary shall submit to Congress on or before the expiration of the one-year period beginning on the date of enactment of this section and every three years thereafter a report—

"(1) describing the health consequences and extent of drug abuse in the United States;

"(2) describing research findings made with respect to drug abuse; and

"(3) containing such recommendations for legislation and administrative action as the Secretary may deem appropriate.

"PEER REVIEW

"SEC. 506. (a) The Secretary, after consultation with the Directors of the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse shall by regulation require appropriate technical and scientific peer review of biomedical and behavioral research and development grants, cooperative agreements, and contracts to be administered through the National Institute of Mental Health, the National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse.

"(b) Regulations promulgated under subsection (a) shall require that the review of grants, cooperative agreements, and contracts required by the regulations be conducted—

"(1) in a manner consistent with the system for scientific peer review applicable on the date of the enactment of the Health

Research Act of 1982 to grants under this Act for biomedical and behavioral research, and,

"(2) to the extent practical, by peer review groups performing such review on or before such date.

"(c) The members of any peer review group established under such regulations shall be individuals who by virtue of their training or experience are eminently qualified to perform the review functions of the group and not more than one-fourth of the members of any peer review group established under such regulations shall be officers or employees of the United States.

"(d) The Administrator of the Administration shall establish procedures for periodic, technical, and scientific peer review of research at the National Institute of Mental Health, and National Institute on Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. Such procedures shall require that—

"(1) the reviewing entity be provided a written description of the research to be reviewed; and

"(2) the reviewing entity provide the advisory council of the institute involved with such description and the results of the review by the entity.".

(8) The following heading is inserted in title V of the Public Health Service Act after the section 506 inserted by paragraph (6):

"PART B—RESEARCH

"Subpart 1—Alcohol Abuse and Alcoholism"

"(9) Sections 501, 503, and 504 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the subpart 1 of part B of title V of the Public Health Service Act established by paragraph (7), redesignated as sections 510, 511, and 512, respectively, and amended as follows:

(A) Section 510 (as so redesignated) is amended—

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism (hereinafter in this subpart referred to as the 'Institute')",

(ii) by striking out "and such Council shall give" in subsection (b)(3) and inserting in lieu thereof "giving", and

(iii) by amending the section heading to read as follows:

"ALCOHOL ABUSE AND ALCOHOLISM RESEARCH".

(B) Section 511 (as so redesignated) is amended—

(i) by striking out the last sentence of subsection (a),

(ii) by striking out the second sentence of subsection (b),

(iii) by striking out "of the Public Health Service Act (42 U.S.C. 292a)" in subsection (b), and

(iv) by striking out subsection (c).

(C) Section 512 (as so redesignated) is amended—

(i) by striking out "this title" and inserting in lieu thereof "this subpart",

(ii) by inserting before the period at the end of the first sentence a comma and the following: "and $33,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, and $75,000,000 for the fiscal year ending September 30, 1985", and

(iii) by striking out "section 503" and inserting in lieu thereof "section 511".

(10) The following heading is inserted in title V of the Public Health Service Act after the section 512 inserted by paragraph (8):

"Subpart 2—Drug Abuse Research".

(11) Section 503 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to the subpart 2 of part B of title V established by paragraph (10), redesignated as section 515, and amended—

(A) by striking out "The Director" the first time it occurs in subsection (a) and inserting in lieu thereof "The Director of the National Institute of Drug Abuse",

(B) by inserting before the period in subsection (c) a comma and the following: "$47,000,000 for the fiscal year ending September 30, 1983, $53,000,000 for the fiscal year ending September 30, 1984, and $59,000,000 for the fiscal year ending September 30, 1985",

(C) by striking out the section heading and inserting in lieu thereof the following:

"DRUG ABUSE RESEARCH",

and

(D) by inserting before "(a)" in subsection (a) the following: "SEC. 515.".

(12) The following heading is inserted in title V of the Public Health Service Act after the section 515 inserted by paragraph (10):

"PART C—MISCELLANEOUS PROVISIONS RELATING TO ALCOHOL ABUSE AND ALCOHOLISM AND DRUG ABUSE".

(13) Sections 301, 201, 321, and 333 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are transferred to the part C of title V established by paragraph (12), redesignated as sections 501, 521, 522, and 523, respectively, and amended as follows:

(A) Section 520 (as so redesignated) is amended—

(i) by striking out "the Institute" in subsection (a) and inserting in lieu thereof "the National Institute of Alcohol Abuse and Alcoholism",

(ii) by striking out "section 321" in subsection (a)(4) and inserting in lieu thereof "section 522", and

(iii) by striking out "under this Act and under the Drug Abuse Prevention, Treatment, and Rehabilitation Act" and inserting in lieu thereof "under this title".

(B) Section 521 (as so redesignated) is amended—

(i) by striking out "section 413(b) of the Drug Abuse Prevention, Treatment, and Rehabilitation Act" in subsection (b)(4) and inserting in lieu thereof "section 525",

(ii) by striking out "title" in subsection (d) and inserting in lieu thereof "section", and

(iii) by striking out subsection (e).

(C) Section 522 (as so redesignated) is amended by striking out "of the Public Health Service Act" in subsection (a).

(14) Section 502 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 523 inserted by paragraph (12), redesignated as section 524, and amended—

(A) by striking out "The Director" in subsection (a) and inserting in lieu thereof "The Director of the National Institute on Drug Abuse",

(B) By striking out ", to promote the purposes of this Act," in subsection (b)(2),

(C) by striking out "section 407" in subsection (d) and inserting in lieu thereof "section 526",

(D) by striking out "under this Act and under the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (d) and inserting in lieu thereof "under this title",

(E) by striking out the section heading and inserting in lieu thereof:

"TECHNICAL ASSISTANCE TO STATE AND LOCAL AGENCIES",

and

(F) by inserting before "(a)" in subsection (a) the following: "SEC. 524.".

(15)(A) Section 413 of the Drug Abuse and Prevention, Treatment, and Rehabilitation Act is transferred to title V of the Public Health Service Act, inserted after the section 524 inserted by paragraph (14), redesignated as section 525, and amended—

(i) by striking out the section heading and inserting in lieu thereof:

"DRUG ABUSE AMONG GOVERNMENT AND OTHER EMPLOYEES";

(ii) by inserting before "(a)" the following: "SEC. 525."; and

(iii) by striking out "section 201(b) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" in subsection (b)(4) and inserting in lieu thereof "section 521".

(B) Sections 407 and 408 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act are transferred to title V of the Public Health Service Act, inserted after the section 525 inserted by subparagraph (A), redesignated as sections 526 and 527 and amended as follows:

(i) Section 526 (as so designated) is amended—

(I) by striking out the section heading and inserting in lieu thereof:

"ADMISSION TO DRUG ABUSERS TO PRIVATE AND PUBLIC HOSPITALS";

and

(II) by inserting before "(a)" in subsection (a) the following: "SEC. 526.".

(ii) Section 527 (as so redesignated) is amended—

(I) by striking out the section heading and inserting in lieu thereof:

"CONFIDENTIALITY OF PATIENT RECORDS"

(II) by inserting before "(a)" in subsection (a) the following: "SEC. 527."; and

(III) by striking out "of Health and Human Services" in subsection (g).

(c)(1) Sections 102, 103, 311, 312, and 502 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 are repealed.

(2) Sections 405, 410, 411, and 504 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act are repealed.

(d) Title V of the Medical Facilities Construction and Modernization Amendments of 1970 (Public Law 91-296) is repealed.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. WAXMAN) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of H.R. 6458 is to extend for 3 fiscal years the authorization of appropriations for research activities sponsored by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA). In addition, the legislation contains a

technical revision of Federal alcohol, drug abuse and mental health research authorities to consolidate reporting requirements and to centralize these authorities within title V of the Public Health Service Act.

Mr. Speaker, the abuse of alcohol and drugs is one of the most grave public health problems facing our country today. It afflicts all levels of society. It diminishes the Nation's productivity with crippling blows to the work force. It increases health care costs by increasing demand for health care services.

The social and economic costs of alcohol and drug abuse have been estimated to exceed $60 billion annually. As many as 13 million Americans can be classified as problem drinkers and millions more experiment with or abuse licit and illicit drugs.

For more than a decade the Federal Government has supported alcohol and drug abuse treatment programs through Federal formula and project grants. With passage of the Omnibus Budget Reconciliation Act of 1981, these programs were consolidated with programs for mental health into the Alcohol, Drug Abuse and Mental Health Services block grant. While support for these vital programs must continue, the Federal Government's role in research emerges as a particularly important responsibility.

If we are to lessen the effects and reduce the incidence of alcohol and other drug abuse, the Nation's commitment to a strong research agenda is critical. We continue to need greater understanding of the causes of addiction and through support of carefully controlled services demonstrations, the most effective forms of treatment and most productive strategies for prevention. The sponsorship of prevention-oriented research is particularly important and the committee's report has instructed the agencies to expand their activities in this area.

Mr. Speaker, H.R. 6458 was reported from the Energy and Commerce Committee by unanimous voice vote. I urge each Member's support.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to offer my support for this legislation and urge its adoption by my colleagues.

As pointed out by the gentleman from California, we had several days of hearings on these and related issues and after a rather lengthy drafting process we favorably reported this bill.

Members will want to know that although some components of the reauthorizing legislation for the National Institutes of Health are controversial, those contained in H.R. 6458 are not.

As implied by the short title to the bill, H.R. 6458 extends authorities for and provides consolidation of research in alcohol and drug abuse and mental health.

Over the next 3 fiscal years the bill authorizes a total of $158 million for alcohol abuse research conducted by the National Institute of Alcohol Abuse and Alcoholism. For the same period $159 million is authorized for drug abuse research engaged in by the National Institute of Drug Abuse.

Further, the bill provides for establishment of appropriate protocols for technical and scientific peer review of those contracts awarded by the three institutes involved, formal procedures for review of purported scientific misconduct by grantees, and creation of offices focusing on prevention activities within each of the Institutes.

In sum, I believe this is balanced, reasoned legislation and I urge its support.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I would be happy to yield to my colleague from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

It is my understanding that the administration has some problems with this bill, particularly in the levels of funding; is that correct?

Mr. MADIGAN. I believe that is the only problem they have, yes.

Mr. WALKER. It would be my understanding that one of the problems they have is the fact that this is being brought up under suspension of the rules so those funding levels cannot be reduced by amendment but that the funding levels with regard to alcohol and drug abuse research activities are in one case 30 percent and in another case 66 percent higher than the President's budget for 1983.

Is that the gentleman's understanding?

Mr. MADIGAN. I think it would be correct to say that those percentages are higher than the original request of the President. It would not be correct to say that they are higher by those percentages than the budget adopted by the Congress as a whole.

I believe the position of the administration is that the language they would prefer, rather than specific numbers, would be that the bill simply said, "such sums as may be necessary."

But I would point out to the gentleman, as he well understands, that that could be an amount of money even more than what is included in the bill at this point.

I would further point out to the gentleman we are talking here about the authorizing levels and not the amounts to be actually appropriated by the appropriations process.

Finally, I would point out to the gentleman that if the authorizing levels were less than this and in a supplemental appropriation it would be determined by the administration, as has sometimes been the case in the past, that too little money had been devoted to drug or alcohol abuse problems and if they then were in the position of saying we want to devote more money to this, the Appropriations Committee could not do that without the passage of another authorizing bill, something that has been contemplated by the gentleman from Illinois but apparently not by the Department.

Mr. WALKER. If the gentleman will yield further for a question, can the gentleman tell me how the funding within the authorizing matches with the congressionally passed budget?

Mr. MADIGAN. No, I cannot, except to tell the gentleman that the percentages are considerably lower than those referred to by the gentleman from Pennsylvania.

Although I have asked for that information it is not here on the floor yet.

Mr. WALKER. If the gentleman would yield further, are we taking about authorizing levels which exceed the budget request?

Mr. MADIGAN. It is my understanding that we are not. We are talking about authorizing levels that exceed the original request of the President for fiscal year 1983 but we are not talking about authorizing levels, if this gentleman's understanding is correct, that exceed those levels actually contemplated in the budget resolution adopted by the Congress as a whole.

□ 1520

Mr. WALKER. If the gentleman will yield further, this is within the limits of the budget adopted by this Congress; is that correct?

Mr. MADIGAN. That is my understanding. And, as I mentioned a moment ago, I have asked for that specific information, when I saw the one-pager here from the conference, but that information has not yet come to the floor.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding to me.

We have the President's 1983 figures in this proposal for authorization; and, therefore, I do agree with the comments of my colleague that it is within the budget resolution adopted by this House for 1983.

We have not received any specific dollar amount from the administration for 1984 and 1985. They requested that we authorize such sums as may be necessary. What we did was set a specific figure which, of course, as the gentleman knows, is a ceiling on the amount that can be spent. It is then up to the Appropriations Committee to decide how much within that amount will in fact be appropriated.

Mr. WALKER. If the gentleman will yield further, the real question here is

the 1984-85 outyears, as I understand it, far more so than the 1983 authorization; is that correct?

Mr. WAXMAN. If the gentleman will yield to me to respond to that question, that is correct.

Mr. MADIGAN. Except, if I may reclaim my time, the statement contained on the one-pager from the conference with regard to the administration's view obviously must be in error or the information supplied by the administration must be in error. If they state we are 30 percent and 66 percent higher respectively in each of the 2 outyears but never provided as with figures for those outyears, then how can the statement be made that we are higher if the figures for which the comparison is being made have never been supplied, if the gentleman understands my point.

● Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 6458, to amend the Public Health Service Act and related laws. This bill consolidates the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse. It also introduces a slight increase in the budget of two of the mentioned institutions: The National Institute on Drug Abuse and the National Institute of Alcohol Abuse and Alcoholism, and sets specific figures for their respective fiscal years 1984 and 1985.

The Alcohol, Drug Abuse and Mental Health Administration is an agency under a major operating division of the Department of Health and Human Services; it was established in 1974. The agency is an umbrella organization covering three major institutes: the National Institute of Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse and the National Institute of Mental Health.

The National Institute of Alcohol Abuse and Alcoholism was established in 1970 as part of the Institute of Mental Health. In 1973, the NIAAA became a separate institute by an amendment of the act. The institute has been responsible for Federal efforts to combat the harmful use of alcohol, and up to 1981 it did so through grants and contracts to States and nonprofit public and private organizations, and through work in three areas: research, services (prevention and treatment), and clinical training. After the drug alcohol abuse, mental health block grant to States in fiscal year 1981 (Public Law 97-35) the mechanism by which local programs were funded has been modified. The funds now go directly to the respective States and are not handled by the institute. However, it continues to provide national leadership in research (as a repository of data, for example), technical assistance to States and to anyone interested in the area when requested.

The National Institute on Drug Abuse was authorized in 1972, and actually came into existence in 1974-75 as part of the Health Education and Welfare Department. Its primary role, up to 1981, had been in drug abuse prevention, rehabilitation, research, treatment, and training. In the last 10 years the institute has been involved in several areas, working closely with States through grants—which went to local programs for training and prevention—and generating drug abuse research. Due to last year's legislation in Congress the institute is now more research oriented, and no funding will be used for drug abuse treatment, or training. However, the increase in funding is needed for research, dissemination of knowledge to the field and the public, and to assist States and localities when asked.

The National Institute of Mental Health was mandated by Congress to promote the mental health of the Nation, and President Truman signed the National Mental Health Act in 1946. The Institute was to work on three areas: research, training, and services. As in the other cases, the field of action of this Institute was limited last year to research performed by the Institute itself, and, through grants and awards, by other institutions.

Each of these institutes now exist on separate pieces of legislation. The NIDA exists under the Drug Abuse Prevention Treatment and Rehabilitation Act; the NIMH exists under the Public Health Service Act; and the NIAAA exists under the Comprehensive Alcohol Abuse and Prevention Treatment and Rehabilitation Act. This piece of legislation takes the authorities left over—basically research—and moves them to the Public Health Service Act. In short, it organizes into a more coherent body of legislation all the Institutes' authorities dealing with the same subject matter.

The work and activities developed by these institutes, are of great importance to Puerto Rico since we suffer of a critical problem of alcohol consumption and also of a high incidence of mental health problems.

I urge my colleagues to vote for H.R. 6458 and thank them for their support.●

Mr. MADIGAN. Mr. Speaker, I have no further requests for time.

Mr. WAXMAN. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. WAXMAN) that the House suspend the rules and pass the bill, H.R. 6458, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CONGRESSIONAL REPORTS ELIMINATION ACT OF 1982

Mr. BROOKS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6005) to discontinue or amend certain requirements for agency reports to Congress, as amended.

The Clerk read as follows:

H.R. 6005

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Congressional Reports Elimination Act of 1982".

TITLE I—ELIMINATIONS

REPORTS BY MORE THAN ONE AGENCY

SEC. 101. (a) Section 616(b) of the Act of December 15, 1980, entitled "An Act making appropriations for agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1981, and for other purposes" (31 U.S.C. 28(b); 94 Stat. 3117), is repealed.

(b) Section 126(b) of the Military Construction Act of 1981 (31 U.S.C. 28, note; 94 Stat. 1869) is repealed.

REPORT BY THE EXECUTIVE OFFICE OF THE PRESIDENT

SEC. 102. Section 6002(g) of the Solid Waste Disposal Act (42 U.S.C. 6962(g)) is amended to strike everything after the word "resources" and to insert in lieu thereof a period.

REPORTS BY THE DEPARTMENT OF AGRICULTURE

SEC. 103. (a) Section 1303(d) of the Food and Agriculture Act of 1977 (7 U.S.C. 2011, note; 91 Stat. 980) is repealed.

(b) Paragraph (a) of the Act of March 4, 1913, entitled "An Act making appropriations for the Department of Agriculture for the fiscal year ending June thirtieth, nineteen hundred and fourteen" (16 U.S.C. 502; 37 Stat. 843), is amended by striking out the second sentence.

(c) Section 9 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590i; 50 Stat. 329) is amended by striking out the third sentence.

REPORTS BY THE DEPARTMENT OF DEFENSE

SEC. 104. (a) Section 1081 of title 10, United States Code, is amended by striking out the second sentence.

(b) Section 2677(c) of title 10, United States Code, is repealed.

(c) Section 2110(b) of title 10, United States Code, is amended by striking out "The Secretary of each military department shall report to Congress in April of each year on the progress of the flight instruction program.".

REPORT BY THE DEPARTMENT OF EDUCATION

SEC. 105. Section 112(b)(3) of the Rehabilitation Act of 1973 (29 U.S.C. 732(b)(3); 87 Stat. 372) is repealed.

REPORTS UNDER THE DEPARTMENT OF ENERGY

SEC. 106. (a) Section 203 of the Clean Air Act Amendments of 1977 (42 U.S.C. 7551) is amended by—

(1) striking out subsection (b); and

(2) striking out the subsection designator "(a)".

(b) The Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976 is amended by striking out the last sentence of section 7(e)(1) (15 U.S.C. 2506(e)(1)).

(c) Section 4(c)(8) of the Methane Transportation Research, Development, and Demonstration Act of 1980 (15 U.S.C. 3808(c)) is amended by striking out "and report to the Congress on".

(d) Section 742 of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8452) is repealed.

REPORTS BY THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

SEC. 107. (a) Section 1120(b) of the Social Security Act (42 U.S.C. 1320) is amended by striking out subsection (b) and by striking out "(a)".

(b) Section 329(f)(5) of the Public Health Service Act (42 U.S.C. 254b(f)(5)) is amended by striking out the last sentence.

REPORTS BY THE DEPARTMENT OF THE INTERIOR

SEC. 108. (a) Section 4 of the joint resolution of August 14, 1976, entitled "Joint resolution providing for Federal participation in preserving the Tule Elk population in California" (16 U.S.C. 673g; 90 Stat. 1189), is amended by striking out the final sentence thereof.

(b) Section 3 of the Act of August 21, 1951 (25 U.S.C. 673; 65 Stat. 195) is repealed.

(c) The Tribally Controlled Community College Assistance Act of 1978 is amended by striking out subsection (e) of section 106 and the last sentence of subsection (c)(2) of section 107 (25 U.S.C. 1807(e) and 1808(c)(2); 92 Stat. 1327).

(d) Section 208 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 458d; 88 Stat. 2216) is amended by striking out the last sentence.

REPORTS BY THE DEPARTMENT OF JUSTICE

SEC. 109. (a) Section 4352(b) of title 18, United States Code (88 Stat. 1141), is repealed.

(b) Section 203 of the Truth in Lending Act (18 U.S.C. 891, note; 82 Stat. 162) is repealed.

REPORTS BY THE DEPARTMENT OF LABOR

SEC. 110. (a) Section 6(f) of Public Law 90-83 (29 U.S.C. 606; 81 Stat. 221) is repealed.

TITLE II—MODIFICATIONS

REPORTS BY THE EXECUTIVE OFFICE OF THE PRESIDENT

SEC. 201. (a) Section 552a(e)(4) of title 5, United States Code, is amended by striking out "at least annually" and inserting in lieu thereof "upon establishment or revision".

(b) Subsection (p) of section 552a of title 5, United States Code, is amended to read as follows:

"(p) ANNUAL REPORT.—The President shall annually submit to the Speaker of the House of Representatives and the President pro tempore of the Senate a report—

"(1) describing the actions of the Director of the Office of Management and Budget pursuant to section 6 of the Privacy Act of 1974 during the preceding year;

"(2) describing the exercise of individual rights of access and amendment under this section during such year;

"(3) identifying changes in or additions to systems of records;

"(4) containing such other information concerning administration of this section as may be necessary or useful to the Congress in reviewing the effectiveness of this section in carrying out the purposes of the Privacy Act of 1974.".

(c) Effective July 1, 1983, section 6(c) of the Federal Advisory Committee Act (5 U.S.C. App.) is amended by striking out the first sentence and inserting in lieu thereof the following: "The President shall, not later than December 31 of each year, make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding fiscal year.".

REPORTS BY THE DEPARTMENT OF COMMERCE

SEC. 202. (a) Section 302(d) of the Marine Protection, Research, and Sanctuaries Act of 1972 (16 U.S.C. 1432(d)) is amended to read as follows:

"(d) The Secretary shall submit a biennial report to the Congress, on or before March 1 of every other year beginning in 1984, setting forth a comprehensive review of his actions during the previous two fiscal years undertaken pursuant to the authority of this section, together with appropriate recommendation for legislation considered necessary for the designation and protection of marine sanctuaries.".

(b) Section 7 of the National Climate Program Act of 1978 (15 U.S.C. 2906) is amended by striking out "not later than January 30 of each year" and inserting in lieu thereof "not later than March 31 of each year".

(c) Section 4(a) of the National Ocean Pollution Research and Development and Monitoring Planning Act of 1978 (33 U.S.C. 1703(a)) is amended by striking out "and a revision of the plan shall be prepared and so submitted by September 15 of each odd-numbered year occurring after 1979" and inserting in lieu thereof "and a revision of the plan shall be prepared and so submitted by September 15 every three years after 1979".

(d) Section 8 of the Fair Packaging and Labeling Act (15 U.S.C. 1457) is amended by striking out the following: "or to participate in the development of voluntary product standards with respect to any consumer commodity under procedures referred to in section 5(d) of this Act,".

REPORTS BY THE DEPARTMENT OF DEFENSE

SEC. 203. (a)(1) Section 808(a) of the Department of Defense Appropriation Authorization Act, 1978 (50 U.S.C. 1520(a); 91 Stat. 334) is amended by striking out clause (1) and by striking out "(2)".

(2) Section 409(a) of the Act of November 19, 1969, (50 U.S.C. 1511(a); 83 Stat. 209), is amended by adding the following sentence at the end thereof: "The report shall include a full accounting of all experiments and studies conducted by the Department of Defense in the preceding year, whether directly or under contract, which involve the use of human subjects for the testing of chemical or biological agents.".

(b) Section 201 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-11; 69 Stat. 585) is amended by striking out "odd-numbered years" and inserting in place thereof "the first odd-numbered year following the year in which the Presidential election is held".

(c) Section 2455(b) of title 10, United States Code, is amended by striking out "yearly period ending with the preceding December 31" and inserting "preceding fiscal year".

REPORT BY THE DEPARTMENT OF EDUCATION

SEC. 204. Section 605(b) of the Higher Education Act of 1965 (20 U.S.C. 1125(b); 79 Stat. 1264) is amended by striking out "which shall include an index and analysis" and inserting in lieu thereof "listing".

REPORT BY THE DEPARTMENT OF ENERGY

SEC. 205. (a) Section 208(c) of the Department of Energy Organization Act (42 U.S.C. 7138(c); 91 Stat. 576) is amended to read as follows:

"(c)(1) The Inspector General shall, not later than May 31 and November 30 of each year, submit to the Secretary and the Congress semiannual reports summarizing the activities of the Office during the immediately preceding six-month periods ending March 31 and September 30. Such reports shall include, but need not be limited to—

"(A) a description of significant problems, abuses, and deficiencies relating to the administration of programs and operations of the Department disclosed by such activities during the reporting period;

"(B) a description of the recommendations for corrective action made by the Office during the reporting period with respect to significant problems, abuses, or deficiencies identified pursuant to subparagraph (A);

"(C) an identification of each significant recommendation described in previous re-

ports under this subsection on which corrective action has not been completed;

"(D) a summary of matters referred to prosecutive authorities and the prosecutions and convictions which have resulted; and

"(E) information concerning the numbers and types of audit reports completed by the Office during the reporting period.

"(2) Within sixty days of the transmission of each semiannual report to the Congress, the Secretary shall make copies of such report available to the public upon request and at a reasonable cost.".

(b) Section 208(d) of such Act is amended by striking out "thirty days" and inserting in lieu thereof "seven days".

REPORTS BY THE DEPARTMENT OF HEALTH AND HUMAN SERVICES

SEC. 206. (a) Section 336A of the Public Health Service Act (42 U.S.C. 254i) is amended in the matter preceding paragraph (1) by striking out "on May 1 of each year".

(b) Section 8 of the Fair Packaging and Labeling Act (15 U.S.C. 1457) is amended by striking out the last two sentences and inserting in lieu thereof the following: "All agencies except the Department of Health and Human Services and the Federal Trade Commission shall submit their reports in January of each year. The Department of Health and Human Services shall include this report in its annual report to Congress on activities under the Federal Food, Drug, and Cosmetic Act, and the Federal Trade Commission shall include this report in the Commission's annual report to Congress.".

(c) Subsections (a) and (b) of section 204 of Public Law 94-505 (42 U.S.C. 3524 (a), (b)) are amended to read as follows:

"SEC. 204. (a) The Inspector General shall, not later than May 31 and November 30 of each year, submit to the Secretary and the Congress semiannual reports summarizing the activities of the Office during the immediately preceding six-month periods ending March 31 and September 30. Such reports shall include, but need not be limited to —

"(1) a description of significant problems, abuses, and deficiencies relating to the administration of programs and operations of the Department disclosed by such activities during the reporting period;

"(2) a description of the recommendations for corrective action made by the Office during the reporting period with respect to significant problems, abuses, or deficiencies identified pursuant to paragraph (1);

"(3) an identification of each significant recommendation described in previous reports under this section on which corrective action has not been completed;

"(4) a summary of matters referred to prosecutive authorities and the prosecutions and convictions which have resulted;

"(5) a summary of each report made to the Secretary under section 205(b)(2) during the reporting period; and

"(6) information concerning the numbers and types of audit reports completed by the Office during the reporting period.

"(b) Within sixty days of the transmission of each semiannual report to the Congress, the Secretary shall make copies of such report available to the public upon request and at a reasonable cost.".

REPORTS BY THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SEC. 207. (a) Section 817 of the Housing Act of 1954 (12 U.S.C. 1701p; 68 Stat. 648) is amended by striking out ", and shall also contain" and all that follows through "that section".

(b) Section 311(4) of the Energy Conservation and Production Act (42 U.S.C. 6840(4); 90 Stat. 1125) is amended by inserting before the period at the end thereof the following: ", except that, with respect to reports transmitted to the Congress after August 14, 1981, such reports shall be transmitted biennially".

REPORTS BY THE DEPARTMENT OF THE INTERIOR

SEC. 208. (a)(1) The second proviso of the Act of July 1, 1932 (25 U.S.C. 386a; 47 Stat. 564), is amended to read as follows: *"Provided further,* That the Secretary shall report such adjustments and eliminations to the Congress not later than sixty calendar days following the end of the fiscal year in which they are made:".
